Sub: Comments to the Sunrise Powerlink Project Recirculated Draft EIR /
Supplemental Draft EIS

Starlight Mountain Estates Owners (SMEO) has two specific comments related
to the Sunrise Powerlink Project RDEIR/SDEIR:

- 1) SMEO is pleased to see that their Oak Hollow Road Underground Alternative is now being identified as a part of both the Environmentally Superior Northern Alternative and the SDG&E Enhanced Northern Route. The Oak Hollow Road Underground Alternative is much more desirable than the original SDG&E Overhead section, which was originally identified through our community.
- 2) SMEO has reviewed the Sunrise Powerlink Project Recirculated Draft EIR / Supplemental Draft EIS, and we believe that there is a typographical error repeated several times on some of the maps and Figures. We found that the map routing key on the bottom of several figures says "Oak Hollow Road Alternative, Overhead Portion", when it is called "Oak Hollow Road Underground Alternative" in the text of both the RDEIR/SDEIS and the DEIR/DEIS. We're concerned that this causes confusion as to the intent of the Oak Hollow Road Alternative. There is no "Overhead Portion" in the Alternative. The original SDG&E route included an "Overhead Portion" through Oak Hollow Road. The specific locations in the RDEIR/SDEIS that contained this error are:
 - a. NOA, Figure 2, Environmentally Superior Northern Alternative and Modified Environmentally Superior Alternative.
 - b. Section 5, Figure 5-1, Environmentally Superior Northern Alternative and Modified Environmentally Superior Alternative.
 - c. Section 5, Figure 5-2, SDG&E Enhanced Northern Route and UCAN Modified Southern Route.

Thank you for continuing to carry forward the Oak Hollow Road Underground Alternative, and we hope that you agree with our conclusion regarding the maps being incorrectly marked.

Sincerely,

Michael Page
Spokesperson for
Starlight Mountain Estates Owners (SMEO)
