Nuevo, CA Weather

Nuevo, CA climate is warm during summer when temperatures tend to be in the 70's and cool during winter when temperatures tend to be in the 50's.

The warmest month of the year is August with an average maximum temperature of 98.10 degrees Fahrenheit, while the coldest month of the year is December with an average minimum temperature of 34.40 degrees Fahrenheit.

Temperature variations between night and day tend to be relatively big during summer with a difference that can reach 39 degrees Fahrenheit, and relatively big during winter with an average difference of 30 degrees Fahrenheit.

The annual average precipitation at Nuevo is 11.40 Inches. Rainfall in is fairly evenly distributed throughout the year. The wettest month of the year is February with an average rainfall of 2.86 Inches.

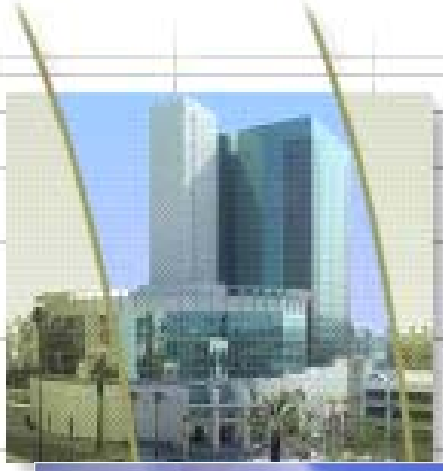
Riverside County Operational Area

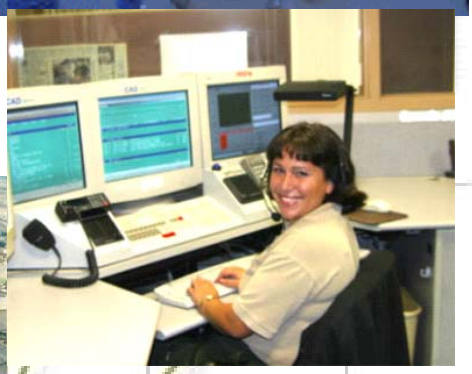
Multi-Jurisdictional Local Hazard Mitigation Plan (LHMP)

FINAL COPY APPROVED BY FEMA

MARCH, 2005

PART 1





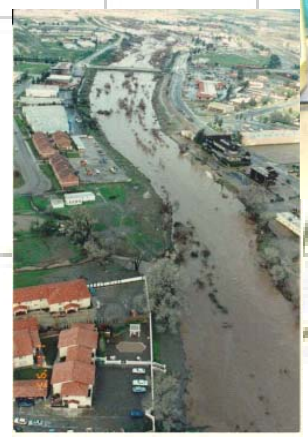


Table of Contents

Multi-Jurisdictional LHMP Evaluation Requirements
Cross Reference Table

Category of Requirement	Federal Emergency Management Agency (FEMA) / California Office of Emergency Services (OES) Evaluation Requirement & Statutory Authority	Riverside Operational Area LHMP Response
Prerequisite	Adoption by Local Governing Body: §201.6(c)(5)	Part I -County Resolution Part II - Placed at the front of each Jurisdiction's Section.
Prerequisite for Multi-Jurisdictional Plan	Indication of Specific Jurisdictions Represented in the Plan	Pages 1-2 Appendix B
	Adoption by Local Governing Body for Each Jurisdiction	Part I County Resolution Part II - Placed at the front of each Jurisdiction's Section.
	Supporting Documentation of Adoption Included for Each Jurisdiction	
	Description of How Each Jurisdiction Participated in the Plan's Development	Pages 3 – 12
Planning Process	Documentation of the Planning Process: §201.6(b) and §201.6(c)(1)	Pages 3 – 12
	Local Capabilities Assessment: §201.4(c)(ii) and §201.6©(1) – OPTIONAL REQUIREMENT	Part II - Each Jurisdictions Section
Risk Assessment	Identifying Hazards: §201.6(c)(2)(i)	Pages 22 - 39
	Profiling Hazards: §201.6(c)(2)(i)	Pages 22 – 200; See p. iii
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Pages 19 – 200; See p. iii
	Assessing Vulnerability: Structures: §201.6(c)(2)(ii)(A)	Pages 19 – 200; See p. iii
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Pages 19 – 200 See p. iii
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(c)	Pages 19 - 2000 See p. iii

Jurisdictions "Submitting" as Part of the Riverside Operational Area Multi-Jurisdictional LHMP

The following "Submitting Jurisdictions" are agencies that are part of the Riverside Operational Area Multi-Jurisdictional LHMP. These jurisdictions conducted internal and public meetings and activities in support of the Plan and completed the projects necessary to complete their portion of the Plan, both in Part I and Part II. A list of other participating agencies, private sector organizations, and people is in Appendix A.
(Note: Each jurisdiction is electronically hyperlinked to their specific portion of Part II in this Plan.)

1. Purpose / Vision / Values

Purpose of LHMP

Riverside Operational Area (OA) has developed this Multi-Jurisdictional Local Hazard Mitigation Plan (LHMP) to create a safer community. The Riverside OA LHMP is the representation of Riverside OA's commitment to reduce risks from natural and other hazards, and serves as a guide for decision-makers as they commit resources to reducing the effects of natural and other hazards. The Riverside OA LHMP serves as a basis for State OES to provide technical assistance and to prioritize project funding. (See IFR §201.6.)

While the Disaster Mitigation Act of 2000 ("DMA 2000") requires that local communities address only natural hazards, the Federal Emergency Management Agency (FEMA) recommends that local comprehensive mitigation plans address man-made and technological hazards to the extent possible. Towards that goal, Riverside OA has addressed an expansive set of hazards.

In developing the hazard list, the goal was to create a Hazards List by identifying as many hazards as could be found in the county. This list was used as part of the planning process. Some of the disasters identified on the list were found to have a limited amount of supporting information about the potential impact, specific locations in the county where the hazard might arise, and the magnitude of that hazard on the economy, infrastructure, and citizens of the County. Those hazards that fell into to group, were identified as being part of the yearly maintenance process for the Plan.

For disasters declared after November 1, 2004, Riverside OA and the jurisdictions participating in the multi-jurisdictional effort must have an LHMP approved pursuant to §201.6 in order to receive FEMA Pre-Disaster Mitigation (PDM) project grants or to receive post-disaster Hazard Mitigation Grant Program (HMGP) project funding. The Multi-Jurisdictional LHMP is written to meet the statutory requirements of DMA 2000 (P.L. 106-390), enacted October 30, 2000 and 44 CFR Part 201 – Mitigation Planning, Interim Final Rule, published February 26, 2002.

Goals Shared with State Multi-Hazard Mitigation Plan

Riverside OA's LHMP supports the goals that it shares with the State of California Multi-Hazard Mitigation Plan, namely:

Goal 1: Save Lives and Reduce Injuries
Goal 2: Avoid Damages to Property
Goal 3: Protect the Environment
Goal 4: Promote Hazard Mitigation as an Integrated Policy

Support of Broader County Vision

The Multi-Jurisdictional LHMP supports the broader vision and values of the County of Riverside, along with the cities, special districts, and tribes within the county. As stated in Riverside County General Plan of October 2003, the Riverside County vision is:

"Riverside County is a family of special communities in a remarkable environmental setting."

The General Plan expounds on the Vision Statement by saying:

Our vision is based on values that provide the foundation for common ground that, in turn, underpin the General Plan's goals, policies, and actions. The people of Riverside County declare that they join together in holding the following values and seeking a community future based on them. It can be argued that our values are optimistic and very ambitious: that they require our best instincts to prevail. Of course-why would we seek less in shaping our communities? So, with that theme in mind, let us express the values that have motivated our community building and that will continue to do so in the future.

- Community
- Inter-relatedness
- Rights
- Responsibilities
- Risks
- Diversity
- Valued Contributions
- Varied Communities
- Balance
- Participation
- Volunteerism
- Decision Making
- Creativity and Innovation
- Distinctiveness
- Housing
- Natural Environment
- Man-made Environment
- Employment
- Safety
- Planning Integration
- Communication and Information
- Quality Management
- Sustainability
- Costs
- Governmental Cooperation
- Youth in the Community

2. The Planning Process

Planning Process Requirements Cross-Reference Table

D	Documentation of Opportunity for Neighboring Communities, Agencies, Businesses, Academia, Nonprofits, and Other Interested Parties to be Involved in the Planning Process	Pages 3 – 12 Part I, Appendix A
E	Description of Review and Incorporation, if Appropriate, of Existing Plans, Studies, Reports, and Technical Information	Page 3 -12

Initial Planning

The Riverside County Office of Emergency Services ("County OES") acting under the guidance of the State of California Government Code Sections 8559 and 8607 has the primary responsibility for activities within the County of Riverside Operational Area. In doing so, County OES staff acted as the coordinators and as the "primary coordinating agency" for the development of the Riverside County Operational Area Multi-jurisdictional Local Hazard Mitigation Plan. The Pan was developed with the assistance of the many of County OES's public and private partners,

County OES and its partners began the initial process of planning for the LHMP in the year 2002. Although formal guidance had not been received from the State of California on the development of a LHMP, three major factors were considered in the initial planning process:

1. The County of Riverside had created the Riverside County Integrated Project (RCIP) to update its General Plan and its Safety Element of the General Plan. This update was part of Riverside County's comprehensive land use planning, capital improvements planning, and building code development to guide and control growth and development within the County. Part of the project involved input and participation from many of the cities, special districts, and tribes who would be partners in the development of a LHMP. California State Government Code 65302 (g)(2) allows cities and special districts within a county to adopt all or part of the County's Safety Element and it was felt that many of the objectives, goals, and strategies developed in the RCIP Plan could be used in the LHMP.

2. County OES and its partners believed that a multi-jurisdictional approach was the most appropriate document because of:
   a. The large expanse of unincorporated areas within Riverside County
   b. The large number of boundary (incorporated and unincorporated) overlaps between cities, special districts, and the County itself.

3. The County Fire Department, County Sheriff's Department, and County Office of Emergency Services provide contract services to over seventy-five percent of the cities in the County. This meant that these County Departments would be involved in the planning process for the majority of cities.

Once County OES and its partners made the decision to use the multi-jurisdictional approach, a process for planning and developing a LHMP was created. (Note: Throughout this document, the word “County” is used to refer to Riverside County (County OES and all County Departments, Commissions, and special agencies) and all of the County's partners in the LHMP process).

The primary design of the Plan was to have a base document (Part I) with detailed information about the county, all of the hazards in the county, and proposed hazard mitigation goals and strategies. The second part of the Plan (Part II) was a document specifically identifying each 'Submitting Jurisdiction's" hazards, mitigation priorities and strategies, and land use issues.

The Planning and Plan Development Steps

This process involved the following steps and milestones:

Step 1 - Developing Partners

County OES sent out letters with information about the LHMP and inviting organizations and individuals to participate. A copy of the letter is located in Appendix A. These letters were mailed to
1. All jurisdictions within the Operational Area
2. Those counties and cities adjacent to the County
3. Private businesses, utilities, and organizations within the county who were participating in the RCIP.

4. Members of the County's Citizen Community Groups and other volunteer organizations. Under County Ordinance, the County of Riverside is divided into eight different Citizen Community Emergency Preparedness Groups that function under the Riverside County Fire, Office of Emergency Services. These groups consist of citizens interested in disaster preparedness, members of the local unincorporated areas of the County, community leaders, gated residential communities, amateur radio groups, emergency management, and members of the business community. These meetings are open, public meetings with agendas posted at various community buildings, etc.
5. Members of the Western Riverside Emergency Council (representing the County's hospitals), the Emergency Managers of Riverside County, and the Emergency Mangers of the Coachella Valley were used as working groups in the development of the LHMP.
6. Special groups representing specific disciplines such as agriculture, the military, etc.

A list of participants is located in Appendix A. The City of Redlands was the only out-of-county jurisdiction that participated in the planning process.

Between September 2003 and October 2003, a number of initial informational meeting were held throughout the County to discuss the Plan and gather interest from jurisdictions. Each agency head signed a Letter of Participation formalizing their agency's commitment to the planning process. Those agencies that could formally commit to the planning process (CALTRANS, CHP, military, etc.) indicated a strong level of support to the planning process and participated heavily. Additional planning meetings were held between October 2003 and April 2004 with the different groups to conduct training on how to develop the plans. Planning, assessment, and development meetings were held from January 2004 through September 2004.

Step 2 - Establish Goals and Priorities

After developing the various partnerships needed to create the Plan, a set of overall Goals and Objectives were created. Although the County RCIP Plan set a global set of prioritized Goals, Objectives, and Activities for the County and those agencies utilizing the RCIP Plan as part of their General Plan, as the lead agency, County OES staff felt that a general set of Goals and Objectives were necessary. The following identifies those Goals and Objectives:

1. Reduce possibility of damage and loss to existing community assets including addressable structures, critical facilities and infrastructure due to natural, man-made, and technological hazards by:
   a. Promoting disaster-resistant future development
   b. Promoting hazard mitigation as a public value in recognition of its importance to the health, safety, and welfare of the population

2. Reduce possibility of damage and loss to existing community assets including addressable structures, critical facilities and infrastructure due to floods by:
   a. Promote the continuing purchase of flood insurance by property owners in flood hazard areas.
   b. Protect existing assets with the highest relative vulnerability to the effects of flooding associated with the 100-year floodplain.
3. Reduce possibility of damage and loss to existing community assets including addressable structures, critical facilities and infrastructure due to landslides by better identifying the types and locations of potential landslide zones.
4. Reduce possibility of damage and loss to existing community assets including addressable structures, critical facilities and infrastructure due to natural, man-made, or technological disasters by better determining detailed information about individual structures, other critical facilities and infrastructure with the highest relative vulnerability any of the known hazards.
5. Promote hazard mitigation and disaster preparedness as a public value in recognition of its importance to the health, safety, and welfare of the population through a higher level of public education.

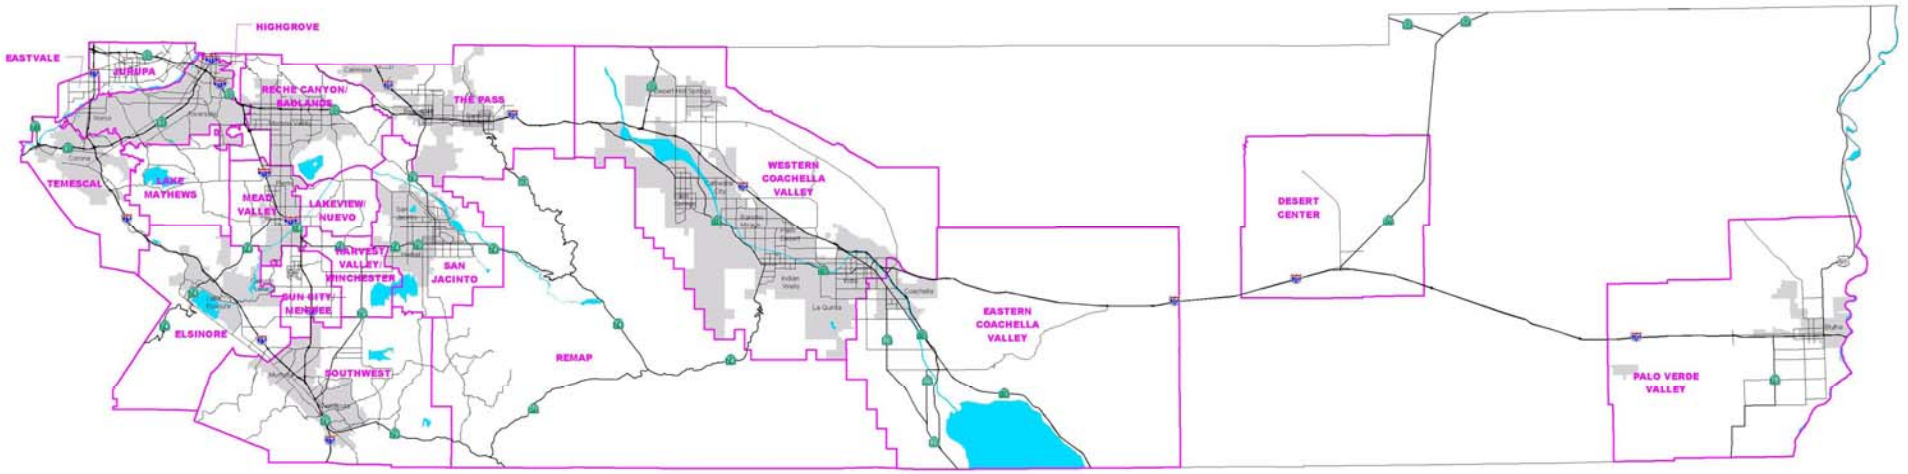
Step 2 - Identification of Hazards and RCIP Plan Data.

The County General Plan, the Safety Element to the General Plan, and the RCIP Plan were approved in October, 2003. In the RCIP Plan, specific strategies and goals were established for the mitigation of hazards, the reduction of the land use development on the environment, and efforts to reduce the impact of urban interface with the forests and desert.

Starting in 1999, numerous meeting were held to develop the new Plan ans Safety Element Updates. As part of the planning process, the RCIP plans were subject to numerous public sessions and meetings. Additionally, a phone survey conducted with community members from each Supervisorial District for input and response to the Plan. A listing of the meetings, minutes of the planning meetings, and newsletters can be can be found at the RCIP Library at: http://www.rcip.org/library.htm. The RCIP Final Plan draft was posted on the RCIP Website (http://www.rcip.org) for a review and comments by the general public for approximately six months prior to the final adoption of the RCIP Plan.

The RCIP Plan divided the County into eighteen geographical areas to better identify individual issues and make specific recommendations. This also allowed for the identification of specific hazards and mitigation objectives, goals, and strategies based on the specific geographical areas within the county. These eighteen geographical areas coincide with the various cities in the county. The map on the next page identifies the geographical areas in the RCIP Plan.

Specific hazard information as well as mitigation strategies will be listed as part of each hazard's discussion in Part I of this Plan.



Source Information: County of Riverside.
The oldest data shown on this map is 1990.

Area Plan Boundary
Water

0 65,000 Feet

Figure LU-4

RIVERSIDE COUNTY AREA PLAN BOUNDARIES

Data from these plans was gathered for use by the participates in the LHMP project. The strategic mitigation proposals and goals adopted in the General Plan were used as the basis for the development of the mitigation strategies listed in the Mitigation Goals Questionnaire

Step 3 - Local Meeting and Training

Once the partners in the Plan development were established, County OES held numerous meetings and training sessions. These open meetings had participation from the different jurisdictions, community groups, the general public, and specialty groups such as the agriculture group. In addition to these meetings, the jurisdictions had local meeting to discuss they hazards and mitigation goals within their individual community. The purpose of these meetings was to:

1. Inventory and assess the hazards within the County including:
   a. The specific type of hazard.
   b. Specific information relating to location, size, etc.
   c. Any history of major events relating to the hazard
   d. Jurisdictions directly or indirectly threatened by the hazard
   e. Potential economic impact of the hazard.
2. Develop a system of evaluating the risk potential, probability, and vulnerability of the major hazards on the County, the jurisdictions within the County, and its citizens.
3. Develop mitigation efforts and strategies through the use of RCIP recommendations and others developed by the Plan's partners.
4. Establish a prioritization process for prioritizing the importance of the different mitigation efforts and strategies on a jurisdiction-by-jurisdiction basis.
5. Develop the different documents for the jurisdictions to complete for their section of Part II of the Plan.

Step 4 - Individual Jurisdiction Activities

Jurisdiction Information

Each jurisdiction provided jurisdictional information identifying:

1. The jurisdiction and the contact person
2. The jurisdiction's service area size and population
3. If the have an EOP Plan and a Safety Element of their General Plan

This information will be used by County OES to help determine what activities need to occur as part of this plans maintenance process as well as which jurisdictions need to have EOP plans written and/or updated.

Hazard Assessment and Identification

Each jurisdiction was asked to conduct an assessment of hazards for their jurisdiction and complete the forms detailing the results of their assessment. This assessment process consisted of identifying the hazards specific to their jurisdiction, the impact of those hazards, and specific goals and strategies for their jurisdiction. This assessment was conducted through the use of a questionnaire developed during the first round of meetings with the various working groups and from the hazards listed in the County's General Plan Update and RCIP. The questionnaire was used to help each Submitting Jurisdiction to identify the hazards within their service area. The information was used as the basis for each jurisdiction to evaluate its capabilities, determine its needs, and develop goals and strategies. The information identifies:

1. What specific hazards are within or adjacent to the service area of the jurisdiction.
2. Which of those hazards have had reoccurring events?
3. What specific hazards and risks are considered by the jurisdiction to be a threat specifically to the jurisdiction? These locations were identified by name and location for inclusion in the Specific Hazard Summary Table for each jurisdiction.
4. Specific types of facilities owned and operated by the jurisdiction.
5. Locations damaged from prior disasters or hazard causing events.
6. Information about the jurisdiction's EOC location in relationship to the hazards.

Jurisdiction's Critical Facility Evaluation

Riverside County OES, acting as the Operational Area, in cooperation with all local jurisdictions, developed a computer based Emergency Response Database for the County of Riverside. This database was created so emergency planners could use the database as a planning tool to develop response plans, evaluate their jurisdiction's capabilities, determine its needs, and develop goals and strategies. The program is also used during events to assist in-field units and planners in the EOCs.

The database functions similar to HAZUS in that it contains a list of major hazards and risks, all identified critical facilities in the County, and a topographical overlay of the County. Unlike HAZUS, the database does not contain any dollar values. This is a proposed upgrade in the future. The database is built in ArcView and a copy of ArcView and the database was provided to the jurisdictions in the County. The database is updated by the jurisdictions on a yearly basis through County OES and maintained by County GIS. Many of the HAZUS, RCIP, and other maps in the Plan were created with the use of this database.

Summarized HAZUS Results

Earthquake risks for each city and several unincorporated areas of the County were developed in terms of the vulnerability of the population and infrastructure and costs associated with physical and economic damages or destruction. Earthquake scenarios were used based on the major earthquake faults in the County of Riverside.

Risk assessments were developed only for the cities and county unincorporated areas because of the broad overlay of the special district's boundaries and the specific data available from the cities. Several of the HAZUS and GIS maps contained in Part I of the plan depict potential impact of various hazards throughout the County on the cities, unincorporated areas, and the various submitting special districts.

Local Jurisdiction Vulnerability Worksheet

During the meetings with the various working groups, a set of primary hazards was developed. Each jurisdiction was asked to use this list and evaluate the potential for an event to occur in their jurisdiction by each of the hazards. They were also asked to evaluate the potential impact of that event by individual hazard on their jurisdiction. The impact potential was determined based on:

1. Economic loss and recovery
2. Physical loss to structures (residential, commercial, and critical facilities)
3. The loss or damage to the jurisdictions infrastructure
4. Their ability to continue with normal daily governmental activities
5. Their ability to quickly recover from the event and return to normal daily activities
6. The loss of life and potential injuries from the event.

The jurisdictions were asked to rate the potential and severity of different hazards using a rating scale of between 0 and 4 (4 being the most severe). The jurisdictions were also asked to rank the listed hazards as they relate to their jurisdiction from 1 to 19 (1 being the highest overall threat to their jurisdiction). The Risk Assessment rating guidelines can be found in Appendix A of this Plan.

With the assistance of the RCIP Plan and County Departments, Riverside County OES conducted an extensive evaluation of the severity and probability potential of the different hazards for the county as a whole. The hazards were also ranked for the County. Those numbers and rankings were provided to the jurisdictions as a comparison guide. The County numbers are listed at the top of each hazard discussion section. The individual agency numbers can be found in each agency's section in Part II.

A separate table was created to address the hazards relating to agriculture and was assessed by the agriculture working group. This table can be found in the Agriculture Appendix of Part I of the Plan.

Local Jurisdiction Mitigation Strategies and Goals

The working groups created a detailed list of Mitigation Strategies and Goals for the primary hazards previously identified. This list was developed so that each jurisdiction could determine what mitigation strategies, goals, and objectives would be of value for their organization. The jurisdictions were also given the opportunity to list additional strategies, goals, and objectives specific to either their jurisdiction or their workgroup (i.e. the hospitals, agriculture, etc.).

Once this list was compiled, each jurisdiction was asked to determine a priority of the strategies, goals, and objectives based on:

1. The hazards identified in their jurisdiction
2. The ability of their organization to perform the strategy, goal, or objective
3. The availability of funding

These were prioritized as High, Medium, Low, or N/A.

Local Jurisdiction Proposed Mitigation Action and Strategy Proposal

Each jurisdiction was required to develop a Mitigation Strategy Proposal based on one of the following:

1. The strategy, goal, or objective rating "High Priority" on the Local Jurisdiction Mitigation Strategies and Goals
2. A specifically identified strategy, goal, or objective that was developed as part of one of the working groups planning sessions such as the hospitals or agriculture
3. A specifically identified strategy, goal, or objective that was developed as part of one of the jurisdiction's internal working group planning sessions.

In some cases, the strategy, goal, or objective was one that the jurisdiction or working group felt was very realistic and of value.

As part of this process, each Submitting Jurisdiction was required to perform a cost-benefit analysis. They were required to answer the question at the bottom of the Proposal page that asks if they had conducted a Cost-Benefit Analysis of some type. This analysis was conducted either by completing the Cost-Benefit Form attached to the Proposal or by some other approved method. Many of the jurisdictions used the cost-effective analysis approach outlined in the FEMA publication, *Cost and Benefits of Natural Hazards Mitigation.* This cost-benefit analysis was not restricted to one of the natural hazards.

In some cases, the jurisdiction or working group identified a proposal that highlighted a life-safety issue over a standard hazard proposal. This was done when there was either historical data or other sources of information indicating that the life-safety issue needed to be emphasized or brought to the public's attention.

As part of the planning process, presentations on the different methods of cost-benefit analysis were given to the different working groups. The resources used for these presentations are listed in Appendix B of Part I, Resource List.

Development Trends Questionnaire

This questionnaire identifies a comparison of specific land use issues between 2004 and 2010. The questionnaire also identifies the specific threat potential to the jurisdiction in relationship to residential and commercial structures along with critical facilities. This threat potential is focused on structural loss rather than dollar-value loss as it relates to the three main natural hazards – earthquakes, floods, and wildland fires. The determination of specific dollar-value loss relating to commercial and critical facilities was found to be very limited and a difficult task to establish. This issue will be addressed in future updates of the Plan.

The questionnaire also requires the jurisdiction to identify the process it will use to maintain their portion of the Plan. They we given the option of continuing to work with the County or develop their portion as an independent document in the future.

County OES will use this data for future HAZUS and Emergency Response Database activities.

Step 5 - Finalization and Adoption by the County Board of Supervisors and Each Jurisdiction

A final draft of the LHMP was posted on the County's Website on September 30, 2004 for public commit. The County received ten responses to the posting. All were positive and had no comments for change or modification to the posted draft. The draft was removed from the Website on November 5, 2003.

A presentation of the Plan and its information was made in a public meeting for each of the "Submitting Jurisdiction." governing bodies. Comments were received at those open meetings and the Plan was then adopted by the governing body of each jurisdiction. An open public Board of Supervisors meeting was held to review and approve the Plan by the County of Riverside. After comments by the public and members of the Board, the Plan was formally adopted.

Copies of the adoptions can be found at the front of each jurisdiction's section in Part II.

3. Riverside County Profile

General Overview

Riverside County is the fourth largest county in the State of California, stretching nearly 200 miles across and comprising over 7,200 square miles of fertile river valleys, low deserts, mountains, foothills, and rolling plains. Riverside County shares borders with densely populated Los Angeles, Orange, San Diego, and San Bernardino Counties, extending from within 14 miles of the Pacific Ocean to the Colorado River. It is also located in the southeastern portion of the Governor's Office of Emergency Services Southern Region.

The County of Riverside is vulnerable to a wide range of hazard threats. In recent years, the county has experienced several disastrous events, including earthquakes, floods, fires, pestilence, and storms. The increased use, storage, and transportation of numerous hazardous materials create additional hazardous threats. The threat picture is further complicated by the recent terrorist attacks on the Trade Center, causing federal mandates for all localities to prepare for potential terrorist activities.

The following is a map depicting Riverside County and the areas covered by this OA LHMP

Historical Setting

When Spain claimed California for its own, the Spaniards began putting a series of missions in what was then called Alta California. While no missions were ever built in what would become Riverside County, the Riverside County area played a vital role during the mission period. The San Gabriel Mission claimed lands in what are now Jurupa, Riverside, San Jacinto, and the San Gorgonio Pass, while the San Luis Rey Mission claimed land in what is now Lake Elsinore, Temecula, and Murrieta. These lands were used for grazing of the large herds of cattle and sheep that belonged to the missions. In 1776, and again in 1778, Juan Bautista de Anza, an army captain charged with discovering an overland route from the Mexican state of Sonora to San Gabriel and Los Angeles, passed through much of Riverside County and described fertile valleys, lakes, and sub-desert areas.

The Mission Period lasted until 1832, when Mexico, having taken over California from Spain 10 years earlier, desecularized the missions, and began doling out the vast mission holdings to Californians who were citizens of Mexico. The "grants" were called ranchos, and many of the ranchos in Riverside County have lent their names to modern-day locales - Jurupa, San Jacinto, San Gorgonio, Temecula, and La Laguna (Lake Elsinore).

With the advent of the transcontinental railroad in 1869, land speculators, developers, and colonists began to swarm to Southern California. The first colony in what would become Riverside County was Riverside itself. Judge John Wesley North, a staunch temperance-minded abolitionist from Tennessee who was ostracized back home after he talked a crowd out of lynching a black man, brought a group of associates and co-investors out to Southern California, and founded Riverside on part of the Jurupa Rancho. A few years later, the navel orange was planted and found to be such a success that full-scale planting started. By the time of Riverside County's formation, Riverside had grown to become the wealthiest city per capita in the country, due to the riches of the navel orange.

In the mean time, developments at Lake Elsinore, San Jacinto, and South Riverside (present-day Corona) were gaining in popularity and population. However, by the late 1880's and early 1890's, there was growing discontent between Riverside and San Bernardino, its neighbor 10 miles to the north. There were many political, spiritual, and economic differences between the two towns. San Bernardino was predominantly Democratic in nature, allowed saloons, and had been a hot-bed of secessionist sympathy during the Civil War. Riverside was temperance minded (few saloons if any were allowed in Riverside proper), and Republican. In addition, both towns were competing for settlers in an era in which many towns were languishing or dying because of a lack of inhabitants. After a series of instances in which charges were claimed about unfair use of tax monies to the benefit of the City of San Bernardino only, several people from Riverside decided to investigate the possibility of a new county.

Joined by San Diego County residents in the Temecula and San Jacinto Valleys and the desert region who were tired of living so far from their county seat, they petitioned the State legislature, held an election, and on May 9, 1893 formed Riverside County.

Further developments in Riverside County included Banning and Beaumont in the San Gorgonio Pass; Hemet south of San Jacinto; Moreno Valley east of Riverside; Perris, Lake Elsinore, Murrieta, and Temecula along the California Southern Railroad; Palm Springs, Palm Desert, Indio, and Coachella along the Southern Pacific route to Yuma; and Blythe on the Colorado River.

Today, Riverside County encompasses an area of nearly 7,200 square miles, and boasts a population of over 1.5 million people. Over the last decade, it has consistently been one of the fastest growing areas in the country.

Governing Bodies

Riverside County is governed by a five-member Board of Supervisors. By law, Supervisorial district boundaries are adjusted every ten years based on population changes reported by the U.S. Census Bureau. Each Supervisor currently represents over 300,000 residents (approximately one-fifth of all County residents). The map on the following page outlines the Supervisorial Districts.

Other participating jurisdictions in the OA LHMP have their own governing bodies (e.g., city councils, tribal councils, water district boards, hospital district boards, etc.).

ASSESSOR DATA

The tables on the next two pages identify the potential loss value of various types of buildings in the County. The values are listed by City and by County areas. The lists identify the number and values for commercial residential properties (apartment buildings), all other commercial properties, single-family residential properties, and multi-family non-commercial residential properties (condos, duplexes, etc.). These values are based on County Assessor figures as of June, 2004.

Area	COMMERCIAL RESIDENTIAL PROPERTIES	VALUE	COMMERCIAL PROPERTIES	VALUE	SINGLE FAMILY RESIDENCES	VALUE	MULTI-FAMILY RESIDENTS	VALUE

Critical Facilities and Values

Critical facilities are parts of infrastructure that must remain operational after an earthquake, or facilities that pose unacceptable risks to public safety if severely damaged. In Riverside County, critical facilities include schools, hospitals, fire and police stations, emergency operation centers, communication centers, dams, and industrial sites that use or store explosives, toxic materials or petroleum products. It is essential that critical facilities have no structural weaknesses that can lead to collapse.

Critical facilities may provide only limited services if lifelines are disrupted. The issue of seismic hazard mitigation for lifelines is very complex, given the diversity of lifeline facilities. The effects of strong ground motion applies to structures involved in lifeline service, such as the control tower in an airport, or the buildings that house computers and telephone circuits that are central to communication lifelines. Strong ground motion can also result in damage to freeway interchanges and bridges that are essential for successful transportation lifelines. When properly designed, manufactured and laid out, buried pipelines are generally not damaged by strong ground motions, but can be severely disrupted in areas of surface rupture, liquefaction, or landslides.

In December of 2001, the County of Riverside Office of Emergency Services, in cooperation with Riverside County GIS, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool, as well as quickly determine the potential impact of an event may on a community, special district, or specific site. During the creation of the Emergency Response Database, each local jurisdictions and agencies was asked to identify critical facilities of the following types within their jurisdiction:

- Airports
- Community Colleges and Universities
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire and Law Enforcement Facilities
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management and Water Treatment Sites
- Reservoirs / Water tanks

For each site, the jurisdiction identified at a minimum, the location of the site (address and latitude and longitude), the type of structure, the type of occupancy, and site contact information.

During the creation of this LHMP, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the project.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

The County has identified and categorized over 1600 critical facilities. The maps on the following pages depict the following critical facilities and infrastructure:

- Fire, Police, and Emergency Operations Center;
- Schools;
- Hospitals; and
- Rail facilities, available water, oil, and natural gas pipeline inventory.

Mitigation Goals and Strategies Relating to Critical Facilities

The General Plan and RCIP both identify the following strategies relating to critical facilities:

1. Promote strengthening of planned and existing utilities and lifelines, the retrofit and rehabilitation of existing weak structures, and the relocation of certain critical facilities.

2. Find alternatives that improve site safety for the protection of critical facilities. Property acquisition for open space, change in building use or occupancy, or other appropriate measures can be employed to reduce risks posed by hazards.

3. Discourage development of critical facilities that are proposed in dam failure inundation areas, and apply hazardous materials safety guidelines within such zones.

4. Coordinate with the Public Utilities Commission (PUC) and/or utilize the Capital Improvement Program, to strengthen, relocate, or take other appropriate measures to safeguard high-voltage lines, water, sewer, natural gas and petroleum pipelines, and trunk electrical and telephone conduits that:
   a. extend through areas of high liquefaction potential;
   b. cross active faults; or
   c. traverse earth cracks or landslides.

5. Strengthen the project permit and review process to ensure that proper actions are taken to reduce hazard impacts and to encourage structural and nonstructural design and construction. Damage must be minimized for critical facilities, and susceptibility to structural collapse must be minimized, if not eliminated.
   a. Ensure that special development standards, designs, and construction practices reduce risk to tolerable levels for projects involving critical facilities, large-scale residential development, and major commercial or industrial development through conditional use permits and the subdivision review process. If appropriate, impact fees should be assessed to finance required actions.
   b. Require mitigation measures to reduce potential damage caused by ground failure for sites determined to have potential for liquefaction. Such measures shall apply to critical facilities, utilities, and large commercial and industrial projects as a condition of project approval.
   c. Require that planned lifeline utilities, as a condition of project approval, be designed, located, structurally upgraded, fit with safety shutoff valves, be designed for easy maintenance, and have redundant back up lines where unstable slopes, earth cracks, active faults, or areas of liquefaction cannot be avoided.

The County attempted to develop viable values for the different facilities and structures listed in the database. In attempting to determine the value of the facilities, County OES staff found that the values associated with many of the locations, that it was impossible to determine a workable dollar figure. As part of the 2005 Plan Maintenance Project, County OES staff will attempt to develop an equitable method of determining the true value of the locations.

