**Subject: Limited Supplement to the Sunrise Powerlink Phase I ESA
Encina Switchyard – Portions of APN 210-010-430
Carlsbad, California**

Dear Ms. Tracy:

Geosyntec Consultants (Geosyntec) is pleased to provide the San Diego Gas and Electric Company (SDG&E) this Limited Supplement to the Sunrise Powerlink Phase I Environmental Site Assessment prepared by Geosyntec, dated 18 August 2009 (Sunrise ESA). This supplement summarizes the results of an evaluation for portions of the Encina Switchyard planned for disturbance during switchyard upgrades for the Sunrise Powerlink Project. The area assessed and planned for disturbance comprises approximately 10 acres of an approximately 155-acre parcel (San Diego County Assessor's Parcel No. 210-010-430) at 4600 Carlsbad Boulevard in Carlsbad, California (the site; Figure 1). The purpose of this supplemental evaluation was to evaluate the site which was not included in the initial Sunrise Phase I ESA to identify potential existing recognized environmental conditions which may adversely affect construction during upgrades at the site for the Sunrise Powerlink. This addendum was prepared by Mr. Douglas Baumwirt, PG and has been reviewed by Mr. Veryl Wittig, PG, CHG in accordance with the peer review policy of the firm.

BACKGROUND

Geosyntec was contracted by SDG&E in May 2009 to perform a Phase I Environmental Site Assessment (ESA) of the proposed approximately 120-mile Sunrise Powerlink electrical transmission corridor. The Encina Switchyard does not lie within the ¼-mile buffer area assessed as part of the Sunrise ESA; however, upgrades are planned at the Encina Switchyard that will require ground disturbance in relation to the Sunrise Powerlink. Therefore, this Limited Supplemental Phase I ESA has been prepared to identify RECs associated with the areas at the Encina Switchyard planned for disturbance.

Based on reports provided by SDG&E, construction of the Encina Power Plant began in 1952, and SDG&E started electrical generation and transmission in 1954 [Fluor Daniel, 1998a]. The primary

fuels used to power the steam-driven electrical generators at the facility were Bunker C from 1954 to 1971, No. 6 fuel oil from 1971 to 1984, and natural gas from 1984 to the present. Electrical current generated at the facility is routed to the switchyard where the line voltage is transformed and routed to transmission lines which exit the facility [Fluor Daniel, 1998a]. The power generating facility was sold by SDGE to NRG in 1999, but Geosyntec understands SDG&E retained the switchyards [URS Greiner Woodward Clyde, 1999].

The switchyards at the site have historically contained electrical equipment including transformers, circuit breakers and other dielectric oil-cooled equipment which contained PCB-bearing dielectric oils [Fluor Daniel, 1998a]. In their 1998 report, Fluor Daniel indicated that most of the former transformers at the site contained PCBs at concentrations exceeding 60 percent, but that all electrical equipment had been converted to non-PCB-containing, mineral-oil-based dielectric fluids in the mid 1980s. A previous investigation of the switchyard in 1996 by EnecoTech Southwest consisted of collecting 16 wipe samples and 19 soil samples to assess the presence of PCBs resulting from historical operations. Eight of the 16 wipe samples contained PCBs at concentrations ranging from 0.62 to 33.0 µg/100 cm², and 10 of the 19 soil samples contained PCBs at concentrations ranging from 0.03 to 1.20 mg/kg. EnecoTech concluded that the PCB concentrations identified during their investigation did not exceed regulatory thresholds at the time of their investigation.

The 1998 Fluor Daniel ESA identified prior known releases of hazardous materials (primarily hydrocarbon releases) from historical power plant operations, but there were no documented incidents reported for the switchyards. To further assess potential impacts associated with historical facility operations, Fluor Daniel conducted a Phase II ESA in 1998 throughout the facility, with the exception of the switchyards which were designated as “retained property” [Fluor Daniel, 1998b]. Based on the summary and conclusions presented in their Phase II ESA report, Fluor Daniel did not report environmental conditions which would adversely affect the switchyards.

