

Michael Clayton & Associates

The **existing view** to the east-southeast from Key Viewpoint 55 on Moneno Boulevard, just south of San Vicente Drive. This view is dominated by a rocky ridge immediately east of the equestrian community of Moreno. Although the ridge and slopes are predominantly natural appearing, with sparse vegetation and rocky promintories, there is a communication tower that is visible and a wood-pole utility line along the ridge, though it is of relatively small scale and not substantially noticeable. The ridge is highly visible from the numerous residences and riding trails below.
