Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:  
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:  
 The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Date/Time:	1720
Year:	2022
Agency:	Oakland PW
Incident Date:	07/05/2022
Admin Agency:	Alameda County Environmental Health
Amount:	Not reported
Contained:	Stopped, Contained
Site Type:	Not reported
E Date:	Not reported
Substance:	Sewage - Raw Type
Quantity Released:	300
Unknown:	Not reported
Substance #2:	Not reported
Substance #3:	Not reported
Evacuations:	Not reported
Number of Injuries:	Not reported
Number of Fatalities:	Not reported
#1 Pipeline:	No
#2 Pipeline:	No
#3 Pipeline:	No
#1 Vessel >= 300 Tons:	No
#2 Vessel >= 300 Tons:	No
#3 Vessel >= 300 Tons:	No
Evacs:	No
Injuries:	No
Fatals:	No
Comments:	Not reported
Description:	A blockage in a main line caused the release, material flowed from a manhole onto asphalt then went into a storm drain, all material will be recovered, RP is handling the containment and clean up.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

**Environmental Interest/Information System:**

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Environmental Interest/Information System:

THE LEAKING UNDERGROUND STORAGE TANK (LUST) AMERICAN RECOVERY AND REINVESTMENT ACT (ARRA) SYSTEM COLLECTS DATA ON LUST RELEASES THAT ARE TRACKED BY ARRA PERFORMANCE MEASURES OR FOR WHICH ARRA FUNDS ARE BEING SPENT. DATA IS COLLECTED FOR EACH RELEASE, INCLUDING IDENTIFICATION, PERFORMANCE MEASURES, REFERENCE INFORMATION, AND LOCATION INFORMATION.

500-gallon, and one 1,000-gallon gasoline USTs were removed from the site on December 14, 1992. Soil samples collected beneath the 1,000 gallon gasoline UST detected 27 mg/kg TPHg and 5.5 mg/kg benzene indicated an unauthorized release of petroleum hydrocarbons had occurred and this Leaking Underground Fuel Tank (LUFT) case was opened to investigate the release. Environmental investigations have been ongoing since 1993 and have included installation of a groundwater monitoring well network and collection of soil, groundwater and soil gas samples. Interim remedial excavation was conducted in 1993 and removed 360 cubic yards of contaminated soil from the former waste oil UST to a depth of 18 feet bgs. An ozone pilot test was proposed for the site in 2008 but was never implemented. The current property owner intends to redevelop the site with a single family residence and is working on preparing a corrective action plan for review and approval by Alameda County Environmental Health. This case is in the State Water Boards Expedited Claim Account Pilot Program (ECAP).

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

**Environmental Interest/Information System:**

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

**Violations:**

Site ID: 30239  
Site Name: Fire Station #16  
Violation Date: 09-14-2016  
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507

Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Notes: Returned to compliance on 11/06/2019. FS16 has one 1,000 gallon double walled AGT and one 65 gallon generator belly tank. The fire station staff, fire fighter crew, performs weekly visual inspections of tank, surrounding area, and fuel level. However, the fire station staff does not perform inspections of the secondary containment annular space. Oakland Fire Dept., or qualified representative, shall perform weekly inspections of the annular space to ensure no liquids have accumulated in the space:A) Verify if City of Oakland is checking annular space; orB) Verify if fuel delivery contractor is checking annular space. Transmit validation of verification of annular space (e.g. a photo of the annular space condition or dipstick) and checklist indicating performance regular annular space monitoring to ACDEH inspector.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:  
 The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

 Military DOD Site: No  
 Facility Project Subtype: Not reported  
 RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)  
 Site History: The Site is located in a mixed commercial and residential area of Oakland and is currently developed as a two-story commercial building totaling approximately 4,500 square feet and consisting of 7 commercial units located on one parcel Alameda County Assessor's Parcel Number: 29A-1327-12-02. Results of a Phase I environment site assessment (ESA) indicated the Site was undeveloped from approximately 1897 until 1952 when it was developed into the current

