

Michael Clayton & Associates

The **existing view** to the northwest from Key Viewpoint 53 on westbound Alpine Road, just north of Peutz Valley Road and immediately adjacent to Interstate 8. This view encompasses the location of the western terminus of the underground portion of the I-8 Alternative, where it would transition aboveground and span to the north side of Interstate 8. The landscape is suburban in character and there are several residences to the south (left out of the frame of the image). To the immediate north (right) is Interstate 8. Existing utility poles visible on both sides of I-8.
