**BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF CALIFORNIA**

In The Matter of the Application of SAN DIEGO GAS
& ELECTRIC COMPANY (U 902 E) for a Permit to
Construct The TL 6975 San Marcos to Escondido Project

Application 17-11-_____

**APPLICATION OF SAN DIEGO GAS & ELECTRIC COMPANY (U 902 E)
FOR A PERMIT TO CONSTRUCT THE TIE LINE (TL) 6975 SAN MARCOS TO
ESCONDIDO PROJECT**

I. INTRODUCTION

Pursuant to General Order (GO) 131-D, the California Environmental Quality Act (CEQA), the California Public Utilities Code, and the Rules of Practice and Procedure of the California Public Utilities Commission (Commission), San Diego Gas & Electric Company (SDG&E) files this Application (Application) for a Permit to Construct (PTC) the Tie Line (TL) 6975 San Marcos to Escondido Project (Proposed Project). As set forth in the accompanying Proponent’s Environmental Assessment (PEA), the primary objective of the Proposed Project is to eliminate North American Electric Reliability Corporation (NERC) Category P0 (Cat A) and Category P1 (Cat B) violations on tie-line (TL) 680C (San Marcos–Melrose Tap) and TL 684 (Escondido to San Marcos), to eliminate the existing congestion in the Escondido/San Marcos area, and to improve reliability by providing an additional feed to the existing San Marcos Substation. A complete project description is included in Chapter 3 of the PEA, which is Volume II of this Application. The PEA will be referenced in this Application pursuant to GO 131-D, Section IX.B.1.e.¹

¹ Other required information for a PTC application under the Commission’s Rules of Practice and Procedure are contained in this Application or its appendices.

II. SUMMARY OF REQUEST

SDG&E submits this Application requesting that the Commission, upon completion of its review of this Application, issue and certify an appropriate environmental document, and if no protests or requests for hearing are received (pursuant to G.O. 131-D, Section XII), issue an expedited *ex parte* decision on the application granting SDG&E a PTC authorizing SDG&E to construct the Proposed Project set forth in this Application, PEA and the accompanying documents within the proposed timelines set forth in Section IV.A.4.d of this Application.

III. PROJECT BACKGROUND

A. Project Site

The Proposed Project site is located in San Diego County, California, within the cities of Carlsbad, Escondido, San Marcos, and Vista as well as unincorporated San Diego County. Additionally, the Proposed Project has an existing auxiliary staging yard in the City of San Diego that may be utilized for the Proposed Project. Two poles will be removed from service and two poles will have overhead work on the border of the City of San Marcos and the City of Vista. The Proposed Project location is discussed in more detail in Chapter 3, *Project Description*. The Proposed Project travels a total of 12.0 miles from San Marcos Substation to Escondido Substation and includes acquiring a minimal amount of new right-of-way (ROW).

B. Project Objectives

The fundamental objectives of the Proposed Project include the following:

- Objective 1: Eliminate North American Electric Reliability Corporation (NERC) Category P0 (Cat A) and Category P1 (Cat B) violation on TL 684 (Escondido to San Marcos) and 680C (San Marcos–Melrose Tap);
- Objective 2: Meet mandatory NERC reliability criteria in the Escondido Area Load Pocket and alleviate the existing 69 kV congestion at Escondido/San Marcos Substations.

The Proposed Project's objectives are presented in greater detail in Chapter 2, *Project Purpose and Need* of the PEA, Volume II of this application.

C. Project Description

The Proposed Project includes the rebuild, new build, and reconductoring/re-energizing of approximately 12 miles of 69 kV overhead electric power line from the existing San Marcos Substation to the existing Escondido Substation. In addition to improving the reliability to the area by adding a third line into San Marcos Substation, the Proposed Project would also mitigate identified NERC thermal/voltage violations and the ongoing 69 kV congestion on the corridor between Escondido to San Marcos Substations. In the 2013–2014 Transmission Planning Process (TPP), the Proposed Project was approved by the California Independent System Operator (CAISO). The Proposed Project was included in the 2013–2014 and 2015–2016 TPP. The “need” date for the Proposed Project was anticipated for June 2016.

The Proposed Project includes the following main components:

- Removal of approximately 19 poles from service.
- Replacement of approximately 40 wooden power line poles with 40 dulled galvanized steel poles that would be direct-bury or supported by foundations.
- Installation of approximately 18 new steel dulled galvanized poles that would be either supported by foundations or direct-bury.
- Pole-top work for reconductoring/re-energizing at approximately 43 structures. Structures would not be replaced; however, two of these structures would have anchor work.
- Reconductoring near San Marcos Substation of the existing TL 680C 69 kV line with 636 Aluminum Conductor Steel Reinforced/AW Core (ACSR/AW).
- Stringing near San Marcos Substation for TL 6975 (would have 636 Aluminum Conductor Steel Supported/AW Core [ACSS/AW]).
- Reconductoring the existing distribution underbuild.

- Reconductoring near Meadowlark Junction of the existing lattice tower and steel pole line with 636 ACSS/AW conductor.
- One new access road and four spur roads will be installed.
- Road-extension work in one existing access road area to provide access to the new steel poles and distribution line area at Meadowlark Junction.
- Installation of approximately 50 temporary guard structures.
- Use of approximately 21 stringing sites (12 stringing sections).
- Potential use of 10 staging yards.
- Removal of an oil containment wall and a Circuit Breaker Pad at Escondido Substation.
- At Escondido Substation, existing circuits would be relocated to available bay positions.
- Installation of approximately 360 feet of primary and secondary underground conduit from new pole positions to intercept locations along existing conduit packages.
- At San Marcos Substation, a new Circuit Breaker Pad, seven piers, and an A-frame would be installed for the new line.
- Fifteen structures along the alignment were identified as not requiring work.
- Four structures were identified for possible work.

These components are described in greater detail in Chapter 3, *Proposed Project*

Description of the PEA, Volume II of this Application.

