Re: Sunrise Powerlink

25 Feb, 2008

My family and I oppose the Sunrise Powerlink in its entirety. We need to put the money that would be required should be put into renewable energy close to the source. Like maybe give home owner along the proposed routes the money to put wind generators up and send the power back to S.D.G.E.

We truly have so much protected land and this powerlink seeks to invade the small areas that are left.

Please reconsider this whole project and vote as a true Public Commission should, and that is for the public's wishes.

Sincerely,
