**Subject: Opposition to the Modified Route D Alternative**

Dear Ms. Blanchard and Ms. Kastoll,

This letter is a strong voice of objection to the proposed Sunrise Powerlink modified route D alternative. I am a resident of a mountain empire community of San Diego County and enjoy the natural beauty of the back country. We residents are angered by the proposal to site hundreds of 150 foot towers and noisy 500 kilo volt transmission lines across the scenic backdrop of the Cleveland National Forest.

We are proud to live in a quiet rural setting because we value it as a unique place of environmental preserve. This scenic quality and "back in time" feeling is so valuable to us that we sacrifice many amenities available in more urban places. Do not destroy that value by ripping it apart with unsightly power transmission towers and lines.

I urge you to reject the modified route D alternative and all proposals that ruin the natural rural treasure of Jacumba, Boulevard, Campo, Potrero, Descanso, Pine Valley and Alpine.

Sincerely,

Doris Lane
