Environmental Impact Report Topic: Land use for future generations

Comments: I would like to speak
for future generations.
that they be given the opportunity
to have to use, safety, & beauty
of the land available to them.
that they may be able to
enjoy the state park. to
be safe in the back country
from more danger of fire is
such a big problem as it is
to add more danger is an
incredible problem I have
3 children & know many
more that I feel should
have the same rates to this
land as we have been able
to live with.

Thank you
