This image presents a **Visual Simulation** of the Proposed Project from **KOP 12**, at the **Morongo Community Center**. This simulation illustrates the replacement of three existing transmission lines of different design and size, with two, slightly more distant TSP transmission lines of identical design. The new structures would be similar in height to the tallest existing lattice structures, but they would appear shorter and more numerous when viewed from the Community Center, owing to their greater viewing distance and the ROW alignment.
