Notes:  
**Bold** values indicate roadway segments operating at LOS E or F.  
(a) within the County of San Diego  
(b) Existing roads street classification is based field observations conducted in August 2015 to the applicable jurisdiction's roadway standards.  
(c) Average Daily Traffic (ADT) volumes for the roadway segments were provided by National Data & Surveying Services to measured in August 2015.  
(d) The v/c Ratio is calculated by dividing the ADT volume by each respective roadway segment's capacity.

**APPROXIMATE VEHICLE TRIP INCREASES ON PUBLIC ROADWAYS

Notes:  
**Bold** values indicate roadway segments operating at LOS E or F.  
(a) within the County of San Diego  
(b) Existing roads street classification is based field observations conducted in August 2015 to the applicable jurisdiction's roadway standards.  
(c) Average Daily Traffic (ADT) volumes for the roadway segments were provided by National Data & Surveying Services to measured in August 2015.  
(d) The v/c Ratio is calculated by dividing the ADT volume by each respective roadway segment's capacity.  
(e) ADT determined by adding the estimated construction trip generation to the existing adt  
Construction Trip Generation based on the assumption that there will be 600 personnel in four separate crews (150 workers per site) and 413 truck trips at the four sites (104 truck trips per site). Both the workers and the trucks are assumed to have 1 trip in and one trip out per day.  
(f) Based on Jurisdiction Traffic Impact Analysis Guidelines

**TEMPORARY CONSTRUCTION IMPACTS (w lane closures)

Notes:  
**Bold** values indicate roadway segments operating at LOS E or F.  
(a) within the County of San Diego  
(b) Existing roads street classification is based field observations conducted in August 2015 to the applicable jurisdiction's roadway standards.  
(c) Average Daily Traffic (ADT) volumes for the roadway segments were provided by National Data & Surveying Services to measured in August 2015.  
(d) The v/c Ratio is calculated by dividing the ADT volume by each respective roadway segment's capacity.  
(e) Construction includes construction traffic and the closure of one lane on each roadway segment  
(f) ADT determined by adding the estimated construction trip generation to the existing ADT. Construction Trip Generation based on the assumption that there will be 600 personnel in four separate crews (150 workers per site) and 413 truck trips at the four sites (104 truck trips per site). Both the workers and the trucks are assumed to have 1 trip in and one trip out per day.  
(g) Based on Jurisdiction Traffic Impact Analysis Guidelines
