

**A** The **existing view** to the north toward proposed structure location SP104 from Mine Wash Road, approximately 0.3 mile south of SR 78 in ABDSP. The angular form of Yaqui Ridge rises abruptly from Mescal Bajada in the foreground.

**B** This image presents a **visual simulation** of the Proposed Project paralleling SR 78 (not visible in the image) The transmission line would appear as a prominent linear, vertical feature in an otherwise natural appearing landscape.