IV. STATUTORY AND PROCEDURAL REQUIREMENTS

GO 131-D, Section IX.B. requires an applicant for a PTC to comply with the Commission’s Rules of Practice and Procedure, Rule 2. Pursuant to this requirement, SDG&E responds as follows:²

² Although not specifically discussed herein, SDG&E’s Application also complies as necessary with Rule 1.5 (“Form and Size of Tendered Documents”), Rule 1.13 (“Tendering and Review of Document for Filing”), Rule 7.1 (“Categorization, Need for Hearing”), Rule 8.1 (“Definitions”), Rule 8.2 (“Ex Parte

A. Rule 2.1(a) – (c)

In accordance with Rule 2.1(a) – (c) of the Commission’s Rules of Practice and Procedure, SDG&E provides the following information.

1. Statutory Authority

This Application is made pursuant to the CEQA, GO 131-D, the Commission's Rules of Practice and Procedure, and prior decisions, orders and resolutions of this Commission.

2. Rule 2.1(a) - Legal Name and Address

The applicant is San Diego Gas & Electric Company, a corporation organized and existing under the laws of the State of California, and an investor-owned public utility as defined by Section 216 (a) and 218 (a), respectively, of the California Public Utilities Code, and engaged in the business of purchasing, selling, generating, transmitting, distributing, and providing electric and gas energy service to approximately 3.4 million consumers through 1.4 million electric meters and more than 840,000 natural gas meters throughout San Diego County and in a portion of southern Orange County, California. The utility’s service area spans 4,100 square miles and 25 cities and unincorporated areas in southwestern California, United States. The activities of SDG&E are regulated by this Commission and by the Federal Energy Regulatory Commission. SDG&E is a wholly-owned, indirect subsidiary of Sempra Energy, whose shares are publicly traded. SDG&E’s principal place of business is 8330 Century Park Court, San Diego, California 92123.

3. Rule 2.1(b) - Correspondence

Correspondence or communications regarding this Application should be addressed to:

Requirements”), Rule 13.3 (“Assigned Commissioner Presence”), and Rule 13.13 (“Oral Argument before Commission”).

Fax: (858) 819-4142
TLyons@semprautilities.com

4. Rule 2.1(c)

a. Proposed Category of Proceeding

In accordance with Rule 7.1, SDG&E requests that this Application be categorized as ratesetting because the costs for the new power line project will be recovered by SDG&E through its retail rates, and because this Application neither raises questions of policy or rules of general applicability, nor adjudicates any allegations of violations of law. In addition, because this Application raises ancillary issues that do not fall clearly into a single category, Rule 7.1(e)(2) requires that it be categorized as a ratesetting proceeding.

b. Need for Hearings

SDG&E does not believe that approval of this Application will require hearings. SDG&E has provided ample information, analysis and documentation that provide the Commission with a sufficient record upon which to grant the relief requested on an *ex parte* basis. SDG&E respectfully requests that the relief requested in this Application be provided on an *ex parte* basis

as provided for in G.O. 131-D, Section IX.B.6. An *ex parte* grant of the authorization sought herein at the earliest achievable date will permit SDG&E to proceed with the project in accordance with a 9 month timeline as provided for in G.O. 131-D, Section IX.B. If the Commission finds that hearings are necessary, SDG&E respectfully requests that that such hearings be concluded as soon as practicable.

c. Issues to be Considered

The issues to be considered, including but not limited to the proposed construction of certain electric power line facilities needed to eliminate a North American Electric Reliability Corporation (NERC) thermal and voltage deviation violations and to improve service reliability, are described in this Application, PEA and the accompanying documents. Based on the PEA, SDG&E believes the Proposed Project will not have a significant adverse impact on the environment. Therefore, SDG&E requests that the Commission issue a decision within the time limits prescribed by Cal. Gov. Code § 65920 *et seq.* (Permit Streamlining Act) as provided for in G.O. 131-D, Section IX.B.6.

In accordance with Section IX.B.6. of G.O. 131-D, SDG&E further requests that the Commission refrain from assigning an Administrative Law Judge (ALJ) to this proceeding, unless a valid protest is received by the Commission, and in the absence of any valid protest allow the Energy Division to process this Application.

d. Proposed Schedule

Section IX.B.1.a. of GO 131-D requires that applicants for a PTC include a proposed schedule for authorization, construction, and commencement of operation of facilities. This proceeding involves the Commission's: (1) environmental review of the Proposed Project in compliance with the CEQA (Public Resources Code Section 21100 *et seq.*) and GO 131-D; and

(2) issuance of a PTC authorizing SDG&E to construct the Proposed Project. In accordance with Section IX.B.1.a. of GO 131-D, SDG&E submits a Proposed Construction Schedule, which is attached to this Application as Appendix A. Given the pressing need of commencement of operation of facilities and lack of anticipated environmental issues or public controversy connected with the Proposed Project, SDG&E proposes the following schedule for this Application:

<u>ACTION</u>	<u>DATE</u>
Application filed	November 15, 2017
Provide Notice of Filing of Application by direct mail, advertisement and on-site posting	On or before November 27, 2017 (Within 10 days after filing)
File a Declaration of Mailing and Posting	December, 2017 (Within 5 days of completion)
Application Completeness Determination	December 15, 2017 (30 days after Application filed)
Last Date for Protest and Request for Public Hearings	December 15, 2017 (30 days after notice ³)
Draft CEQA Document Issued for Public Comment	February 28, 2018 (105 days)
Close of Public Comment Period	March 14, 2018 (45 days after notice of availability)
Proposed Date for Release of Final EIR or Negative Declaration	April 2018

³ GO 131-D, Section XII. provides in part that any person entitled under the Commission's Rules of Procedure to participate in a proceeding for a permit to construct may, within 30 days after the notice was mailed or published (as provided under Section XI. of GO 131-D), object to the granting in whole or in part of the authority sought by the utility and request that the Commission hold hearings on the application.

Evidentiary Hearing, if needed	May 2018
Draft Decision Issued	June 2018
<i>Ex Parte</i> Decision Issued. Final CEQA Document Certified.	July 2018

B. Rule 2.2 – Articles of Incorporation

A copy of SDG&E's Restated Articles of Incorporation as last amended, presently in effect and certified by the California Secretary of State, was filed with the Commission on September 10, 2014 in connection with SDG&E's Application No. 14-09-008, and is incorporated herein by reference.

C. Rule 2.3 – Financial Statement

SDG&E's financial statement, balance sheet and income statement for the three-month period ending June 30, 2017 are included with this Application as Appendix G.

