RE: Sunrise Powerlink- Modified Route D Alternative – Written Comments

As a Potrero property owner, I am very concerned about plans to construct the Sunrise Powerlink Modified Route D through the Potrero area and backcountry. It seems that local Potrero residents and property owners are being ignored in favor of other, more influential or wealthier ratepayers. This powerline has no business going through the Potrero area. Obviously there would be significant disruption of wildlife, including endangered species along with their habitat. Powerlines in this extremely windy location would create an even greater fire danger than already exists. I urge you to upgrade or modify existing towers and lines rather than destroying still more unspoiled wilderness.

Sincerely,

A handwritten signature in cursive script that reads "Dania Raum". The signature is written in black ink and is positioned below the word "Sincerely,".
