

SDG&E Sunrise Powerlink Project

California Public Utilities Commission Fact Sheet Regarding the Public Process in the Lakeside Area for the Sunrise Powerlink Project

Introduction

This fact sheet summarizes past notification and consideration of alternative routes in the community of Lakeside for the Sunrise Powerlink Project. Commenters from the community are also listed. The segment of the CPUC-approved route that crosses through the Lakeside area is considered to be from the underground-to-overhead transition on the north side of Interstate 8 (I-8) to the point where the Interstate 8 Alternative rejoins the originally proposed route. This fact sheet can be found electronically on the Sunrise Powerlink Project website noted below. If you would like to receive this fact sheet via email, please email sunrise@aspenerg.com.

Alternatives Development in the Lakeside Community

Over 100 alternatives were considered in the Alternatives Screening Report, which is included as Appendix 1 to the EIR/EIS. The Interstate 8 Alternative, an alternative that would generally follow I-8 and would pass through the community of Lakeside, was developed in response to numerous public and agency comments requesting consideration of use of the existing linear corridor in which I-8 is located, rather than creating a new major linear transmission corridor in less developed areas (especially Anza-Borrego Desert State Park).

During the alternatives development process and in response to scoping, the Interstate 8 Alternative was refined to avoid sensitive land uses, constraints, and other infeasible areas, and while doing so, various routes throughout the Lakeside area were considered. The CPUC looked at several different options, including undergrounding, in the area of SR 67, west of High Meadows Ranch and to avoid hang gliding impacts in Blossom Valley. However, all of the routes included long segments of underground installation and none reduced the severity of impacts without creating other significant impacts of their own. Therefore, they were eliminated after preliminary screening and were not incorporated into the Interstate 8 Alternative route. Ultimately the High Meadows Ranch Reroute was later developed based on comments on the Draft Environmental Impact Report/Environmental Impact Statement (EIR/EIS), and it was found to be environmentally superior to the Interstate 8 Alternative in the Recirculated Draft EIR/Supplemental Draft EIS (RDEIR/SDEIS) and the Final EIR/EIS. All project documents, including this fact sheet, can be found on the CPUC's project website at:

<http://www.cpuc.ca.gov/environment/info/aspensunrise/sunrise.htm>.

After the first round of scoping in October 2006, on January 22, 2007, the CPUC mailed a notice announcing a second scoping period and describing the 30 alternatives that were presented with preliminary recommendations for detailed EIR/EIS analysis as well as the remaining approximately 70 alternatives recommended for elimination from detailed analysis. An additional eight public scoping meetings were held, including one in Alpine on February 7, 2007. Based on all of the feedback received from the public and agencies, along with additional research done by the EIR/EIS team, the CPUC and United States Department of the Interior Bureau of Land Management (BLM) made final decisions on the alternatives that were fully analyzed and the alternatives that were eliminated from full consideration in the EIR/EIS. Those decisions were presented in an Alternatives Determination Notice that was mailed on March 16, 2007.

The following alternatives and reroutes were carried forward for full analysis in the Draft EIR/EIS and the RDEIR/SDEIS:

- Interstate 8 Alternative (Draft EIR/EIS, Section E.1)
- Chocolate Canyon Option including the SDG&E Chocolate Canyon/Peutz Valley Revision (Draft EIR/EIS, Section E.1)
- High Meadows Reroute (RDEIR/SDEIS, Section 3.3.3)
- Highway 67 Hansen Quarry Reroute (RDEIR/SDEIS, Section 3.3.4)

Besides just the Proposed Project, other alternatives were also considered that would avoid the community of Lakeside, such as the non-wires alternatives, the LEAPS Alternatives and the Northern Alternatives. The New In-Area All-Source Generation Alternative, New In-Area Renewable Generation Alternative, and the LEAPS Transmission-Only Alternative were all found to be overall environmentally superior to the Final Environmentally Superior Southern Route Alternative, which passes through the Lakeside area (see Executive Summary, Section ES.2.1 in the Final EIR/EIS).

Project Notification

Mailing List. The EIR/EIS informational mailing list includes property owners within 300 feet of the Proposed Project and all alternative routes, as well as groups and individuals the EIR/EIS team identified or who identified themselves to be stakeholders. In addition, all attendees at scoping meetings, informational workshops, and commenters on the Draft EIR/EIS or RDEIR/SDEIS were added to the mailing list. The mailing list includes all individuals on the CPUC's proceeding service list for the project application as well.