County OES staff was able to develop a "standard value" for the building value of the following facilities:

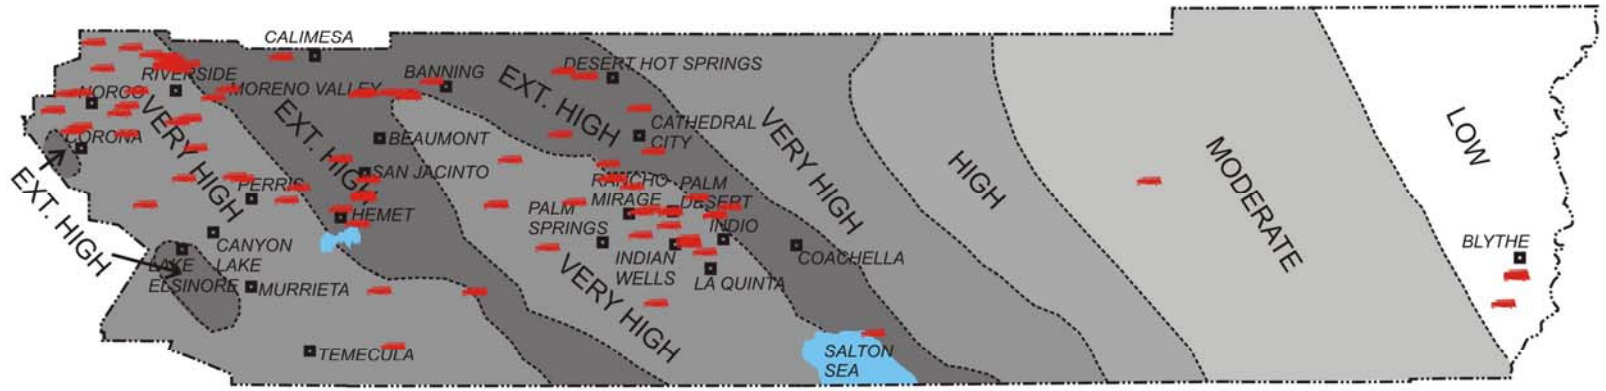
Facility	"Standard Value"
Fire Station	$ 1.9 million
Police/Sheriff Station	$ 7.6 million
Courthouse	$ 6 million
Medical Clinic	$ 6 million
Gymnasium/Community Center	$3.5 million

Loss Factors

The loss estimates provided in this Plan are based on the best data currently available and the methodologies applied result in an approximation of risk. These estimates may be used to understand relative risk from various hazards and potential losses. There are, however, uncertainties are inherent in any loss estimation methodology, arising in part from incomplete knowledge concerning the different hazards, as well as the use of approximations and simplifications that are necessary for a comprehensive analysis.

It is also important to understand that the quantitative vulnerability assessment results are limited to the exposure of people, buildings, critical facilities and infrastructure to hazards. It is currently beyond the scope of this initial Plan to analyze other types of hazard impacts (e.g., people injured or killed, shelter requirements, loss of facility/system function, and economic losses) for many of the listed hazards. The data necessary for this detailed level of analysis is not currently available.

In future updates of the plan, the County will attempt to conduct additional analysis of the impact of other hazards. .



Location of Emergency Response Facility
Fire, Police, or Emergency Operations Center
(based on HAZUS '99 inventory.)

General Ground Shaking Risk

- Low = <10% g
- Moderate = 10-20% g
- High = 20-30% g
- Very High = 30-40% g
- Ext. High = >40% g

4. Hazards Facing Riverside County

List of Risk Assessment Requirements

Element	Requirement	Riverside Operational Area LHMP Response
Identifying Hazards – A	Description of the Types of Natural Hazards Affecting Riverside County	See following table for page numbers by hazard
Profiling Hazard Events – A	Location of Hazards Identified	See following table for page numbers by hazard
Profiling Hazard Events – B	Extent of Hazards Identified	See following table for page numbers by hazard
Profiling Hazard Events – C	Information on Previous Occurrences	See following table for page numbers by hazard
Profiling Hazard Events – D	Probability of Future Events	See following table for page numbers by hazard
Assessing Vulnerability: Overview – A	Overall Summary Description of Riverside County's Vulnerability	See following table for page numbers by hazard
Assessing Vulnerability: Overview – B	Impact of Each Hazard on Riverside County	See following table for page numbers by hazard
Assessing Vulnerability: Identifying Structures – A	Description of Vulnerability in Terms of Types and Numbers of Existing Buildings, Infrastructure, and Critical Facilities Located in Identified Hazard Areas	See following table for page numbers by hazard
Assessing Vulnerability: Identifying Structures – B	Description of Vulnerability in Terms of Types and Numbers of Future Buildings, Infrastructure, and Critical Facilities Located in Identified Hazard Areas	See following table for page numbers by hazard
Assessing Vulnerability: Estimating Potential Losses - A	Description of Vulnerability in Terms of an Estimate of Potential Dollar Losses to Existing Buildings, Infrastructure, and Critical Facilities Located in Identified Hazard Areas	See following table for page numbers by hazard
Assessing Vulnerability: Estimating Potential Losses - B	Description of Vulnerability in Terms of an Estimate of Potential Dollar Losses to Future Buildings, Infrastructure, and Critical Facilities Located in Identified Hazard Areas	HAZUS DATA Part I pages 79 -113 See following table for page numbers by hazard
Assessing Vulnerability: Analyzing Development Trends – A	Description of Land Uses and Development Trends and Critical Facilities	County - Part I Pages 24 – 27 Jurisdictions - Part II Land Use Questionnaire for each Jurisdiction
Multi-Jurisdictional Risk Assessment	Where Needed to Reflect Unique or Varied Risks, Risk Assessment Included for Each Participating Jurisdiction	Part II, Jurisdictional Detail

Risk Assessment Requirements -Reference Table
This table represents information for the County and the Submitting Jurisdictions
Individual HAZUS data for each City is included in section of Part II

Hazard	Riverside County and Listed Affected Jurisdictions From Part II	Hazard Definition, Extent, History, Future Event Probability	Risk Assessment: General Impact on People, Structures, and Infrastructure	Mitigation Strategy and Mitigation Programs
Wildfire	40	41-52	47-52	52-53
Flooding	54-55	55-62	62-65	65-67
Earthquakes	68-69	69-75	75-79 HAZUS Analysis 79-113	113-115
Extreme Weather	116-117	117-130 Listed by Weather Type	131 - 133	133 - 139
Landslides	140	141 - 145	145 - 147	147 - 148
-Insect Infestation	149	150 - 151	152	152
Dam failure	153	154 - 158	159 - 160	160
Hazardous materials (hazmat) incidents	161 - 162	162 - 164	164 - 166	167
Transportation emergencies	168	169 - 175 Listed by Type	175	175
Pipeline/Aqueduct incidents	176	177	178	178
Blackout	179	180 - 181	181	181
Toxic pollution	182	183 - 185	185 - 187	185 - 189
Nuclear incidents	189	190	190	190
Civil unrest	192	192 - 193	193	193
Jails and prisons incidents	194	194 - 195	195 - 196	196
Terrorism	197	197 - 200	200	200

Mitigation Strategy Requirements Cross-Reference Table

Element	Requirement	Riverside County LHMP Response
Local Hazard Mitigation Goals - A	Description of Mitigation Goals to Reduce or Avoid Long-Term Vulnerabilities to the Identified Hazards	Wildfire – pp. 28 – 40 Flooding pp. 41 – 53 Earthquake pp. 54 – 100 Landslides pp. 110-113 Hazardous Materials pp. 127-134
Identification and Analysis of Mitigation Actions - A	Identification and Analysis of a Comprehensive Range of Specific Mitigation Actions and Projects for Each Hazard	
Identification and Analysis of Mitigation Actions - B	Explain How Identified Actions and Projects Address Reducing the Effects of Hazards on New Buildings and Infrastructure	
Identification and Analysis of Mitigation Actions - C	Explain How Identified Actions and Projects Address Reducing the Effects of Hazards on Existing Buildings and Infrastructure	

Identification of Hazards

With its varying topography; mix of urban and rural areas; rapidly growing permanent, transient, and recreational populations, the Riverside OA is subject to potential negative impacts from a broad range of hazards and threats. There are three broad categories of hazards that threaten the OA, namely:

- Natural hazards
- Technological hazards
- Domestic security threats

In addition, because of the importance of agriculture to the economy of the Riverside OA, this LHMP assesses the impacts of each hazard type to agriculture specifically.

Natural hazards include:

- Wildfires
- Floods
- Earthquakes
- Extreme Weather
- Landslides
- Insect Infestation

Technological hazards include:

- Dam Failure
- Hazardous Materials (Hazmat) Incidents
- Transportation emergencies
  - Highway
  - Rail line
  - Airline/Airport
- Pipeline/Aqueduct Incidents
- Blackout
- Toxic Pollution
- Nuclear Incidents

Domestic security threats include:

- Civil unrest
- Jails and Prisons incidents
- Terrorism (CBRNE)
  - Chemical
  - Biological
  - Radiological
  - Nuclear
  - Explosive

The following table describes how and why the hazards listed above were identified by Riverside County in preparing its LHMP.

Hazard	How and Why Identified
Wildfire	History of events and the presence of a large amount of timber and brush areas in OA
Flooding	History of events and the presence of a large number of rivers and channels in the OA
Earthquakes	History of events and the presence of fault lines and geologic activity in the OA
Extreme Weather	History of events
Landslides	History of events
Insect Infestation	History of events and the current presence of insect infestation in the OA
Dam Failure	Vulnerability due presence of a relatively large number of dams
Hazardous Materials (Hazmat) Incidents	History of events and the presence of a large number of transportation corridors and Hazardous Materials Facilities in the OA
Highway emergencies	History of events and the presence of a large number of transportation corridors
Rail line emergencies	History of events and the presence of a large number of transportation corridors
Airline / airport emergencies	History of events and the presence of a large number of airports and flight paths within the OA
Pipeline/Aqueduct incidents	History of events and the presence of a large number of various pipelines within the OA
Blackout	History of events
Toxic pollution	Vulnerability due to presence of pollution in air, water, and soil
Nuclear Incidents	Vulnerability due to transportation routes and relative proximity of San Onofre Nuclear Generating Station (SONGS)
Civil Unrest	Vulnerability due to number of public gathering venues
Jails and Prisons Incidents	Vulnerability due to presence of State and County correctional facilities
Terrorism	Heightened sense of awareness since September 2001

Land Use and Development Trends

Existing land use within Riverside County is a mosaic of varying types of uses, ownership, character, and intensity. Uses include:

- Rural residential
- Single family detached
- Single family attached
- High-density residential (apartments)
- Mobile homes
- Recreational open space
- Other open space
- Heavy industrial
- Warehouse
- Vacant
- Agriculture
- Water
- Utilities
- Public facilities
- Schools
- Retail / Office
- Tourist / Commercial recreation
- Light industrial / Business park
- Mineral extraction

Development Trends

While the population of Riverside County is expected to continue growing, there are Land Use policies and elements within the Riverside County General Plan to help assure orderly development.

In addition, the Local Agency Formation Commission (LAFCO) of Riverside County is tasked with the mission to provide an orderly pattern of growth that reconciles the varied needs of the County. One of the fundamental principles of LAFCO is to ensure the establishment of an appropriate and logical municipal government structure for the distribution of efficient ad appropriate public services. LAFCO Land Use Objectives include:

- the discouragement of urban sprawl;
- the preservation of the physical and economic integrity of agricultural lands;
- the preservation of open space within urban development patterns;
- the orderly formation and development of agencies by shaping local agency boundaries;
- the minimization of agencies providing services to a given area; and
- the utilization of Spheres of Influence to guide future development of agency boundaries.

Agriculture

In terms of dollar value, agriculture is the largest industry in Riverside County, providing employment for a significant portion of the County's population. Agriculture faces continual pressure from urbanization, foreign competition, and rising production costs. Despite these pressures, those areas that remain in agricultural production represent a significant open space and economic resource for the County.

The Riverside County General Plan defines productive agricultural lands as those which are "involved in long-term, substantial investment to agricultural use, and which has a long-term economic viability for agricultural use." Some of the factors affecting the economic viability of these areas include weather, water prices, crop selection, management techniques, commodity prices, new technology, and proximity to developed lands.

Because of the importance of agriculture to the Riverside OA, effects on agriculture are assessed for each hazard type identified in this LHMP. In addition, a separate assessment of hazards and mitigation stratifies was conducted by the County and the results are included in a separate section of Part I.

Hazard Definition

A wildfire is an uncontrolled fire spreading through vegetative fuels, posing danger and destruction to property. Wildfires can occur in undeveloped areas and spread to urban areas where structures and other human development are more concentrated.

While some wildfires start by natural causes, humans cause four out of every five wildfires. Wildfires started by humans are usually the result of debris burns, arson, or carelessness. As a natural hazard, a wildfire is often the direct result of a lightning strike that may destroy personal property and public land areas, especially on state and national forest lands. The predominate dangers from wildfires are:

1. the destruction of timber, property, wildlife; and
2. injury or loss of life to people living in the affected area or using the area for recreational facilities.

History

There is a long history of wildfires in Riverside County, as reflected in the following map of wildfires from 1900 – 2002:

Location	Date of Incident	Declaration	Intensity	Reported Damage	Number Injured	Structures Affected	Incident Description	Source
Riverside County	10/28/1993	Federal	52,000 acres	$5,000,000	6	129	Variety of fires. 129 structures destroyed 6 injuries.	Co. Rpts.
Juniper/Weirick	8/31/1998	Federal - SBA	11,000 acres	$4,450,000	2	90	Multiple fires from lightening. 90 structures burned, 98 vehicles. 150 persons sheltered.	Co. Rpts.
Banning - Hwy 243	8/28/1999	None	Not Avail.	Not Avail.	1	0	Wildfire	Co. Rpts & NCDC
Twin Pines	8/29/1999	None	2,500 acres	$227,000	4	5	Part of larger fire in both San Bernardino and Riverside Counties.	Co. Rpts.

Interestingly, the preceding historical wildfire map points out the distinct bi-lateral character of Riverside County. The western end of the County is more urban, densely populated, and covered with vegetation that is susceptible to wildfires. The eastern end of the County is primarily desert, with far less population and far less vegetation than the western end of the County.

The following map provides closer detail of the western end of Riverside County, where the vast majority of the historical wildfires have occurred.

Risk Assessment

Fire is a continuous threat in Southern California, particularly in Riverside County. The major areas of concern are the wildland and urban interfaces. Literally hundreds of homes now border major forests and brush areas. With thousands of people living near and visiting wildland areas, the probability of human-caused fires is growing. Although occurring with less frequency, the threat of fire from lightning strikes also exists.

Generally, the dry seasons are a major time for an increase in the number of forest fires and structure fires. The standard "shake roof" is a particular hazard, as is the poor control of flammable growth around structures. During times of the strong "Santa Ana" winds, fire danger is particularly high.

The increase of industrial complexes, transportation networks, and utility networks pose a threat that is not seasonal, but rather year-round. Associated with industry and transportation networks is the ever present problem of hazardous materials. Although not necessarily a wildland threat, a fire occurring in an urban area involving hazardous materials could have serious consequences.

Due to the undeveloped and rugged terrain of Riverside County, highly flammable brush-covered land, and long, dry summers, many portions of the County have experienced numerous wildland fires in the recent past.

- **Effects on people and structures.** As the table of selected historic wildfire incidents from 1993 – 2004 on the preceding page shows, the effects on people and housing can be significant. Many of the fires shown in the table resulted in the evacuation of homes. In the 1998 Juniper/Weirick fire, 90 structures were destroyed and 150 persons were sheltered. In the 1993 Riverside County fire, 129 structures were destroyed.

- **Effects on infrastructure.** As shown in the table of historic incidents, wildfires often result in power outages. These outages can be extensive in geographic area and numbers of persons affected.

- **Effects on Critical Facilities.** There approximately 15 fire stations that are in potential direct risk from wildland fires. There are additional critical locations within the Idyllwild area that are at a high danger risk from wildland fires. In many cases (i.e. fire stations and schools) these facilities can not be relocated into a safer area.

- **Effects on agriculture.** Effects on agriculture can be devastating. In addition to the obvious impacts on animals and crops, wildfire can have deleterious effects on soil and water that will affect agriculture for an extended period of time.

Risk Assessment Conclusion.

The western end of Riverside County is far more susceptible to wildfire than the eastern end of the County. As the recent fires in the summer and fall of 2003 showed, the effects can be far-reaching in terms of the number of acres involved, the toll on human life, and the economic consequences. Wildfire will continue to be a high risk hazard for Riverside County.

Relationship to Other Hazards – Cascading Effects

Flooding and erosion. Major wildfires can completely destroy ground cover. If heavy rains follow a major fire, flash floods, heavy erosion, landslides and mudflows can occur. These cascading effects can have ruinous impacts on people, structures, infrastructure, and agriculture.

Hazard Mitigation Goals and Strategies

To achieve fire protection for all residents of the County, the County Department of Building and Safety and the County Fire Department enforce standards as they review building plans and conduct building inspections. Additional programs implemented to ensure compliance with established fire standards include:

- the maintenance of a Countywide Information Map, showing area of high fire hazard areas;
- the provision of uniform fire improvement standards for various land uses; and
- the continued updating of the Fire Protection Master Plan.

The Riverside County General Plan, adopted in October 2003, includes the following recommendations:

1. Develop and enforce construction and design standards that ensure that proposed development incorporates fire prevention features through the following:
2. All proposed construction shall meet minimum standards for fire safety as defined in the County Building or Fire Codes, or by County zoning, or as dictated by the Building Official or the Transportation Land Management Agency based on building type, design, occupancy, and use.
3. In addition to the standards and guidelines of the Uniform Building Code and Uniform Fire Code fire safety provisions, continue additional standards for high-risk, high occupancy, dependent, and essential facilities where appropriate under the Riverside County Fire Protection Ordinance. These shall include assurance that structural and nonstructural architectural elements of the building will not:
    a. impede emergency egress for fire safety staffing/personnel, equipment, and apparatus; nor
    b. hinder evacuation from fire, including potential blockage of stairways or fire doors.
    c. Proposed development in Hazardous Fire areas shall provide secondary public access, unless determined otherwise by the County Fire Chief.
    d. Proposed development in Hazardous Fire areas shall use single loaded roads to enhance fuel modification areas, unless otherwise determined by the County Fire Chief.
4. Reduce fire threat and strengthen fire-fighting capability so that the County could successfully respond to multiple fires.

5. Utilize ongoing brush clearance fire inspections to educate homeowners on fire prevention tips.

6. Conduct and implement long-range fire safety planning, including stringent building, fire, subdivision, and municipal code standards, improved infrastructure, and improved mutual aid agreements with the private and public sector.
7. Ensure coordination between the Fire Department and the Transportation Land Management Agency, Environmental Heath Department and private and public water purveyors to improve firefighting infrastructure, during implementation of the County's capital improvement programs, by obtaining:
   a. replacement and/or relocation of old cast-iron pipelines and inadequate water mains when street improvements are planned;
   b. assessment of impact fees as a condition of development; and
   c. redundant emergency distribution pipelines in areas of potential ground failure or where determined to be necessary.
5. Develop a program to utilize existing reservoirs, tanks, and water wells in the County for emergency fire suppression water sources.
6. Periodically review inter-jurisdictional fire response agreements, and improve fire fighting resources as recommended in the County Fire Protection Master Plan to keep pace with development, including construction of additional high-rises, mid-rise business parks, increasing numbers of facilities housing immobile populations, and the risk posed by multiple ignitions, to ensure that:
7. Fire reporting and response times do not exceed those listed in the County Fire Protection Master Plan identified for each of the development densities described;
8. Fire flow requirements (water for fire protection) are consistent with Insurance Service Office (ISO) recommendations; and
9. The planned deployment and height of aerial ladders and other specialized equipment and apparatus are sufficient for the intensity of development desired.
10. Continue County Fire Department collaboration with the Transportation Land Management Agency (TLMA) to update development guidelines for the urban/wildland interface areas. These guidelines should include increasing the development area to at least 30 feet past the usual boundary.
11. Continue to utilize the Riverside County Fire Protection Master Plan as the base document to implement the goals and objectives of the Safety Element.

Hazard Definition

A flood is defined as an overflowing of water onto an area of land that is normally dry. Floods generally occur from natural causes, usually weather-related, such as a sudden snowmelt, often in conjunction with a wet or rainy spring or with sudden and very heavy rainfalls. Floods can, however, result from human causes as a dam impoundment bursting. Dam break floods are usually associated with intense rainfall or prolonged flood conditions. In the Riverside County area, an earthquake can cause dam failure. The greatest threat to people and property is normally in areas immediately below the dam since flood discharges decrease as the flood wave moves downstream.

Floods are generally classed as either slow-rise or flash floods. Slow-rise floods may be preceded by a warning time lasting from hours to days, or possibly weeks. Evacuation and sandbagging for a slow rise flood may lessen flood-related damage. Conversely, flash floods are the most difficult for which to prepare due to the extremely short warning time, if there is any at all. Flash flood warnings usually require immediate evacuation. On some occasions in the desert areas, adequate warning may be impossible.

For floodplain management purposes, the following discussion describes the Federal Emergency Management Agency (FEMA) definition of “100-year flood.” The term "100-year flood" is misleading. It is not a flood that will occur once every 100 years. Rather, the flood elevation has a 1 percent chance of being equaled or exceeded each year. Thus, a 100-year flood could occur more than once in a relatively short period of time. The 100-year flood, which is the standard used by most federal and state agencies, is used by the National Flood Insurance Program (NFIP) as the standard for floodplain management and to determine the need for flood insurance. A structure located within a special flood hazard area shown on a map has a 26 percent chance of suffering flood damage during the term of a 30-year mortgage.

History

Riverside County flood events include the following:

Location	Date of Incident	Declaration	Intensity	Reported Damage	Number Injured	Structures Affected	Incident Description	Source
Riverside County	1/17/1993	Federal		$12,629,191	0	0	Flooding	NCDC

Risk Assessment

Although Riverside County has experienced periods of significant drought, the County can experience substantial rainfall. The soil in the County is generally not able to effectively absorb water quickly, nor is it able to absorb a large volume of water. Therefore, when Riverside County does experience heavy rain, or rain over a period of days or weeks, flash flooding is a common problem. This kind of event can occur even during a drought. A heavy rain can occur, and create flash floods, without relieving the overall drought conditions.

Floods that affect Riverside County can be attributed to three different types of storm events, namely:

1. A general winter storm that combines high-intensity rainfall and a rapid melting of the mountain snow pack.
2. A tropical storm out of the southern Pacific Ocean.
3. A summer thunderstorm, particularly in the desert areas.

There are three principal types of flood hazards, namely:

1. Stream flooding (including bridge scour and stream erosion)
2. Flash flooding (including debris and mud flows)
3. Sheetflow flooding (including alluvial fan flooding)

The major rivers in the western portion of Riverside County are dry most of the year and pose flood threats to developments within the floodplain during general storms of long duration. When a major storm moves into the area, water collects rapidly and becomes surface runoff. Resultant flood flows have predominantly short durations and sharp peaks. Increased urbanization increases flood potential by increasing the percentage of impervious surfaces.

Storms with high volumes of precipitation in a short period of time have occurred in the County causing flash floods, contaminated drinking water, disrupted electrical service, and damaged homes and contents. In addition, land that has been stripped of foliage and trees due to fire or human activity has experienced serious erosion.

Excessive precipitation can inundate soil in slopes causing mudslides and landslides. This activity can destroy homes, block highways, and destroy power lines. The County is vulnerable to this type of flood damage.

Heavy storms also can strand individuals playing near or crossing streams, rivers, flood control channels and intersections.

Riverside County has rivers, several dams, and reservoirs. Excessive rainfall can stress these systems causing serious damage to property and possible loss of life. Rivers can overflow their banks, destroy bridges, and wash out roads during flood conditions. Dam Failure is discussed in a separate section of this LHMP on that specific hazard.

Areas subject to flooding are located throughout the County. The topography of the County varies from several thousand feet above sea level to areas actually below sea level. Areas subject to flooding drain either naturally into flood controls or rivers, washes, and creeks. Most can handle normal flows.

In the desert areas, flooding can be rapid and quite severe during the period of July and August. Winter rains are generally more widespread in the desert, but flashflood potential is less due to steady-state rainfall. Winter rains are nonetheless flood-prone, but may be slightly more predictable. There is a danger to motorists who may attempt to drive through flooded washes.

Most areas of the Colorado River region are safe from heavy local rains. Heavy snow pack in the Rocky Mountains can cause controlled flooding if upstream flood control reserves are nearly full. Most flooding in the areas other than the desert is predictable and will provide time for evacuation and mitigation measures such as sandbags.

Effects on people and housing. As the table of flood incidents from 1998 – 2003 shows, the effects on people and housing can be significant.

Effects on commercial and industrial structures. Depending on the geographic area involved and the economic and demographic characteristics of the area, the effects on industry and commerce may be significant. For example, Corona Airport, Chino farmlands, and perhaps some residences could be threatened during a 200 year or 100 year storm. In this instance, high dollar loss could result in business losses, damage to aircraft, and livestock losses.

Effects on infrastructure. A slow-rising flood situation will progress through a series of stages, beginning with minor rainfall and evolving to a major event such as substantial flooding. Once flooding begins, personnel will be needed to assist in rescuing persons trapped by floodwaters, securing utilities, cordoning off flood areas, and controlling traffic. These actions may overtax local agencies, and additional personnel and resources may be required. It is anticipated that existing mutual aid resources would be used as necessary to augment local resources.

Many essential public and quasi-public facilities and hazardous materials sitesare located within the 100- or 500-year flood zones of Riverside County. As of the writing of the Safety Element of the County's General Plan, these included 14 of the County's 39 airports; 4 of 18 hospitals; 47 of 109 police stations, fire stations, and emergency operation centers; 92 of 380 schools; 446 of 1,306 highway bridges; and 695 of 1,978 hazardous materials sites.

Effects on agriculture. As the historical events in Riverside County show, effects on agriculture can be devastating. Flooding can damage crops, livestock, and dairy stock. In addition to the obvious impacts on animals and crops, flooding can have deleterious effects on soil and the ability to reinvigorate the agricultural activities affected once the flood waters recede.

Risk Assessment Conclusion.

Flooding due to heavy precipitation or dam failure is a potential hazard in Riverside County, with the resultant possibilities for damage to property and loss of life. Severe flooding can be particularly costly. In a relative sense, flooding due to precipitation does not present the degree of danger posed by other hazards such as major earthquakes. On the other hand, if there is flooding due to dam failure, the danger could be cataclysmic.

Relationship to Other Hazards – Cascading Effects

Floods can cause many cascading effects. Fire can break out because of dysfunctional electrical goods. Hazardous materials can also get into floodways, causing health concerns and polluted water supplies.

Hazard Mitigation Goals and Strategies

Much effort has been put into precluding flood damage by the Department of Flood Control; however, there is potential for damage to property and loss of life.

In addition, the County Department of Building and Safety and the County Fire Department enforce codes and standards as they review building plans and conduct building inspections.

The Riverside County General Plan, adopted in October 2003, includes the following recommendations:

1. For new construction and proposals for substantial improvements to residential and nonresidential development within 100-year floodplains as mapped by FEMA or as determined by site specific hydrologic studies for areas not mapped by FEMA, the County shall apply a minimum level of acceptable risk; and disapprove projects that cannot mitigate the hazard to the satisfaction of the Building Official or other responsible agency.

2. Enforce provisions of the Building Code in conjunction with the following guidelines:

a. All residential, commercial, and industrial structures shall be flood-proofed from the 100-year storm flow, and the finished floor elevation shall be constructed at such a height as to meet this requirement. Critical facilities should be constructed above grade to the satisfaction of the Building Official, based on federal, state, or other reliable hydrologic studies.
b. Critical facilities shall not be permitted in floodplains unless the project design ensures that there are two routes for emergency egress and regress, and minimizes the potential for debris or flooding to block emergency routes, either through the construction of dikes, bridges, or large-diameter storm drains under roads used for primary access.
c. Development using, storing, or otherwise involved with substantial quantities of onsite hazardous materials shall not be permitted, unless all standards for evaluation, anchoring, and flood-proofing have been satisfied; and hazardous materials are stored in watertight containers, not capable of floating, to the extent required by state and federal laws and regulations.
d. Specific flood-proofing measures may require: use of paints, membranes, or mortar to reduce water seepage through walls; installation of water tight doors, bulkheads, and shutters; installation of flood water pumps in structures; and proper modification and protection of all electrical equipment, circuits, and appliances so that the risk of electrocution or fire is eliminated. However, fully enclosed areas that are below finished floors shall require openings to equalize the forces on both sides of the walls.

3. Prohibit construction of permanent structures for human housing or employment to the extent necessary to convey floodwaters without property damage or risk to public safety. Agricultural, recreational, or other low intensity uses are allowable if flood control and groundwater recharge functions are maintained.

4. Prohibit alteration of floodways and channelization unless alternative methods of flood control are not technically feasible or unless alternative methods are utilized to the maximum extent practicable. The intent is to balance the need for protection with prudent land use solutions, recreation needs, and habitat requirements, and as applicable to provide incentives for natural watercourse preservation, including density transfer programs as may be adopted.

   a. Prohibit the construction, location, or substantial improvement of structures in areas designated as floodways, except upon approval of a plan that provides that the proposed development will not result in any significant increase in flood levels during the occurrence of a 100-year flood discharge.
   b. Prohibit the filling or grading of land for nonagricultural purposes and for non-authorized flood control purposes in areas designated as floodways, except upon approval of a plan which provides that the proposed development will not result in any significant increase in flood levels during the occurrence of a 100-year flood discharge.

5. Prohibit substantial modification to water courses, unless modification does not increase erosion or adjacent sedimentation, or increase water velocities, so as to be detrimental to adjacent property, nor adversely affect adjacent wetlands or riparian habitat.

6. Direct flood control improvement measures toward the protection of existing and planned development.

7. Any substantial modification to a watercourse shall be done in the least environmentally damaging manner possible in order to maintain adequate wildlife corridors and linkages and maximize groundwater recharge.

8. Allow development within the floodway fringe, if the proposed structures can be adequately flood-proofed and will not contribute to property damage or risks to public safety.

9. Within the floodway fringe of a floodplain as mapped by FEMA or as determined by site specific hydrologic studies for areas not mapped by FEMA, require development to be capable of withstanding flooding and to minimize use of fill. However, some development may be compatible within flood plains and floodways, as may some other land uses. In such cases, flood proofing would not be required. Compatible uses shall not, however, obstruct flows or adversely affect upstream or downstream properties with increased velocities, erosion backwater effects, or concentrations of flows.

10. Require all proposed projects anywhere in the County to address and mitigate any adverse impacts that it may have on the carrying capacity of local and regional storm drain systems.

11. Encourage neighboring jurisdictions to require development occurring adjacent to the County to consider the impact of flooding and flood control measures on properties within unincorporated Riverside County.

Hazard Definition

An earthquake is a sudden, rapid shaking of the ground caused by the breaking and shifting of rock beneath the Earth's surface. For hundreds of millions of years, the forces of plate tectonics have shaped the Earth as the huge plates that form the Earth's surface move slowly over, under, and past each other. Sometimes the movement is gradual. At other times, the plates are locked together, unable to release the accumulating energy. When the accumulated energy grows strong enough, the plates break free causing the ground to shake. Most earthquakes occur at the boundaries where the plates meet; however, some earthquakes occur in the middle of plates.

The major form of direct damage from most earthquakes is damage to construction. Bridges are particularly vulnerable to collapse, and dam failure may generate major downstream flooding. Buildings vary in susceptibility, dependent upon construction and the types of soils on which they are built. Earthquakes destroy power and telephone lines; gas, sewer, or water mains; which, in turn, may set off fires and/or hinder firefighting or rescue efforts. The hazard of earthquakes varies from place to place, dependent upon the regional and local geology. Ground shaking may occur in areas 65 miles or more from the epicenter (the point on the ground surface above the focus). Ground shaking can change the mechanical properties of some fine grained, saturated soils, whereupon they *liquefy* and act as a fluid (liquefaction).

Where earthquakes have struck before, they will strike again. Earthquakes strike suddenly, without warning. Earthquakes can occur at any time of the year and at any time of the day or night.

Ground movement during an earthquake is seldom the direct cause of death or injury. Most earthquake-related injuries result from collapsing walls, flying glass, and falling objects as a result of the ground shaking, or people trying to move more than a few feet during the shaking. Much of the damage in earthquakes is predictable and preventable.

History

The following table shows earthquakes since 1999 with an epicenter in Riverside County:

Epicenter	Date of Incident	Richter Scale Intensity
9.3 miles E of Indio	7/13/2004	4.0
6.4 miles NW of Hemet	2/25/2004	3.6
6.2 miles NNE of Indio	11/27/2003	3.5
11.5 miles ENE of Indio	5/14/2003	3.7
7.1 miles WSW of Anza	9/17/2002	3.7
9.6 miles ESE of Anza	10/30/2001	5.1
6.9 miles SE of Mt. San Gorgonio	5/23/2001	3.8

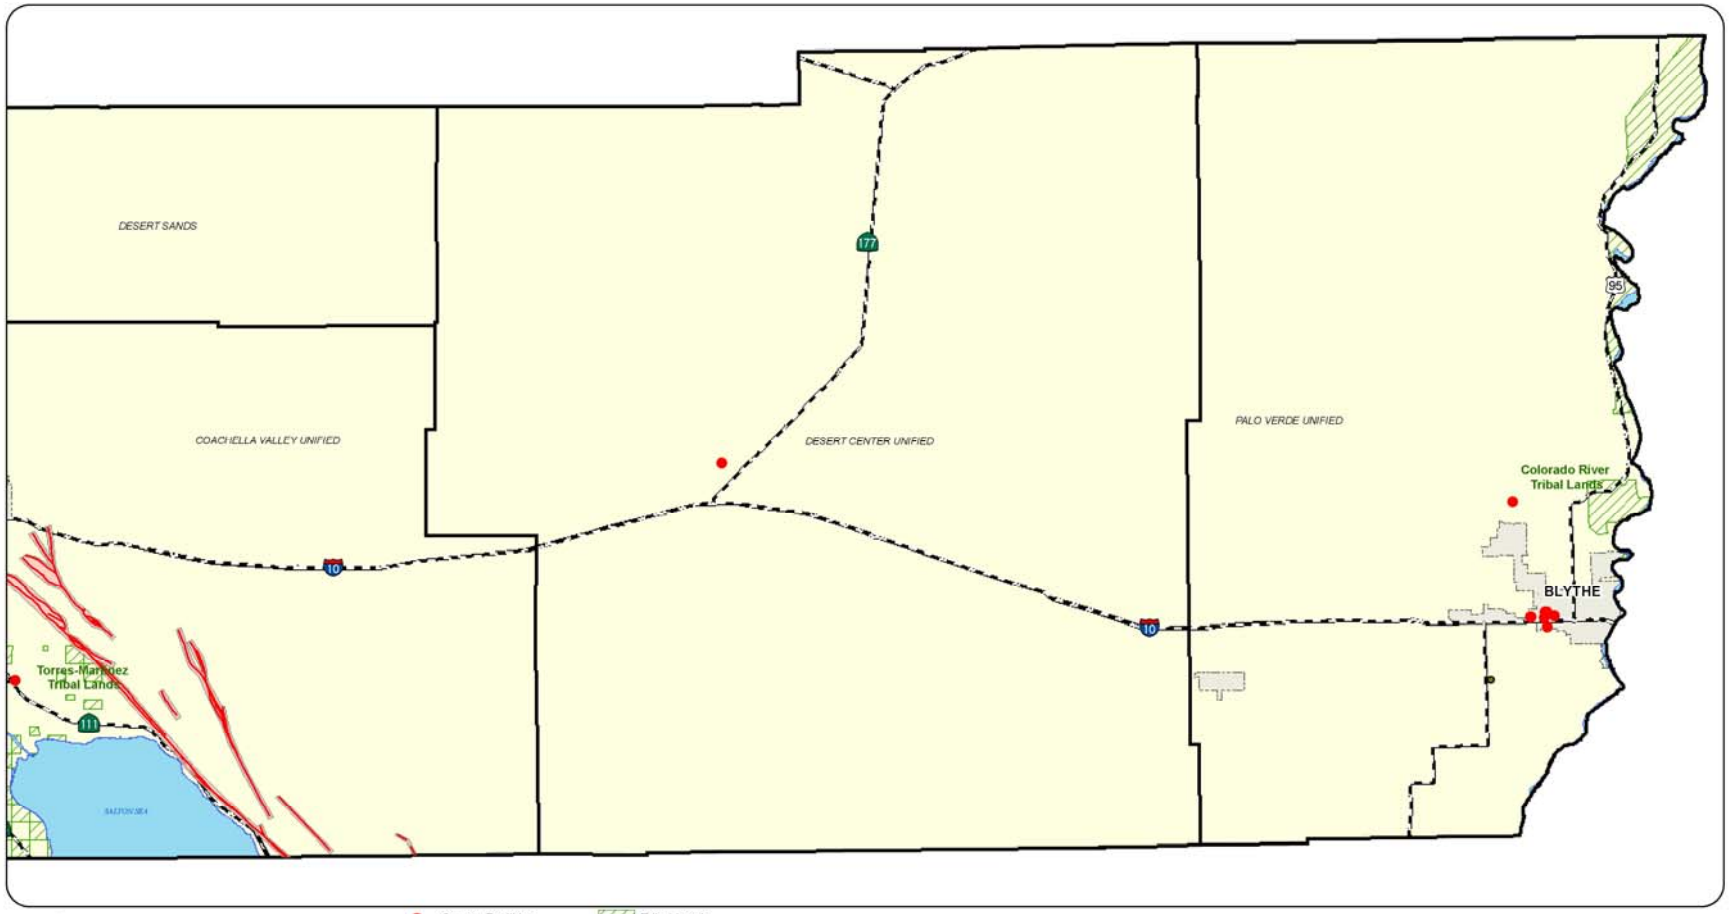
Eastern Riverside County

County Facilities - Earthquake and Major Highway Risks



Risk Assessment

Located within Riverside County are several known active and potentially active earthquake faults, including the San Andreas, San Jacinto, and Elsinore. In the event of an earthquake, the location of the epicenter as well as the time of day and season of the year would have a profound effect on the number of deaths and casualties, as well as property damage.