D. Rule 2.4 - CEQA Compliance

GO 131-D, Section IX.B.1.e. requires an applicant for a PTC to include in its application “[a] PEA or equivalent information on the environmental impact of the project in accordance with the provisions of CEQA and this Commission’s Rules of Practice and Procedure”. SDG&E has prepared a PEA describing in detail the environmental setting and the potential impacts associated with the construction and operation of the Proposed Project. SDG&E is simultaneously submitting the PEA portion of this Application as Volume II.

E. Rule 2.5 – Fees for Recovery of Cost in Preparing EIR

SDG&E is submitting a deposit concurrently with this Application to be applied to the cost the Commission incurs to prepare a negative declaration or an environmental impact report for the Proposed Project.

F. Rule 3.1(a) – (i) – Construction or Extension of Facilities

Rule 2.1(d) requires all applications to comply with “[s]uch additional information as may be required by the Commission in a particular proceeding.” Commission Rule 3.1 contains some additional requirements for applicants for PTCs. Some of the requirements of Rule 3.1 are duplicative of the requirements of GO 131-D, which are more precisely identified and discussed in Section V *infra*. In accordance with Rule 3.1(a) – (i) of the Commission’s Rules of Practice and Procedure, SDG&E provides the following information.

1. Rule 3.1(a) – Description of the Proposed Project

Commission Rule 3.1(a) requires applicants for a PTC to include in their applications “A full description of the proposed construction or extension, and the manner in which the same will be constructed.”

Please refer to SDG&E’s response in Section III-C *supra* of this Application.

2. Rule 3.1(b) – Competing Utilities

Commission Rule 3.1(b) requires applicants for a PTC to include in their applications “The names and addresses of all utilities, corporations, persons or other entities, whether publicly or privately operated, with which the proposed construction is likely to compete, and of the cities or counties within which service will be rendered in the exercise of the requested certificate.”

The Proposed Project will be built entirely within the service territory of SDG&E, and is not intended to compete with the projects of any other entity. The requested certification is to enhance electric service within SDG&E’s service territory (which consists of San Diego County and a portion of southern Orange County, including the Cities of Carlsbad, Chula Vista, Coronado, Dana Point, Del Mar, El Cajon, Encinitas, Escondido, Imperial Beach, Laguna Beach, Laguna Hills, Laguna Niguel, La Mesa, Lemon Grove, Mission Viejo, National City, Oceanside,

Poway, San Clemente, San Diego, San Juan Capistrano, San Marcos, Santee, Solana Beach and Vista) and in the area served by the CAISO.

3. Rule 3.1(c) – Project Maps

Commission Rule 3.1(c) requires an applicant for a PTC to include in its application “A map of suitable scale showing the location or route of the proposed construction or extension, and its relation to other public utilities, corporations, persons, or entities with which the same is likely to compete.”

As stated in the previous response, the Proposed Project is not intended to compete with the projects of any other entity. A copy of SDG&E’s Map of the proposed routing is attached to this Application as Appendix I. For a more detailed description of the Proposed Project location, see PEA, Volume II of this Application.

4. Rule 3.1(d) – Required Permits

Commission Rule 3.1(d) requires an applicant for a PTC to include in its application “A statement identifying the franchises and such health and safety permits as the appropriate public authorities have required or may require for the proposed construction or extension.”

A list of the franchises and anticipated health and safety permits required for the Proposed Project is found in the PEA, Volume II of this Application.

5. Rule 3.1(e) – Public Convenience and Necessity

Commission Rule 3.1(e) requires an applicant for a PTC to include in its application “Facts showing that public convenience and necessity require, or will require, the proposed construction or extension, and its operation.”

The above requirements notwithstanding, pursuant to GO 131-D, Section IX.B.1.f., an application for a PTC need not include a detailed analysis of purpose and necessity beyond that required for CEQA compliance. Please refer to the PEA, Volume II of this Application.

6. Rule 3.1(f) – Estimated Cost

Commission Rule 3.1(f) requires an applicant for a PTC to include in its application “A statement detailing the estimated cost of the proposed construction or extension and the estimated annual costs, both fixed and operating associated therewith.”

The above requirements notwithstanding, pursuant to GO 131-D, Section IX.B.1.f., an application for a PTC need not include a detailed estimate of cost beyond that required for CEQA compliance. SDG&E provides an estimated cost range for the proposed scope of the project in Appendix H of this Application.

7. Rule 3.1(g) – Financial Ability

Commission Rule 3.1(g) requires an applicant for a PTC to include in its application “Statements or exhibits showing the financial ability of the applicant to render the proposed service together with information regarding the manner in which applicant proposes to finance the cost of the proposed construction or extension.”

The above requirements notwithstanding, pursuant to GO 131-D, Section IX.B.1.f., an application for a PTC need not include a detailed economic analysis beyond that required for CEQA compliance. In any event, SDG&E plans to own 100 percent of the assets that will comprise the Proposed Project and those assets will be added to SDG&E’s utility rate base. At present, SDG&E intends to finance the Proposed Project cost with the same proportions of debt and equity with which all other rate base assets are financed, in keeping with the capital structure

approved by the Commission for SDG&E. Financing would be in the form of retained earnings, available cash and debt, as necessary.

8. Rule 3.1(h) – Proposed Rates

Commission Rule 3.1(h) requires an application for a PTC to include “A statement of the proposed rates to be charged for service to be rendered by means of such construction or extension.”

SDG&E’s retail rates are found in its currently-effective tariffs approved by this Commission. SDG&E’s transmission rates are formula rates subject to annual adjustment, as approved by the Federal Energy Regulatory Commission (FERC). SDG&E is not proposing to increase rates as a result of this Project. A statement of all of SDG&E’s presently effective electric rates can be viewed electronically by accessing: <http://www.sdge.com/rates-regulations/current-and-effective-tariffs/current-and-effective-tariffs> .

The costs associated with the Proposed Project are predominantly for transmission-related services. When the project is placed in service, SDG&E will seek to recover the costs through the CAISO’s FERC-jurisdictional rates. This would occur as part of a FERC rate case covering the test period in which the project will become operative. Costs not approved by FERC for recovery in general transmission rates may be recovered through CPUC-jurisdictional retail rates.

9. Rule 3.1(i) – Proxy Statement

Commission Rule 3.1(i) requires an applicant for a PTC to include in its application “a copy of the latest proxy statement sent to stockholders by it or its parent company containing the information required by the rules of the SEC if not previously filed with the Commission.”