Additional soil and groundwater assessment were performed by URS Greiner Woodward Clyde (URS) in 1999 as part of the property transfer between SDG&E and NRG [URS, 1999]. According to information presented in the 1999 URS report, there were approximately 15 transformers located in the switchyard at the time of their assessment. URS reported that information provided by Sempra personnel indicated that oil in the switchyard transformers was tested in 1998 and found to contain PCBs at concentrations ranging from non-detect to 9.8 ppm. Based on the information reported to URS by Sempra, no additional assessment of PCBs in the switchyards was deemed necessary.

SCOPE OF WORK

To supplement the Sunrise ESA, Geosyntec performed the following scope of work for the site:

Database Search and File Review

Prior to conducting a site visit, Geosyntec performed the following tasks to address the regulatory and land use history for the site:

- The database search report compiled by Environmental Data Resources (EDR) for the Sunrise ESA, dated 3 June 2009, did not encompass the site. Therefore, Geosyntec obtained and reviewed a site-specific EDR database search report, dated 25 August 2010 (Attachment A). The database search report for the site is summarized below:

Database	Description
ERNS	The facility reported an emergency release to soil due to equipment failure of a fuel oil storage tank on 9 June 2009.
NPDES	Active facility status for an industrial stormwater permit, no violations reported.
HIST UST	Four waste USTs installed in 1977 with capacities ranging from 301,700 to 762,350 gallons.
SWEEPS UST	Nine USTs reported, including: 301,700-gallon, 589,250-gallon, 762,350-gallon, and 336,150-gallon chemical tanks, 500-gallon and 1,000-gallon petroleum tanks, and 10,000-gallon, 600-gallon, and 1,000-gallon M.V. fuel tanks.
CHMIRS	<p>In April 1997, a hydraulic line on a crane leaked approximately two gallons of hydraulic oil into the cooling water system.</p> <p>In April 1997, a hose fitting on a tanker truck leaked approximately 55 gallons of diesel/mineral oil.</p> <p>In May 1997, residual fuel oil was found running into storm drain.</p> <p>In May 1998, 20 gallons of non-PCB-containing oil spilled from a transformer and some went into Encina Lagoon.</p> <p>In May 1999, a breaker caught fire and caused oil to escape from a transformer in the substation.</p> <p>In March 2000, 80-100 gallons of fuel oil #6 was released from a failed fuel oil line which was contained within the berm of the storage tank.</p> <p>In July 2001, 20 gallons of fuel oil from tank #2 was noted.</p> <p>In December 2001, 15 gallons of fuel oil spilled out of a fuel oil storage tank due to the roof drain leaking.</p> <p>In January 2002, a lab technician found a broken drain pipe with mercury under a sink.</p> <p>In July 2002, a sheen of oil was observed in the lagoon which was traced to a ditch on the south side of the property.</p> <p>In August 2003, a container of paint containing approximately 2.5 gallons of oil paint was found and retrieved from the nearby lagoon.</p> <p>In November 2006, an unknown surfactant was observed flowing from a 96-inch stormdrain easement.</p>
HAZNET	Listed for the disposal of inorganic solid waste; off-spec, aged, or surplus organics; and waste oil and mixed oil.
San Diego HMMD	Listed for the use of nitric oxide, sodium dimethyl thiocarbomate, ethylene glycol (antifreeze), hydrogen, lubricating oil, carbon monoxide, carbonylhydrazide mixture, sodium molybdate, calcium nitrate, oxygen, caustic soda, sodium hypochlorite, ammonium hydroxide, helium, sodium