Research centers devoted to the detection and logging of earthquake events post a continuous string of activity in Riverside County faults as well as those in nearby areas.

A moderate earthquake occurring in or near Riverside County could result in deaths, casualties, property damage, environmental damage, and disruption of normal government and community services and activities. The effects could be aggravated by collateral emergencies such as fires, flooding, hazardous material spills, utility disruptions, landslides, transportation emergencies, and the possible failure of several dams in Riverside County.

The community needs would most likely exceed the response capability of the County's emergency management organization, requiring mutual assistance from volunteer and private agencies, the Governor's Office of Emergency Services, and the Federal Emergency Support Functions.

The San Andreas Fault is the "master" fault of an intricate fault network that cuts through rocks of the California coastal region. The entire San Andreas Fault system is more than 800 miles long and extends to depths of at least 10 miles within the earth. The San Andreas Fault forms a continuous, narrow break in the earth's crust that extends from northern California southward to Cajon Pass near San Bernardino. Southeastward from Cajon Pass, several branching faults, including the San Jacinto and Banning faults, share the movement of the crustal plates.

Recent studies of the eastern knot of the San Andreas near San Gorgonio Pass reveal that this area is more advanced in the cycle of strain accumulation than the western knot at the Cajon Pass. Recent earthquake activity around the Southern San Andreas, including the June, 1992 Landers-Big Bear earthquakes, has prompted scientists to increase their studies of this area.

An M8.0 or greater earthquake in Riverside County on the San Gorgonio to the Salton Sea segment could cause thousands of casualties, extensive major property damage, disruption in communications and utility systems, disruption in supply and distribution systems, and general panic. An earthquake of this magnitude could directly affect all of Riverside County and most of southern California, causing a critical demand on mutual aid resources and competition for national relief.

Another interrelated fault, the San Jacinto fault, has had a higher level of moderate-to-large earthquakes during the past 50 to 100 years, although the rate of slip is not as high. Geodetic data indicates there is an "appreciable" strain accumulation across both faults, implying that either one or both may be primed for release. One of the larger and more active fault segments of the San Jacinto fault, the Casa Loma Faults, runs from near Perris Reservoir to just north of Anza. Also, another large and active named segment is the Clark Fault, which runs from near Hemet to just 9 miles southwest of the shore of the Salton Sea. Historically, the San Jacinto Fault moves on average every 14 years, with the longest known interval being 19 years. The last slip occurred on the Borrego Springs segment in 1968.

In 1988, the Working Group on California Earthquake Probabilities (WGCEP) estimated 30-year probabilities of 20 percent for an M 7.0 event on the San Bernardino Valley segment of the San Jacinto Fault Zone. In late 1993, Special Publication 102, "Planning Scenario for a Major Earthquake on the San Jacinto Fault in the San Bernardino Area" was published by the California Department of Conservation, Division of Mines and Geology. This planning scenario states that an earthquake of M 7.0 on the San Bernardino Valley Segment of the San Jacinto Fault Zone is a significant hazard to lives and property in western Riverside County.

A third major fault zone that traverses Riverside County is the Elsinore Fault. The Elsinore Fault Zone is one of the largest in southern California. While not seismically active in recent years, current trenching is being conducted to determine the frequency of past movement. It has not yet revealed major faulting in historic times.

- **Effects on people and housing.** In any earthquake, the primary consideration is saving lives. Time and effort must also be dedicated to providing for mental health by reuniting families, providing shelter to displaced persons, and restoring basic needs and services. Major efforts will be required to remove debris and clear roadways, demolish unsafe structures, assist in reestablishing public services and utilities, and provide continuing care and temporary housing for affected citizens.

  A survey of local, State, and Federal government emergency plans indicate that although there is a general capacity to respond to small and intermediate-sized earthquakes, it is unlikely that any of these governmental units will be able to cope with the *immediate* impact of a great quake, such as an M 8.3 event on the south-central San Andreas fault. The general public must realize that the assistance that they have been used to expecting simply will not be immediately available. In fact, in the event of an earthquake of such magnitude, citizens must be prepared to wait for up to 72 hours or more for any type of organized response.

- **Effects on commercial and industrial structures.** After any earthquake, individuals are likely to lose wages due to the inability of businesses to function because of damaged goods and/or facilities. With business losses, the County of Riverside and the cities in the Riverside County Operational Area will lose revenue. Economic recovery from even a minor earthquake will be critical to the communities involved.

- **Effects on infrastructure.** The damage caused by both ground breaking and ground shaking can lead to the paralysis of the local infrastructure: police, fire, medical and governmental services.

- **Effects on Critical Facilities.** A large number of critical facilities have been identified as being adjunct to the various faults in the County and surrounding counties. The list of facilities includes hospitals, fire stations, law enforcement facilities, and schools.

- **Effects on agriculture.** Earthquakes can cause loss of human life, loss of animal life, and property damage to structures and land dedicated to agricultural uses. The most significant long-term impacts on agriculture from earthquakes are those that arise from the cascading effects of fire and flood.

Risk Assessment Conclusion.

Riverside County is clearly at high risk for a significant earthquake causing catastrophic damage and strains on response and mitigation resources. Both property and human life are at high risk. The County experiences hundreds of minor quakes and tremblers each month from the myriad of faults in the area. Studies indicate that stress is building up in major faults like the San Andreas. A major quake could happen at any time.

Earthquake risk is very high in the most heavily populated western portion of the County and the Coachella Valley, due to the presence of two of California's most active faults, the San Andreas and San Jacinto. Risk is moderate in the eastern portion of the County beyond the Coachella Valley.

The following table summarizes loss estimations for earthquakes in the ten-county Southern California area:

Earthquake Related Loss Estimation Riverside County Area			
Fault Line	**County**	**Magnitude on Richter Scale**	**Estimated Loss (Billions)**
Elsinore Fault	Riverside	6.8	4
San Jacinto	Riverside	6.7	7
Rose Canyon Fault	San Diego	6.9	28
Newport Inglewood Fault	L.A./Orange	6.9	170
Palos Verdes Fault	L.A.	7.1	90
Coachella Valley Fault	Riverside	7.1	2,600
San Andreas Fault	Various	7.4	5,025
Whittier Fault	L.A./Orange	6.8	1,250
Raymond Fault	L.A.	6.5	64
Puente Hills Fault	L.A.	7.1	408

Relationship to Other Hazards – Cascading Effects

Earthquakes can cause many cascading effects such as fires, flooding, hazardous material spills, utility disruptions, landslides, transportation emergencies, and the possible failure of several dams in Riverside County.

Earthquakes may cause landslides and rupture dams. Ground shaking may cause seiche, the rhythmic sloshing of water in lakes or bays.

HAZUS Analysis

As part of the development of this LHMP, eight earthquake scenarios were created in HAZUS-MH, the FEMA-approved software program for estimating potential losses from disasters.

Jurisdictions (including unincorporated areas of the County) were grouped together by relative geographical proximity into eight “regions.” One scenario was created for each of the eight regions. In each scenario, a fault running through or close to the region was selected for the simulated earthquake and the simulated earthquake’s epicenter was placed along the fault line in a location in or near the region.

The results produced by HAZUS are reported by census tract. For the thirty submitting jurisdictions that are either cities or unincorporated areas of the County, results have been summarized and placed in tables. The summarized results for twenty-four cities are presented in Part II of the LHMP, by city. The summarized results, along with a map of relative ground motion, for each of six unincorporated areas of the County are presented here in Part 1 of the LHMP on the pages immediately following.

Scenario 1

Simulation: M6.7 earthquake on the Elsinore Fault, epicenter in/near Southwest Corona

Name of Scenario: RiversideNorcoCorona

Submitting Cities and Unincorporated Areas for Which Census Tract Results Have Been Summarized:

- Riverside (see Riverside tab in Part 2 of LHMP)
- Corona (see Corona tab in Part 2 of LHMP)
- Norco (see Norco tab in Part 2 of LHMP)
- Jurupa/Mira Loma/Pedley
- Highgrove

Other Jurisdictions Included in Simulation Region (results from software not specific to this jurisdictional level):

- UC-Riverside
- Riverside Community Hospital
- Jurupa Community Service District
- Jurupa Unified School District
- Alvord Unified School District
- Riverside Unified School District
- Corona-Norco Unified School District
- Riverside County Office of Education, Children, and Family Services
- Kaiser Hospital
- Parkview Hospital
- Home Gardens County Water District
- Lee Lake Water District

The map on the following page shows relative ground motion in Scenario 1 for the simulated earthquake. “Red” represents the most severe ground motion at one extreme and “grey” represents the least severe ground motion at the other extreme.

Summarized results for the two unincorporated areas listed above follow the map.

Scenario 5

Simulation: M7.1 earthquake on the San Jacinto Fault, epicenter between San Jacinto and Beaumont

Name of Scenario: CaliBanBeauSanJacHemet

Submitting Cities for Which Census Tract Results Have Been Summarized:

- Banning (see Banning tab in Part 2 of LHMP)
- Beaumont (see Beaumont tab in Part 2 of LHMP)
- Calimesa (see Calimesa tab in Part 2 of LHMP)
- Hemet (see Hemet tab in Part 2 of LHMP)
- San Jacinto (see San Jacinto tab in Part 2 of LHMP)

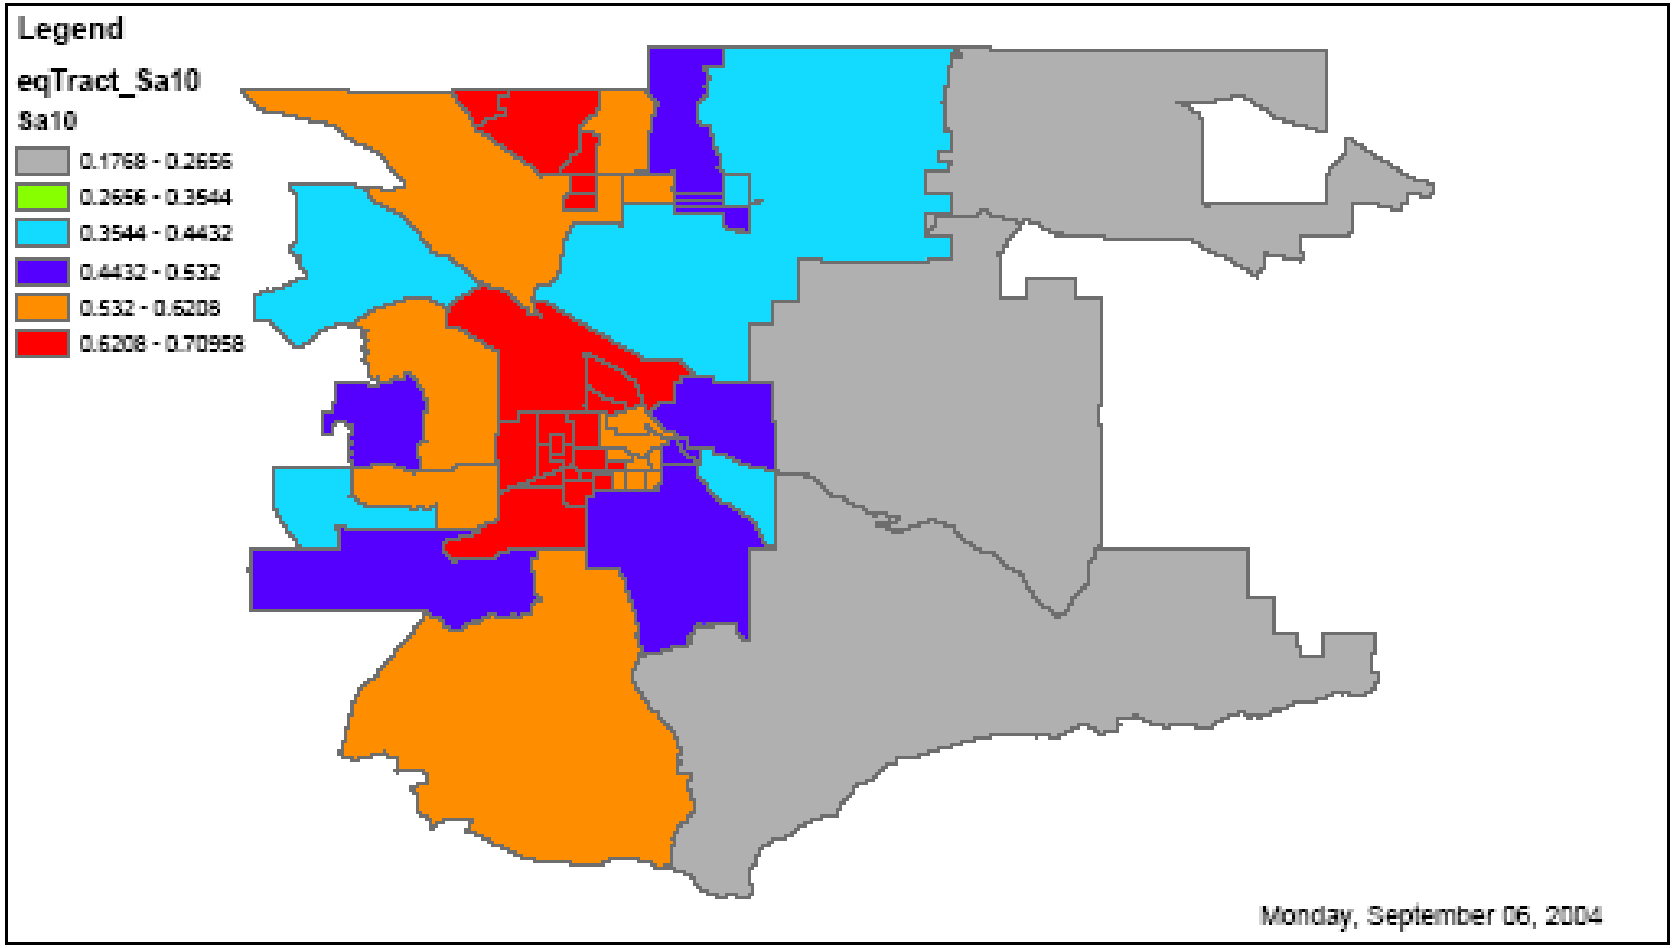
Other Jurisdictions Included in Simulation Region (results from software not specific to this jurisdictional level):

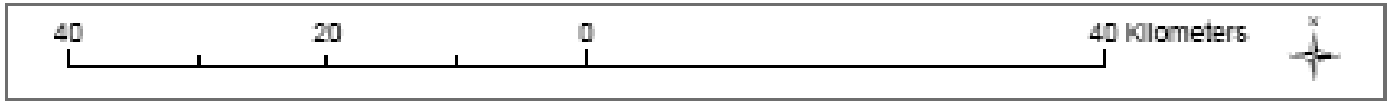
- Soboba Band of Luiseno Indians
- Hemet Valley Medical Center
- Idyllwild Water District
- San Jacinto Unified School District
- Banning Unified School District
- Beaumont Unified School District
- Hemet Unified School District
- San Gorgonio Memorial Hospital
- San Gorgonio Pass Water Agency/Sanitation District

The map on the following page shows relative ground motion in Scenario 5 for the simulated earthquake. “Red” represents the most severe ground motion at one extreme and “grey” represents the least severe ground motion at the other extreme.

No unincorporated areas were analyzed in this scenario.

Study Region : CaliBanBeauSanJacHemet
Hazard Scenario : M7.1 on San Jacinto Fault





Scenario 6

Simulation: M7.1 earthquake on the San Andreas Fault, epicenter northeast of Cathedral City

Name of Scenario: DHSPalmSCatRancho

Submitting Cities for Which Census Tract Results Have Been Summarized:

- Desert Hot Springs (see Desert Hot Springs tab in Part 2 of LHMP)
- Cathedral City (see Cathedral City tab in Part 2 of LHMP)
- Palm Springs (see Palm Springs tab in Part 2 of LHMP)
- Rancho Mirage (see Rancho Mirage tab in Part 2 of LHMP)

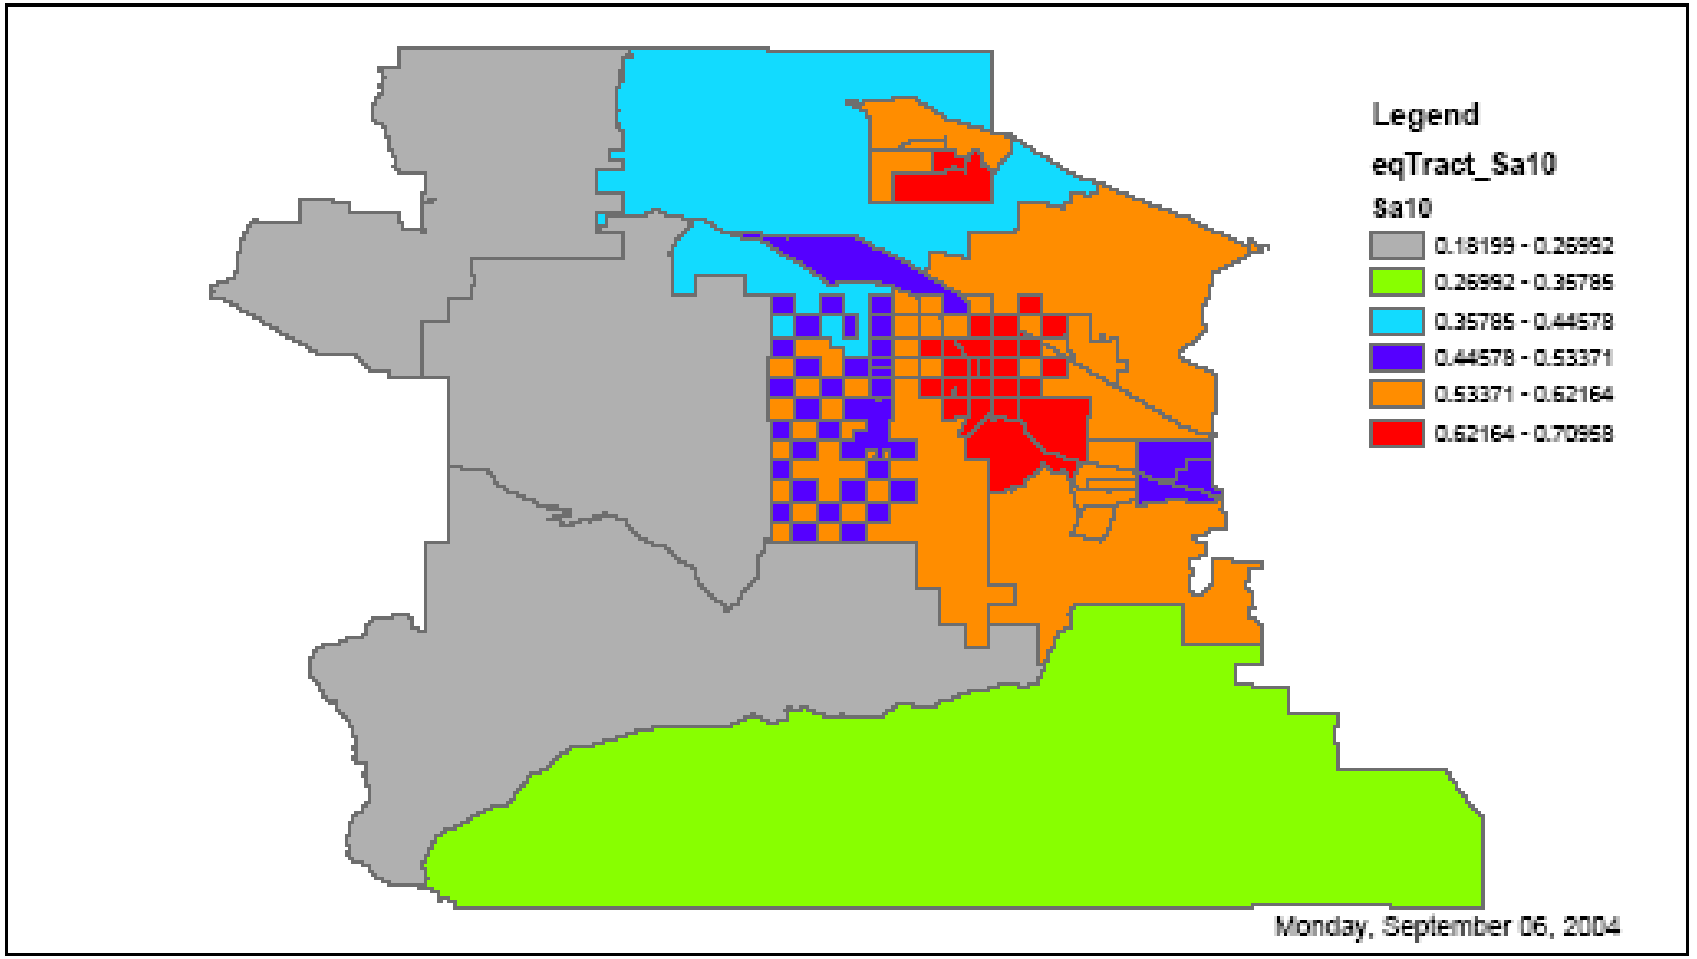
Other Jurisdictions Included in Simulation Region (results from software not specific to this jurisdictional level):

- Desert Regional Medical Center
- Mission Springs Water District

The map on the following page shows relative ground motion in Scenario 6 for the simulated earthquake. “Red” represents the most severe ground motion at one extreme and “grey” represents the least severe ground motion at the other extreme.

No unincorporated areas were analyzed in this scenario.

Study Region : DHSPalmSCatRancho
Hazard Scenario : M7.1 on San Andreas NE of Cat City



Scenario 7

Simulation: M7.1 earthquake on the San Andreas Fault, epicenter northeast of Coachella

Name of Scenario: PalmDIndianIndioQuintaCoach

Submitting Cities and Unincorporated Areas for Which Census Tract Results Have Been Summarized:

- Coachella (see Coachella tab in Part 2 of LHMP)
- Indian Wells (see Indian Wells tab in Part 2 of LHMP)
- Indio (see Indio tab in Part 2 of LHMP)
- La Quinta (see La Quinta tab in Part 2 of LHMP)

Scenario 8

Simulation: M7.1 earthquake on the San Andreas Fault, epicenter northeast of Coachella

Name of Scenario: BlytheDesertArea

Submitting Cities and Unincorporated Areas for Which Census Tract Results Have Been Summarized:

- Blythe (see Blythe tab in Part 2 of LHMP)
- Desert Center

The map on the following page shows relative ground motion in Scenario 8 for the simulated earthquake. "Red" represents the most severe ground motion at one extreme and "grey" represents the least severe ground motion at the other extreme. Note that the map depicts *relative differences* between census tracts and, in this case, the desert area includes one very large census tract. The red does *not* mean that the entire desert area moves violently in the scenario. It simply means that relative to the other census tracts on the map (which are all grey), the census tract in the desert area is affected substantially more.

Summarized results for the one unincorporated area listed above follow the map.

Hazard Mitigation Goals and Strategies

Comprehensive hazard mitigation programs include the identification and mapping of hazards, prudent planning and enforcement of building codes, and expedient retrofitting and rehabilitation of weak structures to reduce the scope of an earthquake disaster. The Riverside County Safety Element of the Riverside County General Plan enumerates a number of policies intended to minimize the impact of earthquakes on Riverside County's citizens, property, and economy.

The Riverside County General Plan, adopted in October 2003, includes the following recommendations:

1. Minimize fault rupture hazards through enforcement of Alquist-Priolo Earthquake Fault Zoning Act provisions and the following policies:

    a. Require geologic studies or analyses for critical structures, and lifeline, high-occupancy, schools, and high-risk structures, within 0.5 miles of all quaternary to historic faults shown on the Earthquake Fault Studies Zones map.
    b. Require geologic trenching studies within all designated Earthquake Fault Studies Zones, unless adequate evidence, as determined and accepted by the County Engineering Geologist, is presented. The County may require geologic trenching of non-zoned faults for especially critical or vulnerable structures or lifelines.
    c. Require that lifelines be designed to resist, without failure, their crossing of a fault, should fault rupture occur.
    d. Support efforts by the California Department of Conservation, Division of Mining and Geology to develop geologic and engineering solutions in areas of disseminated ground deformation due to faulting, in those areas where a through-going fault cannot be reliably located.
    e. Encourage and support efforts by the geologic research community to define better the locations and risks of County faults. Such efforts could include data sharing and database development with regional entities, other local governments, private organizations, utility agencies or companies, and local universities.

2. Require geological and geotechnical investigations in areas with potential for earthquake-induced liquefaction, landsliding or settlement as part of the environmental and development review process, for any structure proposed for human occupancy, and any structure whose damage would cause harm.

3. Require that a State-licensed professional investigate the potential for liquefaction in areas designated as underlain by "Susceptible Sediments" and "Shallow Ground Water" for all general construction projects.

4. Require that a State-licensed professional investigate the potential for liquefaction in areas identified as underlain by "Susceptible Sediments" for all proposed critical facilities projects.

5. Require that engineered slopes be designed to resist seismically induced failure. For lower-risk projects, slope design could be based on pseudo-static stability analyses using soil engineering parameters that are established on a site-specific basis. For higher-risk projects, the stability analyses should factor in the intensity of expected ground shaking, using a Newmark-type deformation analysis.

6. Require that cut and fill transition lots be over-excavated to mitigate the potential of seismically-induced differential settlement.

7. Require a 100% maximum variation of fill depths beneath structures to mitigate the potential of seismically-induced differential settlement.

8. Encourage research into new foundation design systems that better resist the County's climatic, geotechnical, and geological conditions.

Hazard: Extreme Weather

County Severity Rating		County Probability Rating

Hazard Definition

Extreme weather hazards in Riverside County are:

1. Drought
2. Windstorms
3. Extreme summer heat
4. Lighting Storms
5. Tornado

Each of these hazards will be discussed separately in this section.

Riverside County's weather has a history of extremes. There are basically three weather regions in the county, each with its own type of weather extreme and each with a different impact on the County. In some cases, the high temperatures in the desert are harmful to the public, but beneficial to agriculture. In other cases, a steady rainfall that raises the water table can be good for the County, yet too much rain will cause flooding and a disruption in the product of agricultural goods.

Weather Index and Historical Weather Events

The weather table below shows Riverside County broken down into three regions. These three regions represent the general topographical areas in the county.

TABLE OF THE WEATHER AVERAGES BY REGION FOR LAST 20 YEARS

City/Area	Average Yearly Highest Temperature °F	Average High °F	Average Yearly Lowest Temperature °F	Average Low °F	Average Rainfall	Average Snow
DESERT REGION						
Blythe	108	88	33	55	3.8	
Thermal	110	88	38	56	2.95	
Indio	107	89	39	58	3.1	
Palm Springs	108	88	42	56	5.5	
MOUNTAIN REGION						
Idyllwild	84	67	28	37	25	39

Temecula	2/25/2005	None		$250,000	24	2	Heavy Rain and snow - Canyon Lake overflowed	NCDC

Drought

In general, drought is defined as an extended period–a season, a year, or several years–of deficient rainfall relative to the statistical multi-year average for a region. However, dozens of more specific drought definitions are used around the world that are defined according to the lack of rain over various time periods, or measured impacts such as reservoir levels or crop losses. Because of the various ways drought is measured, an objective drought definition has yet to be produced upon which everyone can agree. Droughts become severe if "wet seasons" pass without significant precipitation. Drought and extreme heat can cause shortages of water and food crops. Prolonged shortages of moisture can be enough of a drain on moisture reserves to seriously affect crops, livestock, forest and range lands, as well as hydro-electric, irrigation, and urban water supplies. Parched lands are more susceptible to wildfires during periods of drought. Droughts can actually result in later flooding. The vegetation dies without water, and as a result, even average rain can cause flooding.

Drought can be defined according to meteorological, hydrological, or agricultural criteria.

Meteorological drought is usually based on long-term precipitation departures from normal, but there is no consensus regarding the threshold of the deficit or the minimum duration of the lack of precipitation that make a dry spell an official drought.

Hydrological drought refers to deficiencies in surface and subsurface water supplies. It is measured as stream flow, and as lake, reservoir, and ground water levels.

Agricultural drought occurs when there is insufficient soil moisture to meet the needs of a particular crop at a particular time. A deficit of rainfall over cropped areas during critical periods of the growth cycle can result in destroyed or underdeveloped crops with greatly depleted yields. Agricultural drought is typically evident after meteorological drought but before a hydrological drought.

Socioeconomic drought associates the supply and demand of economic goods or services with elements of meteorological, hydrologic, and agricultural drought. Socioeconomic drought occurs when the demand for water exceeds the supply as a result of weather-related supply shortfall. This may also be called a water management drought.

A sophisticated system for measuring drought was developed by National Weather Service meteorologist Wayne Palmer in 1965. Now called the Palmer Drought Severity Index (PDSI), it uses temperature and rainfall information in a formula to determine dryness and has become the semi-official drought index. The PDSI is most effective in determining long-term drought (several months) and is not as effective with short-term forecasts (a few weeks). It uses a value number of 0 as normal, with drought figures shown in terms of negative numbers; such as a - 2 for moderate drought , - 3 severe drought, and - 4 is extreme drought. In mid August 2000, sections of many western states were in the - 4 range must be defined not only in terms of below normal precipitation, but also in terms of duration. Occasional periods of below average precipitation will not seriously deplete moisture reserves.

Drought History

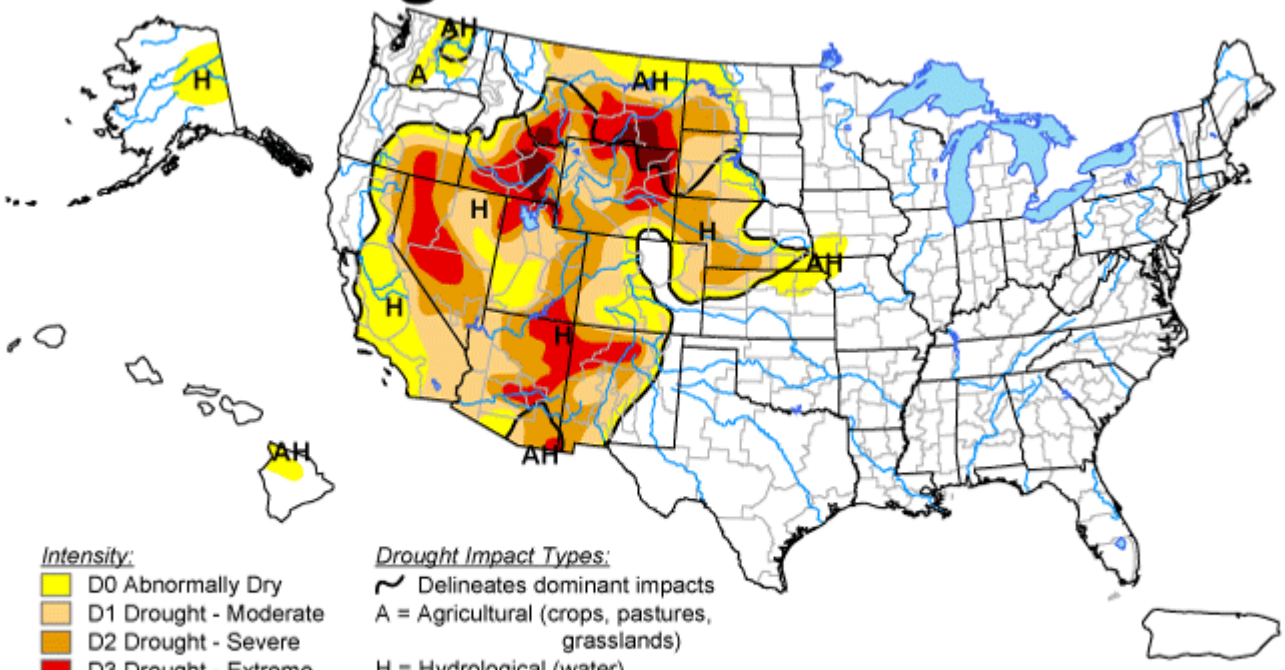
Riverside County chronically experiences drought cycles. The County is currently experiencing a drought cycle that has been four years in duration. The drought has caused stress on the County's ability to provide water to the community. In addition, the drought conditions have caused extensive weakening of trees in forested areas causing them to become highly vulnerable to disease and insect infestation. Many trees have weakened and died, creating a severe fire hazard. Furthermore, wildland brush areas are dry, presenting wildfire risk.

The following maps and charts provide a history of the rainfall in the State and identify the State and specifically the county as currently being in a drought cycle.

Location	Date of Incident	Declaration	Intensity	Reported Damage	Number Injured	Structures Affected	Incident Description	Source
Riverside County	6/1/2002	Federal-SBA USDA		$2,727,744	0	0	Crop Loss due to Drought	Co. Rpts.

U.S. Drought Monitor

December 7, 2004
Valid 7 a.m. EST



Intensity:
- D0 Abnormally Dry
- D1 Drought - Moderate
- D2 Drought - Severe
- D3 Drought - Extreme
- D4 Drought - Exceptional

Drought Impact Types:
- Delineates dominant impacts
- A = Agricultural (crops, pastures, grasslands)
- H = Hydrological (water)
- (No type = Both impacts)

The Drought Monitor focuses on broad-scale conditions. Local conditions may vary. See accompanying text summary for forecast statements.

Drought Risk Assessment

The Department of Water Resources produces a California Water Plan every five years that not only includes a statewide water budget but also regional watershed water budgets. These water budgets are based on California Department of Finance population projections, and indicate clearly that demand for water will exceed supply in 2020 whether or not a drought condition exists at that time. Most of the State's regions, except for the North Coast and San Francisco Bay Regions, experience average-year and drought-year shortages now, and are forecasted to experience increased shortages in 2020. The largest average-year shortages are forecasted for the South Coast Region, which heavily relies on imported water. Future average-year shortages in the South Coast Region reflect forecasted population growth plus lower Colorado River supplies as California reduces its use of Colorado River water to the State's basic apportionment.

Although a drought in and of itself is not a direct threat to property and life, the impact on the County's agricultural industry and home development can be monumental. The costs to the County for the current drought in terms of fire damage and forest management have been in the millions. This is a chronic problem for Riverside County and accounts for significant indirect costs, loss of property and threat to human life.

Drought Mitigation Goals, Polices, and Strategies

Goal - To help bridge the projected gap between water supply and demand in Riverside County in 2020, water conservation must be a priority. Following are water conservation policies that seek to manage existing supplies, by promoting the efficient use of water to the maximum extent possible, so that they can be maintained for future use.

Strategies

1. Encourage the installation of water-conserving systems such as dry wells and graywater systems, where feasible, especially in new developments. The installation of cisterns or infiltrators shall also be encouraged to capture rainwater from roofs for irrigation in the dry season and flood control during heavy storms.

2. Where feasible, decrease stormwater runoff by reducing pavement in development areas, and by design practices such as permeable parking bays and porous parking lots with bermed storage areas for rainwater detention.

3. Support and engage in educational outreach programs with other agencies that promote water conservation and wide-spread use of water-saving technologies.

4. Encourage continued agricultural water conservation and recommend the following practices where appropriate and feasible: lining canals, recovering tail water at the end of irrigated fields, and appropriate scheduling of water deliveries.

Extreme Weather

Extreme Summer Heat

Summer heat can be described as overly hot temperatures that are sustained to the extent that human and animal overexposure can cause heat illness and death. Heat illness is a major cause of preventable morbidity in regions characterized by high ambient temperatures. The table provided by County EMS shows the impact of heat on the public over the last three years. The data depicts the impact of heat on the County's EMS system. Figures are not available on those medical calls were the patient was treated and released by paramedics at the scene. Surprisingly, the table shows that the impact of high temperatures affects the Valley portion of the County as much as it does the Desert portion of the County.

Extreme Summer Heat Mitigation Efforts

The County, in cooperation with the desert cities, the American Red Cross, and the Economic Development Agency have established various "Cool Centers" in the County for people to use during extremely hot days.

The County has also adopted a plan to increase the number of older homes that have up graded insulation through a partnership with various community groups.

Extreme Winds

Santa Ana Winds have caused large amounts of damage and increased the fire damage level dramatically. The history table for Wind Events shows the high number of events that are directly attributed to Santa Ana Winds.

Santa Ana Winds are generally defined as warm, dry winds that blow from the east or northeast (offshore). These winds occur below the passes and canyons of the coastal ranges of Southern California and in the Los Angeles basin. Santa Ana winds often blow with exceptional speed in the Santa Ana Canyon (the canyon from which it derives its name). Forecasters at the NWS in Oxnard and San Diego usually place speed minimums on these winds and reserve the use of "Santa Ana" for winds greater than 25 knots.

The complex topography of Southern California combined with various atmospheric conditions create numerous scenarios that may cause widespread or isolated Santa Ana events. Commonly, Santa Ana winds develop when a region of high pressure builds over the Great Basin (the high plateau east of the Sierra mountains and west of the Rocky mountains including most of Nevada and Utah). Clockwise circulation around the center of this high pressure area forces air downslope from the high plateau. The air warms as it descends toward the California coast at the rate of 5 degrees F per 1000 feet due to compressional heating. Thus, compressional heating provides the primary source of warming. The air is dry since it originated in the desert, and it dries out even more as it is heated.

