Subject: *Minor Project Refinement Request (MPRR) #3 -- Addition of a Water Source for Construction, Wilson Pond Facility -- Cleveland National Forest Power Line Replacement Projects (Application No. 12-10-009)*

Dear Ms. Reynolds:

On January 18, 2017, San Diego Gas & Electric Company (SDG&E) submitted Minor Project Refinement Request (MPRR) #3 to the California Public Utilities Commission (CPUC) requesting to add the Wilson Pond Facility as an additional source of construction water for the Project, as described in the MPRR. In order to gain additional information about the proposed refinement, the CPUC prepared and submitted Data Request #3, dated February 8, 2017, to which SDG&E responded on March 18, 2017.

The CPUC voted on May 26, 2016 to approve the Cleveland National Forest Power Line Replacement Projects (Decision 16-05-038) and a Notice of Determination was submitted to the State Clearinghouse (SCH#2013091070).

The Commission decision approving the Permit to Construct (PTC) authorizes Energy Division staff to approve requests by SDG&E for minor project refinements. The decision states that minor project refinements that may be necessary due to final engineering of the project may be approved so long as such minor project refinements are located within the geographic boundary of the study area of the Environmental Impact Report/Environmental Impact Statement (EIR/EIS) and do not, without mitigation, result in a new significant impact or a substantial increase in the severity of a previously identified significant impact based on the criteria used in the EIR/EIS; conflict with any mitigation measure or applicable law or policy; or trigger an additional permit requirement.

This letter documents the CPUC's thorough evaluation of all activities covered in MPRR #3 and that the changes requested in MPRR #3 are allowed pursuant to the Commission decision issuing the PTC. In accordance with the Mitigation Monitoring, Compliance, and Reporting Program, MPRR #3 was reviewed by CPUC to confirm that no new impacts or increase in impact severity would result from the requested activities.

MPRR#3 is approved with the following conditions:

- MM HYD-2a: SDG&E shall update the Water Supply Plan and provide to the CPUC prior to using the new water source.

Ms. Kirstie Reynolds