	bisulfite, fuel oil, magnesium oxide, sulfuric acid, diesel oil, trixylenyl phosphate, hydrochloric acid, lacquer thinner, argon, acetylene, ferric sulfate, and muriatic acid.
San Diego HMMD Waste Streams	Disposal from the site has reportedly included oily water with surfactants, fluorosilicone paste, antifreeze, chromium treated water, sulfuric acid and debris, diesel fuel, asbestos, sodium phosphate, paint cleaner, batteries, and inorganic solids.
TSCA	The facility reportedly imports Fuel Oil No. 6.
FTTS	The facility was investigated for PCBs
CA WDS	Listed as an active industrial facility that treats or disposes wastes under a Waste Discharge Permit.
EMI	Listed by the San Diego County APCD for releases of organic hydrocarbon gas, reactive organic gases, carbon monoxide, NOX, SOX, and particulate matter.
Toxic Pits	Listed for 6 former pits; case closed in July 1992.
WMUDS/SWAT	Listed as a minor threat to water quality if a violation of a regional board order occurred.
RCRA-LQG	Listed as a large quantity generator of hazardous wastes.
SLIC	Listed for four SLIC cases: A release of gasoline to soil, case-closed October 1996; a release of heating oil to soil, case-closed October 1996; a release of oil and gasoline to soil, case open as of November 2007; and a release of diesel to soil, case-closed March 2005.
AST	Total gallons stored at the site is reportedly 30,082,665 owned by NRG.
San Diego SAM	Listed for four soils-only Voluntary Assistance Program cases from 1950, 1996, 1999, and 2007. Details not provided.

Geosyntec does not believe that the reported entries for the site in the database search report are indicative of recognized environmental conditions (RECs) in the areas at the site planned for disturbance. Rather, the reported database entries appear to be primarily related to the power plant and support facilities which share the approximately 155-acre parcel. Minor incidents were reported for the substation area including transformer leaks in 1998 and 1999. Detailed descriptions of the locations of the incidents were not available.

- To supplement the EDR report for the site, Geosyntec checked publicly available environmental databases for listings associated with the Encina Switchyard, including: the California State Water Resources Control Board's online database *GeoTracker*, the Department of Toxic Substances Control's online database *Envirostor*, and the California Department of Conservation's Division of Oil, Gas, and Geothermal Resources online database *DOGGR*. Four San Diego County, Department of Environmental Health (DEH) cases are listed in the GeoTracker and Envirostor databases for the site address; however, the cases appear to be related to fuel oil and diesel fuel releases in the tank farm area located northeast of the substation area. Information related to RECs affiliated with the planned areas of disturbance was not identified.

- Geosyntec submitted file review request forms to the DEH, the San Diego Regional Water Quality Control Board (RWQCB), the City of San Diego Building Department, California Department of Toxic Substances Control (DTSC), and the United States Environmental Protection Agency (USEPA). To date, files have not been received.
- Historical aerial photographs (aerials) and 7.5 minute topographic maps (topos) of the site vicinity were reviewed to assess historical activities at the site. Aerials obtained from EDR were reviewed including aerials from 1939, 1947, 1953, 1963, 1974, 1990, 1994, 2002, and 2005 (Attachment B). Topos obtained from EDR were reviewed including topos from 1901, 1904, 1947, 1949, 1968, 1975, and 1997 (Attachment C). Based on the aerials and topos reviewed, in 1939 the site was formerly part of Agua Hedionda Lagoon which included an inlet extending southeast through the current location of the substation. The site vicinity was cleared land between the existing railroad corridor and Pacific Coast Highway. By 1953, construction of the existing power plant is evident, including the backfill of the southern portion of the lagoon. In 1963, the substation is visible and the power plant appears operational including three existing high-capacity fuel tanks north east of the substation. In 1974, three additional high-capacity fuel tanks are visible northeast of the substation, across the railroad tracks. With the exception of additional storage tanks northeast of the substation, the site appeared similar to its current configuration by 1990.

Interview of Occupant Representative

An interview was conducted by Mr. Douglas Baumwirt, PG and Mr. Veryl Wittig, PG of Geosyntec on 3 September 2010 with Mr. Dan McCullough of SDG&E. During the interview, questions were asked regarding site use and conditions, typical of a Phase I ESA interview in accordance with ASTM E 1527-05.

Mr. McCullough explained that he has been involved with the property since the 1980s. He indicated that he is familiar with the planned upgrades to the switchyard, and that the area planned for disturbance has been used as a substation and staging area since the property was developed in the early 1950s, and that much of the existing equipment is original from construction. However, transformers and circuit breakers in the yard have been upgraded to non-PCB containing oil transformers and gas-filled circuit breakers. When asked about any known environmental incidents, Mr. McCullough described an incident where mineral oil leaked from an overheated circuit breaker and that minor soil excavation was performed to clean up the release. However, he did not believe that residual impacts to soil remain as a result of that release.

