

Michael Clayton & Associates

The **existing view** to the south toward Vallecito Mountain, from the West Butte of Borrego Mountain in Anza-Borrego Desert State Park (ABDSP). This view also encompasses a portion of Lower Borrego Valley and SR78 (faint horizontal line in the center of the photograph, approximately 2.25 miles distant). The Proposed Project (the **blue line** shows the approximate route) would be noticeable though somewhat indistinct at a viewing distance ranging from approximately four to six miles (right to left) for the landscape encompassed in the above image.