MAP FINDINGS

1431 LEIMERT BLVD (Continued)

S122492784

structure. The building units have been occupied by various commercial retail, restaurant, and office tenants in addition to a dry cleaning business which has operated in Suite 2431 from approximately 1962 to present. Current commercial tenants include an acupuncture clinic, professional and administrative offices, short term residential business, and dry cleaner. Based on interviews with the previous dry cleaner owner, the unit was purchased in 1980 from an pre-existing dry cleaning business which used tetrachloroethene (PCE) based dry cleaning solvents in their machines. Various PCE-based dry cleaning units have operated in the commercial space since 1962 until the current petroleum hydrocarbon based unit was replaced in 2011. A former service station operated in the northwest property adjacent to the subject Site; located at 1425 Leimert Blvd. Based on limited information presented in the Phase I regarding this property, it appears service station operations were conducted between approximately 1933 until 1970. A search on the State Water Board's GeoTracker website indicated there are no current or former cases associated with the service station property. Currently, the former service station property is presently occupied by a commercial building with subterranean parking; Oakmore Professional Building. Results of recognized environmental conditions (RECs) identified in the Phase I were further investigated as part of an additional Phase II subsurface investigation conducted at the Site during December 2017. Four borings were advanced for the collection of soil and sub-slab vapor samples. Data from these borings indicated total petroleum hydrocarbons as gasoline-range (TPH-g); benzene, ethylbenzene, toluene, and xylenes (BTEX); tetrachloroethylene and trichloroethylene (PCE and TCE), were detected in sub-slab vapor located in the boiler room (southwest) and adjacent to the former location of the dry cleaning unit (west). PCE was detected in sub-slab vapor at SS-4 in the vicinity of the former dry cleaning machine at a concentration exceeding the ESLs for potential vapor intrusion under commercial land use. PCE was also detected in other sub-slab samples within the dry cleaning suite, however, at concentrations below the ESLs for sub-slab vapor intrusion under commercial land use. One soil sample collected at 1 foot below the building slab, due to shallow bedrock, reported concentrations below laboratory detection limits for all potential constituents of concern (PCOCs). Groundwater samples were not collected during investigation activities. A building survey conducted by EIS in September 2018 is summarized in the Site History Activity Report. The survey was conducted to evaluate, select and assess potential sub-slab vapor sampling locations, and evaluate vapor intrusion to indoor air and potential preferential pathways. Results of the survey indicated the building is constructed with a concrete slab on grade foundation with the heating, ventilation, and air conditioning (HVAC) system consisting of forced air units located on the roof. A total of eight restrooms, sinks, and bathrooms; and three floor drains in the rear of the three ground floor units are plumbed to a sanitary sewer outlet in Suite 1433. An abandoned sub-slab water line was observed running along the northwestern wall of Suite 1431. The current above-ground water line for the building enters Suite 1431 near the eastern corner and is plumbed to the remaining units within the walls. Flooring within all ground floor units was observed in good condition with only minimal cracking visible in Suite 1431. A subsequent subsurface vapor investigation work plan was submitted to evaluate potential vapor intrusion to indoor air and preferential

pathways at the Site. The scope of work includes the advancement of 14 semi-permanent sub-slab vapor pins (SV-1 through SV-14) across Suites 1431, 1433, and 1435. Based on ACDEH directive letter dated December 4, ACDEH requested the advancement of additional vapor pins along the southeast wall of Suite 1431, temporal sub-slab sample collection, indoor air sample collection in Suite 1431 and its associated lavatory (slab penetrations), and the advancement of two soil gas wells in the area of the drum storage area (alley).

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Comments: Not reported  
Description: A sewer main failed due to unknown reasons. The incident resulted in a sewage release from the main, down the side of a dirt hill, and into Salsa Creek. The City of Oakland Public Works responded to the site and stopped the release. Permanent repairs to the main and a cleanup are in progress. No road closures were necessary. The release to the creek was unrecoverable.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Violation Source: CERS,

Site ID: 136096  
Site Name: GO! GAS & FOOD # 2  
Violation Date: 02-07-2023  
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2

Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Violation Notes: Returned to compliance on 02/07/2023. Spill buckets for the 87 and 91 product contained liquid. Liquid was removed from the spill buckets and violation was corrected during the inspection.

Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "  
Violation Notes: Returned to compliance on 02/10/2021. Residual liquid was observed in the used oil spill bucket. The liquid was removed and the violation was corrected during the inspection.

Eval Notes: SR0047327 - Primary Piping Inspection. Installation technician Richard Thomas of CGRS on-site to oversee the testing. Certifications on file with ACDEH in the permit package. Testing was conducted in accordance with Title 23 CCR 2636(e). PASSING results of bubble field / soap test. Tested all primary piping joints on 87 and 91 grade pipeline, vent pipeline, and vapor return pipeline. Primary pipeline has been under pressure since Thursday afternoon. Inspector observed at least one hour of holding pressure. \* vent / vapor return primary pipeline pressure = ~11 psi. \* 87 grade primary pipeline pressure = ~52 psi. \* 91 grade primary pipeline pressure = ~50 psi. PASSING results. CGRS will proceed with assembly of secondary containment pipeline. Four double-walled UDCs observed interstitial space under vacuum (~ -10 to ~ -12 in HG).

**Environmental Interest/Information System:**

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

**Environmental Interest/Information System:**

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:  
 The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:  
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

**Environmental Interest/Information System:**

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:  
 The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Facility Project Subtype: Not reported  
RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)  
Site History: Sampling conducted following the removal of a 300-gallon (Tank-1) residential home heating oil tank revealed maximum concentrations of total petroleum hydrocarbons as diesel (TPHd), xylenes and naphthalene at 15,000 milligrams per kilogram (mg/kg), 0.52 mg/kg and 8.1 mg/kg, respectively, indicating a release had occurred. This case was opened on September 11, 2020 following the transmittal of laboratory analysis data for Tank-1 to Alameda County Department of Environmental Health (ACDEH). A second UST was encountered during field activities. Both USTs identified as having contained diesel. Tank-2 was 350 gallons. Sampling indicated TPHd up to 2,700 mg/kg.

Dwr Groundwater Subbasin Name: Santa Clara Valley - East Bay Plain (2-009.04)  
Disadvantaged Community: Not reported  
CA EnviroScreen 3 Score: 6-10%  
CA EnviroScreen 4 Score: 5-10%  
Military DOD Site: No  
Facility Project Subtype: Not reported  
RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)  
Site History: Fuel Leak Case No. RO0003364 was opened in 2019 by ACDEH following removal of a 250-gallon single-walled steel home heating oil underground storage tank (UST) that was discovered at the Site in a grass area in the backyard during a geophysical survey in 2018 in preparation for construction of a new addition to the house. The UST was removed under an Oakland Fire department permit in January 2019. During removal, the top of the three-foot diameter UST was located approximately one- to two feet below the ground surface (bgs) and was observed to be in poor condition with several holes in the bottom. On January 23, 2019 following UST removal, one soil sample (UST-6) was collected from approximately two-feet below the bottom of the former UST at a depth of approximately six feet bgs and analyzed for total petroleum hydrocarbon as diesel (TPH-d); naphthalene; benzene, toluene, ethylbenzene, and xylenes (BTEX); and fuel oxygenates and lead scavengers, including ethylene dibromide (EDB), ethylene dichloride (EDC), methyl tertiary butyl ether (MTBE), tertiary amyl methyl ether (TAME), ethyl tertiary-butyl ether (ETBE), di isopropyl ether (DIPE), and tertiary butyl alcohol (TBA). Analytical results documented TPH-d and naphthalene at a concentration of 460 milligrams per kilogram (mg/kg) and 0.15 mg/kg, respectively in the bottom of the tank excavation pit. Concentration of all other analytes were below laboratory reporting limits appropriate for evaluating risk. A three-point composite sample (STKP 1-1-3) was collected from the stockpile generated during tank removal and analyzed for the same chemicals mentioned above for characterization. Diesel and naphthalene were detected at concentrations of 10 mg/kg and 0.011 mg/kg, respectively, with concentrations of all other analytes below laboratory reporting limits appropriate for evaluating risk. The UST Removal Report, dated May 3, 2019 prepared AEI Consultants does not document the final disposition of the excavated soil stockpile. As no waste manifests documenting offsite disposal were included in the report ACDEH assumes the stockpiled soil was used to backfill the excavation pit. This assumption is supported by a discussion with the Property Owner whereby they indicated the pit was partially backfilled while waiting for a permit to construct the new addition to the house. The concentrations of TPH-d and naphthalene detected in the soil collected beneath the tank and the stockpile are indicative of an unauthorized release from the former UST. Results of Site investigations indicate the following: Soil at the Site consists predominantly of clay, with intermittent lenses of sandy clay, silty clay and caliche based on logs of borings advanced during Site investigation activities. First encountered groundwater was encountered at depths greater than 15 feet bgs. A stabilized groundwater level of 6.5 feet bgs was observed in boring SB-6 indicating the groundwater at the Site is likely semi-confined. The groundwater flow direction is inferred to be to the southwest based on the local topographic gradient. A comparison of residual concentrations in soil within and beneath the backfilled tank pit to the 2019 San Francisco Bay Regional Water quality Control Board's Environmental Screening Levels (ESLs) indicate the following:

