

A **visual simulation** of the San Diego Community Power Project (SDCPP) situated on Site 1B/1C, as viewed from Key Viewpoint 74 at the north end of Strathmore Drive. This view is to the west and illustrates a conceptual presentation of the SDCPP added to the undeveloped landscape along the eastern border of MCAS Miramar, northwest of Santee Lake. The SDCPP would be visible as a complex facility with prominent geometric forms and substantial industrial character that would contrast with the predominantly natural landscape.
