EL CASCO PROJECT PROTEST

As residents of Sun Lakes retirement community, located in the City of Banning, California, we are signing this protest against the El Casco System Project (Project), a project proposed by Southern California Edison (SCE), California Public Utilities Commission (CPUC) Application No. A07-02-022. We contend that the Proponent's Environmental Assessment prepared by SCE does not mitigate the potential environmental impacts, i.e., to result in final conditions becoming less severe or intense than current ones. We request that the CPUC require that an Environmental Impact Report (EIR) be prepared for the portion of the Project where 13 miles of existing single-circuit 115 kV lines (three lines) are replaced with new, higher capacity double-circuit 115 kV lines (six larger lines) and taller poles. We believe that the results of the EIR will require SCE to bury the proposed new lines beneath ground level.

EL CASCO PROJECT PROTEST

As residents of Sun Lakes retirement community, located in the City of Banning, California, we are signing this protest against the El Casco System Project (Project), a project proposed by Southern California Edison (SCE), California Public Utilities Commission (CPUC) Application No. A07-02-022. We contend that the Proponent's Environmental Assessment prepared by SCE does not mitigate the potential environmental impacts, i.e., to result in final conditions becoming less severe or intense than current ones. We request that the CPUC require that an Environmental Impact Report (EIR) be prepared for the portion of the Project where 13 miles of existing single-circuit 115 kV lines (three lines) are replaced with new, higher capacity double-circuit 115 kV lines (six larger lines) and taller poles. We believe that the results of the EIR will require SCE to bury the proposed new lines beneath ground level.
