To Whom it may Concern:

I am requesting a change of plans on the PG&E Proposed Jefferson-Martin 230 kV Transmission Line Project.

As a resident of San Mateo Highlands, I am strongly opposed to this project as proposed. I believe it will endanger the health and safety of my self and my family, and turn this quite small neighbour hood to an unsafe, industrialize looking community.

The Noise from high voltage and size of towers will be a sore in the eyes, ears and the soul of our community.

I urge you to consider undergrounding option for both proposed 230 kV line and existing 60 kV line. The benefit of undergrounding outweighs the costs by far.

*Please print. Your name, address, and comments become public information and may be released to interested parties if requested.

Please either deposit this sheet at the sign-in table before you leave today, or fold, stamp, and mail. Insert additional sheets if needed. Comments must be received by February 27, 2003. Comments may also be faxed to the project hotline at (650) 240-1720 or emailed to jeffmartin@aspenerg.com.

The proposed location of the power lines is too close to the homes in the San Mateo Highlands. This not creates an eyesore to the homes on Lexington and the Highlands in general but also a potential health hazard to those living near the lines.

If the powerlines are really needed than locate them West of the 280 Freeway.

Thank you for reading this letter explaining my position.

Raymond Weiss

We strongly oppose the P.D.E. Power Tower Project.

There are health issues to be considered.

The necessity of such an 'invasive project' the impact on aesthetics noise & views. The loud noise of construction is ecologically damaging.

Property values will be affected!

'Please find an alternative to this project' before you destroy our beautiful hillsides & neighborhood we love!

Sincerely,
Diane & Alex Gallegos

If indeed San Francisco needs this additional power why not improve the San Francisco power plants or plants.

If PUC insists that the power must come from the peninsula, then reasonable compromises should be reached.

Lines that would be underground/overground route if not completely underground.

There is know answer to the health issue it raises.

It would be a very negative factor in property values.