A copy of the most recent proxy statement sent to all shareholders of SDG&E's parent company, Sempra Energy, dated March 24, 2017, was mailed to the California Public Utilities Commission on April 10, 2017, and is incorporated herein by reference.

V. INFORMATION REQUIRED BY GENERAL ORDER 131-D

GO 131-D, Sections IX., X. and XI., adopted by the Commission in D.94-06-014 as modified by D.95-08-038, requires an applicant for a PTC to include in its application a variety of information. This information follows in the order in which it is listed in GO 131-D.

A. Section IX.B.

In accordance with Section IX.B.1.(a) – (f) of the Commission's GO 131-D, SDG&E provides the following information.

1. Section IX.B.1.a. - Description of the Proposed Project facilities

See the PEA, Volume II of this Application.

2. Section IX.B.1.b. - Map of Proposed Project location

A map showing the location or route of the Proposed Project location is attached to this Application as Appendix I. For a more detailed description of the Proposed Project location, see PEA, Volume II of this Application.

3. Section IX.B.1.c. - Reasons for adoption of the power line route or substation locations selected

See the PEA, Volume II of this Application.

4. Section IX.B.1.d. - Listing of governmental agencies consulted and statements of position

A listing of governmental agencies consulted and statements of position is attached to this Application as Appendix J. For further details, see PEA, Volume II of this Application.

5. Section IX.B.1.e. – Proponent’s Environmental Assessment

The PEA attached to this Application as Volume II includes the information described in Section IV(a)-(d) above and concludes that the Proposed Project will have no significant unmitigable impact on the environment.

B. Section X.A.

GO 131-D, Section X.A. requires an applicant for a PTC to “describe the measures taken or proposed by the utility to reduce the potential exposure to electric and magnetic fields generated by the proposed facilities, in compliance with Commission order.”

A copy of SDG&E’s Magnetic Field Management Plan is attached to this Application as Appendix F.

C. Section XI.A.

GO 131-D, Section XI.A. requires an applicant for a PTC to notify the public of its filing “within ten days of filing the application” in several different ways, by direct mail, by advertisement and by posting.

In compliance with Section XI.A. of GO 131-D, SDG&E will, within ten days after the filing of this Application, provide proper notice of the filing of this Application: (1) by direct mail to certain public agencies and legislative bodies; (2) by advertisement in a newspaper or newspapers of general circulation in each county in which the Proposed Project will be located; and (3) by posting a notice on-site and off-site at the project location. A copy of the Draft Notice of Application for a Permit to Construct is attached to this Application as Appendix B. The Service List and Public Review Locations for Notice of Application are contained in Appendix C. A List of Newspaper(s) Publishing the Notice of Application is contained in Appendix D.

And, a Draft Declaration of Posting of Notice of Application is attached to this Application as Appendix E.

VI. LIST OF APPENDICES AND ATTACHMENTS

VII. CONCLUSION

Wherefore, SDG&E requests that the Commission (1) accept its application as complete; (2) prepare an Environmental Impact Report or Negative Declaration regarding the potential environmental impacts of the Proposed Project; and (3) issue a decision granting SDG&E a Permit to Construct the TL 6975 San Marcos to Escondido Project, as described in this Application and the supporting documents.

DATED this 15th day of November 2017, at San Diego, California.

Respectfully submitted,

APPENDIX B
Draft Notice of Application

DRAFT NOTICE OF APPLICATION FOR A PERMIT TO CONSTRUCT

San Diego Gas & Electric TL6975 San Marcos to Escondido Project

Date: November **, 2017

CPUC Application No.: 17-11-***

Proposed Project: San Diego Gas & Electric Company (SDG&E) has filed an application with the California Public Utilities Commission (CPUC) for a Permit to Construct the TL6975 San Marcos to Escondido Project (Proposed Project). As proposed by SDG&E, and further described in the Proponent's Environmental Assessment (PEA), the Proposed Project includes the following elements:

- Rebuild approximately 1.8 miles of an existing 69-kV power line to the west of the San Marcos substation.
- Add approximately 2.8 miles of a new single-circuit 69-kV overhead power line from the end of Segment 1 to Meadowlark Junction.
- Replace or re-energize wires on approximately 7.4 miles of power lines from Meadowlark Junction to the existing Escondido substation.

Environmental Assessment: SDG&E has prepared a PEA that includes the analysis of potential environmental impacts created by the construction and operation of the Proposed Project. Based on the PEA, SDG&E believes that the Proposed Project will not have a significant adverse impact on the environment and there will be no unmitigable environmental impacts to the area because of the Proposed Project.

Magnetic Field Management: SDG&E will employ measures to reduce public exposure to magnetic fields in accordance with CPUC Decisions 93-11-013 and 06-01-042 and SDG&E's "EMF Design Guidelines for Electrical Facilities." SDG&E has filed copies of its Magnetic Field Management Plan for this Proposed Project as part of its Application.

Public Review Process: SDG&E has applied to the California Public Utilities Commission (CPUC) for a Permit to Construct and has asked for approval without hearings. Pursuant to the CPUC's General Order 131-D, Section XII and Rules of Practice and Procedures, Rule 2.6(a), within 30 calendar days of the date notice was first mailed or published, you may protest and request that the CPUC hold hearings on this Amended Application. If the CPUC, as a result of its investigation, determines that public hearings should be held, notice shall be sent to each person or entity who is entitled to notice or who has requested a hearing. Please contact the following people should you require any information regarding this project.

Allen K. Trial AND Attorney for SDG&E 8330 Century Park. Ct., CP32D San Diego, CA 92123	Tim Lyons AND SDG&E Regulatory Affairs 8330 Century Park Ct., CP 32F San Diego, CA 92123	Director, Energy Division California Public Utilities Commission 505 Van Ness Avenue San Francisco, CA 94102
--	---	--

CPUC PROCESS

If you would like additional information on the CPUC process or would like to attend hearings (if held) and need assistance, you can contact the Public Advisor's Office (PAO). You may also send your comments to the PAO at the following address: Public Advisor's Office, 505 Van Ness Ave., San Francisco, CA 94102 or send

an e-mail to: public.advisor@cpuc.ca.gov. Any letters received from you will be circulated to each Commissioner and will become part of the formal correspondence file in the application. In your letter state that your comments are regarding Application No. A.17-11-XXX.