S110655988

TPH-d concentrations exceed the residential ESL for direct contact human health risk of 260 mg/kg. Concentrations of all other constituents analyzed are below the residential direct contact ESLs. TPH-d and naphthalene concentrations are below the ESLs for construction worker direct contact human health risk of 1,100 mg/kg and 400 mg/kg, respectively. Concentrations of all other constituents analyzed are below the residential direct contact ESLs. Naphthalene concentrations exceed the ESLs for leaching to groundwater for drinking water, however do not exceed the ESL for leaching to groundwater for non-drinking water. Concentrations of all other constituents analyzed are below the leaching to ESLs for non-drinking and drinking water. A comparison of concentrations of TPH-d, TPH-mo, and naphthalene in grab groundwater samples to the ESLs indicate the following: TPH-d concentrations exceed the direct exposure human risk level of 200 micrograms per liter (g/L) for drinking water and the odor nuisance levels for drinking water of 100 g/L. The laboratory reporting limit for naphthalene exceeds the ESL for direct exposure human risk level of 0.17 g/L for drinking water. There are no ESL for TPH-mo French drains are installed beneath the patio located adjacent to the UST pit. Building plans for the proposed addition to the house in the area overlying the existing patio and UST pit show a network of new french drains beneath and adjacent to the new foundation to intercept groundwater. Concentrations of TPH-d in the tank pit area exceed leaching to groundwater ESLs and therefore TPH-d impacted groundwater may be intercepted by the French drains and discharged to the street. BTEX was detected in the soil vapor samples collected from beneath the patio slab however BTEX was not detected in soil samples collected 2 feet below the bottom of the tank, and therefore the detections of BTEX in soil vapor is not likely associated with the UST release. Methane was not detected above 0.400 percent. The Case file does not include any information on whether individually certified clean cannisters or batch-certified cannisters were used in the sample collection which may have attributed to the low level concentrations of BTEX in soil vapor. Regardless of the source, the concentrations of BTEX are below concentrations that pose a risk to human health from vapor intrusion to indoor air. Additionally, although the reporting limits for naphthalene were above the ESLs for vapor intrusion, the low concentrations of naphthalene detected in soil indicate that naphthalene is not likely to generate soil vapor at concentrations that would pose a risk to occupants from vapor intrusion. ACDEH listed the site as eligible for closure in June 2020 and completed a 60-day public comment period, however during preparation of the Case Closure Summary, ACDEH determined that additional removal of secondary source material remaining in the UST pit is required to eliminate the exposure pathway for petroleum impacted groundwater to enter the existing and proposed french drains installed directly adjacent to the the tank pit. Based on discussion with the property owner, the secondary source removal will be conducted during construction of the new addition to the house in the Spring of 2021. Upon completion of the secondary source removal, ACDEH will close the case.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,