Santa Ana winds commonly occur between October and February with December having the highest frequency of events. Summer events are rare. Wind speeds are typically north to east at 35 knots through and below passes and canyons with gusts to 50 knots. Stronger Santa Ana winds can have gusts greater than 60 knots over widespread areas and gusts greater than 100 knots in favored areas. Frequently, the strongest winds in the basin occur during the night and morning hours due to the absence of a sea breeze. The sea breeze which typically blows onshore daily, can moderate the Santa Ana winds during the late morning and afternoon hours

The maps and photos below show the direction of the Santa Ana winds as they travel from the stable, high-pressure weather system called the Great Basin High through the canyons and towards the low pressure system off the Pacific. Riverside County is in the direct path of the ocean-bound Santa Ana winds.

Risk Assessment of Santa Ana Winds

The Santa Ana Winds pose several different types of threats.

1. By themselves, the winds pose a threat to the health of the people and to structures in the County.
   a. Health risks relate primarily to breathing problems caused by the blowing dust and plant pollen.
   b. Structural issues relating to the winds range from roofs being blown off to trees falling onto buildings.
2. The winds increase the threat and/or severity of fires in the urban areas
   a. Wind blown flames will spread more rapidly when pushed by high Santa Ana Winds.
3. Santa Ana Winds dry out brush and forest areas and increase the speed of a fire.
4. Santa Ana Winds cause power lines to arc, resulting in fires
5. Santa Ana Winds will either cause trees to fall on power lines or power lines to break, causing power outages.

Wind Erosion

In addition to the problems caused by the Santa Ana Winds, wind erosion is a serious environmental problem attracting global attention. Soil movement is initiated as a result of wind forces exerted against the surface of the ground. Dust particles in the air create major health problems. Atmospheric dust causes respiratory discomfort, may carry pathogens that cause eye infections and skin disorders, and reduces highway and air traffic visibility. Dust storms can cause additional problems. Buildings, fences, roads, crops, trees and shrubs can all be damaged by abrasive blowing soil.

Wind and wind-blown sand are an environmentally-limiting factor throughout much of Riverside County. Approximately 20 percent of the land area of Riverside County is vulnerable to "high" and "very high" wind erosion susceptibility. The Coachella Valley, the Santa Ana River Channel in northwestern Riverside County, and areas in and around the Cities of Hemet and San Jacinto are zones of high wind erosion susceptibility

Tornados and Microbursts

The history table demonstrates the high number of tornados and micro-bursts that have occurred in the County.

Tornados

Tornadoes are spawned when there is warm, moist air near the ground, cool air aloft, and winds that speed up and change direction. An obstruction, such as a house, in the path of the wind causes it to change direction. This change increases pressure on parts of the house, and the combination of increased pressures and fluctuating wind speeds creates stresses that frequently cause structural failures.

In order to measure the intensity and wind strength of a tornado, Dr. T. Theodore Fujita developed the Fujita Tornado Damage Scale. This scale compares the estimated wind velocity with the corresponding amount of suspected damage. The scale measures six classifications of tornadoes with increasing magnitude from an “F0” tornado to a “F6+” tornado.

The chart below depicts the Fujita Tornado Damage Scale:

Scale	Wind Estimate (mph)	Typical Damage
F0	< 73	**Light damage.** Some damage to chimneys and TV antennas; breaks twigs off trees; pushes over shallow-rooted trees.
F1	73-112	**Moderate damage.** Peels surface off roofs; windows broken; light trailer houses pushed or overturned; some trees uprooted or snapped; moving automobiles pushed off the road. 74 mph is the beginning of hurricane wind speed.
F2	113-157	**Considerable damage.** Roofs torn off frame houses leaving strong upright walls; weak buildings in rural areas demolished; trailer houses destroyed; large trees snapped or uprooted; railroad boxcars pushed over; light object missiles generated; cars blown off highway.
F3	158-206	**Severe damage.** Roofs and some walls torn off frame houses; some rural buildings completely demolished; trains overturned; steel-framed hangar-warehouse-type structures torn; cars lifted off the ground; most trees in a forest uprooted snapped, or leveled.
F4	207-260	**Devastating damage.** Whole frame houses leveled, leaving piles of debris; steel structures badly damaged; trees debarked by small flying debris; cars and trains thrown some distances or rolled considerable distances; large missiles generated.
F5	261-318	**Incredible damage.** Whole frame houses tossed off foundations; steel-reinforced concrete structures badly damaged; automobile-sized missiles generated; trees debarked; incredible phenomena can occur.
F6-F12	319 to sonic	**Inconceivable damage.** Should a tornado with the maximum wind speed in excess of F5 occur, the extent and types of damage may not be conceived. A number of missiles such as iceboxes, water heaters, storage tanks, automobiles, etc. will create serious secondary damage on structures.
Source: http://weather.latimes.com/tornadoFAQ.asp		

Microbursts

Unlike tornados, microbursts are strong, damaging winds that strike the ground and often give the impression a tornado has struck. They frequently occur during intense thunderstorms. The origin of a microburst is downward moving air from a thunderstorm's core. But unlike a tornado, they affect only a rather small area.

University of Chicago storm researcher Dr Ted Fujita first coined the term “downburst” to describe strong, downdraft winds flowing out of a thunderstorm cell that he believed were responsible for the crash of Eastern Airlines Flight 66 in June of 1975.

A downburst is a straight-direction surface wind in excess of 39 mph caused by a small-scale, strong downdraft from the base of convective thundershowers and thunderstorms. In later investigations into the phenomena, he defined two sub-categories of downbursts: the larger macrobursts and small microbursts.

Macrobursts are downbursts with winds up to 117 mph that spread across a path greater than 2.5 miles wide at the surface and which last from 5 to 30 minutes. The microburst, on the other hand is confined to an even smaller area, less than 2.5 miles in diameter from the initial point of downdraft impact. An intense microburst can result in damaging winds near 270 km/hr (170 mph) and often last for less than five minutes.

> "Downbursts of all sizes descend from the upper regions of severe thunderstorms when the air accelerates downward through either exceptionally strong evaporative cooling or by very heavy rain which drags dry air down with it. When the rapidly descending air strikes the ground, it spreads outward in all directions, like a fast-running faucet stream hitting the sink bottom.
>
> When the microburst wind hits an object on the ground such as a house, garage or tree, it can flatten the buildings and strip limbs and branches from the tree. After striking the ground, the powerful outward running gust can wreak further havoc along its path. Damage associated with a microburst is often mistaken for the work of a tornado, particularly directly under the microburst. However, damage patterns away from the impact area are characteristic of straight-line winds rather than the twisted pattern of tornado damage."

Tornados, like those that occur every year in the Midwest and Southeast parts of the United States, are a rare phenomenon in most of California, with most tornado-like activity coming from micro-bursts.

High Winds Mitigation Efforts

One of the strongest and most widespread existing mitigation strategies pertains to tree clearance. Currently, California State Law requires utility companies to maintain specific clearances – depending on the type of voltage running through the line – between electrical power lines and all vegetation.

The California Public Resource Code establishes tree pruning regulations:

4293: Power Line Clearance Required

4292: Power Line Hazard Reduction

4291: Reduction of Fire Hazards Around Buildings

4171: Public Nuisances

The California Public Utilities Commission • General Order 95: Rule 35

In addition to these laws, Riverside County has established additional mitigation efforts. These are:

1. Require studies that address the potential of this hazard on proposed development within "High" and "Very High" wind erosion hazard zones as shown on the Wind Erosion Susceptibility Map.
2. Include a disclosure about wind erosion susceptibility on property title.
3. Require buildings be designed to resist wind loads.
4. Educate builders about the wind environment and encourage them to design projects accordingly.

In addition to these laws, Riverside County has adopted the following mitigation strategies:

1. Require studies that address the potential of this hazard on proposed development within "High" and "Very High" wind erosion hazard zones as shown on the Wind Erosion Susceptibility Map.
2. Include a disclosure about wind erosion susceptibility on property title.
3. Require buildings to be designed to resist wind loads.
4. Educate builders about the wind environment and encourage them to design projects accordingly.
5. Create additional alerts levels with the National Weather Service.
6. Train additional Weather Spotters for use during high wind events.

The maps on the following two pages depict wind erosion risks for Western Riverside County and Eastern Riverside County, respectively.

Hazard Definition

A landslide is a geologic hazard where the force of gravity combines with other factors to cause earth material to move or slide down an incline. Some landslides move slowly and cause damage gradually, whereas others move so rapidly that they can destroy property and take lives suddenly and unexpectedly. Slopes with the greatest potential for sliding are between 34 degrees and 37 degrees. Although steep slopes are commonly present where landslides occur, it is not necessary for the slopes to be long.

Landslides, rockfalls, and debris flows occur continuously on all slopes; some processes act very slowly, while others occur very suddenly, often with disastrous results. As human populations expand over more of the land surface, these processes become an increasing concern.

There are four categories of active and dormant landslides. They include debris slides, translational/rotational slides, earth flows, and debris flows and torrent tracks. Debris slide amphitheater and slopes and inner gorges are not technically landslides, but features formed by landslides processes. In some places, complex land sliding causes irregular ground surfaces. Generally, on land slide maps, such areas are depicted as disrupted ground or areas of extreme, high, moderate, and low relative stability.

The geologic setting of southern California locally is conducive to slope failures and slope-failure deposits (landslides) that can be a hazard to human life and property. These hazards are created when geologic materials are displaced down a topographic slope under the influence of gravity. Factors that determine slope-failure occurrence include:

1. Slope angle
2. Geologic materials (substrate)
3. Climatic conditions
4. Earthquake shaking
5. Debris Flows

Sudden "mudslides" gushing down rain-sodden slopes and gullies are widely recognized by geologists as a hazard to human life and property. Most "mudslides" are localized in small gullies, threatening only those buildings in their direct path. They can burst out of the soil on almost any rain-saturated hill when rainfall is heavy enough. Often they occur without warning in localities where they have never been seen before.

There are predictable relationships between local geology and landslides, rockfalls and debris flows. Knowledge of these relationships can improve planning and reduce vulnerability. Slope stability is dependent on many factors and their interrelationships, including rock type, pore water pressure, slope steepness, and natural or man-made undercutting.

History

Riverside County has a history of landslides during seasons of high precipitation.

Landslide

Location	Date of Incident	Declaration	Intensity	Reported Damage	Number Injured	Structures Affected	Incident Description	Source
Lake Elsinore	3/1/1991	None	2 inches		0	4	Heavy Rainfall resulting in Mudslide affecting 4 homes	Co. Rpts.
Riverside County (Temecula - De Luz Canyon area)	2/6/1998	Federal		$12,629,191	0	125	3 Homes affected by Landslides in the DeLuz Canyon area	Co. Rpts.

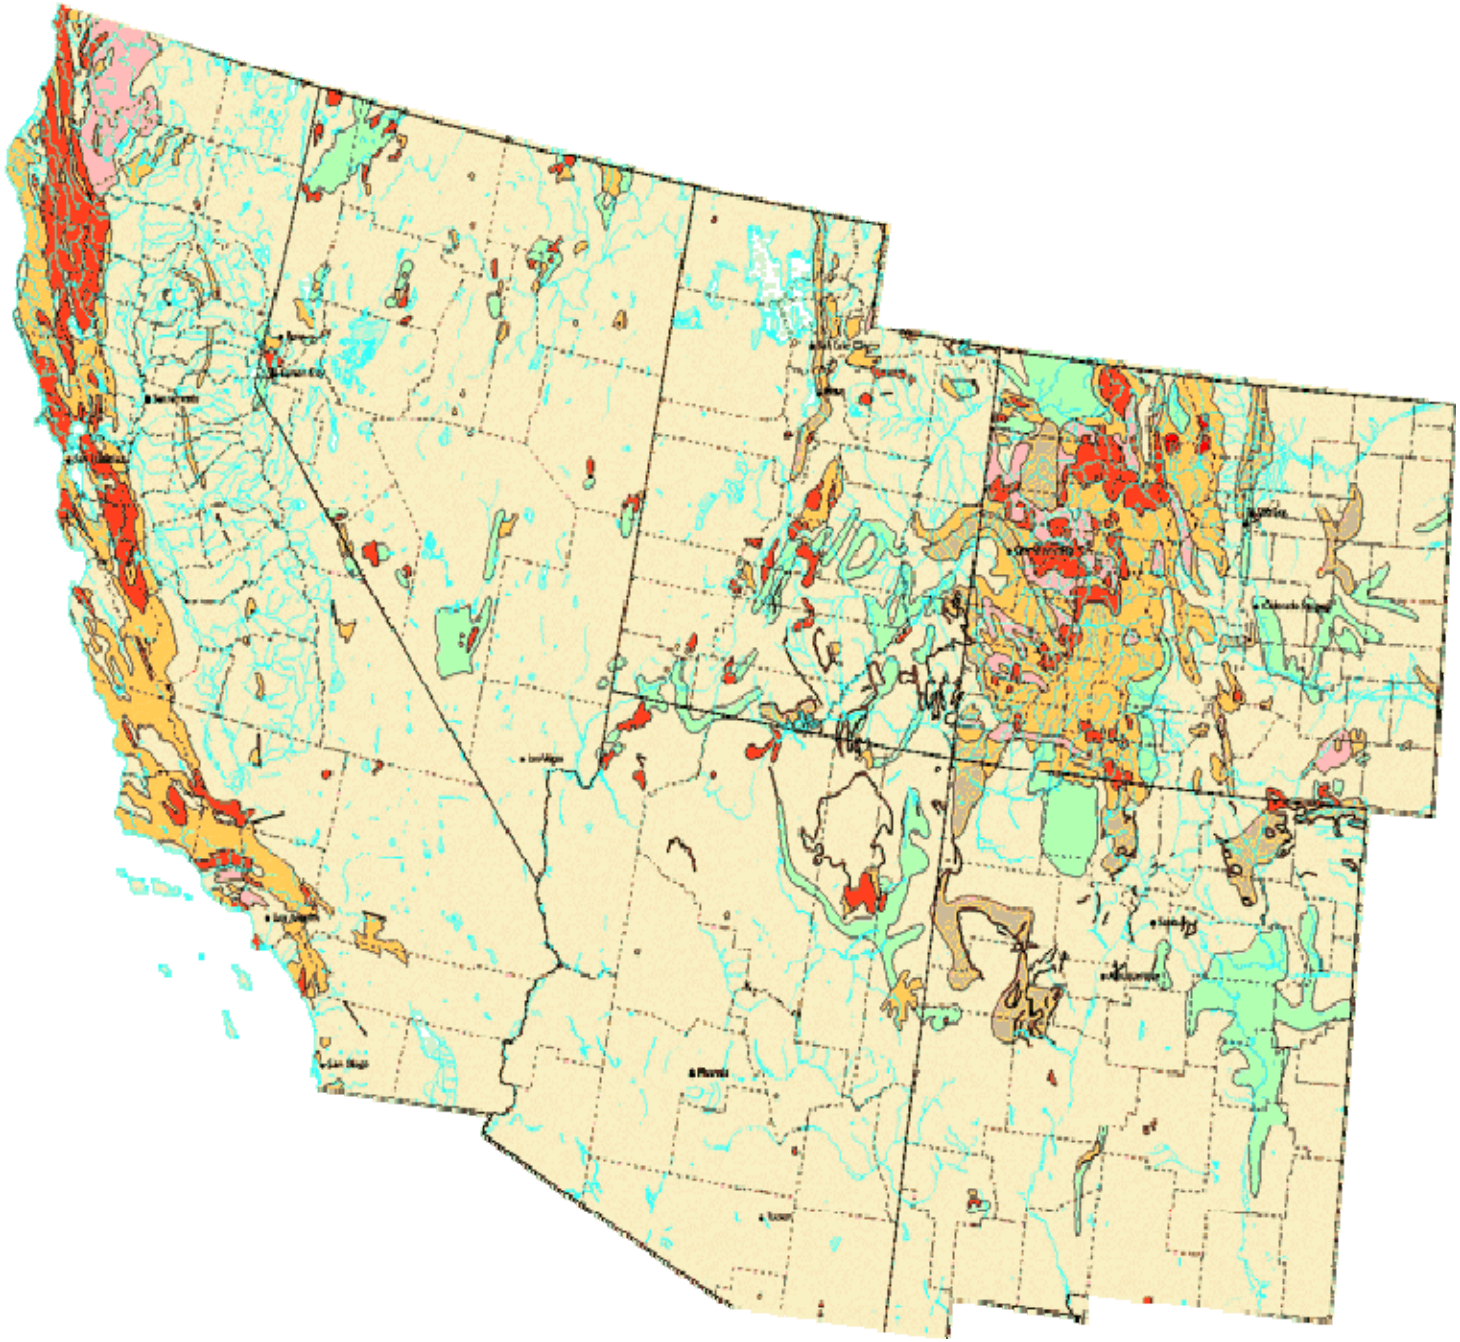
EARTHQUAKE-INDUCED SLOPE INSTABILITY MAP



LANDSLIDE INCIDENCE

Low (less than 1.5% of area involved)
Moderate (1.5%-15% of area involved)

High (greater than 15% of area involved)

LANDSLIDE SUSCEPTIBILITY/INCIDENCE

Moderate susceptibility/low incidence
High susceptibility/low incidence

High susceptibility/moderate incidence

Susceptibility not indicated where same or lower than incidence. Susceptibility to landsliding was defined as the probable degree of response of [the areal] rocks and soils to natural or artificial cutting or loading of slopes, or to anomalously high precipitation. High, moderate, and low susceptibility are delimited by the same percentages used in classifying the incidence of landsliding. Some generalization was necessary at this scale, and several small areas of high incidence and susceptibility were slightly exaggerated.

Source - USGS

Risk Assessment

There is a continuing risk of landslides during seasons of high precipitation. In addition, earthquakes could also cause significant landslides. The County has a great deal of hilly and mountainous terrain increasing the likelihood of a landslide incident.

- **Effects on people and structures.** Landslides constitute a threat to property, road safety, and life. Small landslides would not pose a serious risk. However, there is a possibility that a severe landslide in a populated area could cause significant damage and risk to life.

- **Effects on infrastructure.** Landslides can cause disruptions in power supply pipelines, and County roads and highways.

- Effect on Critical Facilities. An initial review of known landslide locations and the location of critical facilities indicates that there does not appear to any facilities in close proximity to a LMZ.

- **Effects on agriculture.** Similar to the threats to people and structures, small landslides would not pose a serious risk. However, there is the possibility that a severe landslide could cause significant damage and risk of life to elements of the agricultural industry.

Risk Assessment Conclusion.

Landslides are a continuing risk in Riverside County, especially during seasons of high precipitation. History has shown also that many landslides occur in areas where landslides have not been predicted.

Relationship to Other Hazards – Cascading Effects

As noted, landslides can be the result of an earthquake or severe weather.

Mitigation Goals and Strategies

The County has created a Landslide Management Zone (LMZ) program that identifies areas of past or current landslide activity. The purpose of the program is to restrict usage of landslide prone areas. Although not graphically defined, the LMZ areas can be approximated by the above maps. As part of the LMZ program, areas that are considered to high landslide risk areas are placed into LMZ zones and those use for those areas becomes restricted. Most of the areas within LMZs of the County are designated for open space or rural development. LMZs identify regions susceptible to slope instability. This instability can include deep-seated landslides, rockfalls, soil slumps, and debris flows. Without the presence of extensive flood control devices, including large debris basins, the areas outlined by an LMZ may be subject to debris flow inundation. Most often, debris flow inundation results in roadways and improvements blocked by boulders.

1. For new development, the County Building and Safety Department enforces current building codes. Building codes establish specific site investigation requirements and define various standards by which hillside projects are assessed. Mitigation of existing and/or potential slope problems can be required when substantial improvements are proposed.
2. Require that stabilized landslides be provided with redundant drainage systems. Provisions for the maintenance of subdrains must be designed into the system.
3. Before issuance of building permits, require certification regarding the stability of the site against adverse effects of rain, earthquakes, and subsidence.
4. Require adequate mitigation of potential impacts from erosion, slope instability, or other hazardous slope conditions, or from loss of aesthetic resources for development occurring on slope and hillside areas.
5. During permit review, identify and encourage mitigation of onsite and offsite slope instability, debris flow, and erosion hazards on lots undergoing substantial improvements.
6. Require grading plans, environmental assessments, engineering and geologic technical reports, irrigation and landscaping plans, including ecological restoration and revegetation plans, as appropriate, in order to assure the adequate demonstration of a project's ability to mitigate the potential impacts of slope and erosion hazards and loss of native vegetation.
7. Support mitigation on existing public and private property located on unstable hillside areas, especially slopes with recurring failures where County property or public right-of-way is threatened from slope instability, or where considered appropriate and urgent by the County Engineer, Fire, or Sheriff Department.

Hazard Definition

Insect infestation occurs when an undesirable type of insect inhabits an area in a manner that causes serious harm to: cash crops, livestock, or poultry; wild land trees, plants, or animals; or humans. Countless insects live on, in, and around plants, animals, and humans in all environments. Many are harmless, while others can cause fatal damage. Under some conditions, insects that have been present and relatively harmless can become hazardous. For example, severe drought conditions can weaken trees and make them more susceptible to destruction from insect attacks.

The major forms of insects are:

Chewing insects are defoliating insects. They generally strip plants of green matter such as leaves. Caterpillars and beetles make up the largest proportion of chewing insects. Under normal conditions, trees can usually bounce back from an attack of these defoliators, though repeat infestation will weaken a tree and can eventually kill it by starving it of energy.

Boring, or tunneling, insects cause damage by boring into the stem, roots, or twigs of a tree. Some lay eggs that then hatch and the larvae burrow more deeply into the wood, blocking off the water-conducting tissues of the tree. Boring insects generally feed on the vascular tissues of the tree. If the infestation is serious, the upper leaves are starved of nutrients and moisture, and the tree can die. Signs of borer infestation include entry/exit holes in the bark, small mounds of sawdust at the base, and sections of the crown wilting and dying.

Sucking insects do their damage by sucking out the liquid from leaves and twigs. Many sucking insects are relatively immobile, living on the outside of a plant and forming a hard protective outer coating while they feed on the plant's juices. Quite often they will excrete a sweet, sticky substance known as honeydew which contains unprocessed plant material. Honeydew can cause sooty mold to form on leaves and can become a nuisance. Signs of infestation include scaly formations on branches, dieback of leaves, and honeydew production.

In conjunction with the above outlined problems, insects can carry and spread disease to plants, animals, and people.

History

Riverside County has recently suffered from a Bark Beetle infestation. On March 7, 2003, Governor Gray Davis proclaimed a State of Emergency in Riverside, San Bernardino, and San Diego Counties where hundreds of thousands of trees were dead and dying after being weakened by drought and attacked by an infestation of bark beetles. Trees on more than 150,000 acres died and an estimated 75,000 residents were threatened by catastrophic wildfire, injury, and property damage from falling trees.

Parts of Riverside County (Moreno Valley, Indio, Rancho Mirage, Palm Desert, Bermuda Dunes, and Palm Springs) are under quarantine by state and federal officials to stop the spread of Red Imported Fire Ants. The quarantine limits the movement of plants and soil, and requires commercial nursery growers to take steps to ensure their products are free of Red Imported Fire Ants. It is believed that the infestations in Southern California may stem from the shipment of infested nursery stock from the southeastern states. Fruit orchard infestations in the agricultural regions of California's San Joaquin Valley have been traced back to colonies that hitchhiked on beehives shipped to California from Texas.

Africanized Honey Bees entered California in 1994, near Blythe. Until recently, they remained principally in Imperial County. In the last few years, they have spread to most of Southern California south of the San Gabriel mountains (i.e., Imperial, San Diego, Orange, Los Angeles, Riverside, and San Bernardino Counties), and have most recently been found in Kern County and Ventura County. The following table describes recent insect-related incidents.

In 1993-94 and 1990, Med-fly infestations damaged fruit Countywide. In 1991, a white fly infestation damaged melons, squash, and cucumbers Countywide. In 1999-2000, an insect-spread disease caused over $16 million damage to wine grapes in the west County area.

Risk Assessment

Riverside County has a demonstrated vulnerability to insect infestation. The climate makes it possible for insects to reproduce with little natural hindrance to their proliferation.

- **Effects on people and housing.** In the case of the Bark Beetle, the fire hazard it creates can cost loss of homes and life as demonstrated in the fall fires of 2003.

- **Effects on agriculture, and commercial and industrial structures.** If a given insect is particularly hazardous to forests, crops, or property, it can cost the County millions of dollars in lost revenue and eradication and replacement.

Risk Assessment Conclusion.

Insect infestation is an ongoing threat to agriculture and public health in Riverside County. The effects on people and property can be disastrous and costly.

Relationship to Other Hazards – Cascading Effects

The recent Bark Beetle infestation is a classic example of cascading effects. The insect killed hundreds of thousands of trees, increasing the wildfire hazard, which resulted in the unfortunate devastation of the fall fires of 2003.

Hazard Mitigation Goals and Strategies

This area of the Plan will be updated as part of the Plan's 2006 Maintenance Program

The County and two independent vector control special districts have aggressive programs utilizing:

- Sentinel flocks,
- Insect traps, and
- GIS mapping.

Hazard Definition

A dam failure is the partial or complete collapse of an impoundment, with the associated downstream flooding. Flooding of the area below the dam may occur as the result of structural failure of the dam, overtopping, or a seiche. Dam failures are caused by natural and manmade conditions. The list of causes includes earthquake, erosion of the face or foundation, improper sitting, structural/design flaws, and prolonged rainfall and flooding. The primary danger associated with a dam failure is the swift, unpredictable flooding of those areas immediately downstream of the dam.

.

There are three general types of dams: earth and rock fill, concrete arch or hydraulic fill, and concrete gravity. Each of these types of dams has different failure characteristics. The earth/rock fill dam will fail gradually due to erosion of the breach; a flood wave will build gradually to a peak and then decline until the reservoir is empty. A concrete arch or hydraulic fill dam will fail almost instantaneously; with a very rapid build-up to a peak and then a gradual decline. A concrete gravity dam will fail somewhere in between instantaneous and gradual, with corresponding build-up of flood wave.

History

Historically, Riverside County has not experienced any significant dam failure incidents, although there are several major dams in the County of both the earthen and steel reinforced concrete type.

Dam Inventory

Descriptions of the dams, their inundation impact on the County, and a delineation of response efforts are outlined in the Dam Inundation Impact Plan, maintained by Riverside County OES. The following two maps depict dam failure inundation zones in Western Riverside County. The first map includes locations of hospitals. The second map includes an overlay of Special Districts.

Dam	River	Nearest City	Height (feet)	Storage (acre-feet)	Year Built	Drainage Area (sq. miles)	Hazard Rating by Local Jurisdiction

Risk Assessment

The County of Riverside is subject to potential flooding from several local dams, reservoirs, streams, rivers, and washes. These include but are not limited to, Lake Elsinore, the Colorado River, and the San Jacinto River. Seasonal flooding with failure of run-off storage reservoirs, canals, and levees could seriously compound the situation, particularly in or near urban population centers. From the time of complete failure to inundation could be as little as 5-to-10 minutes.

Portions of Riverside County along the Colorado River corridor could suffer from catastrophic failure of dams that are located far outside the borders of Riverside County. These dams include Palo Verde Diversion Dam, Headgate Rock Dam, Parker Dam, Davis Dam, and Hoover Dam. If there were a catastrophic dam failure, it is estimated that it would take a minimum of 23 hours before the flood waters reach the City of Blythe.

With major disruptions in power and communications systems, warning may not be received from dam or reservoir sites in time to initiate an organized evacuation or broadcast warnings via emergency radio stations. If a credible prediction is initiated, then preparation for a damaging earthquake could begin and residents and business owners within dam inundation areas could be directed to assembly areas to wait for official word regarding safe re-entry. This method of direction and control could substantially reduce potential loss of life, if enough warning were available.

- **Effects on people and housing.** The effects on people and housing can be significant. Loss of life and loss of property are very real risks. The shelter requirements for displaced persons can be enormous.

- **Effects on commercial and industrial structures.** Similarly, commercial and industrial structures face risks running the gamut from significant damage to total loss.

- **Effects on infrastructure.** Dam failure may be a direct or indirect cause of power outages. These outages can be extensive in geographic area and numbers of persons affected.

- **Effects on Critical Facilities.** As with the threat of flooding, there are numerous critical facilities within the inundation zones of the dams. In many cases, the facilities were built before the creation of some of the dams (Diamond Valley as an example) and became vulnerable since that time. Relocation efforts for some facilities are being studied and a restriction on the building on these types of facilities has been developed by the County.

- **Effects on agriculture.** Effects on agriculture can be catastrophic, both for crops and for animals. Loss of property is a real risk, as well.

Risk Assessment Conclusion.

Although dam failure incidents have not historically been a problem in Riverside County, the County's location with respect to earthquake fault lines presents the very real danger of dam failure due to quakes. If this were to occur, the effects could be catastrophic. Also, as noted above, seasonal flooding with failure of run-off storage reservoirs, canals, and levees could seriously compound the risks of dam failure and additional flooding.

Relationship to Other Hazards – Cascading Effects

Dam failure obviously causes downstream flooding. It may also lead to power failures and downed power lines. The secondary effects of dam failure can include the disruption of the local and state economies by damage to buildings and roads, the severance of communications, the disruption of supply and delivery mechanisms, additional welfare, and emergency aid to the recovering economy.

Dam failure may be caused by other hazards, including earthquakes and seasonal flooding.

Hazard Mitigation Goals and Strategies

Several methods have been used to improve the seismic stability of dams in California. Multiple arch dams are being stiffened, and embankment dams are being buttressed. Reservoir storage restrictions are being used to improve dam safety.

During the development of the Safety Element of the General Plan, a review of records maintained at the California OES provided potential failure inundation maps for 23 dams affecting Riverside County. These maps were compiled into the GIS digital coverage of potential dam inundation zones for Riverside County. These maps are intended to be used by state and local officials for the development and approval of dam failure emergency procedures as described in Section 8589.5 of the California Government code. The maps are also used to provide information needed to make natural hazard disclosure statements required by legislation (AB 1195 Chapter 65, June 9, 1998; Natural Hazard Disclosure Statement).

The Riverside County General Plan, adopted in October 2003, combines the mitigation efforts for floods and dams together, to insure that the same standards are used to protect property and lives for both types of events.

A specific mitigation strategy listed in the General Plan identifies the need to adopt an inundation alert system with readiness levels corresponding to official forecasts by the State Office of Emergency Services, regarding earthquake prediction, flooding, potential for dam failures and other disasters. This recommendation has been written has a Mitigation Proposal and can be found in the County Department Mitigation Section of Appendix D.

- Western Municipal Water District

Hazard Definition

Hazardous materials (Hazmat), consist of substances that by their nature, lack of containment, and reactivity, have the capability for inflicting harm. Hazmat poses a threat to health and the environment when improperly managed. Hazmat can be toxic, corrosive, flammable, explosive, reactive, an irritant, or a strong sensitizer. Hazmat substances also include certain infectious agents, radiological materials, oxiders, oil, used oil, petroleum products, and industrial solid waste substances.

Hazardous materials can pose a threat where they are manufactured, stored, transported or used. They are used in almost every manufacturing operation and by retailers, service industries, and homeowners.

Hazardous material incidents are one of the most common technological threats to public health and the environment. Incidents may occur as the result of natural disasters, human error, and/or accident.

Hazmat incidents typically take three forms:

1. Fixed facility incidents
    a. It is reasonably possible to identify and prepare for a fixed site incident, because laws require those facilities to notify state and local authorities about what is being used or produced there.
2. Transportation incidents
    a. Transportation incidents are more difficult to prepare for because it is impossible to know what material(s) could be involved until an accident actually happens.
3. Pipeline incidents
    a. Pipelines carry natural gas and petroleum. Breakages in pipelines carry differing amounts of danger, depending on where and how the break occurs, and what is in the pipe.

History

Many forms of hazardous materials are present in both the rural and urban areas of Riverside County. They are present in permanent storage locations, roadway and railway transport mediums, long-distance pipelines, and at various industrial and agricultural application sites. The County's location, with its rail and highway transportation routes, and various industries, has a growing potential for serious hazardous materials incidents. Interstates 10 and 215, and State Highways 60 and 91 are all heavily traveled by trucks. Those trucks carry a wide variety of hazardous materials including gasoline, rocket fuels, pesticides, and radioactive materials.

The railroad lines traveling throughout the County also carry some extremely hazardous cargoes. Fortunately, the railroads have a good safety record with regard to the transportation of hazardous materials.

Traffic on railroads is not as prevalent as on truck routes in Riverside County, but poses a much greater problem when an accident is involved due to the volumes of hazardous materials on board.

Although there is a great deal of air traffic along the airways above Riverside County, with the exception of March Air Reserve Base, there is relatively little airport activity. However, the potential for a hazardous materials incident still exists, especially with respect to military operations.

There are many pipeline distribution systems that traverse the County. These are discussed separately later in this LHMP.

The following table describes a number of relatively recent Hazmat incidents.

Location	Date	Incident Description
Beaumont	4/23/2003	Railcar fire. Leaked white sand. Had to be checked by Hazmat.
Palm Springs Court Bldg.	3/24/2003	Noxious fumes released from mixed chemicals. Building evacuated.
Cajalco	2/12/2003	500 gallon propane tank rolled down a hill and vented. Residents evacuated.
Edgemont - School	1/24/2003	Natural gas leak. School dismissed.
Thermal	8/23/2002	Crop duster crash. Power lines downed. Pesticides released.
Moreno Valley	8/18/2002	Cleaning crew at apartments mixed cleaning agents and was overcome by fumes. 3 apartments evacuated.
Palm Desert	4/25/2002	Truck leak - 55 gallon drum of hydrogen peroxide. Reacted with asphalt.
Corona	10/11/2001	Waste oil barrels illegally dumped.
Indio - Restaurant	10/10/2001	CO2 chemical from defective storage. 27 people were treated and 4 were hospitalized. Building evacuated.
Hwy 215 at Nuevo Road	8/20/2001	Methyl Ethyl Keytone spill. 11 vehicle accident.
City of Riverside -Van Buren/Indiana Area	12/15/2000	Semi truck wreck causing large oil spill that caused closing of road. Oil also leaked into flood basin.
Riverside City - Arlington Ave.	8/24/2000	Double tanker fuel accident, 5,800 gallons. Tanker breached with fire. 12 homes evacuated, affecting about 25-30 residents. Road closed.
Palm Springs	7/5/1999	Train derailment, head on collision. Spill of 10,000 gallons of diesel oil into San Gorgonio River.
Riverside	2/19/1994	“Gloria Ramirez incident” – noxious fumes in emergency room resulted in some health care professionals becoming ill and fainting

The administering agencies within Riverside County are responsible for the control of fixed hazardous materials facilities.

Risk Assessment

The amount of hazardous materials transported over rail and roadways on a daily basis is unknown, but estimated to be steadily increasing as our economy grows. There is the potential for a hazardous materials incident almost anywhere on the numerous highways and roads that criss-cross Riverside County. The greatest concern focuses on the 10, 15, 60, 91, and 215 freeways. The most vulnerable areas along these routes are considered to be the on/off ramps and interchanges.

A major concern with the trucking industry is the safe operation of their trucks. With the deregulation of the trucking industry, spot checks of trucks in many states, including California, have shown that 25 percent or greater of trucks currently in service are not in safe enough condition to be operated on public highways.

Many high-tech industries are moving into the County. Many plants exist today, with more construction forecast. To support high-tech industries, the County is likely to realize a large increase in the transportation of highly toxic and corrosive materials into and out of the County. With increased use of hazardous materials, there is increased need for safe hazardous waste management and disposal. With many hazardous waste disposal sites closing, there will be increased transportation of hazardous materials.

Illegal dumping and clandestine drug labs are also a hazardous materials problem. Although not exclusive to Riverside County, the County is a target for these activities due to its accessibility in the outlying areas and the open living conditions in the mountain and desert areas.

No Class I landfills are operated in Riverside County. Eight Class III landfills are active in Riverside County. All accept only non-hazardous solid wastes and are located in unincorporated areas. Five of these landfills are operated by the Riverside County Waste Management Department, while one (El Sobrante) is privately owned and operated. The El Sobrante and Blythe landfills are the only facilities that currently accept waste from outside of Riverside County.

According to the EPA, the five largest generators of production-related hazardous waste materials in Riverside County produce over 15 million pounds of these materials, including lead compounds, sulfuric and phosphoric acids, and xylene. There hazardous waste generators include food and beverage processors as well as battery, semi-conductor, and metal container manufacturers. Although hazardous waster generators are scattered throughout Riverside County, most of the large producers of these materials are located in the western portion of the County. Of the five largest generators, two are located in the City of Corona. The other three are located in the Riverside, Temecula, and the community of Mira Loma.

Nearly all of Riverside County residents have some type of hazardous material in their homes. Examples include motor oil, paints, cleaners, aerosols, and pesticides. Household hazardous materials pose serious health issues for people who improperly use or dispose of these materials. Adverse environmental impacts can occur when household hazardous materials are disposed of in unlined sanitary landfills, where these materials may leach through the soil and contaminate groundwater.

Medical facilities, including clinics, hospitals, professional offices, blood and plasma centers, and medical research facilities generate a wide variety of hazardous substances. These substances may include contaminated medical equipment or supplies, infectious biological matter, prescription medicines, and radioactive materials used in medical procedures. The disposal of medical waste is achieved by on-site autoclaving of red-bagged waste (any medical waste that could possibly transmit a pathogen) and subsequently transported to a Class III landfill. The Riverside County Department of Environmental Health Services has regulatory control over the disposal of medical and biological waste.

