

Michael Clayton & Associates

The **existing view** to the northwest toward the Santa Ysabel Partial Underground Alternative's north transition structure locations adjacent to Mesa Grande Road. This view is from westbound Mesa Grande Road, approximately 0.2 mile east of the structure. The rural landscape exhibits a pastoral character and there are no substantial built structures along this portion of Mesa Grande Road though there are a few rural residences and agricultural related structures in the vicinity. A roadside wood-pole line is also visible but is not visually prominent.
