

Michael Clayton & Associates

A **visual simulation** of the Proposed Project from Key Viewpoint 8 at Kenyon Overlook, off of Yaqui Pass Road. This view is to the south-southeast toward proposed structures SP100 through SP102 (right to left), shown adjacent and slightly to the north of SR 78. The linear, vertical characteristics of the structures would contrast with the predominantly horizontal lines of Mescal Bajada and the Vallecito Mountains beyond. The light color and prominent lines of the graded maintenance pads and access road would also cause noticeable visual contrast.