- **Effects on people and housing.** As the historical events in Riverside County show, people may be evacuated when a Hazmat incident occurs. Relative to some of the other natural hazards assessed earlier in this LHMP, the numbers of people affected by Hazmat incidents are usually less.

- **Effects on commercial and industrial structures.** There may be economic consequences due to Hazmat incidents, but the damage is generally limited to clean-up of facilities and grounds, or simply interruption of business due to evacuation.

- **Effects on infrastructure.** Hazmat incidents involving transportation may result in downed power lines. Also, Hazmat materials may impact waterways and drainage systems, and incidents can lead to the evacuation of schools, business districts, and residential areas.

- **Effects on agriculture.** As noted previously, there is a long history of agricultural production in Riverside County. Agricultural activities typically include the storage and periodic application of pesticides, herbicides, and fertilizers, as well as the storage and use of toxic fuels and solvents. The infiltration of these substances may leach into local groundwater supplies, presenting an elevated risk of groundwater contamination.

Risk Assessment Conclusion

Although the point of hazard in a Hazmat incident can have serious property damage and even loss of life, Hazmat accidents do not generally affect extremely large areas. Hazmat incidents present a real danger and are highly unpredictable in terms determining when or where they will occur, but they generally do not pose a serious threat to the ability of Riverside County to respond. Reasonable preparation by law enforcement, the fire department, and the medical community enables the County to deal with the majority of likely events. Many emergency workers prepare for Hazmat events as part of their ongoing training. Agencies and facilities are also routinely equipped to deal with most events that might occur.

Relationship to Other Hazards – Cascading Effects

Besides the immediate effect of a hazardous materials incident at the scene of the emergency, there are ancillary effects as well. For instance, there may be impacts on waterways and drainage systems, and the evacuation of schools, business districts, and residential areas.

Hazard Mitigation Goals and Strategies

The County of Riverside Department of Environmental Health contains a Hazardous Materials Management Division, which has several methods of collecting household hazardous waste. There is a Mobile Household Waste facility that travels throughout the County and collects hazardous waste at multiple locations.

The Department of Environmental Health also maintains antifreeze, battery, oil, and latex paint (ABOP) collection sites. There are three sites within Riverside County in the cities of Riverside, Palm Springs, and Murrieta.

In addition to Federal and State policies and regulations for handling of hazardous waste, Riverside County has two local ordinances in this area:

1. Ordinance No. 615.3 – Implemented for the purpose of monitoring establishments where hazardous waste is generated, stored, handled, disposed, treated, or recycled. Regulates the issuance of permits and the activities of establishments where hazardous waste is generated.

2. Ordinance No. 718.1 – Implements a medical waste management program in accordance with the Medical Waste Management Act, as found in the California Health and Safety Code, Division 14, Part 14. Establishes requirements for the management of medical waste and makes provisions for the enforcement of the requirements.

The Riverside County General Plan, adopted in October 2003, includes the following recommendations:

1. Enforce the policies and siting criteria and implement the programs identified in the County of Riverside Hazardous Waste Management plan, which includes the following:
   a. Comply with federal and state laws pertaining to the management of hazardous wastes and materials.
   b. Ensure active public participation in hazardous waste and hazardous materials management decisions in Riverside County.
   c. Coordinate hazardous waste facility responsibilities on a regional basis through the Southern California Hazardous Waste Management Authority (SCHWMA).
   d. Encourage and promote the programs, practices, and recommendations contained in the County Hazardous Waste Management Plan, giving the highest waste management priority to the reduction of hazardous waste at its source.

Hazard Definition

Transportation hazards are incidents involving air, rail, or highway transport of goods or passenger travel resulting in property damage, death, or serious injury. The incidents can be caused by transportation of hazardous materials, earthquake, hazardous weather, or other hazardous conditions affecting the uninterrupted flow of transportation and/or public safety.

Five major transportation systems operate within Riverside County. These systems are:

1. Highways
2. Railroads
3. Air traffic
4. High pressure petroleum and gas lines
5. Aqueducts.

Pipelines and aqueducts are treated separately in the next section of this LHMP.

History

Highways. The traffic density on the freeway and highway systems in the western part of the County is of particular concern. The population and economic growth in this area has caused increased demand on these networks.

Although the seasons do not have a large impact on Riverside County, there is the threat of poor visibility due to winter fog. Adding to this problem is the fact that one out of every ten trucks on the freeway carries some sort of hazardous materials. (In addition, California Highway Patrol statistics show that 20 – 25 percent of them are usually driven in an unsafe mechanical condition.)

Rail Lines. Major rail transport lines through Riverside County include Union Pacific and the Burlington Northern Santa Fe (BNSF) Railway Companies. Rails, cars, supporting bridges, overpasses, and electrically-operated switching mechanisms are susceptible to damage.

Union Pacific and the BNSF Railway Companies lines enter the Coachella Valley from Imperial County along the eastern shore of the Salton Sea.

Major population centers affected by railroad transportation are vulnerable to the impact of a wide variety of hazardous materials transported by these carriers. Additionally, there are lines running east and west that carry significant tonnage daily. Some of these lines are in remote areas, but that does not lessen the overall seriousness of their impact.

The following two maps depict major highways and railways in Western Riverside County and Eastern Riverside County, respectively.

Airlines / airports. The western part of Riverside County has some of the busiest air traffic areas in the United States. Commercial, as well as military traffic, is very heavy. The number of near misses reported by pilots underscores the increasing possibility of a mid-air collision over the County.

There are two major airports in Riverside County: March Air Reserve Base and Palm Springs International. There are also numerous smaller municipal and commercial airports, and private air strips,

- Banning Airport
- Bermuda Dunes Airport
- Blythe Airport
- Chiriaco Summit Airport
- Corona Municipal Airport
- Desert Center Airport
- Flabob Airport
- French Valley Airport
- Hemet City Airport
- Lake Elsinore Airport
- Perris Valley Airport
- Rancho California Airport
- Riverside Municipal Airport
- Thermal Airport

In addition, there are four major out-of-county airports operating in the vicinity of Riverside County with significant flight-paths over the County:

1. John Wayne Airport (Orange County)
2. Long Beach Airport (Los Angeles County)
3. Los Angeles International (LAX) Airport
4. Ontario Airport (San Bernardino County)

The history of transportation emergencies in Riverside County includes a wide range of incidents as shown in the table below. Note that many of the Hazmat incidents enumerated in the preceding section may be viewed as transportation emergencies as well.

Location	Date of Incident	Incident Type	Incident Description
Beaumont, San Timeteo Road	9/7/2003	Train - Collision with other train	Train derailment, diesel fuel leak. 2 homes evacuated, 4 displaced residents.
Beaumont	4/23/2003	Train - Cargo	Railcar fire.
Mira Loma, Jurupa, Rubidoux, Pedley, Sky Country	1/6/2003	Highway - Semi	Semi-truck overturn. Road closures, downed trees and power lines. Power outages affecting 10,000.
Thermal	8/23/2002	Airplane - crop-duster	Crop duster crash. Power lines down. Pesticides released.
Palm Desert	4/25/2002	Highway - Spill	Truck leak - 55 gallon drum of hydrogen peroxide.
North Bound 215 - 4th Street	10/24/2001	Highway - Automobile	Fog related vehicle accident. 32 vehicles, 50 passengers
Hwy 215 at Nuevo Road	8/20/2001	Highway Incident - Automobile	Methyl Ethyl Keytone spill. 11 vehicle accident.
City of Riverside - Van Buren/Indiana Area	12/15/2000	Highway Incident - Semi	Semi truck wreck causing large oil spill that caused closing of road. Oil also leaked into flood basin.
Riverside City - Arlington Ave.	8/24/2000	Highway - Spill	Double tanker fuel accident, 5,800 gallons. Tanker breached with fire. 12 homes evacuated, estimated 25-30 residents
Cathedral City	10/22/1999	Train - Passenger & Freight collision	Passenger train collided with freight train. 234 crew and passengers injured. 16 railcars damaged.
Riverside County - Hector Mine	10/16/1999	Rail line	Earthquake, pipeline break, track damage, fallen items in stores, power outage
Palm Springs	7/5/1999	Train - Head on Collision	Train derailment, head on collision. Spill of 10,000 gallons of diesel oil into San Gorgonio River.

Risk Assessment

The possibility for a transportation hazard to occur is ongoing. There have been railway incidents in the recent past, although they have not been numerous and have not caused extensive damage. Semi-trucking incidents are not uncommon, and could result in a hazardous spill at any time, although notable events have not occurred in recent history. There has not been a serious airline accident in the area in the recent past.

- **Effects on people and housing.** As the historical events in Riverside County show, people may be evacuated when a transportation emergency occurs. Relative to some of the other natural hazards assessed earlier in this LHMP, the numbers of people affected by transportation emergencies are usually less.

- **Effects on commercial and industrial structures.** There may be economic consequences due to transportation emergencies, but the damage is generally limited to clean-up of facilities and grounds, or simply interruption of business due to evacuation.

- **Effects on infrastructure.** Transportation emergencies may result in downed power lines. Also, Hazmat materials released in a transportation emergency may impact waterways and drainage systems, and incidents can lead to the evacuation of schools, business districts, and residential areas.

- **Effects on agriculture.** Transportation is essential to the agricultural industry. For all elements of agriculture other than those that are dairy-related, any incident that affects transportation for more than three days is “major.” For the dairy segment of the agricultural industry, any incident that affects the ability to transport product by more than 12 hours is considered “major.”

Risk Assessment Conclusion.

In general, transportation hazards are not cataclysmic in terms of widespread property damage and loss of life. Existing emergency operations should be equipped to handle almost of any transportation hazard that may occur.

However, because Riverside County has an agricultural production value of over $1 billion, any transportation emergency that affects the ability for agriculture to conduct its routine business (importing supplies and exporting production) can have severe economic consequences for the County.

Relationship to Other Hazards – Cascading Effects

Cascading effects of transportation emergencies are generally limited to those of Hazmat incidents as described above.

Hazard Mitigation Goals and Strategies

Highways, railroads, airports, pipelines, and aqueducts are considered elements of Riverside County's critical infrastructure. There are a number of policies within the Safety Element of the General Plan aimed at strengthening the project permit and review process to ensure that proper actions are taken to reduce hazard impacts and to encourage structural and nonstructural design and construction for critical infrastructure. Damage must be minimized for critical facilities, and susceptibility to structural collapse must be minimized, if not eliminated.

Hazard: Pipeline / Aqueduct Incidents

County Severity Rating: 2	County Probability Rating: 3

OA Jurisdictions Affected by Pipeline / Aqueduct Incidents

- Alvord Unified School District
- Cathedral City
- City of Banning
- City of Blythe
- City of Calimesa

- San Gorgonio Pass Water Agency
- San Jacinto Unified School District
- Valley Sanitation District

- West Valley Water District
- Western Municipal Water District

Hazard Definition

There are many pipeline distribution systems that transit Riverside County, including systems for water, natural gas, and petroleum products.

Major water conveyance systems consist of the Colorado River Aqueduct operated by Metropolitan Water District (MWD) of Southern California, the California Aqueduct operated by the State Department of Water Resources (DWR), and water distribution lines operated by MWD.

A major pipeline carrying natural gas parallels Interstate 10 and Highway 60 throughout the County. This pipeline brings gas from the southwestern states into Southern California.

Petroleum products are stored and distributed at many major areas throughout the County. Of particular interest are the aviation fuel tanks and pipelines located at March Air Reserve Base. Although under the control of the U.S. Government, their potential for impact on the surrounding area is of interest to the County.

History

Recent emergency incidents in Riverside County include:

Location	Date	Incident Description
Pedley	10/31/2002	Gas line rupture. 131 structures evacuated. Mobile home park evacuated. 150 people displaced.
Moreno Valley	8/29/2002	Broken pipe at waste treatment plant. 300,000 gal sewage spill.
Rubidoux Area	10/30/2000	Gas line was damaged by residential homeowner. 70 people evacuated.
City of Riverside -Van Buren/Montgomery	8/29/2000	Water line break. Flooded homes, displaced 7 families. Hail, heavy rain. Mudslide.
Riverside County - Hector Mine	10/16/1999	Earthquake, pipeline break, track damage, fallen items in stores, power outage
Cherry Valley	7/11/1999	Flood: 2 Reservoirs lost, pipeline break, water system destroyed, water damage to structures.

On a daily basis, minor incidents occur which affect a single structure.

Risk Assessment

A rupture of a main line with a major release could have serious effects in terms of flooding and property damage. A gas line rupture could explode causing serious property damage and loss of life.

- **Effects on people and housing.** The consequences to people and housing of flooding or explosion could be quite severe.

- **Effects on commercial and industrial structures.** Similarly, the effects on commercial and industrial structures from flooding or explosion could be severe.

- **Effects on agriculture.** In the same way, the effects on agriculture from flooding or explosion could be severe.

Risk Assessment Conclusion.

Pipelines are vulnerable to rupture if for no other reason than the possibility of an earthquake causing significant breakage. The degree of damage county-wide for a given rupture would be minimal, even though there might be significant loss of life and property in the immediate area of the incident, depending on what kind of pipe ruptures and where the rupture occurs.

Relationship to Other Hazards – Cascading Effects

Pipeline / aqueduct incidents may lead to flooding. Incidents with natural gas or petroleum product pipelines may lead to explosion and fire.

Hazard Mitigation Goals and Strategies

As noted in the previous section on Transportation Emergencies, pipelines and aqueducts are considered elements of Riverside County's critical infrastructure. There are a number of policies within the Safety Element of the General Plan aimed at strengthening the project permit and review process to ensure that proper actions are taken to reduce hazard impacts and to encourage structural and nonstructural design and construction for critical infrastructure. Damage must be minimized for critical facilities, and susceptibility to structural collapse must be minimized, if not eliminated.

Hazard: Blackout

County Severity Rating: 3	County Probability Rating: 4

OA Jurisdictions Affected by Blackout

- Alvord Unified School District
- Cathedral City

- Riverside County Transportation and Land Management Agency
- Riverside Unified School District
- San Gorgonio Pass Water Agency

- San Jacinto Unified School District
- Valley Sanitation District
- Western Municipal Water District

Hazard Definition

A blackout is a total loss of power and light. A blackout is caused by an interruption or loss of electrical service due to disruption of power generation or transmission caused by an accident, sabotage, natural hazard, equipment failure, or fuel shortage. Interruptions that are more common are caused by power grid failure, fire, or severe weather. In Riverside County, it is possible that power outage could be caused by a severe earthquake. These interruptions can last anywhere from a few seconds to several days or weeks.

History

Recent blackout incidents in Riverside County are described in the table below:

Location	Date	Incident Description
Riverside County	1/14/2003	Power lines down with 936,569 people affected, trees felled, homes damaged, fire triggered from downed lines,
Mira Loma, Jurupa, Rubidoux, Pedley, Sky Country	1/6/2003	High wind caused road closures, downed trees and power lines. Semi-truck overturns. Power outages affecting 10,000. Fire.
Moreno Valley	7/22/2002	51 home blackout. Transformer fire. Illegal dumping of used motor oil into the transformer vault.
Riverside County	2/9/2002	High wind. Damage throughout county. Roof damage, structure fires, wildfires started but were contained before 15 acre point. Power outages from wind.
Eastern Coachella Valley	7/3/2001	Power failure. Several thousand people affected.
Desert Cities	8/27/2000	Thunderstorm and wildfires caused power interruption. 2,800 customers without power.
Blythe	8/23/2000	Power outage from storms. Provided shelter for 24 people.
Hector Mine Earthquake	10/16/1999	Minor damage to buildings, power interruption, communication interruption, gas line break causing leak.
Beaumont	2/17/1999	60mph winds damaged roofs, downed trees and power lines, and created a dense dust storm. Plume of dust penetrated homes and covered all surfaces and filled closets and cupboards. Yards had 3" to 6" of silt. 1128 homes damaged. 27 vehicles.
Greater Jurupa Area	1/6/1996	Property damage, power disruption, road damage.
Riverside County	10/28/1993	Variety of fires. 129 structures destroyed. Power outages. 6 injuries.

Risk Assessment

The possibility of catastrophic damage to property or loss of life due directly to power failure is slight. An individual could lose their life if they come into contact with a downed power line. Although the risk of power outage is high, the direct damage potential is low.

On the other hand, blackouts or interrupted service often occur during electrical storms and high winds. Wildfires also cause blackouts in the Riverside County area. There is a very real possibility of a widespread blackout due to earthquake.

- **Effects on people and housing.** Impacts due directly to power failure are slight.
- **Effects on commercial and industrial structures.** Impacts due directly to power failure are slight.
- **Effects on infrastructure.** Impacts to the ability of infrastructure in the area of failure to support emergency response may be significant, although not permanent.
- **Effect on Critical Facilities.** An inventory of all major critical facilities showed that they all have back-up power capabilities.
- **Effects on agriculture.** Impacts due directly to power failure are slight.

Risk Assessment Conclusion

The County needs to be prepared to restore power should there be a failure due to downed lines caused by another hazardous condition.

Relationship to Other Hazards – Cascading Effects

As noted, other hazards such as earthquake, wildfire, electrical storms, and high winds may be causes of blackouts.

Hazard Mitigation Goals and Strategies

Both Southern California Edison and Anza Electricity have mitigation plans.

Hazard: Toxic Pollution

County Severity Rating: 3	County Probability Rating: 4

OA Jurisdictions Affected by Toxic Pollution

- Alvord Unified School District
- Cathedral City
- City of Banning
- City of Blythe
- City of Calimesa
- City of Canyon Lake
- City of Coachella
- City of Corona
- City of Hemet
- City of Indio
- City of La Quinta

- Riverside County Office of Education, Children, and Family Services
- Riverside County Transportation and Land Management Agency
- Riverside Unified School District
- San Gorgonio Pass Water Agency
- San Jacinto Unified School District
- Valley Sanitation District
- Western Municipal Water District

Hazard Definition

People are exposed to toxic pollutants in many ways that can pose health risks:

- Breathing contaminated air
- Eating contaminated food products, such as fish from contaminated waters; meat, milk, or eggs from animals that fed on contaminated plants; and fruits and vegetables grown in contaminated soil
- Drinking water contaminated by toxic pollutants
- Ingesting contaminated soil. Young children are especially vulnerable because they often ingest soil from their hands or from objects they place in their mouths
- Touching (making skin contact with) contaminated soil, dust, or water (for example, during recreational use of contaminated water bodies)

History

Los Angeles and Riverside Counties have often been sited as the most polluted environments in the United States. The California Wellness Foundation writes that development in the Riverside County area has exacerbated local toxic pollution problems. They site health problems due to pollution in the area, as well.

Riverside County has been named as the #1 sprawl area in the United States. This unprecedented growth and development with its focus on making the area a major distribution center with warehouses and cargo ports places an overwhelming additional burden on the already polluted air. The massive housing tracts emerging throughout the area stresses the ability to make available water quality that is safe and healthful to current residents, as well as new residents.

Air Quality. The combination of geographical features and high levels of pollutants produced in the region have resulted in the Environmental Protection Agency (EPA) designating the air basins in Riverside County as non-attainment areas. This means that due to the high level of pollutants in the region, the area is not expected to meet National Ambient Air Quality Standards in the near future.

The World Health Organization (WHO) identifies the Inland Counties as having the 4th worst particulate pollution in the world – only after Jarkarta, Indonesia; Calcutta, India; and Bangkok, Thailand. The Riverside and San Bernardino areas have the highest levels of particulate pollution in the nation.

Water Quality. Riverside County incorporates four major watershed areas in which river systems, numerous lakes and reservoirs, and natural drainage areas are located. The County's supply of water is limited by its arid climate; agricultural practices; projected population growth, and its associated demand and development; and the dependence on low quality imported water. Further, the availability of imported surface water has been reduced due to changing regulations, despite an ever-increasing water demand. In some areas within Riverside County, contamination from natural or manufactured sources has reduced groundwater quality such that its use requires treatment.

Water quality problems that have occurred in Riverside County have related to:

- inadequate subsurface sewage disposal,
- waste disposal management of the Santa Ana River,
- agriculturally-related problems such as citricultural runoff in the western County and increasing salinity of the desert groundwater basins,
- sediment buildup of water bodies from construction-related erosion,
- lake water quality problems, and
- pollution due to urban stormwater system runoff

More than 7 million Californians drink water contaminated with perchlorate (a major component of Rocket Fuel) placing millions of children at risk of developmental, metabolic, immune system damage--and even cancer--with exposures at very low levels. Locally, more than 53 drinking water wells have been closed due to contamination from perchlorate with three major plumes affecting Glen Avon, Mira Loma, and Pedley.

Risk Assessment

Despite significant success in reducing overall pollution levels, air pollution continues to be an important public health problem in Riverside County. For the fourth year in a row (2003), the metropolitan Los Angeles area, *which includes Riverside County*, was designated as the smoggiest area in the country by the American Lung Association. Although the number of days Riverside County experienced unhealthy levels of ozone pollution has improved, from 142 days between 1996 and 1998 to 78 days between 1999 and 2001, officials with the American Lung Association say the "slight improvements" seen recently may be weather related. By next year, when numbers from 2002's studies become available, officials say they expect the number of days with unhealthy air pollution to be higher again due to last year's warm summer. The pollutants are also expected to increase due to large influxes of commuting residents.

Mira Loma, Glen Avon and Rubidoux in Riverside County sit in the region's dirtiest pocket of particulate pollution. The communities get hit by pollution from dairies, which emit ammonia compounds, as well as from vehicle exhaust. In recent years, the warehouse industry has grown substantially in the Mira Loma area, causing unhealthful increases in diesel fuel emissions. In 2000, researchers with USC's medical school blamed the particulate pollution for stunting the lung development of Mira Loma children.

With the anticipated growth in Riverside County, water supply, water quality, and adequate water facilities will continue to be critical issues.

- **Effects on people and housing.** The quality of the air that people breathe and water that they drink directly affects their health, environment, economy and quality of life. An overabundance of pollutants in air or water can cause mild to severe health effects, including increased hospitalization and emergency room visits, respiratory illnesses, increased risk of developing cancer, decreased breathing capacity, lung inflammation, difficulty in exercising, and even a reduction in life-span.

- **Effects on commercial and industrial structures.** Pollutants may cause damage to property. Certain air pollutants are responsible for discoloring painted surfaces, eating away at stones used in buildings, dissolving the mortar that holds bricks together, and cracking tires and other items made from rubber.

- **Effects on agriculture.** The County's agricultural industries include cattle, poultry, and crops. Each of these industries can cause significant soil and water contamination through fecal matter and pesticides.
  In addition, just as people are affected by air and water pollution, so too are plants and animals. Animals must breathe the same air and, for the most part, drink the same water, and are subject to the same types of negative health effects as humans. Certain plants and trees may absorb air or water pollutants that can stunt their development or cause premature death.

  Moreover, the agricultural industry is dependent on an adequate water supply. Although many crops are not as water-dependent as animals are, some ground and vine crops have a very short life-span without an adequate water supply. Short-term water supplies can be provided to animals through the use of water trucks, for example; however, these means will not suffice to support large crops.

Risk Assessment Conclusion

Air and water pollution are significant hazards for the County. Soil contamination is a risk, as well.

While there are risks to humans, animals, and plants as noted above, there are also numerous impacts to the economy including lost work days due to illness, a desire on the part of business to locate in areas with a healthy environment, and increased expenses from medical costs.

Relationship to Other Hazards – Cascading Effects

Cascading effects of toxic pollution are limited.

Hazard Mitigation Goals and Strategies

Air Quality. The following provides background on plans required by legislation:

The Federal Clean Air Act (1977 Amendments) requires that designated agencies in any region of the nation not meeting national clean air standards must prepare a plan demonstrating the steps that would bring the area into compliance with all national standards by December 31, 1987. In response, the Governor of California designated agencies to develop these plans.

For the South Coast Air Basin and the Salton Sea Air Basin, the agencies designated to develop regional air quality plans are the South Coast Air Quality Management District (SCAQMD) and the Southern California Association of Governments (SCAG). T he two agencies first adopted an Air Quality Management Plan (AQMP) in 1979 and have revised it several times subsequently, as earlier attainment forecasts were shown to be overly optimistic.

The latest AQMP, approved in 1997, was designed to meet both federal and state air quality planning guidelines. Strategies for controlling air pollutant emissions in the AQMP are grouped into three "tiers," based on their anticipated timing for implementation. Tier 1 consists of the implementation of best available current technology and management practices that can be adopted within five years. Tier II is based on anticipated advancement in current technology and vigorous regulatory action, while Tier III controls consist of implementation measures which first require the development of new technologies.

Equivalent regional air quality plans were created for the Mojave Desert Air Basin by the Mojave Desert Air Quality Management Basin (MDAQMD) in conjunction with SCAG. In 1998, the California Legislature enacted the California Clean Air Act (CCAA). The CCAA requires regional emissions to be reduced by 5% per year, averaged over a 3-year period, until attainment can be demonstrated. Each region that did not meet a national or state air quality standard was required to prepare a plan which demonstrated how the 5% reductions were to be achieved.

The MDAQMD adopted its Air Quality Attainment Plan in 1995 to meet state ozone standards and the Attainment Demonstration Plan in 1996 to meet federal ozone standards. While the Mojave Desert Air Basin is classified by the state as a non-attainment area for PM10 (coarse particles larger than 2.5 but smaller than 10 micrometers), state law does not require an air quality plan to meet this standard, and as such, no plan has been adopted.

The Air Quality Element of the General Plan and the Air Quality section of the General Plan Draft Program Environmental Impact Report enumerate many policies aimed at improving air quality.

Water Quality. Water Quality Control Boards for Regions 7, 8, and 9 provide state-level water quality policy for the County. Further, the National Pollutant Discharge Elimination system mandates Best Management Practices in order to effectively minimize the adverse effects of pollution and protect water quality. The Multipurpose Open Space Element of the General Plan enumerates water quality policies aimed at:

- Encouraging innovative and creative techniques for wastewater treatment, including the use of local water treatment plants,
- Encouraging wastewater treatment innovations in rural areas, and
- Minimizing pollutant discharge into storm drainage systems, natural drainage, and aquifers.

Hazard: Nuclear Incidents

County Severity Rating: 4	County Probability Rating: 2

OA Jurisdictions Affected by Nuclear Incidents

- Alvord Unified School District
- City of Banning
- City of Blythe
- City of Calimesa
- City of Canyon Lake
- City of Coachella
- City of Corona
- City of Desert Hot Springs
- City of Hemet
- City of Indian Wells
- City of Indio
- City of La Quinta
- City of Lake Elsinore
- City of Moreno Valley
- City of Murrieta
- City of Norco
- City of Palm Desert
- City of Palm Springs
- City of Perris
- City of Rancho Mirage
- City of Riverside
- City of Temecula
- Lake Elsinore Unified School District
- Menifee Unified School District
- Moreno Valley Unified School District
- Murrieta County Water District
- Rancho California Water District
- Riverside Community Hospital
- Riverside County Office of Education, Children, and Family Services
- Riverside County Transportation and Land Management Agency
- Riverside Unified School District
- San Gorgonio Pass Water Agency
- San Jacinto Unified School District
- Valley Sanitation District
- Western Municipal Water District

Hazard Definition

There are three general situations that could affect Riverside County, namely:

- A situation involving nuclear weapons, which is discussed in the Terrorism section of this LHMP;
- A situation involving the transportation of nuclear materials; and
- An incident involving the San Onofre Nuclear Generating Station (SONGS).

As will be discussed in the Terrorism section of this LHMP, the possibility exists that a terrorist organization might acquire the capability of creating a small nuclear detonation. A single nuclear detonation in the United States would likely produce fallout affecting an area many times greater than that of the blast itself. There is also the possibility that a terrorist will construct a "dirty bomb", a bomb that is used to distribute nuclear contaminated materials. It would have less of an effect than a "traditional" nuclear bomb, but the terror effect on the population would be great.

A nuclear incident could be initiated by a transportation emergency, either accidental or intentional. See the Transportation Emergencies section of this LHMP.

SONGS is located on the Pacific Coast in northwestern San Diego County, approximately 4 miles southeast of the City of San Clemente. Surrounding San Onofre is a Basic Emergency Planning Zone, approximately 10 miles in radius within which certain precautionary actions must be taken and specific precautionary plans must be prepared. This zone does not include any portion of Riverside County. Beyond this zone is a Public Education Zone (PEZ) approximately 20 miles in radius in a northeasterly direction that does include the extreme southwestern tip of Riverside County. Within this area, residents are provided a public education program concerning the related hazards and protective actions that might result from an accident at SONGS. Beyond this zone is an area that could be affected by radioactive fallout being deposited in such a manner as to detrimentally affect the human food chain, which includes all of Riverside County. This area is identified as the Ingestion Pathway Zone. Specifically, the primary threat is that of radioactive iodine 131 being deposited upon fodder consumed by dairy cows and subsequently appearing in the milk at the public marketplace.

History

Fortunately, Riverside County has not yet experienced a nuclear accident.

Risk Assessment

Transportation of nuclear and/or irradiated materials is of growing concern. A severe transportation incident could require the evacuation of a large number of people, major rerouting of traffic systems, and an expensive decontamination process for the area involved. Ancillary problems associated with such an incident are discussed in the sections of this LHMP dealing with Hazardous Materials and with Transportation Incidents.

A detailed discussion of radiation hazards and their effects on humans along with a description of the operation of a nuclear power generating facility and the hazards posed thereby are contained in the State of California Nuclear Power Plant Emergency Response Plan and in other documents.

The State Nuclear Power Plant Emergency Response Plan assigns to the County of Riverside responsibility for certain actions to protect the public and the environment within Riverside County from the effects of an accident. The plan also lists the support and assistance available from various State and Federal organizations.

- **Effects on people and housing.** Depending on levels of radiation exposure, the effects could range from minimal to devastating.

- **Effects on commercial and industrial structures.** Depending on levels of radiation exposure, the effects could range from minimal to devastating.

- **Effects on infrastructure.** Depending on levels of radiation exposure, the effects could range from minimal to devastating.

- **Effects on agriculture.** Depending on levels of radiation exposure, the effects could range from minimal to devastating.

Risk Assessment Conclusion

The County is far enough away from nuclear power plants that cataclysmic exposure is not likely. Hills and mountains between the County and the nearest plant (San Onofre) could further mitigate the effects of an accident. There is the possibility of Riverside County being used as a major evacuation route from a nuclear plant accident. This would tax the County's response resources. The radiation from an accident would, of course, negatively affect the area.

Relationship to Other Hazards – Cascading Effects

Cascading effects of a nuclear incident could include contaminated water, air, and soil.

Hazard Mitigation Goals and Strategies

The Nuclear Regulator Commission (NRC) regulates the operation of nuclear power plants in the Unites States. The NRC is responsible for ensuring that the nuclear power plants in California are safe from hazards such as earthquakes and fires, as well as hazards from hostile sources such as terrorism. FEMA evaluates the ability of local and state governments to protect the public in the event of a nuclear power plant emergency.

State and local governments having jurisdiction within ten miles of an operating nuclear power plant must plan, train, and conduct emergency exercises annually in accordance with federal regulations. Detailed emergency plans are maintained by each affected agency.

Riverside County is part of the SONGS plan, primarily for evacuation.

Due to strict regulation of nuclear power plants in the United States, significant nuclear power incidents that can cause harm to the public have low probability of occurrence, and none have occurred in California.

Since 9/11, numerous anti-terrorism programs and policies have been put into effect in Riverside County by law enforcement, fire, public health, and other departments.

As noted in the Transportation Emergencies section of this LHMP, highways, railroads, and airports are considered elements of Riverside County's critical infrastructure. There are a number of policies within the Safety Element of the General Plan aimed at strengthening the project permit and review process to ensure that proper actions are taken to reduce hazard impacts and to encourage structural and nonstructural design and construction for critical infrastructure. These policies will help reduce the potential for a nuclear incident as a result of a transportation incident.

Hazard: Civil Unrest

County Severity Rating: 2	County Probability Rating: 2

OA Jurisdictions Affected by Civil Unrest

- Alvord Unified School District
- Cathedral City
- City of Banning
- City of Blythe
- City of Calimesa
- City of Canyon Lake
- City of Coachella
- City of Corona
- City of Desert Hot Springs
- City of Hemet
- City of Indian Wells
- City of Indio
- City of La Quinta
- City of Lake Elsinore
- City of Moreno Valley
- City of Murrieta
- City of Norco
- City of Palm Desert
- City of Palm Springs
- City of Perris
- City of Rancho Mirage
- City of Riverside
- City of Temecula
- Lake Elsinore Unified School District
- Menifee Unified School District
- Moreno Valley Unified School District
- Murrieta County Water District
- Riverside Community Hospital
- Riverside County Office of Education, Children, and Family Services
- Riverside County Transportation and Land Management Agency
- Riverside Unified School District
- San Gorgonio Pass Water Agency
- San Jacinto Unified School District
- Valley Sanitation District
- Western Municipal Water District

Hazard Definition

Civil Unrest is any incident intended to disrupt community affairs and threaten the public safety. Civil Unrest includes riots, mob violence, and any demonstration resulting in police intervention and arrests. Civil Unrest is generally associated with controversial political, judicial, and/or economic issues and events.

History

Riverside County is not a place where there have been a lot of historic civil disturbance events of noticeable magnitude. There are locations within Riverside County where large public gatherings take place. These locations have the potential for unstable conditions, possibly affecting the ability of a jurisdiction in the County to provide sufficient law enforcement and fire protective services.

Risk Assessment

During a Civil Unrest incident that affects Riverside County, there are certain critical facilities within the County that may be more at risk than others. These critical facilities include venues for musical concerts and sporting events, facilities where legal and illegal demonstrations are held, and any other facilities with events that attract large numbers of people. All of these situations create significant traffic congestion and the potential for disruptive behavior.

- **Effects on people and housing.** The effects of a Civil Unrest are varied and usually based upon the type, severity, scope, and duration of the disturbance. Effects may include illegal assemblies, injuries, and even loss of life.

- **Effects on commercial and industrial structures.** Effects may include traffic congestion or gridlock, illegal assemblies, disruption of utility service, and property damage.

- **Effects on infrastructure.** Effects may include traffic congestion or gridlock, disruption of utility service, and property damage.

- **Effects on agriculture.** Effects may include traffic congestion or gridlock, disruption of utility service, and property damage.

Risk Assessment Conclusion.

The overall risk of civil unrest in Riverside County is low.

Relationship to Other Hazards – Cascading Effects

Civil Unrest may lead to fire, destruction of property, disruption of power, injury to persons, and even loss of life.

Hazard: Jails and Prisons Incidents

County Severity Rating: 1	County Probability Rating: 2

OA Jurisdictions Affected by Jails and Prisons Incidents

- Alvord Unified School District
- Cathedral City
- City of Banning
- City of Blythe
- City of Calimesa
- City of Canyon Lake
- City of Coachella
- City of Corona
- City of Desert Hot Springs
- City of Hemet
- City of Indian Wells
- City of Indio
- City of Lake Elsinore
- City of Murrieta
- City of Norco
- City of Palm Desert
- City of Palm Springs
- City of Rancho Mirage
- City of Riverside
- City of Temecula
- Lake Elsinore Unified School District
- Menifee Unified School District
- Moreno Valley Unified School District
- Riverside Community Hospital
- Riverside County Office of Education, Children, and Family Services
- Riverside Unified School District
- San Gorgonio Pass Water Agency
- San Jacinto Unified School District

Hazard Definition

There are numerous State of California Correctional Institutions and County correctional facilities in Riverside County. Law enforcement is tasked with maintaining order in the facilities and preventing inmates from escaping into the community.

Chuckawalla Valley State Prison in Blythe provides long-term housing and services for male felons classified as medium and low-medium custody inmates.

The California Rehabilitation Center (CRC) in Norco is a medium Level II correctional facility and is the only adult facility that accommodates both male and female inmates (in separate facilities). The CRC inmate population consists of felon commitments as well as Civil Addicts.

The California Institution for Woman (CIW) in Chino accommodates all custody levels of female inmates and functions as a reception/processing center for incoming female inmates. In addition to its large general population, CIW houses inmates with special needs such as pregnancy, psychiatric care, methadone, and medical problems such as HIV infection.

The California Institution for Men in Chino consists of four separate facilities under the administration of one warden. Located three miles south of the city of Chino, the facilities provide housing for minimum through medium custody inmates. The reception centers receive and process newly committed male felons from several southern California counties. The California Youth Authority operates a facility in Chino. While all of these facilities are in the County of San Bernardino, their close proximity to Riverside County and the City of Corona necessitate their inclusion here as facilities of concern to Riverside County.

Ironwood State Prison in Blythe provides services for minimum and medium custody inmates through academic education, vocational instruction, and support services. The prison also has the Institutional Hearing Program (IHP) which prepares inmates who are illegal immigrants for release to United States Immigration and Naturalization Service custody and the return to their native country.

In addition, there are four County jail facilities, namely:

- Robert Pressley Detention Center
- Blythe Jail
- Indio Jail
- Southwest County Jail (Murrieta)

History

Historically, the threat to society has been low. Law enforcement has demonstrated an overall capability to maintain the incarcerated population in a manner that does not pose an immediate threat to the general population.

Risk Assessment

It is important that law enforcement remain in a state of readiness for any incidents that could precipitate a threatening situation.

