Comment: Returning from Tucson ARIZONA on
FEB 2 Along the 8 to San Diego.
Put the Line Along the Border there are
ALREADY Lines there open space Easy Access and
this is the Best ALternative! How Sad
that the Big Corporations Just want to make
Billions and could care less ABOUT the Impact
on the communities or the environment
the concern is there that if the terrorist want to take
out our Electricity it would be to easy what a joke
that thought is, the fact of the matter is that
if they want to take out our Electricity they will
Do it Anywhere ^{Put it} Along the Border where it ALREADY
Exists. ✓ John B. Greenhalgh

Comment: This line through Anza Borrego State Park WOULD BE A TRAGEDY for the park system, Julian, and our backcountry. It would be a DANGEROUS PRECEDENT of INDUSTRIAL USE of our dedicated parklands. If I can't take a rock from the STATE PARK, why should SOG&E be permitted to put a power line through it?

Comment: _____

It is very clear that SDGE would not be proposing this link if it were not a big money maker for them and their stockholders. Should the CPUC ignore the existence of already available electricity offered SDGE from a competitor with a South Power Station in Chula Vista, And, should the CPCU ignore the facts that more environmentally friendly alternatives exist which SDGE does not pursue, and grant approval to this Powerlink, the Holly Oaks Ranch Community of 90 homes PLEADS that either the I-8 ALTERNATIVE OR THE WEST OF THE FOREST ALTERNATIVE be chosen for the Southwest Powerlink Section of the project. This would not only spare Anza-Borrego and The Cleveland National Forest, but also the 90 family community of Holly Oaks Ranch from the potential hazards and unsightly Powerlink.

We still think, based on evidence presented by stalwart consumer and environmental protection groups, that the best alternative is No Powerlink. However, in lieu of the fact that the Powerlink may be approved, forthcoming will be a petition signed by each family of Holly Oaks in support of the I-8 Alternative.

Please print your name, address, and telephone number in the space provided.

Comment: _____

THE WEST OF SAN VINCENTE UNDERGROUND ALTERNATIVE was rejected due to "greater ground disturbance and its effects on biological resources" and also rejected due to "construction/erosion impacts on steep slopes".

I am suggesting a shorter than proposed route (between markers 122-126) **ABOVE GROUND** (see attached page), which hopefully would avoid the above stated negatives of underground construction and save our community (Holly Oaks) from the unsightly poles and potential health hazards (remember the disaster of Love Canal) of close proximity to surging high voltage.
