DATA REQUEST SET A1503003 ED-SCE-08

To: ENERGY DIVISION
Prepared by: Scott Lacy, on behalf of John Le
Title: GIS Specialist
Dated: 07/15/2016

Question 01:

SCE made comments that on the Draft EIR that updated several items in the EIR Project Description. Provide GIS data that shows updated project components provided in SCE's comments on the Draft EIR including:

1. All TSP, LWS poles, LST, and wood poles
2. 66-kV subtransmission structures
3. Underground trenches and vaults
4. Manholes
5. Duct banks
6. Existing and proposed driveways at the Mesa Substation
7. Temporary structures and components
8. Permanent and temporary impact areas

Response to Question 01:

In response to this question, SCE has prepared an updated GIS data file (MPK file type) that reflects the most current design information, including the specific items listed in the initial question. If needed, SCE would welcome the opportunity to review this data file with the CPUC or its environmental consultant to ensure a common and accurate understanding of the schema used and terminology selected for various project features.