Riots within the facilities generally do not pose a direct threat to the public on the outside. Occasionally an inmate has escaped correctional facilities. The danger involved in their escape is predicated on the escapee's criminal characteristics.

A prison ward incident at Riverside County Regional Medical Center could have a severe impact on health care delivery at the facility during and immediately after the incident. The degree of disruption would, of course, depend on the extent of the incident.

- **Effects on people and housing.** Relatively speaking, the risks are minimal.
- **Effects on commercial and industrial structures.** The risks are minimal.
- **Effects on infrastructure.** The risks are minimal.
- **Effects on agriculture.** The risks are minimal.

Risk Assessment Conclusion.

Relatively speaking, the risks of jail and prison incidents are low. It is important that law enforcement remain in a state of readiness for any incidents that could precipitate a threatening situation.

Relationship to Other Hazards – Cascading Effects

Risks are minimal.

Hazard Definition

Terrorism is the use of force or violence against persons or property in violation of the criminal laws of the United States for purposes of intimidation, coercion or ransom. Terrorists often use threats to create fear among the public, to try to convince citizens that their government is powerless to prevent terrorism, and to get immediate publicity for their causes.

Terrorist acts or and acts of war may cause casualties, extensive property damage, fires, flooding, and other ensuing hazards.

Terrorism takes many forms, including:

- Chemical
- Biological
- Radiological
- Nuclear
- Explosive
- Cyber-terrorism

Chemical. Chemical weapons have been used primarily to terrorize an unprotected civilian population and not as a weapon of war. This is because of fear of retaliation and the likelihood that the agent would contaminate the battlefield for a long period of time.

Some analysts suggest that the possibility of a chemical attack would appear far more likely than either the use of nuclear or biological materials, largely due to the easy availability of many of the necessary precursor substances needed to construct chemical weapons. Additionally, the rudimentary technical knowledge needed to build a working chemical device is taught in every college level chemistry course in the world.

Some chemical agents are odorless and tasteless and are difficult to detect. They can have an immediate effect (a few seconds to a few minutes) or a delayed effect (several hours to several days).

Biological. Biological weapons are defined as any infectious agent such as a bacteria or virus used to produce illness or death in people, animals, or plants. This definition is often expanded to include biologically-derived toxins and poisons. Biological agents can be dispersed as aerosols or airborne particles. Terrorists may use biological agents to contaminate food or water because the agents are extremely difficult to detect.

Radiological. A radioactive material is a material made up of unstable atoms which give off excess energy in the form of radiation through the process of radioactive decay.

Radiation cannot be detected by human senses. Wherever radioactive materials are used, transported, or stored there is a potential for a radiological accident to occur. Some of their most common uses include use:

- By doctors to detect and treat serious diseases.
- By educational institutions and companies for research.
- By the military to power large ships and submarines.
- By companies in the manufacture of products.
- As a critical base material to help produce the commercial electrical power that is generated by a nuclear power plant.
- As one of the critical components in nuclear weapons, which are relied upon to help deter the threat of war.

Nuclear. The possibility exists that a terrorist organization might acquire the capability of creating a small nuclear detonation. A single nuclear detonation in the United States would likely produce fallout affecting an area many times greater than that of the blast itself. There is also the possibility that a terrorist will construct a “dirty bomb”, a bomb that is used to distribute nuclear contaminated materials. It would have less of an effect than a “traditional” nuclear bomb, but the terror effect on the population would be great.

Explosive. The possibility exists that a terrorist may attack with conventional explosives, particular in a public setting. Innumerable incidents have occurred around the world involving car bombs, truck bombs, and bombs attached directly to terrorist individuals.

Cyber-terrorism. Cyber-terrorism is the use of computer network tools to shut down critical government infrastructures such as energy, transportation, and government operations, or to coerce or intimidate a government or civilian population. The premise of cyber terrorism is that as nations and critical infrastructure became more dependent on computer networks for their operation, new vulnerabilities are created. A hostile nation or group could exploit these vulnerabilities to penetrate a poorly secured computer network and disrupt or even shut down critical public or business operations.

The goal of cyber terrorism is believed to be aimed at hurting the economy of a region or country, and to amplify the effects of a traditional physical terrorist attack by causing additional confusion and panic.

History

Fortunately, Riverside County has no history of incidents of chemical, biological, radiological, nuclear, or explosive terrorism.

The County has been impacted – as has the rest of the world – by recent computer viruses and worms.

Risk Assessment

Chemical. A terrorist would not have to build a complicated chemical release device. During favorable weather conditions, an already existing chemical plant could be sabotaged or bombed releasing a toxic cloud to drift into a populated area. The result could be just as dangerous as having placed a smaller chemical device in a more confined space. This type of incident would cause the maximum amount of fear, trepidation, and potential panic among the civilian population, and thus achieve a major terrorist objective.

Biological. The agents are cheap, easy to make, and simple to conceal. Even small amounts, if effectively deployed, could cause massive injuries and overwhelm emergency rooms. The production of biological weapons can be carried out virtually anywhere — in simple laboratories, on a farm, or even in a home.

However, experts say it remains very difficult to transform a deadly virus or bacterium into a weapon that can be effectively dispersed. A bomb carrying a biological agent would likely destroy the germ as it explodes. Dispersing the agents with aerosols is challenging because biomaterials are often wet and can clog sprayers. Most agree that, while a biological attack could be devastating in theory, in reality, the logistical challenges of developing effective agents and then dispersing them make it less likely a terrorist could carry out a successful widespread assault.

Radiological/Nuclear. Under extreme circumstances an accident or intentional explosion involving radiological materials can cause very serious problems. Consequences may include death, severe health risks to the public, damage to the environment, and extraordinary loss of, or damage to, property.

Explosive. While generally more limited in the extent of the damage inflicted, explosive terrorist attacks may have consequences including death and damage to property.

Cyber-terrorism. Recent incidents illustrate the County's vulnerability to cyber-terrorism.

- **Effects on people and housing.** Depending on levels of contamination and exposure, effects could range from minimal to devastating.
- **Effects on commercial and industrial structures.** Depending on levels of contamination and exposure, effects could range from minimal to devastating.
- **Effects on infrastructure.** Nuclear, radiological, and cyber-terrorism can have profound effects on infrastructure.
- **Effects on agriculture.** Depending on levels of contamination and exposure, effects could range from minimal to devastating.

5. Riverside County Multi-Jurisdictional Action Plan

Mitigation Action Plan Requirements Cross-Reference Table

Element	Requirement	Riverside County LHMP Response
Implementation of Mitigation Actions - A	Mitigation Strategy Includes How Actions are Prioritized	Pages 172 – 173
Implementation of Mitigation Actions - B	Mitigation Strategy Addresses How Actions will be Implemented and Administered	Page 173
Implementation of Mitigation Actions - C	Prioritization Process Includes an Emphasis on the Use of a Cost-Benefit Review	Pages 172 – 173 Part II by Jurisdiction
Multi-Jurisdictional Mitigation Actions	At Least One Identifiable Action Item for Each Jurisdiction Requesting FEMA Approval of the Plan	• Page 173 • Appendix D - Mitigation and Strategies for County Departments • Part II by Jurisdiction

The process used to prioritize mitigation strategies involved lengthy discussions with various jurisdictional stakeholders, followed by citizen and community review. The end result is a hazard mitigation action plan with a prioritized list of strategies that Riverside County and the other participating jurisdictions expect to carryout during the next five years.

The County and each Submitting Jurisdiction utilized a Cost - Benefit process to determine the potential cost and benefit to their strategy.

Prioritizing Strategies

The process used by the County to prioritize goals and their respective objectives consisted on an extensive evaluation of the hazards and their threat by the RCIP planning group and the RCIP consultants. The initial RCIP information was used by County OES to develop a prioritized list from the County Departments and the members of the LHMP working groups. Available resources and public input were also considered. The County next assessed each strategy listed under the prioritized list of goals, ranking them in a Low, Medium, or High category.

In assessing and evaluating each strategy, Riverside County and the Participating Jurisdictions considered the following factors:

1. The cost was justified
2. Financial resources were available; local or outside resources
3. Staff resources were adequate
4. Minimal impact on County department functions
5. Strategies mitigate risks for the riskiest hazard events
6. Strategies reflect the goals and objectives

Riverside County then prepared a draft action plan that listed goals followed by a prioritized list of strategies which included the principal contact and cooperating parties, the cost, and the time involved in carrying out the strategy. This step involved lengthy discussions with County departments and staff, and with staffs within participating jurisdictions.

Implementation

Each year the action plan will be revisited and the first year will be dropped as those activities are completed and another year will be added so that the action plan always reflects a five-year time frame and remains current. Strategies undertaken and completed will be evaluated as to their effectiveness. Those activities not completed during the first year will be re-evaluated and included in the first year of the new action plan if still appropriate.

Even though individual strategies have been assigned a principal contact to ensure implementation, overall responsibility, oversight, and general monitoring of the action plan has been assigned to County OES. County OES will provide periodic updates to the County Board of Supervisors.

This action plan serves as a guide to spending priorities but will be adjusted annually to reflect current needs and financial resources. Some strategies will require outside funding to implement. If outside funding is not available, then the strategy will be set aside until new sources of funding can be identified.

6. Plan Maintenance

Plan Maintenance Requirements Cross-Reference Table

Element	Requirement	Riverside County LHMP Response
Monitoring, Evaluating, and Updating the Plan – A	Description of the Method and Schedule for Monitoring Plan	Pages 203 - 205
Monitoring, Evaluating, and Updating the Plan – B	Description of the Method and Schedule for Evaluating the Plan	Pages 203 - 205
Monitoring, Evaluating, and Updating the Plan – C	Description of the Method and Schedule for Updating the Plan within the Five-Year Cycle	Pages
Incorporation into Existing Planning Mechanisms - A	Identification of Other Local Planning Mechanisms Available for Incorporating the Requirements of the Mitigation Plan	Page 203 - 205
Incorporation into Existing Planning Mechanisms - B	Identification of Process by Which Riverside County will Incorporate the Requirements of Other Plans, When Appropriate	Page 203 - 205
Continued Public Involvement – A	Explanation of How Continued Public Participation will Be Obtained	Page 203 - 205

County OES will continue to participate in the RCIP Planning process. This process is expanding daily and regularly involves public comment. There is a "Public Comment" link at the top of the front page of the RCIP Website, specifically designed for input from the community. A similar input link will be part of the County OES Website were the LHMP Plan will be posted. Links to the LHMP will be posted on other County Websites. Notices of meetings will be listed on this page so that members of the general public interested in disaster preparedness can attend local meetings.

All of the "Submitting Jurisdictions" have agreed to remain a part of the group that was organized to create the LHMP. They have agreed to participate in the planning meetings as well as to expand the use of input from the general public by having more meeting and expanding the groups involved in the planning process. County OES and their partners have made a strong commitment to expand the process of public involvement through the use of additional public meeting, website posting, and further involvement community groups such as CERT, Neighborhood Watch, etc.

Riverside County OES has developed a method to ensure that regular review and update of its Local Hazard Mitigation Plan (LHMP) occurs at least every two years. FEMA regulations require an update every five years. County OES has established a tentative activity list for the next two years bases on issued found during the development of the initial Plan. These activities include:

2005
Develop a hazard identification section for the LHMP addressing EMS and Public Health issues.

Continue to develop a "standard value" list for critical facilities.

Purchase the necessary computer and ArcView programs to support HAZUS MH and identify data from County GIS to add to the working database.

2005 - 2006
Creation of a "Know Your Hazards" page on the County OES website to better inform the public about the hazards in and around Riverside County.

2006
Develop a hazard identification section for the LHMP addressing the issues of insect infestation

Additionally, County OES will utilize the Operational Area Planning Committee to poll the agencies in the County to see if they want to continue to participate and if their elements of the plan are up-to-date.

Factors that will be considered in evaluating whether an LHMP update is required are:
- Relevance of LHMP goals and objectives to the evolving situation in Riverside County
- Consistency of LHMP goals and objectives with changes in State and Federal policy
- Relevance of LHMP goals and objectives to current and expected conditions.
- Additional data developed through the RCIP Planning process.

The risk assessment portion of the plan will be reviewed to determine if the information should be updated or modified. The parties responsible for the various implementation actions will report on:
- Status of their projects
- Implementation processes that worked well
- Any difficulties encountered
- How coordination efforts are proceeding
- Which strategies should be revised.

As new and revised mitigation strategies and goals are developed for hazard areas, those strategies, goals, and associated action plans will be included in LHMP revisions.

The Hazard Mitigation Plan Evaluation Committee members are responsible for the annual review and update of the plan. Although they represent the public to some extent, the public will be able to directly comment on and provide feedback about the plan in a manner similar to that used during the review of this initial plan.

Riverside County currently uses comprehensive land use planning, capital improvements planning, and building codes to guide and control development within the County. The hazard mitigation strategies of the Riverside County General Plan have been integrated into this LHMP. This LHMP will be provided to those responsible for the County's General Plan development mechanisms to insure that consistency is maintained. Whenever there are substantive changes to this LHMP, those involved in other relevant planning mechanisms in the OA will be included the review process.

Copies of the most up-to-date, approved plan will be kept on hand at County OES and the County Library. These copies of the plan will include the address and phone number of the County OES staff member responsible for tracking public comment. Between official revisions, County OES will maintain any substantive changes and pending updates.

APPENDIX A

Appendix A: Additional Participating Jurisdictions and Participants

This is a list of those jurisdictions who did not become "Submitting Jurisdictions" and a list of names of some of the people who participated in one or more of the working groups as a part of the development this LHMP.

Jurisdictions Participating As Members of the Various Workgroups:

- Banning Unified School District
- Burlington Northern and Santa Fe Railroad
- Cabazon Water District
- Cahuilla Band of Indians
- California Department of Food and Agriculture – Animal Health
- California Department of Transportation (Caltrans)
- California Highway Patrol (CHP)
- California State Parks
- Chiriaco Summit Water
- Coachella Valley Vector Control
- Corona/Norco Unified School District
- Corona Regional Medical Center
- Desert Sands Unified School District
- City of Redlands
- College of the Desert
- Desert Unified School District
- Eastern Municipal Water District
- Eisenhower Hospital
- Elsinore Water District
- Hemet Unified School District
- Idyllwild Water District
- Imperial Irrigation District
- Jurupa Community Service District
- Jurupa Unified School District
- Lake Elsinore Unified School District
- March Air Reserve Base
- Northwestern Vector Control
- Perris Union High School
- Pinyon Pines County Water District
- Riverside County Building and Safety
- Riverside County Dairymen's Association
- Riverside County Department of Health Services
- Riverside County Emergency Medical Services
- Riverside County Farm Bureau
- Riverside County Fire Department
- Riverside County Flood Control and Water Conservation District

- Riverside County Sheriff
- Riverside County Transportation and Land Management Agency
- Riverside County Valley-Wide Recreation and Parks District
- Riverside County Waste Management Department
- San Gorgonio Memorial Hospital
- San Onofre Nuclear Generating Station (SONGS)
- Santa Rosa Community Service District
- Southern California Edison (SCE)
- United States Department of Agriculture (USDA)
- University of California – Davis – UC Extension
- University of California at Riverside
- Val Verde Unified School District
- West Valley Water District

Participants representing the County and other jurisdictions:

Sam	Goeps	General Manager	Valley-Wide Recreation & Park District
Richard	Kimberlin	Program Manager	USDA Forest Service Pacific Southwest Research Station
Fredric	Lynch	Emergency Management Specialist	University of California Riverside
John	Chavez	Manager Environment Operations	Burlington Northern and Santa Fe Railway Company
Maureen	Bowling	Disaster Coordinator	Southwest Healthcare System
Linda	Bradley	Chief Operating Officer	Southwest Healthcare System
David	Nelson	Environmental Health & Safety T&D Environmental Services	Southern California Edison
Ed	Lisle	Tribal Safety Environmental/Public Health	Soboba Indian Reservation
Andrew	Masiel	Tribal Administrator	Soboba Band of Luiseno Indians
John	Rogers	General Manager	Santa Rosa Community Services District
Charles	Pilkington	Maintained Supervisor	San Jacinto USD
Peg	Noble	Administrative Assistant	San Gorgonio Pass Water Agency
Sam	Vieths	E.A. Coordinator	San Gorgonio Memorial Hospital
Don	Larkin	C.E.O.	San Gorgonio Memorial Hospital
Bobbi	Duffy	Executive Assistant	San Gorgonio Memorial Hospital
Kirk	Lewis	Assistant Superintendent, Operations	Riverside Unified School District
Joe	McCann	General Manager-Chief Engineer	Riverside County Waste Management Department
Fernando	Vizcarrce	Assistant Hospital Administrator	Riverside County Regional Medical Center
Cookie	Cunningham	ITO	Riverside County Regional Medical Center
Mike	Bowers	Hospital Safety Officer	Riverside County Regional Medical Center
Warren	Williams	General Manager-Chief Engineer	Riverside County Flood Control District
Steve	Stump	Chief of Regulatory Division	Riverside County Flood Control District
Ken	Consaul	Staff Analyst	Riverside County Flood Control District
Mark	Berg	Building Inspector supervisor	Riverside County Building and Safety
Larry	Hernandez	Program Development Specialist-Emergency Services	Riverside Co. Office of Education Children's Services Unit
Thomas	Huss	General Manager	Pinyon Pines County Water District
David	Heard	Safety & Security Director	Perris Union High School District
Keith	Grindle	Director of Plant Operations	Parkview Community Hospital
Michael	Matteson	President, Board of Directors	Murrieta County Water District
Richard	Clifford	Director of Maintenance & Operations	Mt. San Jacinto Community College District
Robert	Crank	Assistant Superintendent, Business Services	Moreno Valley, USD
John	Baldaray	Director, Warehouse/Emergency Operations	Moreno Valley, USD
Gary	Brockman	Director of Operations	Mission Springs Water District
Daniel	Wood	Assistant Superintendent	Menifee USD
Bruce	Shaw	Facilities Coordinator	Menifee USD
Robert	Lindquist	General Manager	Lake Hemet Municipal Water District
Geneva	Krog	Safety Coordinator	Lake Ellsinore Unified School District
Rick	Davis	Safety Manager	Kaiser Hospital
Robert	Iverson	Risk Manager	Jurupa USD
Denise	Waldie	Operations Assistant	Jurupa Community Services District
Richard	Feuerstein	Supervisor, Safety Services	Imperial Irrigation District
Richard	Beck	Assistant Superintendent, Business Services	Hemet Unified School District
Phil	Dorn	Safety/Risk Manager	Hemet Unified School District
Steven	Cordilla	Water Operation Manager	Ellsinore Water District
Michael	Bergman	Chief	Desert Sands Unified School District
Deborah	Miller	Safety Officer	Desert Regional Medical Center
Norman	Guith	Superintendent/ Principal	Desert Center Unified School District
Scott	Barber	Assistant Agency Director	County of Riverside/TLMA
Steve	Ellis	Supervisor, Student Services Division	Corona-Norco USD
Sidney	Ono	Administrative Director of Ancillary and Support Services	Corona Regional Medical Center
John	Calderone	Chief Executive Officer	Corona Regional Medical Center
Debra	Brown	Emergency Services, Emergency Preparedness	Corona Regional Medical Center
Steve	Renew	Director of Maintenance & Operations	College of the Desert
Grant	Yates	Assistant To City Manager	City of Temecula

Dave	Carlson	Fire Chief	City of Riverside Fire
Carmen	Nieves	ESC	City of Riverside
Patrick	Pratt	City Manager	City of Rancho Mirage
Joni	Almy	Executive Assistant/Deputy City Clerk	City of Rancho Mirage
Hector	Apodaca	City Manager	City of Perris
Blake	Goetz	Emergency Services Coordinator	City of Palm Springs
Gary	Rosenblum	Risk Manager	City of Palm Desert
Chuck	Skaggs	City Manager	City of Norco
Michael	Jennings	Battalion Chief	City of Murrieta
LeAnn	Coletta	Program Manager	City of Moreno Valley
Richard	Watenpaugh	City Manager	City of Lake Ellsinore
John	Hardcastle	Community Safety Manager	City of La Quinta
Sandra	Householder	Management Analyst	City of Indio
Steve	Temple	City Manager	City of Hemet
Joe	Glenn	ESC	City of Hemet
Roy	Hill	Director of Public Safety	City of Desert Hot Springs
Curtis	Showalter	Public Works Manager	City of Corona
George	Torres	Emergency Services Coordinator	City of Coachella
Steven	Sowles	Fire Chief	City of Cathedral City
Delbert	Powers	City Manager	City of Canyon Lake
Harry	Jensen	City Manager	City of Calimesa
Mitchell	White	ESC	City of Beaumont
Ted	Yarbrough	Banning Fire Services	City of Banning
Randy	Anstine	City Manager	City of Banning
Mike	Bair	Captain	CHP Riverside
Margit F.	Rusche	Board President	Chiriaco Summit Water District
Mike	Hatfield	Fire Marshall	Cathedral City Fire Department
Bassam	Karaan	Transportation Engineer	CalTrans
William	Dall	SPS III	California State Parks
Jonell	John	Environmental Coordinator	Cahuilla Band of Indians
Kenneth	Wallis	General Manager	Cabazon Water District
Bob	Grady	Chief	Blythe Police
Frank	Passarella	Superintendent of Schools	Beaumont Unified School District
Elias	Jouen	Chief Business Official	Banning Unified School District
Lisa	Rutherford	Director	Banning Public Library
Paul	Jessup	Assistant Superintendent Business Services	Alvord Unified School District
Ed	Gallard	Risk Manager	Alvord Unified School District
Robert	Mann	Public Information Officer	Coachella Valley Mosquito & Vector Control
Ron	Dye		Riverside County Sheriff
Mathew	Hickman		Riverside County Waste Management
Rex	Sharp	General Manager	Valley Sanitary District
Marcy	Chastain		County Parks District
Steve	Hickam	Safety Representative	Riverside County Waste Management Department
Richard	Greener	Director of Safety	Valley Health System
Wayne	Spencer	General Manager	Murrieta Water District
Harry	Pappo	Facility Manager	Sherman Indian High School
Frankie	Clifton		Beaumont Unified School District
Tony	Burgett	Construction Manager	Western MWD
Robert	Cornell	Director of Maintenance Operation and Transportation	San Jacinto School District
Mark	Drzemiecki	Director of Security	US Navy
Bernice	Bigelow	Resource Planning/Emergency Manager	Cleveland National Forest
Walter	Carter	Recreation/Emergency Manager	City of Perris
Mary	Petite	Cost Recovery/ Mitigation Manager	City of Redlands
Sung	Ma		Waste Management Dept
Karl	Kolodzik	Fire Chief	Morongo Fire Department

Bob	Lindstrom	Human Recourse Manager	Coachella Valley Recreation
Mark	Bernas	Manager	Riverside County Transportation Department
Bill	Eaton		Alvord USD
Angelia	Carey	Environmental Specialist	Soboba Band Of Luiseno Indians
Lynn	Rowe	Disaster Prep Analyst	Corona Fire
Kirk	Lewis	Assistant of Support-Operations	Riverside Unified School District
Michael	Bazan	Director of Safety Services	Val Verde Unified School District
Marcy	Burks	Readiness Flight Chief	March Air Reserve Base
Joseph	Glenn	ESC	Hemet
Rick.	Davis	Safety Manager	Kaiser
Bob	Prez	Supervisor Field, OP5	Corona Norco USD
Rick	Garciara	Emergency Planner	San Onofre Nuclear Generating Station
Keith	Knotek	Commander	San Jacinto PD

RISK ASSESSMENT SCORING

Severity - How bad will the event affect your jurisdiction

0. Does not apply to your jurisdiction
1. Negligible Damage and Impact (Total of 1 point) - This means there will be: (1)
    - ◊ Injuries and/or illnesses are treatable with first aid
    - ◊ Minor quality of life lost
    - ◊ Shutdown of critical facilities and services for 24 hours or less
    - ◊ No more than 1 percent of property is severely damaged.
2. Limited Damage and Impact (Total of 2 points) - This means there will be:
    - ◊ Injuries and/or illnesses do not result in permanent disability
    - ◊ Complete shutdown of critical facilities for more than 1 week
    - ◊ More than 10 percent of property is severely damaged
3. Critical Damage and Impact (Total of 3 points) - This means there will be:
    - ◊ Injuries and/or illnesses resulting in permanent disability
    - ◊ Complete shutdown of critical facilities for at least two weeks
    - ◊ More than 25 percent of property is severely damaged
4. Catastrophic Damage and Impact (Total of 4 points) - This means there will be:
    - ◊ Multiple deaths
    - ◊ Complete shutdown of critical facilities for 30 days or more
    - ◊ More than 50 percent of property is severely damaged

Probability - What are the chances of the event happening in the time listed?

0. Does not apply to your jurisdiction
1. Unlikely (Total of 1 points):
    - ◊ The possibility of the event happening is less than 1 percent in the next **100** years
2. Possible (Total of 2 points):
    - ◊ The possibility of the event happening is between 1 and 10 percent within the **next year**, OR
    - ◊ There is at least 1 chance of occurrence within the next **100** years
3. Likely (Total of 3 points):
    - ◊ The possibility of the event happening is between 10 and 100 percent within the **next year**, OR
    - ◊ There is at least 1 chance of occurrence within the next **10** years
4. Highly Likely (Total of 4 points):
    - ◊ The possibility of the event happening is very high (near 100 percent) in the next year.

Ranking

Rank all 19 of the hazards (from 1 to 19) based on what you feel is the overall greatest hazard to your jurisdiction. 1 being the event that is the greatest threat to your jurisdiction.

Notification Letter of Interest

June 2, 2004

West Valley Water District
Attn: Mitch Curtis
855 W. Baseline
P.O. Box 920
Rialto, CA 92337

Dear Mr. Curits:

On July 1, 2003, the Riverside County Fire Department's Office of Emergency Services conducted an initial Hazard Mitigation Planning meeting to discuss a multi-jurisdictional approach to writing a Hazard Mitigation Plan, as required by the Disaster Mitigation Act of 2000 (DMA 2000).

After much discussion, it was determined that the multi-jurisdictional approach would be beneficial to most everyone. For those that were able to attend, we hope you found the information to be relevant. We appreciate your interest in participating and want to remind you that we need a written letter expressing acceptance or rejection of the multi-jurisdictional approach by August 4, 2003. For those who were unable to attend the meeting, we would like to share with you a brief summary of the proceedings.

The Disaster Mitigation Act of 2000 (DMA 2000) states under §201.6, for disasters declared after November 1, 2004, a local government must have a mitigation plan approved pursuant to the section in order to receive Hazard Mitigation Grant Program project grants. This plan would better assist communities and jurisdictions in assessing their risks and vulnerabilities and identifying activities to strengthen the community in order to become less susceptible to disasters. Utilizing a multi-jurisdictional approach, we can evaluate hazards and risks on a broader scale, allowing jurisdictions with limited resources and/or funding the opportunity to accomplish this task in a more efficient way. Without a plan, the community is ineligible to apply for pre-disaster or post-disaster mitigation funds.

Enclosed you will find a form letter that may be used to assist you in writing your jurisdiction's reply which is due by August 11, 2003.

Planning serves as the essential foundation to saving lives and protecting property. Thank you for your commitment to that foundation.

If you have additional questions or need further assistance, please contact either Phillip Bardos at (909) 955-4730 or Philip McCormick at (909) 955-4720.

Sincerely,

TOM TISDALE
County Fire Chief

Appendix C: Agriculture

Agricultural Hazards

As part of the Hazard Assessment for Agriculture, the Riverside County Agriculture Commissioner held a public meeting on July 15, 2004, to identify specific hazards and mitigation efforts relating to agriculture. Attendees included representatives from:

- University of California - Davis - UC Extension
- Riverside County Farm Bureau
- CDFA - Animal Health
- Area feed suppliers
- Local dairies and cattle ranches
- Local vector control agencies
- Local tree fruit and nut industries

The attendees conducted an identification of the various risks associated with agriculture in Riverside County, developed potential mitigation strategies related to agriculture, and identified the potential probability and severity of those hazards. In reviewing the hazards, the direct results of an earthquake or wildland fire were rated very low. The associated effects of an earthquake were rated high.

OVERVIEW OF AGRICULTURE IN RIVERSIDE COUNTY

Agriculture in Riverside County must be considered from two standpoints, namely, both as a product producer/exporter and a major economic provider to the County of Riverside. In 2002, the County ranked in the top eleven leading agricultural counties in the state, with an agricultural production value of $1.06 billion. Major agricultural industries include milk, nursery products, citrus and avocado, grapes, eggs, and dates.

The County is easily divided into two general agriculture regions (Coachella Valley/Desert and West Riverside County), with the San Bernardino National Forest acting as a natural dividing line.

Coachella Valley/Desert (CV)

Agriculture is the second largest industry in the Coachella Valley and is primarily crop-related. Over 66% of Riverside County's crop production is grown in the Coachella Valley. In addition to crop production, many supporting industries, such as packing and distribution, are located in the desert area. Coachella Valley produces 95% of all dates grown in the United States and the annual fruit crop exceeds 40 million pounds. The Valley's list of agriculture related products include:

- Ground crops (strawberries, lettuce, etc.)
- Plant Nurseries
- Turf/Sod Producers

- Citrus crops
- Fish Hatcheries (for domestic and international distribution)
- Vine crops

West Riverside County (WR)

Agriculture in the West Riverside County region is an ever-changing industry. With the large increase in housing in this area of the County over the past few years, there has been a reduction of several agriculture-related industries. This reduction is primarily in the poultry and dairy industries. The West Riverside list of agriculture related products include:

- Dairy Cattle
- Plant Nurseries
- Beef cattle and swine ranches
- Citrus crops
- Vine Crops

USDA statistics for Riverside County Agriculture for 2002 show the following:

Payroll	$16 million
Farms	3,186
Farm Acreage	572,036
Crop Value Production	$ 600 million +
Livestock, poultry value including production	$347 million +
Dairy cows	90,359
Sheep and Lambs	45,985
20 week old and older layers	5,437,142

Top Five Agricultural Products 2002		
1.	Milk	$227.8 million
2.	Nursery Products	$183.1 million
3.	Table Grapes	$103.8 million
4.	Eggs	$60.5 million
5.	Hay	$50.8 million

Agriculture-related disasters in Riverside County

Year	Disaster	Crop or animal	Known Damage amount	Region
1979-80	Wind	Avocado and Citrus Crops	$40,000.00	
1979-80	Rain/Floods (El Nino)	Olive Trees (4,200)	$319,494.00	WR.
1979-80	Rain/Floods	Sugar beets, Barley & Alfalfa	$182,711.00	WR.
1979-80	Rain/Floods	Potato Crop	$2,000,000.00	WR.
1979-80	Rain/Floods	Dairy and Livestock	$211,900.00	WR.
1982-1983	Rain/Floods (El Nino)	All agriculture		Countywide
*1990 **	*Insect Infestation-Med-fly*	*Fruit*		*Countywide*
1990-91	Freezing temperatures	Citrus, avocados, vegetables.	$15,450,000.00	Countywide
1990-91	Drought			WR
1991	Insect Infestation-white fly	Melons, squash, cucumbers,		WR
1992-93	Rain/Flood			
1993-94	Insect Infestation-Med-fly	Fruit		WR
1996	Plant disease-Karnel Blunt	Wheat		WR/Blythe
1997-98	Rain/Flood (El Nino)	Wheat	$167,000.00	WR
1997-98	Rain/Flood (El Nino)	Livestock & Dairy	$4,100,000.00	WR
1999	Freezing temperatures	Citrus	$1,630,000.00	Countywide
*1999-2002 **	*Inpect spread disease (Pierces Disease)*	*Wine Grapes*	*$16,000,000.00*	*WR*
*2001-July **	*Rain/Floods-Desert Storm*	*Misc. land & irrigation damage*	*~ $1,000,000.00*	*CV*
2002-2003	Drought	Dairy farms, dryland crops, etc		Countywide
2002	High Winds/Freeze	Avocado & Citrus Crops	$8,586,000.00	WR
2002-03	Animal Disease-END	Poultry 300,000 birds in So. Calif.		WR
2003-04	Wildfire	Nursery, various crops		WR

*.*Denotes a locally declared disaster*

IDENTIFIED HAZARDS AND HAZARD RANKING

For assessment, mitigation, and rating purposes, the assessment group divided agriculture in Riverside County into two major groups: Animals and Crops. The attached worksheet shows how the different specific hazards were rated for impact severity and the probability of the hazards occurring in the County. The table identifies the two agricultural regions of the County as well as the separation of crops and animals.

WATER-RELATED HAZARDS

For both groups, water-related hazards ranked the highest. Although many crops are not as water-dependent as animals are, some ground and vine crops have a very short lifespan without an adequate supply. Short-term water supplies can be provided to animals through the use of water trucks; however water trucks cannot support large crop areas with an adequate level of water.

Water-related issues included:

1. Local water supply (wells, holding ponds, etc.) contamination occurring either naturally or from manmade causes, and
2. Loss of water supply due to pipeline or aqueduct damage from an earthquake.

HAZMAT INCIDENTS – ON-PROPERTY AND OFF-PROPERTY

The definition for an On-Property Hazmat incident relates to improper use of chemicals, crop-dusting accidents or errors, accidental chemical spills into the ground, and other similar incidents. Off-Property Hazmat events relate to the typical transportation Hazmat incident. Both groups (animal-related and crop-related) were very concerned about the impact of an On-Property event. There was a higher level of concern about the impact of an Off-Property event for animals than for crops. Both groups rated the probability of either type of event occurring as low.

TRANSPORTATION EVENTS

Transportation events were listed as either short-term (less than 3 days) or long-term (over 3 days) and included:

1. Railroad accidents interrupting the delivery of products into the County;
2. Railroad accidents interrupting the movement of products out of the County;
3. A railroad or trucking strike; and
4. A disruption in transportation lines due to an earthquake, flood, fire, or other event.

Both groups viewed the 3-day point as critical from both an economic and operational standpoint, with the crop group indicating that the 3-day window could be reduced based on whether or not it was picking season.

Animals

Most beef and dairy ranches, chicken ranches, swine farms, and other agricultural animal facilities usually only have a 2-to-3 day supply of feed on-site. Most of the large feed providers in the County do not have more than a 3-to-5 day supply. Restocking of feed supplies is done primarily by rail to the feed providers and then by truck to the local ranches.

In addition to providing feed for the animals, the impact on the dairy farms would be immense. The time factor for the dairy farms would be almost immediate. Not being able to move milk to the milkhouse was a major concern. Dairy cows have to be milked and without the ability to transport the milk off property, that milk has to be disposed of in some way so as not to contaminate the soil or create a positive host for insects. This issue is being discussed by CDFA and local dairy producers on a statewide level.

Crops

Although many crops are time sensitive and there is a limited amount of storage space in local packinghouses, transportation issues vary based on the time of year and crop season.

INSECT INFESTATION AND DISEASE TO CROPS AND VINES

There is an ever-changing potential for damage to local crops and vines from disease and insect infestation. The County has been attacked by a wide variety of pests, insects, and diseases, and because of the diversity of the types of crops in the County, maintaining a pro-active approach has been difficult. Studies and history show that should there be a disease outbreak or contamination of crops/vines, the economic impact would be enormous. Recent events in other states have shown the potential for bans on importation of cattle/dairy products from affected states.

One of the primary concerns of the producers in the County is the illegal or uninspected importation of plants into this region. The majority of insect, pest, and disease issues in the County can be attributed to this problem.

The table below shows the primary crop-related insect infestations in the County over the past fifteen years:

NAME
AFRICANIZED HONEY BEE
BARK BEETLE
CITRUS LEAFMINER
GLASSY-WINGED SHARPSHOOTER
GYPSY MOTH
HONEY BEE TRACHEAL MITE
JAPANESE BEETLE
LESSER SNOW SCALE
MAGNOLIA WHITE SCALE
MEDITERRANEAN FRUIT FLY
ORIENTAL FRUIT FLY
PIERCE'S DISEASE
RED IMPORTED FIRE ANT
STING NEMATODE
TROPICAL PALM SCALE
VARROA MITE/HONEY BEE

ANIMAL DISEASES

There have not been recent incidents of catastrophic outbreaks of disease in the cattle/dairy industry. This is due in part to excellent precluding efforts on behalf of the cattle industry. Studies and history show that if there is an outbreak of cattle/dairy-related disease, the economic impact would be enormous. Recent events in other states have shown the potential for bans on importation of cattle/dairy products from affected states. In a short period of time, the inability to export products from the County would have wide-ranging economic effects.

The poultry industry is particularly vulnerable to the spread of disease because many fowl are kept in residential back yards and are therefore hard to monitor. Diseases can be spread by mosquitoes and/or ranch service operations that often serve more than one farm, increasing the odds of infection being spread. Recent outbreaks of the Exotic New Castle Disease in the poultry industry have resulted in the necessary depopulation of almost 100% of the chickens in the County. This disease required the quarantine of a large area of Southern California, including all of Riverside County. The economic loss to the ranchers and County as a whole has not been determined fully.

Diseases of primary concern to the area are:

- Avian Influenza
- Exotic Newcastle Disease
- Fowl Pox
- Mad Cow Disease
- Hoof-and-Mouth Disease

OTHER HAZARDS OF CONCERN

Loss of Electrical Power

The loss of electrical power is becoming more of a concern to all areas of agriculture. Depending on the season, the loss of electrical supply to a poultry ranch can be devastating within 2-to-4 hours because of the inability to keep the chickens cool. The loss of electrical power for over a 12 hour period can be devastating to a diary rancher who can not milk dairy cows.

