**Letter from J. & S. Beattie dated March 29, 2004**

March 29th 2004

J. & S. Beattie  
22841 Briarcliff  
Mission Viejo  
Ca. 92692

To whom it may concern,

I attended the pre-hearing conference on the application for a permit to construct new above ground voltage towers in the city of Mission Viejo Ca. 92692.

**To be concerned about the project would be a mis-understatement!!**

In this day of environmental awareness (and I'm not a green head).  
I was Very Disappointed in to conclude it's all about SCE and profit's.

SCE forgot to explain that the new overhead power is for various other new communities being developed around Mission Viejo.

I fully understand/expect that service to these new area's needs to be provided by SCE through the Mission Viejo easements. But, would duly expect SCE to stand up to the plate and place ALL EXISTING and newly Proposed improvements/upgrade's underground.

A point to mention:

The city mayor & the elected city council fully oppose this construction.  
PLEASE DON'T FIGHT CITY HALL as you might need them on your side one day.

12-1

12-1 Thank you for your comment. Please see General Response GR-3 regarding undergrounding, as well as Appendix 8 which discusses alternative routes considered by the CPUC.
