**Subject:** POWER LINES

This is reponse to edison wanting to add lines, they have put them under ground else where, I see know reason why that cannot do the same for us. Increasing lines in our area only decreases our quality of living. I will be at the meeting to help make this happen.

39-1 Thank you for providing your opinion. Please see General Response GR-3 for information regarding the undergrounding of electrical transmission lines, as well as Appendix 8, which discusses various route options considered by the CPUC.