FOR FURTHER INFORMATION

You may request additional information or obtain a copy of the application and related exhibits by writing to: Tim Lyons, Regulatory Case Manager for SDG&E, 8330 Century Park Court, San Diego, CA 92123. SDG&E will provide a copy of the application, including the public testimony, upon request. SDG&E's application and attachments may be inspected at the CPUC's Central Files Office, 505 Van Ness Ave., San Francisco, CA 94102. A copy of the application and any amendments may be inspected at the SDG&E business offices listed below:

436 H Street
Chula Vista, CA 91910

440 Beech Street
San Diego, CA 92101

Draft Declaration of Posting of Notice

DRAFT DECLARATION OF POSTING OF NOTICE

I, Cambria Rogers, am the Project Specialist responsible for overseeing various aspects of substation, transmission, and distribution projects for San Diego Gas & Electric Company. On November _____, 2017, I posted along the project site for the proposed San Diego Gas & Electric Company's TL6975 San Marcos to Escondido Project the Notice of Filing of an Application for a Permit to Construct filed with the California Public Utilities Commission, in accordance with the provisions of General Order 131-D, Section XI.A.3.

I declare under penalty of perjury that the foregoing statements are true and correct to the best of my knowledge.

Executed this ____ day of ____, 2017, at San Diego, California.

Cambria Rogers
Project Specialist – Major Projects
Representative, SDG&E

APPENDIX – PROPOSED PROJECT SEGMENT MAP	7

I. Proposed Project Scope

The purpose of the proposed TL 6975 San Marcos to Escondido Line project ("Proposed Project") includes the rebuild, new build, and reconductoring of approximately 12 miles of 69 kilovolt ("kV") overhead electric power line¹ from the existing San Marcos Substation to the existing Escondido Substation. In addition to improving the reliability to the area by adding a third line into San Marcos Substation, the Proposed Project would also mitigate identified North American Electric Reliability Corporation ("NERC") thermal/voltage violations and the ongoing 69 kV power congestion on the corridor between Escondido and San Marcos Substations.

II. Magnetic Field Management Design Guidelines

The California Public Utilities Commission ("CPUC") requires SDG&E to apply its *EMF² Design Guidelines for Electrical Facilities* ("Guidelines") to all new and upgraded electric power and transmission projects to reduce public exposure to magnetic fields. SDG&E filed its Guidelines with the CPUC in accordance with CPUC Decision 93-11-013 and updated them in accordance with the 2006 CPUC Decision 06-01-042.

Consistent with SDG&E's Guidelines and with the CPUC order, magnetic fields and possible magnetic field management measures were evaluated along the power line locations associated with the proposed Project. The results of this evaluation are contained in this Detailed Magnetic Field Management Plan ("FMP").

This FMP deals solely with magnetic fields. Moreover, reducing the magnetic field strength is but one of many factors to be considered in planning and designing a transmission system, along with other issues such as safety, environmental concerns, reliability, insulation and electrical clearance requirements, aesthetics, cost, operations and maintenance.

The scope of magnetic field analysis for this FMP does not include the distribution lines, per SDG&E's Guidelines, which state, "For distribution facilities, utilities would apply no-cost and low-cost measures by integrating reduction measures into construction and design standards, rather than evaluating no-cost and low-cost measures for each project." Thus, for purposes of this FMP, the term "Project" includes the 69 kV wood-to-steel pole conversions poles, existing lattice towers and portions exiting/entering both substations.

III. Magnetic Field Management Methodology

In Decision 06-01-042, the CPUC noted that "Utility modeling methodology is intended to compare differences between alternative EMF mitigation measures and not determine actual EMF amounts."³ The CPUC also noted that "modeling indicates relative differences in magnetic field reductions between different transmission line construction methods, but does not measure actual environmental magnetic fields."⁴

¹ In accordance with CPUC General Order 131-D, the term "power line" is used in this document in reference to TL 680C, TL 6975, TL 6908, TL 6934 and TL 689, all 69 kV lines. The term "transmission," when used, refers to internal SDG&E operating departments, internal SDG&E standards and/or other guidelines, and is not intended to suggest that TL 680C, TL 6975, TL 6908, TL 6934 or TL 689 are designed for immediate or eventual operation at 200 kV or above.

² EMF refers to electric and magnetic fields.

³ CPUC Decision D.06-01-042, Finding of Fact 14, p. 20.

⁴ Ibid, p.11.

In accordance with its Guidelines, SDG&E will take the following measures for the proposed Project:

- Apply its EMF Guidelines to the proposed Project design.
- Identify and implement appropriate "no-cost" measures, i.e., those that will not increase overall project costs but will reduce the magnetic field levels.
- Identify and implement appropriate "low-cost" measures, i.e., those measures costing in the range of 4% of the total budgeted project cost that will reduce the magnetic field levels by 15% or more at the edge of the right-of-way (ROW).
- When a sufficiency of "low-cost" measures is available to reduce magnetic field levels, such that it is difficult to stay within the 4% cost guideline, apply these "low-cost" measures by priority of adjacent land uses.

The 15% minimum reduction required for low-cost measures is in addition to any field reduction due to "no-cost" measures. It is not cumulative. Since the Proposed Project requires permitting under General Order 131-D, a Detailed FMP will be used.

This FMP consists of a project description, a checklist table showing evaluation of magnetic field reduction measures adopted or rejected per power line, and a summary with recommendations.

IV. Project Description

For the Proposed Project Description below, Segments 1 through 3 are identified in the *Appendix – Proposed Project Segment Map*.

Segment 1 - The first segment of the proposed new power line circuit will consist of rebuilding approximately 1.8 miles of an existing 69 kV circuit (TL 680C) from a single circuit structure line into a double circuit structure line supporting both the existing (TL 680C) and the proposed TL 6975. All wood structures will be replaced with steel poles; all porcelain insulators will be replaced with polymer and TL 680C will be reconducted with 636 ACSR/AW and TL 6975 will have 636 ACSS/AW. The line will be rebuilt from San Marcos substation, along San Marcos Blvd. and Palomar Airport Road until it reaches the existing 150-foot-wide SDG&E corridor (easement) near pole Z114455. At that location, TL 680C will continue its existing alignment north within the SDG&E corridor and TL 6975 will split off to the south on its own new 69 kV single circuit structures toward Meadowlark Junction. Land uses adjacent to the Proposed Project in Segment 1 include schools, residential, commercial and industrial.

