**Subject:** Viejo System Project

Michael Rosauer:

I received the printed package of the proposed Mitigated Negative Declaration and supporting Initial Study today on my front porch. I have been daily watching the designated web site to see if the document had been update. From the recorded phone message on you message machine it would appear that this document was available on March 3, 2004. The web site as noted in your March 2004 document only displays the old material--not the new document I received today.

29-1

Would you please have your team upload the new document as a number of citizens would like to review the document on line. Frank Ury is in Japan, and Richard Schweinberg is in Okalahoma and would only have access to the document on line.

Thank you--see you at the pre hearing on March 25, 2004.

**Response to Comment Set 29**  
**Email from Joe Holtzman dated March 10, 2004**

29-1 The CPUC's CEQA contractor, Aspen Environmental Group, responded that the public review period was March 10 through April 9, 2004, with further updates available at: <http://www.cpuc.ca.gov/Environment/info/aspen/viejosystem/viejosystem.htm>. The document became available for public review on March 10, 2004.
