

Michael Clayton & Associates

A visual simulation of the proposed project from Key View Point 5 at a residence on Sweet Meadow, southeast of the proposed Tower HF-03 location. This view is to the northwest toward proposed tower locations HF-03 (closest), -04, and -05. As shown in the simulation, with the proposed increase in height and the more structurally complex H-Frame design with horizontal cross-members, the proposed structures would be noticeably more prominent than the existing single-pole towers that are to be replaced.