When asked about the presence of hazardous materials or petroleum hydrocarbons nearby the area planned for disturbance, Mr. McCullough indicated that the only hazardous materials he is aware of in the immediate vicinity of the area of disturbance includes fuel oil in the backup supply lines that traverse the central portion of the switchyard. However, he explained that he is aware of a designated hazardous waste staging area is located west of the switchyard near the power plant, and that the most typical hazardous material stored there is paint. Mr. McCullough also mentioned that a fuel tank farm is located northeast of the switchyard; but that he does not believe that the switchyard area has been

affected by a release from that area. Additionally, he indicated that no groundwater monitoring wells are located in the switchyard area.

Site Reconnaissance

Mr. Douglas Baumwirt, PG and Mr. Veryl Wittig, PG of Geosyntec conducted a site reconnaissance of the site on 3 September 2010. The site reconnaissance included a walking and driving visual inspection of the site and accessible adjoining properties escorted by Mr. Dan McCullough. Site features are highlighted on Figure 2, and photographs taken during the reconnaissance are presented in a photo-log as Attachment D to this letter report.

The site was observed as an operating switchyard. Adjoining land use was the existing power plant to the west, SDG&E staging yard to the south, parking to the north, backup fuel tanks to the northeast, and a staging yard and railroad corridor to the east.

During the reconnaissance, the areas planned for disturbance within the switchyard appeared to be maintained in good condition. The ground surface was gravel except where concrete pads are located to mount electrical equipment. The planned access roads were paved with asphalt and appeared to be in good condition. The planned vehicle parking and material storage area was observed outside the existing switchyard and was unpaved and did not contain equipment or materials at the time of the reconnaissance. However, above ground fuel and steam lines were observed traversing the western side of the staging area, which then turn toward the power plant traversing the central portion of the switchyard area. The fuel and steam lines appeared to be in fair condition with no observed leaks or damage. Based on observations and the age of the pipelines, it is likely that the insulation wrapping the pipelines contain asbestos. Geosyntec understands that SDG&E plans to relocate the pipelines during upgrades at the site. Therefore, prior to disturbance of the existing pipelines, an asbestos survey should be conducted to assess the potential asbestos content within the pipelines and insulation in accordance with applicable regulations.

A small open excavation (approximately two cubic yards, and 2 feet deep) was observed nearby a transformer pad in the vicinity of the area planned for disturbance within the switchyard. The excavation appeared to be related to a subsurface electrical connection repair. Discolored soil was not observed in the spoils pile or sidewalls and bottom of the excavation.

A hazardous waste staging area was observed east of the switchyard outside the planned area of disturbance. The staging area appeared to be in good condition and free from obvious environmental conditions. At the time of the reconnaissance, the staging area contained one 55-gallon drum within secondary containment and labeled to contain paint waste, and three upside down 5-gallon used paint buckets on top of a secondary containment pallet.

Two transformers located west of the switchyard were observed with leaks. 5-gallon buckets were located beneath the source of the leak to contain the oil. According to Mr. McCullough, the transformers belong to NRG and contain mineral oil. The ground surface beneath each of the two transformers appeared discolored and extended approximately 5 to 10 feet from the sources; however, the staining appeared to be confined to the recessed transformer containment areas. Furthermore, the

two leaking transformers were located outside of the areas planned for disturbance during planned upgrades at the site for the Sunrise Powerlink.

DATA GAPS

Based on the identified information, it is believed that “data gaps” as defined by ASTM Standard E 1527-05 exist but have not affected the identification of recognized environmental conditions for the planned areas of disturbance at the site for the Sunrise Powerlink. Geosyntec has not received responses to file review requests from some regulatory agencies, the aerial photos and topographic maps were not obtained and reviewed in 5-year intervals dating back to 1940, and reconnaissance for adjoining areas to the switchyard was not performed. However, Geosyntec believes that the identified data gaps are not believed to be significant or material with respect to identification of RECs within the planned areas for disturbance at the site.

FINDINGS

We have performed a Phase I Environmental Site Assessment in conformance with the scope of ASTM Standard E 1527-05 for the approximately 10 acres planned for disturbance at the Encina Switchyard in Carlsbad, California. Any exception to, or deletions from, this practice are described in the Data Gaps section of this Limited Supplement to the Sunrise ESA and/or Section 8.3 Data Gaps of the Sunrise ESA report.

