Proposed Jefferson-Martin 230 KV Transmission Line Project

We would like to share our deep concerns about the proposed PG&E power tower project.

We have lived in the San Mateo Highlands community for over twenty-eight years.

It is a beautiful and serene area. It has taken us over twenty five years to grow trees tall enough to partially block the existing tower directly behind our home.

We have always had concerns about the health issues from the Electric and Magnetic Field (EMF) emission so close to family homes. This plan would increase the unhealthy exposure.

We have raised our five children in this house and are now raising our two young grandchildren in our

home. Recent studies show a potential health risk for young children. Making our neighborhoods

a safe environment is a responsibility that we all share and should not be taken lightly.

We respectfully disagree with this proposed project and feel it is irresponsible.

This plan is archaic and makes you wonder where is the end?

We have entered into a time of heightened anxiety at home and work, in our cities and nation and

around the world. PG&E should be committed to improving the aesthetics of the neighborhoods

and not infringe unnecessarily on the personal freedoms we all value.

Hopefully you will be engaged in planning for the longer term and acting in the spirit of a time-honored medical dictum: "an ounce of prevention is worth a pound of cure".

The cost to taxpayers in San Francisco should reflect the real cost of the electricity. The cost of bringing

electricity to San Francisco should not be at the cost of uglying our neighborhoods.

We ask for your cooperation even if this means not doing the project at all.

Sincerely,

William and Sharon Catechi

Subject: Concern on PG&E's Jefferson-Martin Transmission line

My husband and I are residents of Hillsborough. We are very concern of the proposal make by PG&E to replace the current power towers along Interstate 280 to a much bigger and higher voltages ones. This will definitely have a negative impact on our property value. More important, the potential health risks my family will be exposed to. We simply do not want to subject ourselves to higher EMF emission exposure than we have to. With a 12 year old daughter, I am very concern of her well being in addition to ours. It is every parent's nightmare to have a child developing some sort of deadly diseases such as leukemia or brain tumors. Please consider alternatives such as moving the power lines away from our houses or put in underground lines instead of the current proposal.

I truly hope the CPUC will hear the concerns of the residents that will be affected by this proposal and put the safety and health of people first. Thank you!!

As a long time resident of the San Mateo highlands as well as a parent, I am very alarmed by the proposed transmission line project.

I wish to see why its necessary to upgrade the lines at all. AND if, in fact, an upgrade is necessary, I wish to see why putting the lines underground or west of the 280 is not possible.

Beyond health and asthetic reasons, I am also concerned about property values an above ground transmission line will have to our family-oriented neighborhood.

Thank you, Yen Lee

Please STOP the PG&E Project as proposed, it will damage our families & Neighbourhoods. Have PG&E Underground all facilities, and be friendly to our Environment. I appreciate your attention and sympathy to this matter.

I AM VERY CONCERNED WITH THE INTENT TO REWORK THE EXISTING POWER LINES IN FRONT OF MY HOME. THESE LINES ARE ALREADY A DANGER AND SHOULD BE UNDERGROUND. NO ONE IS SURE OF THE IMPACT OF EMF BUT TO INCREASE THE SIZE COULD ONLY ADD TO THE UNCERTAINTY. THE GOOD THING IS THERE ARE ALTERNATIVES THAT HAVE BEEN PROPOSED. SUCH AS UNDERGROUND OR TO RELOCATE NEXT TO 280 OR WEST OF 1780. I AM ALSO CONCERNED IN HOW THIS COULD NEGATIVELY EFFECT THE VALUE OF MY PROPERTY

THANK YOU
John Minkel

We strongly opposed to the Jefferson-Martin
 230kV Transmission Line Project and
 currently proposed by CPUC. We believe
 the increased EMF emissions too close
 to our home, without proper long-term impact
 analysis and safety evaluation, is a health
 risk.

We are writing you to voice our STRONGEST
 protest over this project. If this project
 could be moved to the west of 280, we
 believe the environmental and health impact
 will be more acceptable.
