Environmental Impact Report Topic: Sunrise Power Link

Comments: We really much OPPOSE the Sunrise

Power Link! We had our ranch burn  
down in the Pines Fire when a Power  
Line came down. It burned 60,000 acres  
around us - most Riparian Habitat.

There is strong evidence of cancer-  
causing emissions which are  
emitted by power lines of  
this caliber. And we don't  
want our beautiful wild spaces  
contaminated by ugly buzzing  
power lines. Keep it in the city!

Powerlines can be put  
underground to avoid causing fires.  
How many more millions of dollars  
must we, the taxpayers, put out  
to fight fires caused by downed  
power lines?! We are tired of it!