Recognized Environmental Conditions

The EDR report and prior investigations conducted for the Encina Power Plant have identified several RECs associated with the facility. However, based on the available information, there does not appear to be evidence of RECs which would adversely affect the proposed upgrades at the switchyard with the exception of suspected asbestos-containing materials within the existing above-ground piping and insulation that traverses the Encina Switchyard. Geosyntec understands that SDG&E plans to relocate the pipelines during upgrades at the site. Therefore, prior to disturbance of the existing pipelines, an asbestos survey should be conducted to assess the potential asbestos content within the pipelines and insulation in accordance with applicable regulations. Additionally, if the asbestos survey indicates that hazardous concentrations of asbestos exist within the pipelines and/or insulation, then asbestos abatement should be performed by a certified contractor in accordance with applicable regulations prior to relocation of the pipelines.

CONCLUSIONS

Geosyntec has performed this evaluation of the site to supplement the Sunrise ESA because SDG&E is planning to disturb soil at the Encina Switchyard during upgrades for the Sunrise Powerlink. Based on a supplemental ground reconnaissance and database search, it appears that no evidence of recognized environmental conditions was identified for the areas planned for disturbance at the site with the exception of suspected asbestos-containing building materials associated with above-ground pipelines that traverse the site.

The Sunrise ESA and this Limited Supplement were prepared in accordance with the scope of work, terms and conditions described in Geosyntec's proposal dated 1 May 2009 and e-mail dated 24 August 2010, respectively. The scopes of work followed guidance contained in the ASTM Standards E 1527-05, *Standard Practice for Environmental Assessments: Phase I Environmental Site Assessment Process*.

I declare that, to the best of my professional knowledge and belief that I meet the definition of Environmental Professional as defined in §312.10 of 40 C.F.R. 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

Sincerely,
Geosyntec Consultants,

for
Veryl Wittig, PG, CHG
California Professional Geologist No. 7115

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2010 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>BURROUGHS CORP (UNISYS)</i>	<i>5600 AVENIDA ENCINAS</i>	<i>SE 1/2 - 1 (0.800 mi.)</i>	<i>45</i>	<i>117</i>

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2010 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENCINA METER SET	4620 CARLSBAD BLVD	W 0 - 1/8 (0.084 mi.)	B37	81

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 08/09/2010 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 07/23/2010 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

HIST UST: Historical UST Registered Database.

A review of the HIST UST list, as provided by EDR, and dated 10/15/1990 has revealed that there is 1 HIST UST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SDGE NORTH COAST OPERATING DIS	5016 CARLSBAD BLVD	S 1/8 - 1/4 (0.211 mi.)	C40	88

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are

EXECUTIVE SUMMARY

2 SWEEPS UST sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Other Ascertainable Records

Notify 65: Notify 65 records contain facility notifications about any release that could impact drinking water and thereby expose the public to a potential health risk. The data come from the State Water Resources Control Board's Proposition 65 database.

A review of the Notify 65 list, as provided by EDR, and dated 10/21/1993 has revealed that there is 1 Notify 65 site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>WESELOH CHEVROLET</i>	<i>5335 PASEO DEL NORTE</i>	<i>SE 1/2 - 1 (0.557 mi.)</i>	<i>43</i>	<i>98</i>

HWP: Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

A review of the HWP list, as provided by EDR, and dated 08/09/2010 has revealed that there is 1 HWP site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Description: Contactor taking sand off of the off shore hoses and a pinhole leak was discovered. Hose is 12 inches in diameter. The diver put finger over the hose and vacuum was put on the submerged hose stopping the leak. Leak is in the process of being repaired. Diesel went to the surface creating a small sheen which dispersed.

