TO PUC

I AM VERY OPPOSED TO
THE SUNRISE POWER LINK
AND THE FALSE PREMISE THAT
THE RESERVANT ENERGY IS NECESSARY.

(1) THE ENERGY TO PRODUCE THE
ENERGY IS FROM LNG! THIS
IS MOST WASTEFUL OF RESOURCES
AND SUPPORTS GLOBAL DANGER
(INDONESIA + ^{Russia} ~~China~~)

(2) SAN DIEGO IS LARGE ENOUGH!
MORE POWER LINES PROMOTE GROWTH.

(3) SEMPRA HAS NO ECONOMIC INCENTIVE
~~Economic incentive~~ TO PRODUCE RENEWABLE
GENERATION RESOURCES.

④ Health Concerns are poorly understood. High power transmission lines will have an impact on microwaves — Unknown impacts.

⑤ Rate payers will be stuck with the costs + the SEMPRA will profit!

⑥ Public lands are definitely "OFF Limits".

⑦ There is enough solar power possible because of our weather. Place solar panels + disorientated plants.

Why did they build a pier in Ensenada and plant in Mexicali? — to evade Environmental Regulations.

⑧ Health issues:

① denude ground to build excessively high towers.

② Line would run through public lands which contain wildlife which is in danger of extinction.

③ LNG is a fossil fuel. We need to decrease our dependence on this.

④ Don't invade our public parks. We need them.
