Subject: San Diego Gas & Electric Mira Sorrento Substation Project Application for a Permit to Construct (Application No. 11-10-015) – Data Request No. 2

Dear Ms. Wrazen:

The California Public Utilities Commission (CPUC) requests additional information in support of the Mira Sorrento Substation Project. Please provide information requested in Attachment A regarding the circuit that crosses Interstate 805. We would appreciate your response by August 3, 2012 or sooner.

If you have any questions regarding this letter or need additional information, please contact me at 415.703.2579 or michael.rosauer@cpuc.ca.gov.

Sincerely,

Michael Rosauer
Energy Division
California Public Utilities Commission

ATTACHMENT A
Data Request No. 2
Mira Sorrento Substation Project

Project Description

1. Regarding circuit (C) 1444 crossing Interstate 805 (I-805), according to Caltrans there is a planned circuit crossing I-805 at a center line station approximately 1,100 feet northwest of the Mira Mesa undercrossing. Caltrans has no records for SDG&E rights in this area and believes that this is a new crossing of the freeway. Based on the PEA pages 3-17 and 3-18, it states that C1444, will be routed from the second manhole outside the Substation underground westerly on Vista Sorrento Parkway to existing overhead pole located between Directors Place and Vista Sorrento Parkway. New overhead conductor will be installed on existing poles crossing the I-805 freeway. Please clarify whether the proposed crossing is a new crossing.