CA WDS:
 Facility ID: San Diego 000000092
 Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
 NPDES Number: CA0001350 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
 Subregion: 9
 Facility Telephone: 7602684026
 Facility Contact: SHEILA HENIKA
 Agency Name: CABRILLO POWER 1 LLC
 Agency Address: 4600 CARLSBAD BLVD
 Agency City,St,Zip: CARLSBAD 92008
 Agency Contact: GREGORY HUGHES
 Agency Telephone: Not reported
 Agency Type: Private
 SIC Code: 4911
 SIC Code 2: Not reported
 Primary Waste: Cooling Water: Contact
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Secondary Waste: Process Waste (Waste produced as part of the industrial/manufacturing process)
 Secondary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Design Flow: 860
 Baseline Flow: 434
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.
 Complexity: Category A - Any major NPDES facility, any non-NPDES facility

NPDES

S104156526
N/A

Site 18 of 36 in cluster A

Actual:
29 ft.

WMUDS/SWAT:
 Edit Date: Not reported
 Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.
 Primary Waste: Cooling Water: Noncontact
 Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
 Secondary Waste: Process Waste (Waste produced as part of the industrial/manufacturing process)
 Secondary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

CAMDBS (Clean Air Markets Division Business System) is a national information system that supports the implementation of market-based air pollution control programs administered by the Clean Air Markets Division, within the Office of Air and Radiation. These programs include the Acid Rain Program, established by Title IV of the Clean Air Act Amendments of 1990, and regional programs designed reduce the transport of ozone. These emissions trading programs allows regulated facilities (primarily electric utilities) to adopt the most cost-effective strategies to reduce emissions at their units. Units that reduce their emissions below the number of allowances they hold -- each allowance is equivalent to one ton of sulfur dioxide or nitrogen oxides -- may trade allowances with other units in their system, sell them to other utilities on the open market or through EPA auctions, or bank them to cover emissions in future years. CAMDBS functions include registering responsible officials, establishing allowance accounts, reporting hourly emissions data, and transferring allowances between accounts.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.

US National Pollutant Discharge Elimination System (NPDES) module of

the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US Facility Response Plan (FRP) contains plans for responding, to the maximum extent practical, to worst case discharges of oil.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Corrective Action Summary:

Event date:	05/28/1987
Event:	Stabilization Measures Implemented, Groundwater extraction and treatment (e.g., to achieve groundwater containment, to achieve MCL).
Event date:	09/30/1987
Event:	RFA Completed
Event date:	09/29/1988
Event:	CA049PA
Event date:	11/10/1988
Event:	CA049RE
Event date:	11/10/1988
Event:	CA Prioritization, Facility or area was assigned a medium corrective action priority.
Event date:	11/10/1988
Event:	CA074ME
Event date:	11/10/1988
Event:	CA029WQ
Event date:	04/30/1990
Event:	Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Facility Status: This facility recieved ISD 3/30/81 but never recieved permit and went to closure. This facility was clean closed on 2/24/89. For corrective action, WB was the lead agency. DTSC involvement was limited. There was an RFA conducted by USEPA on 6/2/87. Additional RFA was conducted on 5/21/96. The 1996 RFA suggested additional investigation of former SWMUs. However, since WB was lead, the investigation was deferred to WB. There are no additional CA information in file.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2010	Source: EPA

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/07/2010	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 06/18/2010	Telephone: 202-307-1000

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 02/17/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/19/2010	Telephone: (415) 495-8895

	Data Release Frequency: Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 01/05/2009	Source: Department of Energy
Date Data Arrived at EDR: 05/07/2009	Telephone: 505-845-0011

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

Number of Days to Update: 41	Next Scheduled EDR Contact: 09/27/2010
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Date of Government Version: 12/31/2009	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 07/07/2010	Telephone: 916-255-1136

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Historical Auto Stations: EDR Proprietary Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007	Source: Department of Environmental Protection
Date Data Arrived at EDR: 08/26/2009	Telephone: 860-424-3375

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

USGS TOPOGRAPHIC MAP

Target Property Map:	33117-B3 SAN LUIS REY, CA
Most Recent Revision:	1997

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> SAN DIEGO, CA	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	06073C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> SAN LUIS REY	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MARINA

Soil Surface Texture: loamy coarse sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy coarse sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
2	9 inches	57 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
3	57 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: LAKES AND LAGOONS

Soil Surface Texture: loamy coarse sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: TERRACE ESCARPMENTS

Soil Surface Texture: variable

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	59 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 4

Soil Component Name: COASTAL BEACHES

Soil Surface Texture: coarse sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 92 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 42	Max: 7.8 Min: 5.1
2	5 inches	59 inches	coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 42	Max: 7.8 Min: 5.1

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

ATTACHMENT D - SITE PHOTOGRAPHS

SITE: Encina Switchyard, Carlsbad, California
DATE: Site visit conducted on 3 September 2010

PHOTOGRAPH 1:

View: Looking southwest from the northeast portion of the Encina Switchyard.

