

A **visual simulation** of the Proposed Project from Key Viewpoint 4 on eastbound SR-60, just east of the Proposed Project's convergence on SR-60. This view is to the east along the route as it parallels the highway on the north side and then spans the highway to the south side. The proposed subtransmission structures that would be prominently visible within the primary cone of vision of both eastbound and westbound travelers on SR-60, particularly when approaching the span of the highway.
