

Michael Clayton & Associates

A The **existing view** to the southwest across McCain Valley from Carrizo Overlook. As shown in the image, views from the Overlook are unobstructed, offering panoramic vistas of an arid valley that is predominantly natural in appearance.

B This image presents a **visual simulation** of the BCD Alternative as it crosses McCain Valley and ascends Tecate Ridge. The vertical form and lines of the structures would contrast with the horizontal lines of Tecate Ridge and the valley floor.