For modeling purposes, Segment 1 was broken into 2 sections, 1A and 1B. Of the approximate 39 poles, 28 will be direct-bury and 11 will be engineered foundation poles. Section 1A models the shorter direct-bury poles, while section 1B models the much taller engineered foundation poles.

Segment 2 - A new segment of single circuit 69 kV overhead power line will be constructed on new steel poles in the existing SDG&E transmission corridor. The new power line segment will be approximately 2.8 miles long, starting near pole Z114455 and traveling south to the existing Meadowlark Junction, located adjacent to the existing TL 13811/13825 transmission lines. The new single circuit 69 kV steel poles will be constructed within the SDG&E easement approximately 50 feet east of centerline of the existing structures. All the new steel poles will have graded roads and access/maintenance pads built to them in order to facilitate construction and provide long term maintenance access. Near Meadowlark Junction, the line will transition to existing steel lattice towers. Land uses adjacent to the Proposed Project in Segment 2 include residential, commercial and industrial.

Segment 3 – From Meadowlark Junction to the Escondido substation, there is a segment of overhead conductor on existing lattice towers on the south side of the right-of-way that is currently de-energized. In the right-of-way to the north of these lattice towers is another set of lattice towers with 230 kV transmission circuits. For the Proposed Project, a reconductor is required of the de-energized segment that is on north side of the existing lattice towers, approximately 7.4 miles long. The existing lattice tower and steel pole line contains conductor, hardware and insulators on both sides of the double circuit structures. For this project the 250 MCM copper conductor and porcelain insulators on the north side of the towers will be removed and replaced with polymer insulators and new 636 ACSS/AW conductor. The reconductor will be between poles Z101768 and Z414934. Land uses adjacent to the Proposed Project in Segment 3 include residential, undeveloped land and open space.

Segment 4 - From pole Z414934 to the Escondido substation, the existing 900 ACSS/AW conductor on the west side of the existing steel poles will remain in place. This line of steel poles beginning at Z414934 is located on the east side of the right-of-way at the south end of Segment 4, then crosses under the 230 kV transmission circuits located on a line of lattice towers at Andreasen Drive to continue on the west side of the right-of-way. At Escondido substation, existing overhead conductor will be transferred from the 138 kV rack to an existing 69 kV bay position for the new TL 6975. Three existing 69 kV circuits will be transferred to different bay positions in order to accommodate this new circuit and avoid transmission line crossings. The last overhead spans (drop spans) of existing power lines TL 6908, TL 6934 and TL 689 will be relocated to available bay positions. New steel poles and replacement guys and anchors will be required to accomplish these relocations. Land uses adjacent to the Proposed Project in Segment 4 are mostly commercial and industrial.

V. Magnetic Field Reduction Measures Considered for the Proposed Project

Per Table 3-1 of SDG&E's Guidelines, all portions of power lines within scope of the Proposed Project were reviewed for suitable application of magnetic field reduction measures, as listed in Table 1 below.

Table 1: Magnetic Field Reduction Measures Adopted or Rejected

Calculated values are for design comparison only and not meant to predict actual magnetic field levels.

Segment(s)	Location (Street, Area)	Adjacent Land Use	Reduction Measure Considered	Measure Adopted? (Yes/No)	Estimated Cost to Adopt
1A & 1B	TL 6975	Schools, Residential, Commercial and Industrial	Increase Structure Height	Yes	No-Cost
	The proposed project design would increase pole heights compared with the existing pole heights. Calculations (see Section VII) show that this results in magnetic field reduction of 52% or more at each edge of right-of-way. This option was adopted as a no-cost reduction measure.				
1, 2, 3, & 4	TL 6975	Residential Commercial and Industrial, Undeveloped	Phase Reconfiguration	No	No-Cost
	Phasing for TL 6975 is already at optimal order. Calculations (see Section VII) show that changing the phase order would only increase magnetic field values at the edge of right-of-way. This option was rejected as a no-cost reduction measure.				
1A	TL 6975	Schools, Residential, Commercial and Industrial	Increase Structure Height	Yes	Low-Cost
	Calculations (see Section VII) show that increasing heights of the proposed direct-bury poles by an additional 5 feet above design height would reduce magnetic fields by more than 15% at each edge of right-of-way. These new pole heights would be more consistent with that of the design heights of the engineered steel poles (section 1B). This option was adopted as a low-cost reduction measure.				
1B	TL 6975	Schools, Residential, Commercial and Industrial	Increase Structure Height	No	Low-Cost
	As noted above, calculations (see Section VII) show that magnetic fields would be reduced by 52% or more at each edge of right-of-way due to the proposed project design. Additionally, the direct-bury poles in Segment 1A would be increased in height as a low-cost option, making them more consistent in height with, but still shorter than, the engineered steel poles in Segment 1B. As substantial reduction has already been achieved through no-cost and low-cost measures, and the design heights are, on average, several feet higher than the existing poles, the option of seeking additional reduction through increased height was rejected.				
2	TL 6975	Residential, Commercial and Industrial, Undeveloped	Increase Structure Height	No	Low-Cost
	Calculations using an increased height of 25 feet yielded magnetic field reduction of 18% only at the east edge of the right-of-way (see section VII), with no change at the west edge. However, the costs associated with the taller engineered steel poles, foundations, pad and foundation preparation, and additional engineering throughout the segment would be far in excess of the 4% cost guideline for low-cost reduction measures. This option was rejected.				
3 & 4	TL 6975	Residential, Commercial and Industrial, Undeveloped	Increase Structure Height	No	Low-Cost
	Increasing the height of existing lattice towers and steel poles would not be a low-cost reduction measure and was rejected as an option.				
3 & 4	TL 6975	Residential, Commercial and Industrial, Undeveloped	Locate power lines closer to center of the utility corridor	No	Low-Cost
	The proposed new TL 6975 would be placed on existing lattice towers and steel poles. Relocating existing lattice towers and steel poles closer to the center of the right-of-way would not be a low-cost reduction measure and was rejected as an option.				

VI. Magnetic Field Reduction Measures Recommended for the Project

No-cost reduction measures recommended

For segment 1, sections A and B, the proposed heights of the new steel poles are greater than those of the existing poles. The height increases will raise conductor height, which indeed is a no-cost magnetic field reduction measure and is recommended for the Proposed Project.

