Rica:

In response to your correspondence:

- At full build out, ESJ is anticipated to generate approximately 1000MW of power from wind energy.
- The project will be built in multiple phases, with Phase I (Jacume phase) to be constructed just north of the town of La Rumorosa, Mexico. Construction of Phase I is scheduled to commence in 2011 and be completed in 2012. This phase is expected to have 45 to 52 wind turbines, generating a total of over 100MW.
- Subsequent phases are anticipated to initiate operations approximately yearly thereafter.
- Meteorological studies to determine wind speeds and other information for the development of subsequent phases has been initiated. Currently, Phase II is anticipated to be located approximately 30 miles south of the Mexico-US border. Attached you will find a map showing the approximate location.
- ESJ has 3 interconnection requests before the CAISO, totaling 1120MW. The status of the interconnection requests is as follows:
 - Queue 159a – 400 MW – Final Interconnection Study completed. Draft Interconnection Agreement provided for review. Currently anticipate signing the IA in April, 2010.
 - Queue 183 – 300MW – In Transition Cluster. Interconnection Study is anticipated to be completed July 2010. The Interconnection Agreement is anticipated to be completed in December 2010.
 - Queue 215 – 420MW – In Transition Cluster. Interconnection Study is anticipated to be completed July 2010. The Interconnection Agreement is anticipated to be completed in December 2010.

Should you have any additional questions, please do not hesitate to contact me.

Subject: ECO Substation_Wind Project Questionnaire

Hello Alberto,

Thank you for taking the time to speak with me today .

I've attached the CPUC letter requesting information regarding Rumorosa Wind Energy Project / Engeria Sierra Juarez, Phases I-V. If you can provide the requested information by January 22, 2009 (or sooner if possible) it would be extremely helpful.

If you have any questions do not hesitate to contact me.

Thank you,

Rica Nitka
Project Manager
