Subject: Comments on PGE Jefferson-Martin

Billie,

We have reviewed the maps of the above-ground portion of the proposed PGE Jefferson-Martin project for impacts on the County or County Owned Property. In advance of more detailed project plans, we can offer the following comments.

1. It appears that the widened right of way would involve a taking of County property at our Tower Road facility near the intersection of highways 280 and 92. It would be our preference that the proposed right of way be realigned to eliminate this necessity.

2. The following County roads would be impacted:

Edgewood Road
Crystal Springs Road
Black Mountain Road
Skyline Boulevard

This would require PGE to obtain legal rights to widen its right of way within those roads.

It does not appear that the project would impact our communications facilities at Tower Road, but this is, of course, subject to review of more detailed project design documents.

Please let me know if you have any additional questions.
