

Michael Clayton & Associates

The **existing view** to the east-northeast toward the Los Penasquitos Canyon Preserve and Mercy Road Alternative eastern cable pole location. This view is from the southwest corner of Scripps Poway Parkway and Spring Canyon Road. The east cable pole would be located adjacent to Scripps Poway Parkway in a slight hollow below the low ridge, on which the existing transmission lines are situated. There are several transmission structures visible in the existing suburban landscape and the roadside trees would provide some screening for the cable pole.
