I think the proposed Sunrise Powerlink Project is an attempt by SDGE's parent company to bring power across the border from their Mexico power plant. Their for I recommend ES.6.4 No Project Alternative. I am in favor of increased solar photovoltaic and distributed generation & new conventional generation combined cycle power plants and new peaking power plants.

If the project does go on I would prefer one of the Southern Route Alternatives.

Above all other considerations is the need to avoid Anza-Borrego Desert State Park and the Santa Ysabel Valley.

Don't forget the fire in Santa Ysabel by the existing power lines.

Thank you for your consideration.

Rick Moore