Low-cost reduction measures recommended

For segment 1, section A, increasing pole height an additional 5 feet above design height is recommended for the Proposed Project, as it would reduce magnetic fields by more than 16% at each edge of right-of-way.

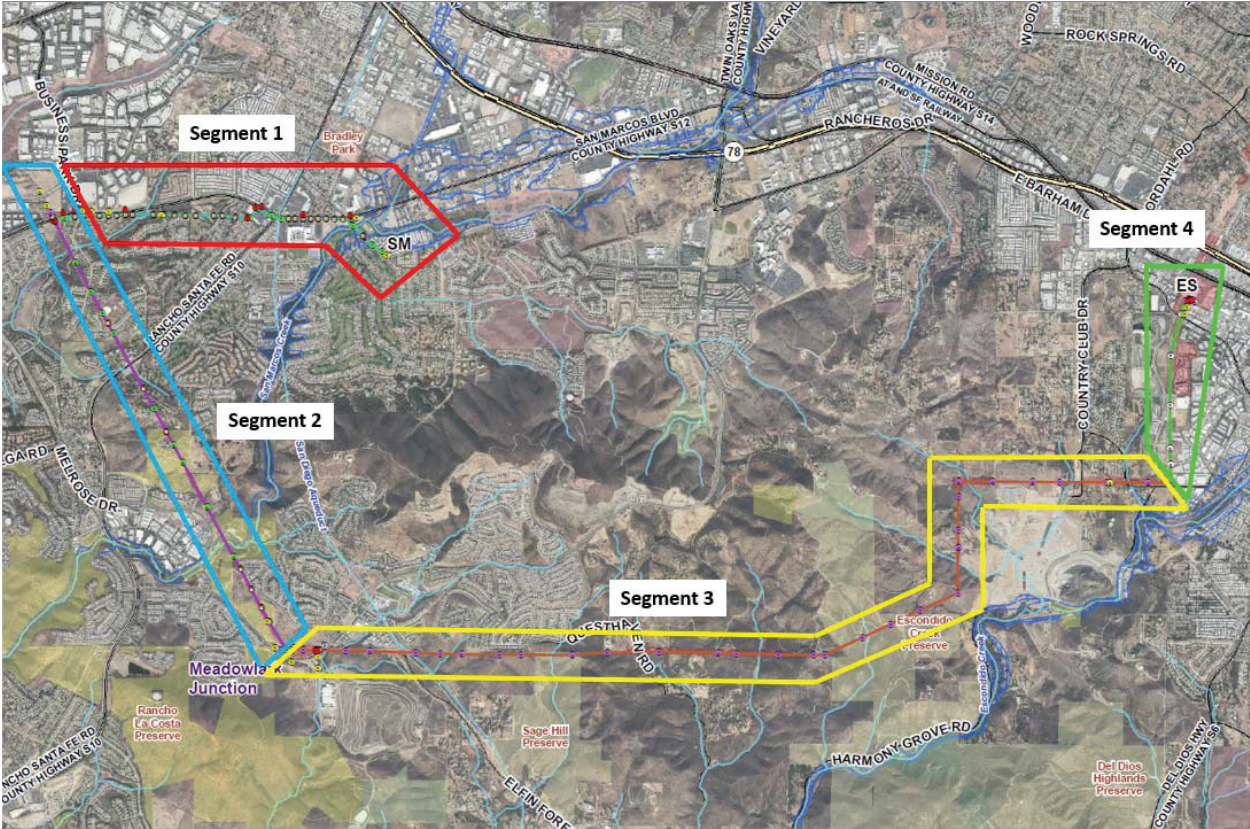

VII. Magnetic Field Calculation Details

Table 2: Calculated Magnetic Field Values*

Segment 1					
Section 1 A	Current	Proposed	Raised 5 ft.	Proposed	Raised 5 ft.
	mG			+/- Δ

SAN DIEGO GAS & ELECTRIC COMPANY
SUMMARY OF EARNINGS
Six Months Ended June 30, 2017
(\$ IN MILLIONS)

<u>Line No.</u>	<u>Item</u>	<u>Amount</u>
1	Operating Revenue	\$ 2,299
2	Operating Expenses	<u>1,935</u>
3	Net Operating Income	<u><u>\$ 364</u></u>
4	Weighted Average Rate Base	\$ 8,232
5	Rate of Return*	7.79%