Within the Lakeside community, all property owners within 300 feet of the Interstate 8 Alternative, Chocolate Canyon Option and Revision, High Meadows Reroute and the Highway 67 Hansen Quarry Reroute were included on the mailing list. The mailing list at the end of this fact sheet (sorted by name) indicates which notices and documents were received by each individual in the Lakeside community related to the following informational mailings:¹

- [Notice of Preparation \(NOP\) of a Joint EIR/EIS for the Proposed Sunrise Powerlink Project](#) (September 15, 2006).
- [Notice of Availability \(NOA\) of the Scoping Report, Part One](#) (November 2006)
- [Notice of Second Round of Scoping on Alternatives](#) (January 2007)
- [Notice of Availability of the Scoping Report, Part Two](#) (March 2007)
- [Notice Regarding Conclusions on EIR/EIS Alternatives](#) (March 2007)
- [Notice Regarding an Additional EIR/EIS Alternative](#) (May 2007)
- [Notice of Availability of the Draft EIR/EIS](#) (January 2008)
- [Postcard Notice of Additional Public Participation Hearings](#) (April 2008)
- [Notice of Availability of the Recirculated Draft EIR/Supplemental Draft EIS](#) (July 2008)
- [Notice of Availability of the Final EIR/EIS](#) (October 2008)

There are 112 total entries with a Lakeside address in the attached mailing list, but 14 addressees had a mailing returned as “undeliverable/unforwardable” at some point, so these individuals are not on the current “mailables” list. Only five of the owners within Lakeside requested/received any documents or information in addition to the Final NOA in the CPUC's last set of mailings.

¹ In the electronic version, by clicking on the title of each notice in the list, you will be directed to a copy of the individual notice on the CPUC's Sunrise Powerlink Project website. The home page for the website is: <http://www.cpuc.ca.gov/environment/info/asp/sunrise/sunrise.htm>.

Newspaper Notices. All public notices appeared on the CPUC’s project website at <http://www.cpuc.ca.gov/environment/info/asp/sunrise/sunrise.htm>. Newspaper advertisements appeared in local and regional newspapers for the October scoping meetings and for the February meetings as well. As part of outreach to Spanish-speaking populations, newspaper advertisements were published in two Spanish-language newspapers. In addition, newspaper notices, including information on the Draft EIR/EIS and/or the RDEIR/SDEIS, the project website address, and the dates and times of the Informational Workshops and Public Participation Hearings were printed at least once and up to five times in January, April, May and July 2008 in the following papers: San Diego Union Tribune, Enlace, Imperial Valley Press, North County Times, Borrego Sun, Adelante Valle, Ramona Sentinel, El Latino, San Diego Business Journal, The Valley News, Press Enterprise, Alpine Sun, and Julian Journal.

Document Repositories. The Lakeside Branch Library was one of the 28 library or office document repositories.

Commenters from Lakeside on Sunrise Powerlink Project

The following six people from Lakeside commented during the scoping periods:

- Chad, Jennifer, and Joseph Bierbaum
- Dave and Judith H. Busby
- Pat and Dave Dewitz
- Sheila Leaming
- Alma and Barnaby Russell
- Rob and Diane Svendsen

Based on a search of the comment responses, the following are the only two commenters on the Draft and the RDEIR/SDEIS that include a specific discussion of Lakeside:

- EnviroMine (Comment Set B0046) – concerns were addressed with the Highway 67 Hanson Quarry Reroute
- Lambron Lakeside Ranch (Comment Set G0005) – opposed to the High Meadows Reroute

In addition to Lambron Lakeside Ranch and EnviroMine, there was only one individual commenter on the Draft EIR/EIS with an address in Lakeside:

- Catherine Gorka Family Trust (Comment Set D0186) – opposed to the Interstate 8 Alternative

There were no individual commenters on the RDEIR/SDEIS with an address in Lakeside.

Lakeside Community Planning Group. Janis and Gordon Shackelford commented during the first scoping period as well as during the Draft EIR/EIS (Comment Set D0221) where they expressed support for the top environmentally ranked alternatives and concerns regarding fire risk and reliability with the Interstate 8 Alternative. Gordon Shackelford is a past Chair of the Lakeside Community Planning Group, but he currently lives in El Cajon and the submitted comments were not affiliated with the Lakeside Community Planning Group.

Therefore, based on our logs, scoping reports and the EIR/EIS, the Lakeside Community Planning Group did not comment at any time in the process. As listed in the attached mailing list, Rick Smith, Chair of the Lakeside Community Planning Group is a stakeholder on the Sunrise mailing list and received all of the notices, Executive Summaries and document DVDs. Mr. Smith also received hardcopies of the Draft EIR/EIS, RDEIR/SDEIS, and Final EIR/EIS.
