

Michael Clayton & Associates

A **visual simulation** of the BCD Alternative as it parallels and then spans McCain Valley Road in McCain Valley. This view is to the north from KVP 60 on McCain Valley Road at the intersection with Sacatone Overlook Road. The simulation illustrates the prominence of the structures and conductors that would be apparent to both north- and southbound travelers on McCain Valley Road. Structure prominence would be accentuated by the considerable skylining (extending above the horizon line) that would occur.
