Environmental Impact Report Topic: Need

Comments: Although many people don't want

to see the power lines that provide the
electricity they use everyday, SDG&E has
an "obligation" to serve" and must follow state
and Federal Laws. The CPUC would certainly
penalize SDG&E if they fail to meet these
obligations. It is now up to the CPUC
to make the hard decisions to allow the
needed infrastructure to be constructed
to allow SDG&E to meet these obligations.

and uneconomical

Please don't take the politically easy route to
rely on impractical technology or turn the decisions over
to the CEC.

Approve a project that will meet the long term
needs of the rate payers of San Diego
County. Approve a northern route.

Signature John R. Bainbridge Date 2/27/2008
