

Michael Clayton & Associates

A **visual simulation** of the Proposed Project from Key Viewpoint 16 at the Inaja Monument Park Overlook, just off of SR 78. This view is to the west toward proposed structures C15 through C21 (left to right), as the Proposed Project crosses the western side of Santa Ysabel Valley. The transmission line and access road would be prominently visible in views from the Overlook. The linear, vertical forms of the structures and light color of the graded access road would contrast with the existing pastoral landscape features and colors of the valley land and vegetation features.