*Authorized Cost of Capital

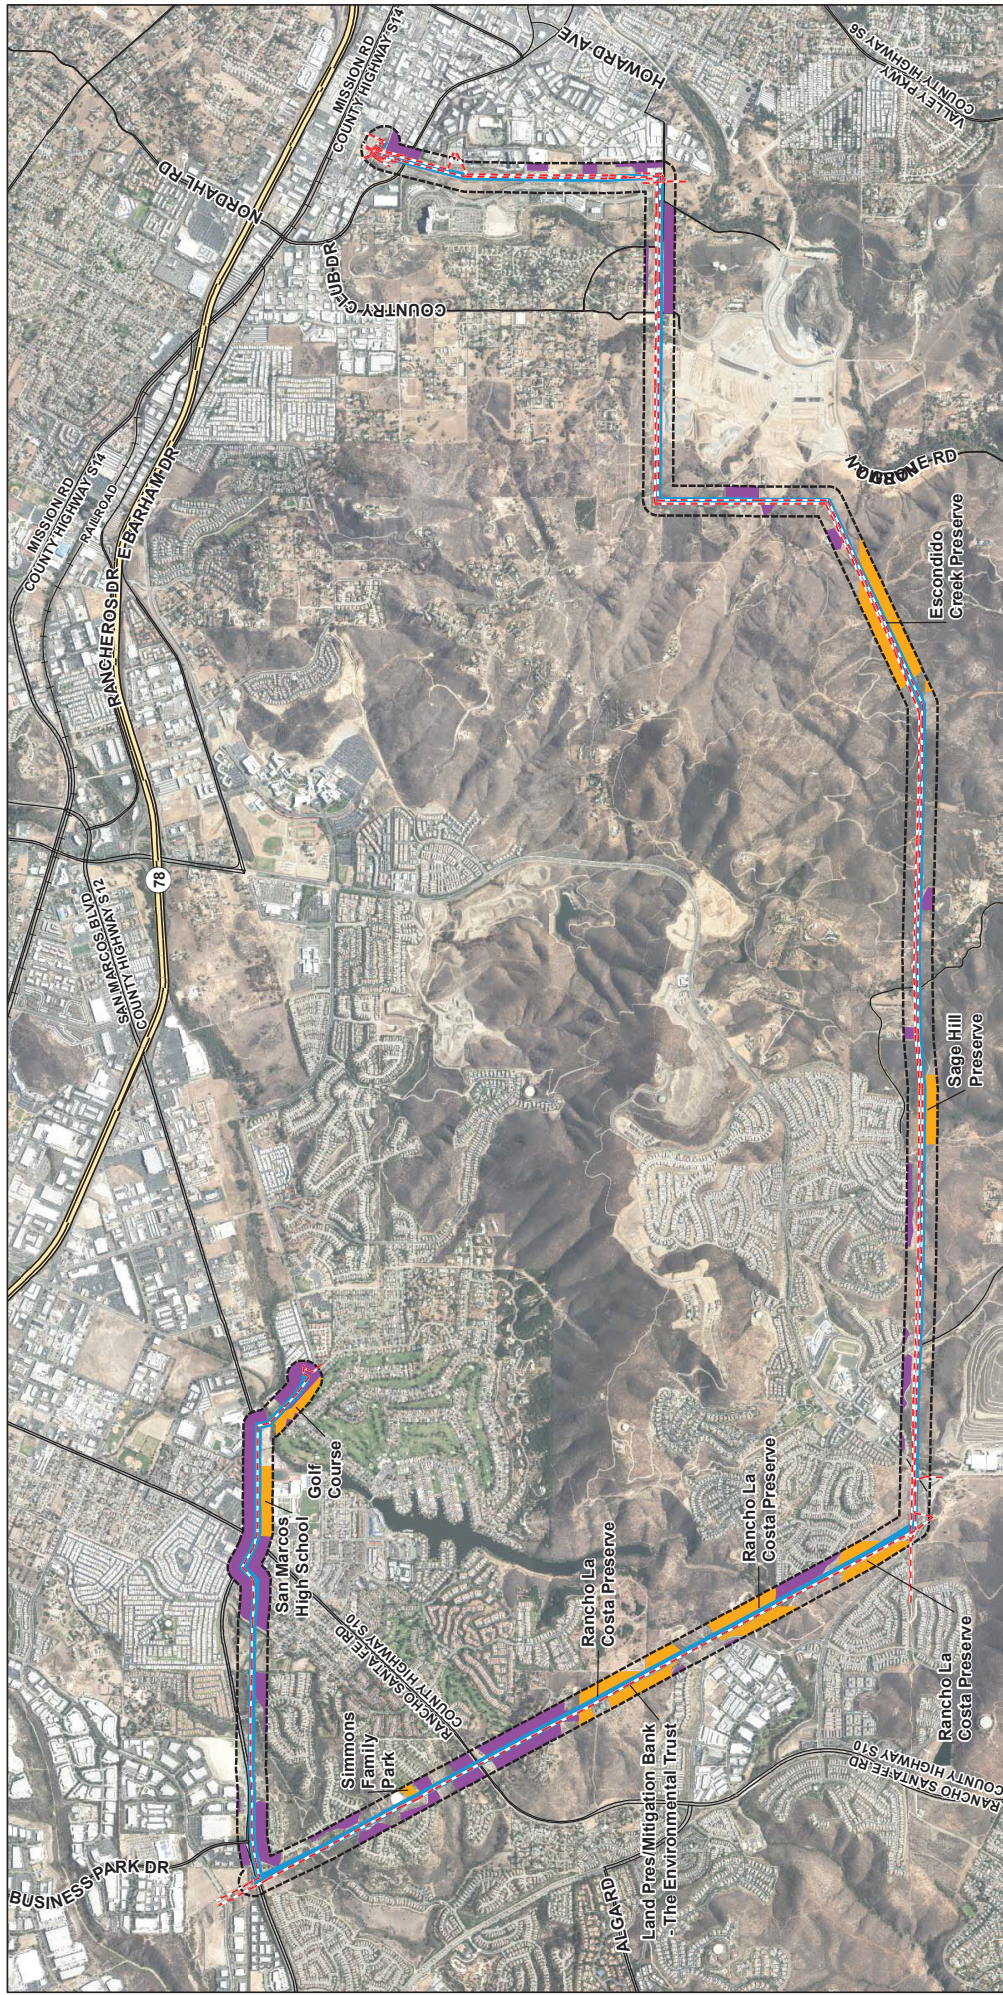

APPENDIX H
Estimated Project Costs

**San Diego Gas & Electric Company (SDG&E)
TL6975 San Marcos to Escondido Project
Estimated Project Costs**

TL6975 San Marcos to Escondido Project Approximate Cost*: \$30,000,000 - \$35,000,000

* All costs are approximate and based on preliminary engineering. Final costs will be determined based on approved final project scope and contracting costs.

APPENDIX I
Map of Proposed Project Location

TL6975 San Marcos to Escondido Overview Map

Project Data

- Proposed power line route
- 300ft buffer of proposed route
- Existing power line within 300ft of proposed route

Within 300ft of proposed route

- Recreational area, park, scenic area
- Populated place

Service Layer Credits: SANDAG Technical Services - GIS

SDG&E is providing this map with the understanding that the map is not survey grade.

APPENDIX J
List of Governmental Agencies Consulted and Statement of Position

DECLARATION OF SERVING A WRITTEN REQUEST FOR A BRIEF POSITION STATEMENT

I, Cameron Durckel, am a Public Affairs Manager responsible for managing community outreach for San Diego Gas & Electric Company (SDG&E). In accordance with the provisions of General Order 131-D, Section IX.B.1.d., I made a written request for a brief position statement by the agencies listed below concerning the proposed project described in this Application for a Permit to Construct SDG&E's TL6975 San Marcos to Escondido Project filed with the California Public Utilities Commission.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed on this 17th day of October 2017, at San Diego, California.

Cameron Durckel

Public Affairs Manager, SDG&E

List of Agencies:

California Native American Heritage Commission

City of San Marcos

City of Escondido

City of Carlsbad

County of San Diego
