RE: Determination of Completeness, Southern California Edison's Application for a Certificate of Public Convenience and Necessity (CPCN) to Construct and Operate the Alberhill System Project.

Dear Ms. Marona:

On September 30, 2009, Southern California Edison Company (SCE) submitted Application 09-09-022, along with a Proponent's Environmental Assessment (PEA), seeking authorization to construct and operate the Alberhill System project.

Along with the supplemental data and information submitted by SCE, the Energy Division of the California Public Utilities Commission (Commission) has determined that the above-referenced Application/PEA contains sufficient information to satisfy the requirements of the Commission's Information and Criteria List. Based on this determination, the Energy Division finds that SCE's Application/PEA can now be deemed complete.

Please note that this determination has been made with the understanding that the Energy Division may request additional data, as necessary, to complete its analyses of the possible environmental effects of the project in accordance with requirements of the California Environmental Quality Act.

Please do not hesitate to call me at (415) 703-5484 if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Jensen Uchida".
