

## LASSEN SUBSTATION PROJECT FINAL IS/MND ERRATA

### Introduction

The California Public Utilities Commission published the Final Initial Study/Mitigated Negative Declaration (IS/MND) for the Lassen Substation Project on June 19, 2017. Following publication, minor errors were identified. This errata item clarifies existing text in the Final IS/MND and does not raise new important issues or potentially significant effects to the environment. This change is not a substantial revision as defined in Section 15073.5(b) of the California Environmental Quality Act Guidelines, and therefore, does not require recirculation.

### Errata Item

The following errata item provides clarification regarding timing of construction activities within the City of Mount Shasta. Revisions to text in the Final IS/MND are presented in underline (signifying an addition).

Page 4-28: The following sentence has been added to Section 4.7, Construction Schedule:

Work within the City of Mount Shasta would be limited to the hours between 7:00 a.m. and 5:00 p.m. on weekdays.

Page 5.12-8: The regulatory setting has been updated to include the following:

It should be noted that the Mount Shasta General Plan explicitly excludes construction noise for noise thresholds. Specifically, Policy NZ-1.8(c) states (City of Mount Shasta 2007):

NZ-1.8(c): Noise associated with construction activity between the hours of 7 a.m. and 5 p.m. shall be exempt from the standards cited in Table 7-5 [of the Noise Element]. Construction activity outside of this period may exceed the cited standards if an exemption is granted by the City to cover special circumstances.

Page 5.12-13 has been updated as follows to ensure the analysis in Section 5.12.5(d) is consistent with Section 5.12.5(a):

Construction activities in proximity to residential areas would occur between 7:00 a.m. and 5:00 p.m.
