

Michael Clayton & Associates

A **visual simulation** of the Modified Route D Alternative from Key Viewpoint 68 on Lyons Valley Road, approximately 2.75 miles east of the intersection with Honey Springs Road. This view to the north captures the Modified Route D Alternative as it parallels Lyons Valley Road, before spanning the road to the west side and ascending the ridge east of Gaskill Peak (not visible in the image). The transmission line would be prominently visible to travelers on Lyons Valley Road as well as travelers on Carveacre Road that runs along the Gaskill Peak ridge in Cleveland NF.
