

This report provides a summary of environmental monitoring and compliance activities conducted by Burns and McDonnell (BMcD) staff and BMcD subconsultants for the San Diego Gas & Electric (SDG&E) Sunrise Powerlink Project during the above weekly time period.

Training

- SWEAP and PBS training was held for new Project personnel on Tuesday. Additional trainings were provided as requested.
- Flat-tailed horned lizard (FTHL) trainings were provided to any new crew members or monitors prior to construction per mitigation measure B-7b and in accordance with the FTHL Rangeland Management Strategy. During morning tailboard meetings, guidelines were provided about recognizing, protecting, and notification requirements for FTHL. FTHL information cards were made available to any crew members or monitors as needed.

Pre/Post Construction

- Avian biologists surveyed for nesting birds prior to work commencing in inactive areas. For sites off of USFS lands, the results of those surveys were submitted to the CPUC/BLM biologist for review and concurrence. For USFS lands, the results of those surveys were submitted to the USFS for review and concurrence. For any active nests found, a buffer was established and no construction activities were permitted within the buffer area without consultation with the CPUC/BLM/USFS biologist. Active nests were mapped and monitored for success or failure and updated on the nest monitoring log.
- Post construction impact surveys occurred from EP324 to EP341, EP342 to EP363, and at Dunaway Road.
- Additional signs and stakes were repaired as needed. Due to traffic and narrow access roads, broken stakes and run over signs were replaced. Maintenance (e.g., writing over faded signs, reinforcing signs/stakes in the ground, replacing zip ties, and adding additional signs) was performed as needed. The ESA Team conducted the following activities during this reporting period:
 - Repaired, refreshed, replaced, and maintained the previously installed project signs and ESAs at the access road to Thing Valley, McCain Valley Road, EP205 access road to McCain Valley Road, access road to Wilson Yard, Thing Valley Yard, access road to EP90, and access road to Kreutzkamp.

Construction

- Monitors were present during construction activities to ensure compliance with mitigation measures as identified in the Final EIR/EIS Mitigation Monitoring, Compliance, and Reporting Program. Archaeologists, Paleontologists, and Native American Monitors were present at sites where required as identified prior to construction activity and as approved in the NTPs. On average, the following number of monitors were on the Project throughout the week:
 - 108 Biological monitors.
 - 1 Archaeological monitor.
 - 1 Native American monitor.
 - 8 SWPPP monitors.
- Project staff carpooled to site reviews, kick-off tailgates, and off-site meetings. Construction and traffic control crews were observed carpooling from yards to work areas.

- Deterrents were utilized to discourage bird nest building activities throughout the Project. Deterrents are determined depending upon the location and type of possible nesting areas and may include metallic flagging, compact discs, plastic owls, and the presence of biological monitors.
- The table below demonstrates the construction progress to date:

Wildlife Reporting

The following listed or Species of Special Concern were found dead in Project construction limits during this reporting period:

- Coast Horned Lizard (*Phrynosoma coronatum blainvili*) – One (1) coast horned lizard was found dead east of Alpine, south of I-8, and west of Hwy 79.

The following listed or Species of Special Concern were relocated during construction activities this reporting period:

- Coast Horned Lizard (*Phrynosoma coronatum blainvili*) – Two (2) coast horned lizards were relocated; (1) one from EP117-3 and (1) one from Thing Valley Construction Yard.
- California Legless Lizard (*Anniella pulchra*) – Four (4) California legless lizards were relocated from McCain Valley Road on access road between SRPL structures EP171 and EP172.
- Coronado Skink (*Plestiodon skiltonianus interparietalis*) – Eight (8) Coronado skinks were relocated from McCain Valley Road on access road between SRPL structures EP171 and EP172.
- Two-striped Garter Snake (*Thamnonphis hammondi*) – One (1) two-striped garter snake was relocated from Kreutzkamp Yard.

Spills/Hazardous Waste

- Access Road to Kreutzkamp Yard – A PAR street sweeper released approximately 15 gallons of hydraulic oil due to a broken hose. The hydraulic hose used to control the cleaning brushes failed and leaked the entire tank, approximately 15 gallons of hydraulic oil. Most of the spill was along the approved asphalt roadway, a few gallons infiltrated the adjacent dirt road and no sensitive

resources or waterways were affected. Geosyntec HazMat monitors were notified and facilitated the cleanup. PAR's environmental crew and an SDG&E environmental spill representative handled the clean-up. The spill was not near any jurisdictional waters.

Customer Complaints

- A customer complaint was received on May 31, 2012, regarding helicopters flying over a customer's property and an aircraft dropping streaming liquid. Sunrise Flight Operations conducted an investigation into the allegations and found that one aircraft did fly into SDG&E's self-imposed no-fly area on May 30. The investigation into the streaming liquid concluded that it was water utilized for dust suppression activities. All SDG&E and contracted pilots have been advised to honor the no-fly area and to stay as far away from the property as safely possible while conducting the remainder of construction activities. Public Affairs responded to the customer's email and explained the findings of the investigation and informed them of SDG&E's actions. No further action is required at this time.

Non-Compliances

- No non-compliances were received during this reporting period.

Variances and TEWS

- TEWS #38 was approved on May 29, 2012, for extra work space at EP119.

Weather

- No rain events occurred during this reporting period.
- BMPs were installed or maintained as needed throughout Project areas. In accordance with the Construction General Permit (CGP), daily site BMP inspections, and photos, appropriate BMPs for stormwater and non-stormwater were implemented. Any sites requiring repairs began within 72 hours of identification.
