Dear Commissioners, The generation that escapes the challenges of war or the burden of economic depression owes everything to the generation that didn't. Somehow thruout the trials these Americans had the foresight to establish our wonderful Parks and Open spaces. This feat was not accomplished easily. But it was one our country undertook with great enthusiasm. Teddy Roosevelt established our first park, Yellowstone. Great commercial, ranching, land, and mining interests were extinguished at the stroke of a pen. But Roosevelt would not be diswayed. His decision has stood the test of time. He is not here today, you Dear Commissioners are in his place. Please deny Sempra Energy and surrogate SDGandE request. You will earn the heartfelt gratitude of Millions of Americans for generation to come. Dave
