

JAN 25 2011

Dec 21 2011

To: Cain Fisher / Greg Thomsen, et.

I am a resident of Boulevard Ca 91905. I live at 39519 Avenida de Robles Verdes, Boulevard Ca. I bought in 2002. I was then diagnosed with ovarian cancer. I am having problems with my ears. The doctors say it isn't related to ovarian cancer.

I want to spend my remaining years... here in Boulevard.

The doctors say they aren't sure what is wrong with my ears, so they gave me some medicine.

I am against the wind turbines in the Boulevard area. There is a lot of land, other than Boulevard that these could be placed.

In Boulevard we have a Volunteer Fire Dept these are a well known health and fire hazard.

A lot of people up here are older and to have a fire up here would require that they be uprooted and maybe lose their homes to fire.

Please stop this wind turbine from coming to our neighbor hoods and making our lives exposed. these

health problems and noise levels
will affect everyone up here.

the low hum of the wind turbines
by the Acorn Casino, is constant!
when the wind blew them apart
fiber glass was blown all over
surrounding properties.

Renewable energy is the thing of
the future for our country.

But there are mountains that are farther
away than McCan Valley, Jacumba
Mesa Valley, Dark Head Springs and
else where, which would suit this
energy program better! Why make

us sick from the magnetic energy
field which is generated from these
turbines.

Please listen to the people of our
community, that don't want this here!

What about the area out by the
look out, past Intopa? those mountains
are secluded and it is very windy there.
As a property owner, a 2 1/2 Cancer
Survivor and Tax payer, Find a
location less populated to put this
energy project.

Thank you for reading my letter