Photo shows the substation and buffer area. The Encina Power Plant is seen in the background.

PHOTOGRAPH 2:

View: Looking west from the eastern portion of the Encina Switchyard.

Photo shows the southern portion of the area planned for disturbance.

ATTACHMENT D - SITE PHOTOGRAPHS

SITE: Encina Switchyard, Carlsbad, California
DATE: Site visit conducted on 3 September 2010

PHOTOGRAPH 3:

View: Looking north along the eastern side of the Encina Switchyard.

Photo shows the planned vehicle parking and material storage area for the upgrades at the Encina Switchyard.

PHOTOGRAPH 4:

View: Looking northeast from east of the Encina Switchyard.

Photo shows the asphalt paved access roads planned for use during upgrades at the Encina Switchyard.

ATTACHMENT D - SITE PHOTOGRAPHS

SITE: Encina Switchyard, Carlsbad, California
DATE: Site visit conducted on 3 September 2010

PHOTOGRAPH 5:

View: Looking east from the central portion of the Encina Switchyard.

Photo shows the existing substation equipment on concrete pads.

PHOTOGRAPH 6:

View: Looking east from the southern portion of the Encina Switchyard.

Photo shows an open area within the Encina Switchyard planned for upgrades.

ATTACHMENT D - SITE PHOTOGRAPHS

SITE: Encina Switchyard, Carlsbad, California
DATE: Site visit conducted on 3 September 2010

PHOTOGRAPH 7:

View: Looking east from the western portion of the Encina Switchyard.

Photo shows fuel oil and steam pipelines that traverse the Encina Switchyard.

PHOTOGRAPH 8:

View: Western portion of the Encina Switchyard.

Photo shows elbows in the fuel oil and steam pipelines. Based on the observed fibrous insulation material and age of the pipelines, it is likely that the pipe insulation contains asbestos.

ATTACHMENT D - SITE PHOTOGRAPHS

SITE: Encina Switchyard, Carlsbad, California
DATE: Site visit conducted on 3 September 2010

PHOTOGRAPH 9:

View: Looking east from the central portion of the Encina Switchyard.

Photo shows an approximately 2 cubic yard spoils pile and excavation to uncover existing electrical lines. No discolored soil was observed in the spoils pile or excavations sidewalls or bottom.

PHOTOGRAPH 10:

View: West of the Encina Switchyard near the Encina Power Plant.

Photo shows a hazardous waste staging area including labeled containers of waste paint in secondary containment.

ATTACHMENT D - SITE PHOTOGRAPHS

SITE: Encina Switchyard, Carlsbad, California
DATE: Site visit conducted on 3 September 2010

PHOTOGRAPH 11:

View: Looking north along the east side of the Encina Switchyard.

Photo shows a drainage area with vegetation. No indications of stressed vegetation were observed. The planned vehicle parking and material storage area is seen in the background.

PHOTOGRAPH 12:

View: Looking south from the southeast portion of the Encina Switchyard.

Photo shows a drainage course for site runoff. No significant staining was observed.

ATTACHMENT D - SITE PHOTOGRAPHS

SITE: Encina Switchyard, Carlsbad, California
DATE: Site visit conducted on 3 September 2010

PHOTOGRAPH 13:

View: Looking northeast from west of the Encina Switchyard.

Photo shows one of two NRG-owned transformers with leaks. The leaking transformers reportedly contain non-PCB-containing mineral oil and lie outside the areas planned for disturbance.

PHOTOGRAPH 14:

View: Looking north from west of the Encina Switchyard.

Photo shows one of two NRG-owned transformers with leaks. The leaking transformers reportedly contain non-PCB-containing mineral oil and lie outside the areas planned for disturbance.