Terrorism

One of the primary mitigation efforts that will be initiated by the County Office of Emergency Services and the Agriculture Commissioner's Office is an increased awareness program for the agricultural industry in the County on terrorism.

Appendix D: County Departments

Appendix D: County Departments
Proposed Mitigation Action and Strategy Proposal Prioritization List

The projects in this appendix were developed and prioritized by the different County Departments and then a final prioritization was made.. These proposals are a few of the proposals identified by each County Department and were selected for inclusion in the Plan because of their high priority rating among all of the County proposals. These proposals have been prioritized as follows:

1. Riverside County Office of Emergency Services - County Wide Alert and Notification System
2. Transportation and Land Management - Lucerita Ave.
3. Riverside County Flood Control And Water Conservation District - Perris Valley Master Drainage Plan
4. Riverside County Waste Management Department - Flood and Drainage Proposal

MITIGATION STRATEGY INFORMATION

Proposal Name:

PERRIS VALLEY MASTER DRAINAGE PLAN

Proposal Location:

WITHIN AND AROUND THE CITY OF PERRIS

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	Flooding affects the City of Perris disrupting traffic and threatening human life. Although loss of life due to this area's frequent flooding is not known, there is a potential for loss of life and has been severe property and infrastructure damage.

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

Narrative:	Various parts of the area in and around the City of Perris are subject to flooding. Perris Valley Channel, which is an interim facility, conveys storm runoff from most of the Cities of Perris and Moreno Valley. About 70 square miles is tributary to Perris Valley channel at Ramona Expressway and is about 6 miles long. Additionally various locations including the intersection of Perris Blvd and Ramona Expressway are subject to ponding water from storm water. To reduce this flooding hazard, Riverside County Flood Control District has prepared a Master Drainage Plan for the Perris Valley Area that identifies the drainage hazards and the solutions to these hazards. The plan proposes the construction of flood control facilities in stages and over many years.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
X	Local jurisdiction Special Fund (road tax, assessment fees, etc.) Area Drainage Plan Fee.
	Non-FEMA Hazard Mitigation Funds
	Pre-Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Yes	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

	Flood inundation/Dam failure
	Weather/Temperature event mitigation
X	Alert and Warning

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History — List any previous disaster related events (dates, costs, etc)

One of the most obvious problems raised by the recent Southern California fires was the difficulty in notifying the public and emergency workers of information relating to the emergency. Although all of the counties impacted by the fires had access to the local Emergency Alert System (EAS), the high volume of alerts being placed by the five counties overtaxed the system. The system works on a "first come, first announcement basis". Although all of the counties were careful to make only the highest of priority alerts, due to the large number of notifications being broadcast, some important evacuation alerts were delayed. In addition, some of the information being broadcast by local news media was incorrect. People in local communities were confused about where the fires were, what areas had been evacuated and whether they should stay in their homes or leave. The design of the EAS is based on a "wide area" notification concept that is not a problem in isolated incidents. It was in the recent situation, that the issuance of timely alerts became a problem. One of the most confusing things for the public was when one of the local media stations combined the names of two fires (our "Mountain Fire" and San Bernardino's "Old Fire") and began talking about the "Old Mountain Fire". These issues not only caused confusion and concern for the public but also greatly increased 9-1-1 activity as the public tried to find out what was happening in their area. Some additional problems identified through the recent utilization of the EAS pertain to agencies requesting staff to return to work, general emergency school closures, and the ever-changing status of shelters. With the number of alert requests by agencies for their employees to return to work or stay at home, notifications became intermingled with other requests and truly lost there effectiveness. The same was true for school closure notifications and shelters being opened or closed. Although the EAS is not the only method used for these types of notifications, it is the primary method used within the State. This event highlights the problems with public and internal agency notifications and is a reflection of the everyday issues that arise whenever there is a major event in the County.

Narrative: Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

The County of Riverside will purchase an alert and notification telephone system to be used in various emergencies to call people in the impacted area. The telephone message will provide the public with important information about the event as well as action to be taken during and after the emergency. Information input will be provided by various County departments with control points being available at the primary dispatch centers, the County's EOCs, and via the internet.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History

The Proposal Area is Lucretia Ave in Mira Loma (Thomas Brother's Page 683, H-7). Lucretia currently goes over Day Creek wash. We currently have 3 - six foot diameter culverts to handle the flows down the wash that eventually dumps into the Santa Ana River. These culverts handle small flows but if we get a substantial amount of rainfall, the culverts get blown out with the road as well. This happened in the winter of 1999-2000 and 2003-2004. Homes in the area have been damaged from both water and mud flow. The last water flow in this area flooded 6 homes, requiring the residents to seek temporary shelter until the water level reseeded.

Narrative:

Give a detailed description of the need for the Proposal, any history related to the Proposal. List the activities necessary for its completion in the narrative section below.

Our solution is to construct a concrete box culvert with at least four cells to handle the necessary flows. The problem is funding and we estimate this Proposal's cost at approximately $500,000. If the box was in place, the road wouldn't wash out.

Does your jurisdiction have primary responsibility for the Proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

Proposal Name:	Lucretia Ave in Mira Loma
Proposal Location:	Lucretia Ave in Mira Loma (Thomas Brother's Page 683, H-7).

Estimated Proposal Costs
List the total cost of the mitigation Proposal. Although these are estimated costs, some care should be taken to ensure the values are as accurate and comprehensive as possible.

Benefit/Loss Costs - *The cost of the event should it happen.*
These costs are determined by projecting the potential damage and losses as a result of the event and include:

1. Direct Losses - Losses linked directly to a hazard event including response costs and all damages.

2. Indirect Losses - All losses other than direct losses and can include potential economic losses due to the closure of a damaged facilities, as well as non financial losses such as loss of historical resources, pain, and suffering.

LOSS/BENEFITS FACTORS

PROPOSAL COSTS		(List potential losses)	NUMBERS	COST
Labor		1. Structures		
Materials	50,0000.00	a. Destroyed	1.00	100,000
Land Acquisition		b. Damaged	4.00	200,000
Contract Services		2. Lives

Phone: (951) 486-3203

MITIGATION STRATEGY INFORMATION

Project Name:

Solid Waste Disposal Facilities Operation Continuity Planning

Project Location:

All Solid Waste Disposal Facilities in Riverside County

Project Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Project/Event History

List any previous disaster related events (dates, costs, etc)

Solid waste disposal facilities in Riverside County include eight active sanitary landfills, seven active transfer stations (plus one under construction), various materials recovery and drop-off centers, numerous inactive landfills, plus Department headquarters. These facilities are located throughout the County and are essential to solid waste disposal management within the County and for its cities. As many of these facilities are located in Southern California desert areas, some are in flood zones, some are in hilly brush-covered terrain and all are in active earthquake zone regions, all are potentially susceptable to damage from earthquakes, wildfires, flooding and flash flooding. A severe occurrence of these types of natural disasters could cause extensive physical damage, or operational impairment, to these facilities, which could in turn cause disruption of the essential daily solid waste processing and disposal services to the County, its cities and residents. A severe occurrence of one of these natural disasters could also create an environmental and/or public health hazard because damage caused to any active or inactive sanitary landfills could result in the uncovering, shifting or relocation of buried and degraded solid waste that could then come in contact with ground or surface water or the atmosphere. Though no major damage has yet to occur, several minor landslide events have occurred at County landfills during the Department's history of operation which are attributable to earthquake events. A flash flood did occur about ten years ago at the Edom Hill Landfill in Cathedral City which washed out the access road into the landfill, resulting in forced closure of the landfill for six months and extended disruption of solid waste disposal service in the Western Coachella Valley. Another occurred at the same landfill facility recently in August, 2004, which resulted in forced closure of the landfill for one day. Wildfires have forced the closure of the Lamb Canyon Landfill in Beaumont and the Badlands Landfill in Moreno Valley for one to two days in the past. A severe occurrence of one of these types of natural disasters could also result in a regionwide power outage, or damage to or rupture of water retention, storage and distribution facilities creating a flood event that could impact any of these facilities, including the Department's headquarters. On a larger scale, a severe occurrence of one of these natural disasters could cause regionwide destruction of buildings and infrastructure components, that could in turn generate a surge of debris influx into the active landifills during post disaster cleanup that could potentially overwhelm the capacity of the solid waste disposal system. On a lesser scale, an earthquake or flood impacting the Department's headquarters facility could damage or destroy critical engineering and administrative computer support systems, which are essential to the daily operation and management of the Countywide solid waste disposal system, resulting in loss of hardware and/or data that could impair the Department's ability to maintain continuity of operation following a disaster. Major post disaster disruption of the Countywide solid waste disposal system could have far reaching impact on the region's post disaster recovery efforts.

Narrative: Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

In order to ensure continuity of operation of the Countywide solid waste disosal system in the wake of a natural disaster caused by an earthquake, flood, flash flood or wildfire, the proposed mitigation strategy has multiple components. One is to analyze, and improve as needed, surface water control measures on active and inactive landfill sites and transfer stations and along landfill and transfer station site access roads (water and sediment retention basins, culverts, drainage systems, etc.) subject to 100 to 500 year rainstorms, flooding and flash flooding. Another is to perform geotechnical studies at active and inactive landfills, and improve as needed, landfill surface terrain to ensure its ability to withstand seismic influences in an earthquake. Improvements may include such action such as installing soil buttresses over active earthquake faults that cross through landfill sites. Another is to analyze, and improve as needed, all landfill access roads, with emphasis on those having bridge components, to ensure those roads and bridges can withstand damage from earthquakes and 100 to 500 years rainstorms and resultant floods and flash floods. Such improvements may require coordination of efforts, and joint feasibility studies, between the Department, local city jurisdictions, the County Flood Control District and Transportation Department and contract transfer station operators. Another is to expand the Department's hazardous materials inspection program (including personnel, tools, equipment, material processing facilities, public education resources, etc.) to reduce the frequency and magnitude of incidents involving the dumping of hazardous materials at active landfill sites. Another is to ensure that critical engineering and administration computer support systems, software and data at the Department's headquarter facility are adequately protected against physical damage from flood, fire, sprinkler leakage or water intrusion and are capable of continuity of operation following a disaster resulting in a regionwide or local power outage. This could include upgrading or modifing physical fire protection systems in the main computer room at the headquarters facility, installing emergency power generation equipment at the headquarters facility, utilization of protected off-site repositories for storage of original, customized and updated software programs and backup and/or archived data media and entering into predisaster agreements and strategies with vendors to ensure rapid replacement of duplicate computer system hardware should a disaster damage or destroy the original computer hardware.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

EXPLANATION OF PART II DOCUMENTS

Reference Table For Local Jurisdictions Submissions	This spreadsheet lists all of the Non-County jurisdictions that are submitting a set of documents as part of the County Multi-Jurisdictional Plan. The spreadsheet identifies the documents completed by each jurisdiction as a quick snapshot of the work completed by each of the Submitting Jurisdictions.
Jurisdictional Information	The first page of each jurisdiction's submittal is an information page about that jurisdiction. The information on this page identifies: 4. The jurisdiction and the contact person 5. The jurisdiction's service area size and population 6. If the have an EOP Plan and a Safety Element of their General Plan This information will be used by County OES to help determine what activities need to occur as part of this plans maintenance process as well as which jurisdictions need to have EOP plans written and/or updated.
Hazard Identification Questionnaire	This questionnaire was answered by each Submitting Jurisdiction to help identify the hazards within their service area. The list was developed from the first round of meetings with the various working groups and from the hazards listed in the County's General Plan Update. Each hazard is discussed in detail in Part I of the plan. The information was used as the basis for each jurisdiction to evaluate its capabilities, determine its needs, and develop goals and strategies. The information identifies: 7. What hazards can be identified within or adjacent to the service area of the jurisdiction. 8. Which of those hazards have had reoccurring events. 9. What specific hazards and risks are considered by the jurisdiction to be a threat specifically to the jurisdiction? These locations were identified by name and location for inclusion in the Specific Hazard Summary Table. 10. Specific types of facilities owned and operated by the jurisdiction. 11. Locations damaged from prior disasters or hazard causing events. 12. Information about the jurisdiction's EOC
Specific Hazards Summary Table	This table identifies the information (name, owner, location, etc.) about the specific hazards identified in the Hazard Questionnaire. The Summary Table lists the basic information of the hazards identified by the jurisdiction in the Hazard Identification Question as a potential threat. These specific hazards were used in the development of response plans, maps, and other analysis data.
Jurisdiction's Critical Facility Evaluation	Riverside County OES, acting as the Operational Area, in cooperation with all local jurisdictions, developed a computer based Emergency Response Database for the County of Riverside. This database was created so emergency planners could use the database as a planning tool to develop response plans, evaluate their jurisdiction's capabilities, determine its needs, and develop goals and strategies. The program is also used during events to assist in-field units and planners in the EOCs. The database functions similar to HAZUS in that it contains a list of major hazards and risks, all identified critical facilities in the County, and a topographical overlay of the County. Unlike HAZUS, the database does not contain any dollar values. This is a proposed upgrade in the future. The database is built in ArcView and a copy of ArcView and the database was provided to the jurisdictions in the County. The database is updated by the jurisdictions on a yearly basis through County OES and maintained by County GIS. Many of the HAZUS, RCIP, and other maps in the Plan were created with the use of this database.

What is HAZUS?	HAZUS (Hazards U.S.) is a GIS-based software used for estimating earthquake losses based on current scientific and engineering knowledge. It was developed under a cooperative agreement by the National Institute of Building Sciences (NIBS) with funding from the Federal Emergency Management Agency (FEMA). This earthquake loss estimation tool is currently in use by communities throughout the United States and provides a planning guide for jurisdictions of the potential physical and economical impact of an earthquake that has occurred in their area.
Summarized HAZUS Results	Earthquake risks for each city and several unincorporated areas of the County were developed in terms of the vulnerability of the population and infrastructure and costs associated with physical and economic damages or destruction. Earthquake scenarios were used based on the major earthquake faults in the County of Riverside. Risk assessments were developed only for the cities and county unincorporated areas because of the broad overlay of the special district's boundaries and the specific data available from the cities. Several of the HAZUS and GIS maps contained in Part I of the plan depict potential impact of various hazards throughout the County on the cities, unincorporated areas, and the various submitting special districts.
Local Jurisdiction Vulnerability Worksheet	This table is a listing of the primary hazards identified by the working groups. Each jurisdiction was asked to evaluate the potential for an event to occur in their jurisdiction by hazard. They were also asked to evaluate the potential impact of that event by hazard on their jurisdiction. The impact potential was determined based on:: 1. Economic loss and recovery 2. Physical loss to structures (residential, commercial, and critical facilities) 3. The loss or damage to the jurisdictions infrastructure 4. Their ability to continue with normal daily governmental activities 5. Their ability to quickly recover from the event and return to normal daily activities 6. The loss of life and potential injuries from the event. The jurisdictions were asked to rate the potential and severity using a scale of between 0 and 4 (4 being the most severe). The jurisdictions were also asked to rank the listed hazards as they relate to their jurisdiction from 1 to 19 (1 being the highest overall threat to their jurisdiction). With the assistance of the RCIP Plan and County Departments, Riverside County OES conducted an extensive evaluation of the severity and probability potential for the county as a whole. The hazards were also ranked for the County. Those numbers and rankings were provided to the jurisdictions as a comparison guide. A separate table was created to address the hazards relating to agriculture and was assessed by the agriculture working group. This table can be found in the Agriculture Appendix of Part I of the Plan.
Local Jurisdiction Mitigation Strategies and Goals	This table is a listing of the various mitigation strategies, goals, and objectives developed by the working groups. The jurisdictions were also given the opportunity to list additional strategies, goals, and objectives specific to either their jurisdiction or their workgroup (i.e. the hospitals, agriculture, etc.). Once this list was compiled, each jurisdiction was asked to prioritize the strategies, goals, and objectives based upon the hazards identified in their jurisdiction. These were prioritized as High, Medium, Low, or N/A.

Local Jurisdiction Proposed Mitigation Action And Strategy Proposal	Each jurisdiction was required to develop a Mitigation Strategy Proposal based on one of the following: 4. The strategy, goal, or objective rating "High Priority" on the Local Jurisdiction Mitigation Strategies and Goals 5. A specifically identified strategy, goal, or objective that was developed as part of one of the working groups planning sessions such as the hospitals or agriculture 6. A specifically identified strategy, goal, or objective that was developed as part of one of the jurisdiction's internal working group planning sessions. In some cases, the strategy, goal, or objective was one that the jurisdiction or working group felt was very realistic and of value. As part of this process, each Submitting Jurisdiction was required to perform a cost-benefit analysis. They were required to answer the question at the bottom of the Proposal page that asks if they had conducted a Cost-Benefit Analysis of some type. This analysis was conducted either by completing the Cost-Benefit Form attached to the Proposal or by some other approved method. Many of the jurisdictions used the cost-effective analysis approach outlined in the FEMA publication, *Cost and Benefits of Natural Hazards Mitigation.* This cost-benefit analysis was not restricted to one of the natural hazards. In some cases, the jurisdiction or working group identified a proposal that highlighted a life-safety issue over a standard hazard proposal. This was done when there was either historical data or other sources of information indicating that the life-safety issue needed to be emphasized or brought to the public's attention. As part of the planning process, presentations on the different methods of cost-benefit analysis were given to the different working groups. The resources used for these presentations are listed in Appendix B of Part I, Resource List.
Development Trends Questionnaire	This questionnaire identifies a comparison of specific land use issues between 2004 and 2010. The questionnaire also identifies the specific threat potential to the jurisdiction in relationship to residential and commercial structures along with critical facilities. This threat potential is focused on structural loss rather than dollar-value loss as it relates to the three main natural hazards – earthquakes, floods, and wildland fires. The determination of dollar-value loss relating to commercial and critical facilities was found to be very limited and a difficult task to establish. This issue will be addressed in future updates of the Plan. The questionnaire also requires the jurisdiction to identify the process it will use to maintain their portion of the Plan. They we given the option of continuing to work with the County or develop their portion as an independent document in the future. County OES will use this data for future HAZUS and Emergency Response Database activities.
Crosswalk Review	This is a State OES and FEMA document used to evaluate the contents of the entire plan and each jurisdiction's submittal of information. It should be noted that there have page number pages in Part I since the jurisdiction's completed their crosswalks.

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Banning

Scenario: M7.1 on San Jacinto Fault
Epicenter Between San Jacinto & Beaumont

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$15,488.96
Non-Structural Damage	$64,207.56
Building Damage	$79,696.52
Contents Damage	$20,481.62
Inventory Loss	$350.06
Relocation Cost	$379.39
Income Loss	$2,634.50
Rental Income Loss	$4,276.02
Wage Loss	$3,487.73
Total Loss	$111,305.77

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
	Generate new literature for dissemination to:
L	◊ Government employees
M	◊ Businesses
M	◊ Hotel/motel literature
M	◊ Local radio stations for education
M	◊ Public education via utilities
L	◊ Identify/create television documentary content
L	Improve the Emergency Alert System (EAS)
L	◊ Consider integration with radio notification systems
L	◊ Upgrade alerting and warning systems for hearing impaired
L	◊ Training and maintenance
L	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
L	Provide training to hospital staffs
M	Require earthquake gas shutoffs on remodels/new construction
L	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
M	Install earthquake cutoffs at reservoirs
M	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
M	Earthquake retrofitting
L	◊ Bridges/dams/pipelines
M	◊ Government buildings/schools
M	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
L	Insurance coverage on public facilities
M	Funding for non-structural abatement (Earthquake kits, etc.)
L	Pre - identify empty commercial space for seismic re-location
L	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
M	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
L	Backup water supplies for hospitals

L	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
L	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
M	Website with mitigation/contractor/retrofitting information
M	◊ Links to jurisdictions
M	◊ Alerting information
M	◊ Volunteer information
L	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
M	Harden repeater sites
H	Continue existing interoperability project
L	Strengthen/harden
L	Relocate
L	Redundancy
L	Mobile repeaters

FLOODS

M	Update development policies for flood plains
L	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
H	Develop greenbelt requirements in new developments
L	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
L	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
L	Create map of flood channels/diversions/water systems etc
M	Require digital floor plans on new non-residential construction
L	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
M	Increase sandbag distribution capacities
L	Develop pre-planned response plan for floods
L	◊ Evacuation documentation
L	◊ Re-examine historical flooding data for potential street re-design
L	Training for city/county PIOs about flood issues
L	Warning systems - ensure accurate information provided
L	◊ Publicize flood plain information (website?)

L	◊ Install warning/water level signage
L	◊ Enhanced public information
L	◊ Road closure compliance
L	◊ Shelter locations
L	◊ Pre-event communications
	Look at County requirements for neighborhood access
H	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
L	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
L	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
L	Traffic light protection
M	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
M	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
H	◊ Networking of agencies for weed abatement
M	Develop strategic plan for forest management
M	Public education on wildfire defense
H	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information
M	Enhanced fire fighting equipment
M	Fire spotter program/red flag program
L	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
M	Public education program
L	◊ Weather reporting/alerting
H	◊ Building protection
L	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
H	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
M	Fuel/dead tree removal
M	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
L	Brush clearings around repeaters

M	Research new technologies for identifying/tracking fires
L	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
H	Clear out abandoned vehicles from oases
H	Code enforcement
L	Codes prohibiting fireworks
M	Fuel modification/removal
L	Evaluate building codes
L	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
L	Wetlands mosquito mitigation (West Nile Virus)
L	Insect control study
N/A	Increase County Vector Control capacities
M	General public drought awareness
M	◊ Lawn watering rotation
N/A	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
L	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
M	Terrorism training/equipment for first responders
M	◊ Terrorism planning/coordination
M	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
M	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
H	Develop plan for supplemental water sources
M	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
L	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable

N/A	Upgrade valves on California aqueduct
M	Public education
M	◊ Bi-lingual signs
M	◊ Blackout information
M	Notification system for rail traffic - container contents
M	Control and release of terrorism intelligence
L	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Banning
Contact: Ted Yarbrough
Phone: (951)922-3210

MITIGATION STRATEGY INFORMATION

Proposal Name:

Electric Transmission line pole replacement

Proposal Location:

Various locations throughout the city

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
X	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History

List any previous disaster related events (dates, costs, etc)

The City of Banning is in a high earthquake potential fault zone (Banning Fault) as well as a high wind area. On two occasions, strong wind events have caused power poles that support, 33kv transmission lines, to fall. These events caused the loss of power to portions of the city for as much as 24 hours. These poles have been replaced but the potential still exists for other poles to fail and cause widespread outages. Depending on the time of year, long-term power outages could cause life-threatening situations. Long tern outages would also cause loss of revenue to local businesses.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

The project will involve the replacement of poles that have been identified for replacement and the development of a more comprehensive inspection program to identify the potential problem poles. Primary and critical facilities (City Hall, Police and Fire facilities and local Hospitals) that are provided power by the City will be evaluated as a routine part of the City's replacement program in an effort to help reduce the potential impact of a loss of power to these critical locations. The replacement of these poles will also reduce the impact of earthquakes on the local power grid because the newer poles will have a reduced potential for being affected by the shaking of the earthquakes and the movement of the power lines. The City has determined that the cost of this on-going replacement program is cost beneficial when looking at the potential cost of replacing a large number of poles at one time because of a single event.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	Y	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
X	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Y	Has your jurisdiction evaluated this mitigation strategy to determine its cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

Current Population in Jurisdiction or Served	**27,000**	Projected Population in Jurisdiction or Served - in 2010	**29,213**
Current Sq Miles in Jurisdiction or Served	**23**	Projected Sq Miles in Jurisdiction or Served - in 2010	**24**
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	**YES**	If yes, please list ordinance or regulation number. Ordinance 1258	
What is the number one land issue your agency will face in the next five years	**Increasing Development**		
Approximate Number of Homes/Apts/etc.	**10,000**	Projected Number of Homes/Apts/etc.- in 2010	**12,000**
Approximate Total Residential Value	**$562,000,000**	Projected Residential Total Value - in 2010	**$1,200,000,000**
Approximate Number of Commercial Businesses	**749**	Projected Number of Commercial Businesses - in 2010	**820**
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	**30% $168,600,000**	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	**35% $420,000,000**
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	**100% $562,000,000**	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	**100% $1,200,000,000**
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	**2% 11,124,000**	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	**4% $48,000,000**
Approximate Percentage of Commercial Businesses in flood hazard zones	**10%**	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	**10%**
Approximate Percentage of Commercial Businesses in earthquake hazard zones	**100%**	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	**100%**
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	**0%**	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	**1%**
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	**0**	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	**0**
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	**5**	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	**6**
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	**0**	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	**0**
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	**YES**	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			**YES**

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction:	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan:**	**Date of Completion:**
City of Banning	**Riverside County OES**	

Local Point of Contact: **Ted Yarbrough**	**Address:** **PO Box 998** **Banning, CA 92220**
Title: **Banning Fire Marshal**	
Agency: **Riverside County Fire Dept. / C.D.F.**	
Phone Number: **(951) 922-3210**	**E-Mail:** **tedyarbrough@fire.ca.gov**

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part II City of Banning Section		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**[Yes]** If yes, where in MJP: Part II City of Banning Section	**[N] [S]**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part II City of Banning Section	**[N] [S]**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part II City of Banning Section	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part II City of Banning Section Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part II City of Banning Section Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Part II City of Banning Section Hazard Mitigation Strategy Proposal	**[N] [S]**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I pages 38-101		
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part II City of Banning Section Supplemental Questionnaire	**[N] [S]**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.			

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Beaumont

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		BEAUMONT		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	Sgt.		
First Name:	Mitchell	Last Name:	White	
Agency Address:	Street:	660 Orange Ave.		
	City:	Beaumont		
	State:	CA		
	Zip:	92223-2200		
Contact Phone	951-769-8500		FAX	
E-mail	mwhite@ci.beaumont.ca.us			

Population Served	18,000
Square Miles Served	32

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	NO
What year was your plan last updated?	1/1/1995

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	1/1/1995
Do you have a recovery annex or section in your plan?	NO
Do you have a terrorism/WMD annex or section in your plan?	NO

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	**NO**
AIRPORT NEXT TO JURISDICTION	**NO**
DAIRY INDUSTRY	**NO**
POULTRY INDUSTRY	**NO**
CROPS/ORCHARDS	**YES**
DAMS IN JURISDICTION	**NO**

LAKE/RESERVOIR IN JURISDICTION	**NO**
LAKE/RESERVOIR NEAR JURISDICTION	**NO**
JURISDICTION IN FLOOD PLAIN	**YES**
CONTROLLED FLOOD CONTROL CHANNEL	**NO**
UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
EARTHQUAKE FAULTS IN JURISDICTION	**NO**
EARTHQUAKE FAULTS NEXT TO JURISDICTION	**YES**
MOBILE HOME PARKS	**YES**
NON-REINFORCED FREEWAY BRIDGES	**NO**
NON-REINFORCED BRIDGES	**NO**
BRIDGES IN FLOOD PLAIN	**YES**
BRIDGES OVER OR ACROSS RIVER/STREAM	**YES**
ROADWAY CROSSING RIVER/STREAM	**YES**
NON REINFORCED BUILDINGS	**YES**
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	**YES**
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	**NO**
FOREST AREA IN JURISDICTION	**NO**
FOREST AREA NEXT TO JURISDICTION	**NO**
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	**NO**
MAJOR GAS/OIL PIPELINES IN JURISDICTION	**YES**
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	**NO**
RAILROAD TRACKS IN JURISDICTION	**YES**
RAILROAD TRACKS NEXT TO JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	**NO**

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**NO**
NEAR FLOOD PLAIN	**NO**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**NO**
DOWNSTREAM OF A LAKE	**NO**
DOWNSTREAM FROM A RESERVOIR	**NO**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**NO**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**NO**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**NO**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**NO**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**YES**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**YES**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**YES**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**YES**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	NO
NEAR RAILROAD TRACKS	YES
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	NO
DOWNSTREAM OF A LAKE	NO
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	NO
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	YES

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
BEAUMONT	Fault	San Andres	No	Yes
BEAUMONT	Fault	San Jacinto	No	Yes
BEAUMONT	Pipeline	four corners and others	Yes	No
BEAUMONT	Railroad Track	union pacific rail lines	Yes	No
BEAUMONT	Stream	edgar creek	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Beaumont

Scenario: M7.1 on San Jacinto Fault
Epicenter Between San Jacinto & Beaumont

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$21,221.56
Non-Structural Damage	$87,304.61
Building Damage	$108,526.15
Contents Damage	$25,654.13
Inventory Loss	$359.91
Relocation Cost	$485.38
Income Loss	$3,150.50
Rental Income Loss	$5,570.91
Wage Loss	$3,753.22
Total Loss	$147,500.19

Commercial Casualties for Daytime Event	
Medical Aid	5
Hospital Treatment	3
Life-Threatening Severity	1

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

	EARTHQUAKE
H	Aggressive public education campaign in light of predictions
	Generate new literature for dissemination to:
L	◊ Government employees
M	◊ Businesses
M	◊ Hotel/motel literature
M	◊ Local radio stations for education
M	◊ Public education via utilities
L	◊ Identify/create television documentary content
L	Improve the Emergency Alert System (EAS)
L	◊ Consider integration with radio notification systems
L	◊ Upgrade alerting and warning systems for hearing impaired
L	◊ Training and maintenance
L	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
L	Provide training to hospital staffs
M	Require earthquake gas shutoffs on remodels/new construction
L	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
M	Install earthquake cutoffs at reservoirs
M	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
M	Earthquake retrofitting
L	◊ Bridges/dams/pipelines
M	◊ Government buildings/schools
M	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
L	Insurance coverage on public facilities
M	Funding for non-structural abatement (Earthquake kits, etc.)
L	Pre - identify empty commercial space for seismic re-location
L	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
M	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
L	Backup water supplies for hospitals
L	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
L	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
M	Website with mitigation/contractor/retrofitting information

M	◊ Links to jurisdictions
M	◊ Alerting information
M	◊ Volunteer information
L	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
M	Harden repeater sites
H	Continue existing interoperability project
L	Strengthen/harden
L	Relocate
L	Redundancy
L	Mobile repeaters

FLOODS

M	Update development policies for flood plains
L	Develop multi-jurisdictional working group on floodplain management
H	Develop greenbelt requirements in new developments
L	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
L	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
L	Create map of flood channels/diversions/water systems etc
M	Require digital floor plans on new non-residential construction
L	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
M	Increase sandbag distribution capacities
L	Develop pre-planned response plan for floods
L	◊ Evacuation documentation
L	◊ Re-examine historical flooding data for potential street re-design
L	Training for city/county PIOs about flood issues
L	Warning systems - ensure accurate information provided
L	◊ Publicize flood plain information (website?)
L	◊ Install warning/water level signage
L	◊ Enhanced public information
L	◊ Road closure compliance
L	◊ Shelter locations
L	◊ Pre-event communications
	Look at County requirements for neighborhood access
H	◊ Secondary means of ingress/egress
L	Vegetation restoration programs

L	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
L	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
L	Traffic light protection
M	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
M	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
H	◊ Networking of agencies for weed abatement
M	Develop strategic plan for forest management
M	Public education on wildfire defense
H	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information
M	Enhanced fire fighting equipment
M	Fire spotter program/red flag program
L	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
M	Public education program
L	◊ Weather reporting/alerting
H	◊ Building protection
L	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
H	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
M	Fuel/dead tree removal
M	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
L	Brush clearings around repeaters
M	Research new technologies for identifying/tracking fires
L	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
H	Clear out abandoned vehicles from oases
H	Code enforcement
L	Codes prohibiting fireworks

M	Fuel modification/removal
L	Evaluate building codes
L	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
L	Wetlands mosquito mitigation (West Nile Virus)
L	Insect control study
N/A	Increase County Vector Control capacities
M	General public drought awareness
M	◊ Lawn watering rotation
N/A	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
L	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
M	Terrorism training/equipment for first responders
M	◊ Terrorism planning/coordination
M	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
M	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
H	Develop plan for supplemental water sources
M	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
L	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
M	Public education
M	◊ Bi-lingual signs
M	◊ Blackout information
M	Notification system for rail traffic - container contents
M	Control and release of terrorism intelligence
L	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City Of Beaumont
Contact: Jeffrey E. Oakley
Phone: 951 769-8520

MITIGATION STRATEGY INFORMATION

Proposal Name:

Oak Valley Parkway/Noble Creek Bridge Reconstruction

Proposal Location:

Oak Valley Parkway at the Noble creek crossing. City of Beaumont

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
X	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History

Historortorically the bridge crossing Noble creek on Oak Valley Parkway (formerly 14th Street) has been severely damaged and rendered unusable during every major rain event in the last 30 years. During the 1990s alone it was out of service four times. In 1969 the bridge was closed for more than a year for repairs.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the Proposal, any history related to the Proposal. List the activities necessary for its completion in the narrative section below.

Oak Valley Parkway is the major transportation corridor for the entire north end of the City of Beaumont and connects to the Interstate highway (I 10). Fast paced growth as also made this area a large population area. As such, another failure of this bridge would severely limit and slow the response of energeancy personnel such as Fire and Police to the people living in the area. The entire roadway and bridge will be elevated to a higher grade with a box culvert, allowing much more clearence for water flow down Noble Creek channel.

Does your jurisdiction have primary responsibility for the Proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this Proposal

	Unfunded Proposal - funds are not available for the Proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Y	Has your jurisdiction evaluated this mitigation strategy to determine its cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: **City of Beaumont**	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES XXXX NO ____**		
Current Population in Jurisdiction or Served	18000	Projected Population in Jurisdiction or Served - in 2010	27300
Current Sq Miles in Jurisdiction or Served	32	Projected Sq Miles in Jurisdiction or Served - in 2010	42
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	YES	If yes, please list ordinance or regulation number. City Ordinance 461	
What is the number one land issue your agency will face in the next five years	Development of Traffic routes in and around the city		
Approximate Number of Homes/Apts/etc.	5600	Projected Number of Homes/Apts/etc.- in 2010	8500
Approximate Total Residential Value	$ 900 mill	Projected Residential Total Value - in 2010	$1.4 billion
Approximate Number of Commercial Businesses	410	Projected Number of Commercial Businesses - in 2010	574
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	>1% $9,000,000	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	>1% $14,000,000
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	100% $900,000,000	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	100% $1.4 billion
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	0 $0.0	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	10% $140,000,000
Approximate Percentage of Commercial Businesses in flood hazard zones	0	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	0
Approximate Percentage of Commercial Businesses in earthquake hazard zones	100%	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	100%
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	0	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	10
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	0	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	5	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	6
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	YES	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?		YES	

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **City of Beaumont**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 10, 2004**
Local Point of Contact: **Mitchell White**		**Address:** **660 Orange Ave.** **Beaumont, CA 92223-2200**
Title: **Sgt.**		
Agency: City of Beaumont

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 3 -7**	**M**	

PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation	Part II, City of Beaumont Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

	planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, City of Beaumont Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II City of Beaumont Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, City of Beaumont Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pages 28 – 40 Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Landslides Pages 77 – 80 Insect Infestation Pages 81 – 84 Dam failure Pages 85 – 93 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Airline / airport emergencies Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Civil unrest Pages 129 – 131 Jails and prisons incidents Pages 132 – 134 Terrorism Pages 135 – 139 Part II, City of Beaumont Section	**S**	

	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, City of Beaumont Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II City of Beaumont Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, City of Beaumont Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Blythe

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		BLYTHE		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	Captain		
First Name:	Robert	Last Name:	Whitney	
Agency Address:	Street:	240 N. Spring Street		
	City:	Blythe		
	State:	CA		
	Zip:	92225		
Contact Phone	760 922-6111		FAX	760 922-3652
E-mail	rwhitney@cityofblythe.ca.gov			

Population Served	21,200
Square Miles Served	26.4

Does your organization have a general plan?	NO
Does your organization have a safety component to the general plan?	NO
What year was your plan last updated?	

Does your organization have a disaster/emergency operations plan?	Yes
What year was your plan last updated?	1998
Do you have a recovery annex or section in your plan?	NO
Do you have a terrorism/WMD annex or section in your plan?	NO

HAZARDOUS STORAGE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	**NO**

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**YES**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**YES**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**YES**
DOWNSTREAM FROM A RESERVOIR	**YES**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**YES**
ON AN EARTHQUAKE FAULT	**NO**
NEAR AN EARTHQUAKE FAULT	**NO**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**NO**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**NO**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**NO**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	YES
NEAR FLOOD PLAIN	YES
NEAR RAILROAD TRACKS	YES
NEAR A DAM	YES
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	YES
DOWNSTREAM OF A LAKE	YES
DOWNSTREAM FROM A RESERVOIR	YES
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	NO
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	YES

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
BLYTHE	Dam	Palo Verde Diversion Dam	No	Yes
BLYTHE	Flood Channel	Unknown	Yes	Yes
BLYTHE	Pipeline	Southern CA Natural Gas line	Yes	Yes
BLYTHE	Railroad Track	CA/AZ Railroad	Yes	Yes
BLYTHE	River	Colorado River	Yes	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Blythe

Scenario: M7.1 on San Andreas Fault
Epicenter Northeast of Coachella

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$33.23
Non-Structural Damage	$136.45
Building Damage	$169.68

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
M	Generate new literature for dissemination to:
M	◊ Government employees
M	◊ Businesses
M	◊ Hotel/motel literature
M	◊ Local radio stations for education
M	◊ Public education via utilities
N/A	◊ Identify/create television documentary content
H	Improve the Emergency Alert System (EAS)
H	◊ Consider integration with radio notification systems
L	◊ Upgrade alerting and warning systems for hearing impaired
M	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
H	Provide training to hospital staffs
L	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
L	Install earthquake-warning devices at critical facilities
L	Develop a dam inundation plan for new Diamond Valley Reservoir
L	Earthquake retrofitting
L	◊ Bridges/dams/pipelines
L	◊ Government buildings/schools
L	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
M	Ensure Uniform Building Code compliance
M	◊ Update to current compliance when retrofitting
L	Insurance coverage on public facilities
L	Funding for non-structural abatement (Earthquake kits, etc.)

