I support the Tule Wind Power Project for a few reasons. The main reason I support the Tule Wind Power Project is that it will boost the local economy that has been dead for years. This project will boost the economy not only here but around the country. From making turbine parts and towers for the windmills to the local businesses that drill for well water. Our community needs this project to move forward to help our local families obtain jobs to care for their families and get off the crutch of the government. In my opinion only good can come from pushing this project forward. Thank you for taking the time to read my comment and thank you in advance for giving birth to the Tule Wind Power Project.

Ed. Fleming