N/A	Pre - identify empty commercial space for seismic re-location
L	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
L	Mapping of liquefaction zones
L	Incorporate County geologist data into planning
M	Backup water supplies for hospitals
L	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
L	Fire sprinkler ordinance for all structures
L	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
L	◊ Links to jurisdictions
L	◊ Alerting information
L	◊ Volunteer information
L	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

M	Communications Interoperability
H	Harden repeater sites
M	Continue existing interoperability project
M	Strengthen/harden
M	Relocate
M	Redundancy
H	Mobile repeaters

FLOODS

L	Update development policies for flood plains
L	Public education on locations of flood plains
M	Develop multi-jurisdictional working group on floodplain management
H	Develop greenbelt requirements in new developments
M	Update weather pattern/flood plain maps
L	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
L	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
H	Maintenance of storm sewers/flood channels
L	Create map of flood channels/diversions/water systems etc
M	Require digital floor plans on new non-residential construction

L	Upgrade dirt embankments to concrete
L	Conduct countywide needs study on drainage capabilities
M	Increase number of pumping stations
L	Increase sandbag distribution capacities
H	Develop pre-planned response plan for floods
H	◊ Evacuation documentation
M	◊ Re-examine historical flooding data for potential street re-design
M	Training for city/county PIOs about flood issues
L	Warning systems - ensure accurate information provided
L	◊ Publicize flood plain information (website?)
L	◊ Install warning/water level signage
L	◊ Enhanced public information
L	◊ Road closure compliance
M	◊ Shelter locations
M	◊ Pre-event communications
L	Look at County requirements for neighborhood access
M	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
M	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
L	Riverbed maintenance
M	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
L	Traffic light protection
L	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
M	Backup generation facilities
L	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
L	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
M	Identify hydrants with equipment ownership information
M	Enhanced fire fighting equipment

L	Fire spotter program/red flag program
L	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
L	Public education program
L	◊ Weather reporting/alerting
L	◊ Building protection
L	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
M	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
M	Fuel/dead tree removal
L	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
M	Brush clearings around repeaters
L	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
M	Clear out abandoned vehicles from oases
M	Code enforcement
L	Codes prohibiting fireworks
M	Fuel modification/removal
M	Evaluate building codes
M	Maintaining catch basins

OTHER HAZARDS

L	Improve pipeline maintenance
M	Wetlands mosquito mitigation (West Nile Virus)
M	Insect control study
L	Increase County Vector Control capacities
L	General public drought awareness
L	◊ Lawn watering rotation
L	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
M	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
M	Rotational crop planning/soil stabilization

L	Enhance agricultural checkpoint enforcement
L	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
L	Improve/maintain blackout notification plan.
L	Support business continuity planning for utility outages
H	Terrorism training/equipment for first responders
H	◊ Terrorism planning/coordination
M	◊ Staffing for terrorism mitigation
L	Create a SONGS regional planning group
L	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
L	Fire Ant eradication program
M	White Fly infestation abatement/eradication program
L	Develop plan for supplemental water sources
L	Public education on low water landscaping
L	Salton Sea desalinization
L	Establish agriculture security standards (focus on water supply)
M	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable
L	Upgrade valves on California aqueduct
L	Public education
L	◊ Bi-lingual signs
L	◊ Blackout information
L	Notification system for rail traffic - container contents
M	Control and release of terrorism intelligence
M	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Blythe
Contact: Charles Hull
Phone: (760) 922-6161 x 240

MITIGATION STRATEGY INFORMATION

Proposal Name:

McCoy Wash Flood Control and 6th Ave. Alternate Access Route

Proposal Location:

East terminus of 6th Ave. at the mesa, north side of McCoy Wash

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
X	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
X	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
X	Agriculture - crop related mitigation
X	Agriculture - animal related mitigation
X	Flood inundation/Dam failure
X	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History — List any previous disaster related events (dates, costs, etc)

Major flood event September 23 & 24, 1976. Millions of dollars in damage and lost crops.

Description of Mitigation Goal Narrative: Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

There are 171 square miles of undeveloped desert that is tributary to the discharge point of this wash into the Palo Verde Valley. In 1976, this wash ran 16,000 cfs and flooded approximately 25 square miles of agricultural fields, roads, and personal property. A number of homes were damaged or destroyed. Interstate 10 was closed for several hours. The federal government has had an earthen dam as an unfunded project for many years to mitigate this local hazard. Just recently the community college relocated to a new campus on the mesa on the north side of the McCoy Wash. There currently is one way in and one way out. The ADA for the college is 2,000 students.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No	X	Responsible Agency: The McCoy Wash Flood Control District is responsible for the flood control project. The City of Blythe would handle the roadway construction for the alternate access

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

- [X] Unfunded project - funds are not available for the project at this time
- [ ] Local jurisdiction General Fund
- [ ] Local jurisdiction Special Fund (road tax, assessment fees, etc.)
- [ ] Non-FEMA Hazard Mitigation Funds
- [ ] Pre-Hazard Mitigation Grant Funds - Future Request
- [ ] Hazard Mitigation Funds

- [ ] Has your jurisdiction evaluated this mitigation strategy to determine its cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: City of Blythe	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _XX_ NO _____**		
Current Population in Jurisdiction or Served	14428	Projected Population in Jurisdiction or Served - in 2010	19390
Current Sq Miles in Jurisdiction or Served	27	Projected Sq Miles in Jurisdiction or Served - in 2010	32
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	Yes	If yes, please list ordinance or regulation number. City Ordinance # 252	
What is the number one land issue your agency will face in the next five years	Development of the river resort area on both sides of the California and Arizona border		
Approximate Number of Homes/Apts/etc.	4891	Projected Number of Homes/Apts/etc.- in 2010	5937
Approximate Total Residential Value	$700 million	Projected Residential Total Value - in 2010	$890 million
Approximate Number of Commercial Businesses	2476	Projected Number of Commercial Businesses - in 2010	3415
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	<12% $84,000,000	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	25% $222,500,000
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	N/A	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	N/A
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	<5% $35,000,000	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	8% $71,200,000
Approximate Percentage of Commercial Businesses in flood hazard zones	<2%	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	4%
Approximate Percentage of Commercial Businesses in earthquake hazard zones	N/A	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	N/A
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	<.05%	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	2%
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	3	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	3
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	0	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?		Yes	

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Blythe**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 22, 2004**
Local Point of Contact: **Charles Hull**	**Address:** **235 North Broadway** **Blythe, CA 92225**	
Title: **Assistant City Manager**

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Calimesa

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		CALIMESA		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	Assistant Public Works Director		
First Name:	Keith	Last Name:	Haan	
Agency Address:	Street:	908 Park Ave		
	City:	Calimesa		
	State:	CA		
	Zip:	92320		
Contact Phone	(951) 795-9801		FAX	(951) 795-4399
E-mail	khaan@cityofcalimesa.net			

Population Served	7,333
Square Miles Served	15

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	4/4/1994

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	4/4/1994
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	NO

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	NO
AIRPORT NEXT TO JURISDICTION	NO
DAIRY INDUSTRY	NO
POULTRY INDUSTRY	NO
CROPS/ORCHARDS	NO
DAMS IN JURISDICTION	NO
DAMS NEXT TO JURISDICTION	NO
LAKE/RESERVOIR IN JURISDICTION	NO
LAKE/RESERVOIR NEAR JURISDICTION	NO
JURISDICTION IN FLOOD PLAIN	YES
CONTROLLED FLOOD CONTROL CHANNEL	YES
UNCONTROLLED FLOOD CONTROL CHANNEL	YES
EARTHQUAKE FAULTS IN JURISDICTION	YES
EARTHQUAKE FAULTS NEXT TO JURISDICTION	YES
MOBILE HOME PARKS	YES
NON-REINFORCED FREEWAY BRIDGES	NO
NON-REINFORCED BRIDGES	NO
BRIDGES IN FLOOD PLAIN	YES
BRIDGES OVER OR ACROSS RIVER/STREAM	NO
ROADWAY CROSSING RIVER/STREAM	NO
NON REINFORCED BUILDINGS	YES
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	YES
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	NO
FOREST AREA IN JURISDICTION	NO
FOREST AREA NEXT TO JURISDICTION	YES
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	YES
MAJOR GAS/OIL PIPELINES IN JURISDICTION	YES
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	YES
RAILROAD TRACKS IN JURISDICTION	YES
RAILROAD TRACKS NEXT TO JURISDICTION	YES
HAZARDOUS WASTE FACILITIES IN JURISDICTION	NO
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	NO
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	NO
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	NO

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**YES**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**NO**
DOWNSTREAM OF A LAKE	**NO**
DOWNSTREAM FROM A RESERVOIR	**NO**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**YES**
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**YES**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**YES**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**NO**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**YES**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**YES**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**YES**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**YES**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	YES
NEAR RAILROAD TRACKS	NO
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	NO
DOWNSTREAM OF A LAKE	NO
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	YES
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	YES
IN A FOREST AREA	NO
NEAR A FOREST AREA	YES
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	YES
COULD BE CONSIDERED A BIO-HAZARD RISK	YES

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction ?	Adjacent to Jurisdiction?
CALIMESA	Aqueduct	East Branch Extension, Calif. Aqueduct	Yes	No
CALIMESA	Fault	Banning Fault Zone	Yes	No
CALIMESA	Fault	Beaumont Plain Fault Zone	No	Yes
CALIMESA	Fault	Crafton Hills Fault Zone	No	Yes
CALIMESA	Fault	Pinto Mountain Fault Zone	No	Yes
CALIMESA	Fault	San Gorgonio Pass Fault Zone	Yes	No
CALIMESA	Fault	San Jacinto Fault Zone	No	Yes
CALIMESA	Flood Channel	Calimesa Creek	Yes	No
CALIMESA	Flood Channel	Cherry Valley Creek	Yes	No
CALIMESA	Flood Channel	Gardenaire Wash	Yes	No
CALIMESA	Flood Channel	Singleton Cayon	Yes	No
CALIMESA	Pipeline	10" High Pressure Gas	Yes	No
CALIMESA	Railroad Track	Union Pacific Main Line	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Calimesa

Scenario: M7.1 on San Jacinto Fault
Epicenter Between San Jacinto & Beaumont

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$9,243.31
Non-Structural Damage	$36,511.62
Building Damage	$45,754.92
Contents Damage	$10,805.75
Inventory Loss	$142.85
Relocation Cost	$214.83
Income Loss	$1,471.17
Rental Income Loss	$2,121.87
Wage Loss	$1,924.66
Total Loss	$62,436.04

Commercial Casualties for Daytime Event	
Medical Aid	4
Hospital Treatment	2
Life-Threatening Severity	0
Death	1

Commuting Casualties for Daytime Event	
Medical Aid	0
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
M	Generate new literature for dissemination to:
H	◊ Government employees
H	◊ Businesses
L	◊ Hotel/motel literature
L	◊ Local radio stations for education
L	◊ Public education via utilities
L	◊ Identify/create television documentary content
H	Improve the Emergency Alert System (EAS)
M	◊ Consider integration with radio notification systems
H	◊ Upgrade alerting and warning systems for hearing impaired
H	◊ Training and maintenance
H	Procure earthquake-warning devices for critical facilities
H	Reinforce emergency response facilities
H	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
H	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
L	Install earthquake cutoffs at reservoirs
L	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
L	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
N/A	◊ Government buildings/schools
H	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
H	Insurance coverage on public facilities
L	Funding for non-structural abatement (Earthquake kits, etc.)

N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
L	Mapping of liquefaction zones
L	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals
L	Evaluate pipeline seismic resiliency
H	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
N/A	Evaluate adequacy of reservoir capacity for sprinkler systems
N/A	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
L	◊ Links to jurisdictions
L	◊ Alerting information
M	◊ Volunteer information
L	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
M	Harden repeater sites
L	Continue existing interoperability project
L	Strengthen/harden
L	Relocate
N/A	Redundancy
H	Mobile repeaters

FLOODS

H	Update development policies for flood plains
L	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
H	Develop greenbelt requirements in new developments
H	Update weather pattern/flood plain maps
L	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
M	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
H	Maintenance of storm sewers/flood channels
H	Create map of flood channels/diversions/water systems etc
H	Require digital floor plans on new non-residential construction

L	Upgrade dirt embankments to concrete
M	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
M	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
M	◊ Evacuation documentation
M	◊ Re-examine historical flooding data for potential street re-design
M	Training for city/county PIOs about flood issues
L	Warning systems - ensure accurate information provided
L	◊ Publicize flood plain information (website?)
L	◊ Install warning/water level signage
L	◊ Enhanced public information
H	◊ Road closure compliance
M	◊ Shelter locations
H	◊ Pre-event communications
H	Look at County requirements for neighborhood access
H	◊ Secondary means of ingress/egress
N/A	Vegetation restoration programs
L	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
L	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
M	Traffic light protection
L	Upkeep of diversionary devices
M	Install more turn-off valves on pipelines
H	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
M	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
L	Public education on wildfire defense
M	Encourage citizen surveillance and reporting
H	Identify hydrants with equipment ownership information
H	Enhanced fire fighting equipment

L	Fire spotter program/red flag program
L	◊ Expand to other utilities
M	Research on insect/pest mitigation technologies
M	Volunteer home inspection program
M	Public education program
L	◊ Weather reporting/alerting
M	◊ Building protection
M	◊ Respiration
L	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
H	Fuel/dead tree removal
N/A	Strategic pre-placement of fire fighting equipment
H	Establish FEMA coordination processes based on ICS
H	Brush clearings around repeaters
N/A	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
H	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
H	Clear out abandoned vehicles from oases
H	Code enforcement
H	Codes prohibiting fireworks
L	Fuel modification/removal
H	Evaluate building codes
H	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
L	Wetlands mosquito mitigation (West Nile Virus)
L	Insect control study
M	Increase County Vector Control capacities
L	General public drought awareness
N/A	◊ Lawn watering rotation
L	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
H	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization

N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
M	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
M	Improve/maintain blackout notification plan.
N/A	Support business continuity planning for utility outages
L	Terrorism training/equipment for first responders
M	◊ Terrorism planning/coordination
L	◊ Staffing for terrorism mitigation
L	Create a SONGS regional planning group
L	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
N	Fire Ant eradication program
N	White Fly infestation abatement/eradication program
N	Develop plan for supplemental water sources
N/A	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
M	ID mutual aid agreements
M	Vulnerability assessment on fiber-optic cable
H	Upgrade valves on California aqueduct
M	Public education
M	◊ Bi-lingual signs
M	◊ Blackout information
N/A	Notification system for rail traffic - container contents
M	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Calimesa
Contact: Keith Haan
Phone: (951) 795-9801

MITIGATION STRATEGY INFORMATION

Proposal Name:

Drainage Improvement

Proposal Location:

On County Line Road, Calimesa Blvd, Brian Street and Myrtlewood floods

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

x	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	The area between County Line Road, Calimesa Blvd, Brian Street and Myrtlewood floods during heavy rainstorms. This area is a residential area and causes recurring private property and roadway damage.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

Our goal is to improve storm drainage via improve curbs and cutters and drainage. This project would piggyback on a county effort to install a large storm drainage line. The proposed project would drain into the new county storm drain.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	x	No		Responsible Agency: City of Calimesa

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

x	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
x	Pre-Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Y	Has your jurisdiction evaluated this mitigation strategy to determine its cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: City of Calimesa		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _X_ NO _____**	
Current Population in Jurisdiction or Served	7272	Projected Population in Jurisdiction or Served - in 2010	12072
Current Sq Miles in Jurisdiction or Served	15	Projected Sq Miles in Jurisdiction or Served - in 2010	23
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	Yes	If yes, please list ordinance or regulation number. 3.3 and 8.8	
What is the number one land issue your agency will face in the next five years	Wildlife Corridors & Development		
Approximate Number of Homes/Apts/etc.	3252	Projected Number of Homes/Apts/etc.- in 2010	4752
Approximate Total Residential Value	1.25 billion $	Projected Residential Total Value - in 2010	1.90 Billion $
Approximate Number of Commercial Businesses	89	Projected Number of Commercial Businesses - in 2010	110
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	.1% (3 units) $1,250,000	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	0
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	1.1% (36 units) $13,750,000	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	0.8% (36 units) $1,520,000
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	16.8% (545 units) $210,000,000	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	27.4% (1300 units) $520,000,000
Approximate Percentage of Commercial Businesses in flood hazard zones	13.5% (12 units)	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	10% (12 units)
Approximate Percentage of Commercial Businesses in earthquake hazard zones	20.2% (18 units)	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	15% (18 units)
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	12.4% (11 units)	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	9.2% (11 units)
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	2	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	2
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	0	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **City of Calimesa**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 22, 2004**
Local Point of Contact: **Bob French**	**Address:** **P.O. Box 1190** **908 Park Avenue** **Calimesa, CA 92320**	
Title: **Public Works Manager**

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pages 28 – 40 Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Landslides Pages 77 – 80 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Part II, Calimesa Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Calimesa Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Calimesa Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Calimesa Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Canyon Lake

Scenario: M6.9 on Elsinore Fault
Epicenter Near Lake Elsinore

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$6,462.16
Non-Structural Damage	$31,376.46
Building Damage	$37,838.62
Contents Damage	$10,825.90
Inventory Loss	$144.08
Relocation Cost	$155.21
Income Loss	$694.57
Rental Income Loss	$1,363.75
Wage Loss	$744.80
Total Loss	$51,766.93

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
M	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
M	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
H	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
H	Install earthquake cutoffs at reservoirs
M	Install earthquake-warning devices at critical facilities
H	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
	◊ Bridges/dams/pipelines
	◊ Government buildings/schools
	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections
M	Ensure Uniform Building Code compliance
	◊ Update to current compliance when retrofitting
L	Insurance coverage on public facilities
L	Funding for non-structural abatement (Earthquake kits, etc.)
L	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
H	Mapping of liquefaction zones
M	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals

N/A	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
L	Fire sprinkler ordinance for all structures
L	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
M	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

M	Communications Interoperability
L	Harden repeater sites
M	Continue existing interoperability project
	Strengthen/harden
	Relocate
	Redundancy
	Mobile repeaters

FLOODS

H	Update development policies for flood plains
H	Public education on locations of flood plains
H	Develop multi-jurisdictional working group on floodplain management
M	Develop greenbelt requirements in new developments
H	Update weather pattern/flood plain maps
H	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
M	Perform GIS mapping of flood channels, etc.
M	Install vehicular crossing gates/physical barriers for road closure
H	Maintenance of storm sewers/flood channels
M	Create map of flood channels/diversions/water systems etc
L	Require digital floor plans on new non-residential construction
L	Upgrade dirt embankments to concrete
M	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
L	Increase sandbag distribution capacities
H	Develop pre-planned response plan for floods
	◊ Evacuation documentation
	◊ Re-examine historical flooding data for potential street re-design
M	Training for city/county PIOs about flood issues
M	Warning systems - ensure accurate information provided
	◊ Publicize flood plain information (website?)

	◊ Install warning/water level signage
	◊ Enhanced public information
	◊ Road closure compliance
	◊ Shelter locations
	◊ Pre-event communications
M	Look at County requirements for neighborhood access
	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
L	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
L	Riverbed maintenance
L	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
L	Traffic light protection
M	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
M	Backup generation facilities
L	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
	◊ Networking of agencies for weed abatement
L	Develop strategic plan for forest management
L	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information
L	Enhanced fire fighting equipment
M	Fire spotter program/red flag program
	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
M	Public education program
	◊ Weather reporting/alerting
	◊ Building protection
	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
M	Fuel/dead tree removal
M	Strategic pre-placement of fire fighting equipment
N/A	Establish FEMA coordination processes based on ICS
M	Brush clearings around repeaters

L	Research new technologies for identifying/tracking fires
L	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
L	Clear out abandoned vehicles from oases
M	Code enforcement
M	Codes prohibiting fireworks
M	Fuel modification/removal
M	Evaluate building codes
M	Maintaining catch basins

OTHER HAZARDS

L	Improve pipeline maintenance
L	Wetlands mosquito mitigation (West Nile Virus)
M	Insect control study
M	Increase County Vector Control capacities
L	General public drought awareness
	◊ Lawn watering rotation
N/A	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
N/A	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
L	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
L	Terrorism training/equipment for first responders
	◊ Terrorism planning/coordination
	◊ Staffing for terrorism mitigation
M	Create a SONGS regional planning group
	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
L	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
M	Develop plan for supplemental water sources
L	Public education on low water landscaping
N/A	Salton Sea desalinization
L	Establish agriculture security standards (focus on water supply)
M	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable

N/A	Upgrade valves on California aqueduct
L	Public education
	◊ Bi-lingual signs
	◊ Blackout information
N/A	Notification system for rail traffic - container contents
M	Control and release of terrorism intelligence
L	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Canyon Lake	
Contact:	Kathy Bennett, City Clerk
Phone:	(951) 244-2955

MITIGATION STRATEGY INFORMATION

Proposal Name:

Construct bridge and roadway at Goetz and Railroad Canyon Road to raise above 100 year flood level requirements

Proposal Location:

Goetz at Railroad Canyon Road City of Canyon Lake

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
X	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
X	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History

1993 Flood and 1995 flooding has happened due to inadequate flood channel under roadway and this rebuild with the Audie Murphy project will control water flow to remain under and in channel and not flood over roadway. Water flow from upstream and mountain causes flooding during heavy rain periods.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

The proposal is to elevate Goetz Rd. in the area of Railroad Canyon Rd. in order to reduce the flooding impact on the area. Culvert pipes will be placed under the newly elevated roadway to allow for a smooth flow of floodwaters to run through the area.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency: In coordination with Riverside County Road Department.

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
x	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: City of Canyon Lake	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES XX NO**		
Current Population in Jurisdiction or Served	10500	Projected Population in Jurisdiction or Served - in 2010	11800
Current Sq Miles in Jurisdiction or Served	4.3	Projected Sq Miles in Jurisdiction or Served - in 2010	4.3
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	Yes	If yes, please list ordinance or regulation number. Number 33	
What is the number one land issue your agency will face in the next five years	Traffic		
Approximate Number of Homes/Apts/etc.	4600	Projected Number of Homes/Apts/etc.- in 2010	4800

Approximate Number of Commercial Businesses	400-500	Projected Number of Commercial Businesses - in 2010	425
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	5 $115,000,000	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	5 $115,000,000
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	100 $2,300,000,000	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	100 $2,300,000,000
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	35 $805,000,000	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	40 $920,000,000
Approximate Percentage of Commercial Businesses in flood hazard zones	10	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	15
Approximate Percentage of Commercial Businesses in earthquake hazard zones	100	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	100
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	15	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	25
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	0	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	100	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	100
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			YES

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **City of Canyon Lake**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 20, 2004**
Local Point of Contact: **Kathy Bennet**	**Address:** **31516 Railroad Canyon Rd.** **Canyon Lake, CA 92587**	
Title: **City Clerk**		
Agency: **City of Canyon Lake**

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pgs 41 – 53 Earthquakes Pgs 54 – 66 Extreme Weather Pgs 67 – 76 Hazmat incidents Pgs 94 – 101 Blackout Pgs 115 – 118 Nuclear incidents Pgs 125 – 128 Part II, Canyon Lake Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** If yes, where in MJP: Yes, Part II, CANYON LAKE Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & CANYON LAKE Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, CANYON LAKE Section	**S**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Cathedral City

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		CATHEDRAL CITY		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	Div. Chief, Emergency Prep. Coordinator		
First Name:	Mike	Last Name:	Hatfield	
Agency Address:	Street:	32-100 Desert Vista Rd.		
	City:	Cathedral City		
	State:	CA		
	Zip:	92234		
Contact Phone	760-770-8200		FAX	760-328-3902
E-mail	mhatfield@cathederalcity.gov			

Population Served	47,300	Square Miles Served	21

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	7/31/2002

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	7/31/2002
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	YES

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	NO
AIRPORT NEXT TO JURISDICTION	YES
DAIRY INDUSTRY	NO
POULTRY INDUSTRY	NO
CROPS/ORCHARDS	NO
DAMS IN JURISDICTION	NO
DAMS NEXT TO JURISDICTION	YES
LAKE/RESERVOIR IN JURISDICTION	NO
LAKE/RESERVOIR NEAR JURISDICTION	NO
JURISDICTION IN FLOOD PLAIN	YES
CONTROLLED FLOOD CONTROL CHANNEL	YES
UNCONTROLLED FLOOD CONTROL CHANNEL	NO
EARTHQUAKE FAULTS IN JURISDICTION	NO
EARTHQUAKE FAULTS NEXT TO JURISDICTION	YES
MOBILE HOME PARKS	YES
NON-REINFORCED FREEWAY BRIDGES	YES
NON-REINFORCED BRIDGES	YES
BRIDGES IN FLOOD PLAIN	YES
BRIDGES OVER OR ACROSS RIVER/STREAM	YES
ROADWAY CROSSING RIVER/STREAM	YES
NON REINFORCED BUILDINGS	NO
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	YES
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	NO
FOREST AREA IN JURISDICTION	NO
FOREST AREA NEXT TO JURISDICTION	NO
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	NO
MAJOR GAS/OIL PIPELINES IN JURISDICTION	YES
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	YES
RAILROAD TRACKS IN JURISDICTION	YES
RAILROAD TRACKS NEXT TO JURISDICTION	NO
HAZARDOUS WASTE FACILITIES IN JURISDICTION	NO
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	NO
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	YES
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	NO

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**NO**
NEAR FLOOD PLAIN	**YES**
NEAR RAILROAD TRACKS	**NO**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**NO**
DOWNSTREAM OF A LAKE	**NO**
DOWNSTREAM FROM A RESERVOIR	**NO**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**NO**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**NO**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**YES**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**NO**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**YES**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**YES**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	YES
NEAR RAILROAD TRACKS	YES
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	NO
DOWNSTREAM OF A LAKE	NO
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	YES
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	YES

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	YES
COULD BE CONSIDERED A BIO-HAZARD RISK	YES

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
CATHEDRAL CITY	Fault	San Andreas	No	Yes
CATHEDRAL CITY	Hazmat Storage Location	Superior Pools	Yes	No
CATHEDRAL CITY	Pipeline	High Pressure Gas Line	Yes	No
CATHEDRAL CITY	Pipeline	Southern Pacific Pipeline	Yes	No
CATHEDRAL CITY	Railroad Track	Southern Pacific Railroad	Yes	No
CATHEDRAL CITY	River	White Water River	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Cathedral

Scenario: M7.1 on San Andreas Fault
Epicenter Northeast of Cathedral City

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$39,683.51
Non-Structural Damage	$168,167.24
Building Damage	$207,850.76
Contents Damage	$50,451.28
Inventory Loss	$957.23
Relocation Cost	$942.45
Income Loss	$6,759.00
Rental Income Loss	$13,927.03
Wage Loss	$9,105.04
Total Loss	$289,992.76

Commercial Casualties for Daytime Event	
Medical Aid	22
Hospital Treatment	9
Life-Threatening Severity	2
Death	4

Commuting Casualties for Daytime Event	
Medical Aid	0
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Cathedral

Scenario: M7.1 on San Andreas Fault
Epicenter Northeast of Cathedral City

Educational Casualties for Daytime Event	
Medical Aid	13
Hospital Treatment	3
Life-Threatening Severity	1
Death	1

Hotels Casualties for Daytime Event	
Medical Aid	1
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

Industrial Casualties for Daytime Event	
Medical Aid	11
Hospital Treatment	3
Life-Threatening Severity	0
Death	1

Other Residential Casualties for Daytime Event	
Medical Aid	18
Hospital Treatment	4
Life-Threatening Severity	0
Death	1

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Cathedral

Scenario: M7.1 on San Andreas Fault
Epicenter Northeast of Cathedral City

Single Family Casualties for Daytime Event	
Medical Aid	8
Hospital Treatment	1
Life-Threatening Severity	0
Death	0

Total Casualties for Daytime Event	
Medical Aid	73
Hospital Treatment	20
Life-Threatening Severity	3
Death	6

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
H	Generate new literature for dissemination to:
H	◊ Government employees
H	◊ Businesses
H	◊ Hotel/motel literature
H	◊ Local radio stations for education
M	◊ Public education via utilities
L	◊ Identify/create television documentary content
M	Improve the Emergency Alert System (EAS)
M	◊ Consider integration with radio notification systems
L	◊ Upgrade alerting and warning systems for hearing impaired
M	◊ Training and maintenance
L	Procure earthquake-warning devices for critical facilities
L	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
L	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
L	Install earthquake cutoffs at reservoirs
L	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
L	Earthquake retrofitting
L	◊ Bridges/dams/pipelines
L	◊ Government buildings/schools
L	◊ Mobile home parks
M	Develop educational materials on structural reinforcement and home inspections
M	Ensure Uniform Building Code compliance
M	◊ Update to current compliance when retrofitting
L	Insurance coverage on public facilities
L	Funding for non-structural abatement (Earthquake kits, etc.)
M	Pre - identify empty commercial space for seismic re-location

N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
M	Mapping of liquefaction zones
L	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals
N/A	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
L	Fire sprinkler ordinance for all structures
L	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
L	◊ Links to jurisdictions
L	◊ Alerting information
L	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

M	Communications Interoperability
M	Harden repeater sites
L	Continue existing interoperability project
M	Strengthen/harden
L	Relocate
L	Redundancy
M	Mobile repeaters

FLOODS

L	Update development policies for flood plains
M	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
M	Develop greenbelt requirements in new developments
M	Update weather pattern/flood plain maps
L	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
M	Required water flow/runoff plans for new development
L	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
L	Create map of flood channels/diversions/water systems etc
L	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete

N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
L	Increase sandbag distribution capacities
L	Develop pre-planned response plan for floods
L	◊ Evacuation documentation
M	◊ Re-examine historical flooding data for potential street re-design
L	Training for city/county PIOs about flood issues
M	Warning systems - ensure accurate information provided
L	◊ Publicize flood plain information (website?)
L	◊ Install warning/water level signage
L	◊ Enhanced public information
L	◊ Road closure compliance
L	◊ Shelter locations
L	◊ Pre-event communications
H	Look at County requirements for neighborhood access
H	◊ Secondary means of ingress/egress
N/A	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
M	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
H	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
L	Traffic light protection
L	Upkeep of diversionary devices
N/A	Install more turn-off valves on pipelines
M	Backup generation facilities
M	Identify swift water rescue capabilities across County

WILDFIRES

L	Aggressive weed abatement program
L	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information
M	Enhanced fire fighting equipment
L	Fire spotter program/red flag program

L	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
M	Volunteer home inspection program
M	Public education program
L	◊ Weather reporting/alerting
M	◊ Building protection
M	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
N/A	Fuel/dead tree removal
N/A	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
N/A	Brush clearings around repeaters
N/A	Research new technologies for identifying/tracking fires
M	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
M	Involve insurance agencies in mitigation programs
H	Clear out abandoned vehicles from oases
H	Code enforcement
H	Codes prohibiting fireworks
N/A	Fuel modification/removal
M	Evaluate building codes
M	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
M	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
M	General public drought awareness
L	◊ Lawn watering rotation
L	Develop County drought plan
L	Mitigation of landslide-prone areas
N/A	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
H	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement

N/A	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
M	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
H	Terrorism training/equipment for first responders
H	◊ Terrorism planning/coordination
H	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
L	◊ Include dirty bomb planning
H	Cooling stations - MOUs in place
L	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
L	Develop plan for supplemental water sources
M	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
H	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
M	Public education
M	◊ Bi-lingual signs
M	◊ Blackout information
M	Notification system for rail traffic - container contents
M	Control and release of terrorism intelligence
L	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Cathedral City	
Contact:	Mike Hatfield, Emergency Services Coordinator
Phone:	(760) 770-8200

MITIGATION STRATEGY INFORMATION

Proposal Name:

City Wide Flood Control Proposal

Proposal Location:

City sphere of influence

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History

The city prepared a study to manage storm water runoff city wide in 1997. In this study the need was for storm water runoff control was cited as a result the floods experienced during the late 1960's.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

Mapping the Flood zones is required to show the true condition of the Flood zones. Currently we have the design criteria for citywide flood and storm water runoff and control system. Due to the unfunded expense of $47 million, the proposal has not been undertaken.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

X	Unfunded proposal - funds are not available for the proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Pre-Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: City of Cathedral City		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES X NO**	
Current Population in Jurisdiction or Served	50,000	Projected Population in Jurisdiction or Served - in 2010	98,000
Current Sq Miles in Jurisdiction or Served	21.5 sq.mi	Projected Sq Miles in Jurisdiction or Served - in 2010	21.5 sq.mi
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	Yes	If yes, please list ordinance or regulation number. City Resolutions (2003-11) and (2003-12) Chapter 2.20 CCMC	
What is the number one land issue your agency will face in the next five years	Lack of Land	Lack of land due to citywide expansion	
Approximate Number of Homes/Apts/etc.	21,045	Projected Number of Homes/Apts/etc.- in 2010	43,045
Approximate Total Residential Value	600,000,000	Projected Residential Total Value - in 2010	1,200,000,000
Approximate Number of Commercial Businesses	1,017	Projected Number of Commercial Businesses - in 2010	1,200
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	5% $30,000,000	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	5% $60,000,000
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	100% $600,000,000	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	100% $1,200,000,000
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	0%	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	0%
Approximate Percentage of Commercial Businesses in flood hazard zones	10%	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	10%
Approximate Percentage of Commercial Businesses in earthquake hazard zones	100%	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	100%
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	0%	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	0%
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	5%	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	10%
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	100%	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	100%
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0%	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0%
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Cathedral City**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 8, 2004**
Local Point of Contact: **Mike Hatfield**	**Address:** **32-100 Desert Vista** **Cathedral City, Ca 92234**	
Title: **Division Chief**		
Agency: **City of Cathedral City**		
Phone Number: **760-770-8204**	**E-Mail: mhatfielld@ci-cathedral.city.ca.us**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	Part II, Cathedral City Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Cathedral City Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Cathedral City Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Cathedral City Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Landslides Pages 77 – 80 Insect Infestation Pages 81 – 84 Dam failure Pages 85 – 93 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
		– 110 Rail line emergencies Pages 102 – 110 Airline / airport emergencies Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Civil unrest Pages 129 – 131 Terrorism Pages 135 – 139 Part II, Cathedral City Section		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Cathedral City Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Cathedral City Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Cathedral City Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Coachella

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		COACHELLA		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	Emergency Services Coordinator		
First Name:	George	Last Name:	Torres	
Agency Address:	Street:	1515 6th Street		
	City:	Coachella		
	State:	CA		
	Zip:	92236		
Contact Phone	(760) 398-4202		FAX	(760) 398-8117
E-mail	gtorres@coachella.org			

Population Served	26,750
Square Miles Served	29

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	1998
Do you have a recovery annex or section in your plan?	NO
Do you have a terrorism/WMD annex or section in your plan?	NO

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	NO
AIRPORT NEXT TO JURISDICTION	YES
DAIRY INDUSTRY	NO
POULTRY INDUSTRY	NO
CROPS/ORCHARDS	YES
DAMS IN JURISDICTION	NO
DAMS NEXT TO JURISDICTION	NO
LAKE/RESERVOIR IN JURISDICTION	NO
LAKE/RESERVOIR NEAR JURISDICTION	NO
JURISDICTION IN FLOOD PLAIN	NO
CONTROLLED FLOOD CONTROL CHANNEL	YES
UNCONTROLLED FLOOD CONTROL CHANNEL	NO
EARTHQUAKE FAULTS IN JURISDICTION	NO
EARTHQUAKE FAULTS NEXT TO JURISDICTION	YES
MOBILE HOME PARKS	YES
NON-REINFORCED FREEWAY BRIDGES	NO
NON-REINFORCED BRIDGES	YES
BRIDGES IN FLOOD PLAIN	NO
BRIDGES OVER OR ACROSS RIVER/STREAM	NO
ROADWAY CROSSING RIVER/STREAM	NO
NON REINFORCED BUILDINGS	NO
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	YES
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	YES
FOREST AREA IN JURISDICTION	NO
FOREST AREA NEXT TO JURISDICTION	NO
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	NO
MAJOR GAS/OIL PIPELINES IN JURISDICTION	YES
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	YES
RAILROAD TRACKS IN JURISDICTION	YES
RAILROAD TRACKS NEXT TO JURISDICTION	YES
HAZARDOUS WASTE FACILITIES IN JURISDICTION	NO
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	NO
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	YES
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	YES

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**NO**
NEAR FLOOD PLAIN	**NO**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**NO**
DOWNSTREAM OF A LAKE	**NO**
DOWNSTREAM FROM A RESERVOIR	**NO**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**NO**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**YES**
NEAR A HAZARDOUS STORAGE FACILITY	**YES**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**YES**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**NO**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	NO
NEAR RAILROAD TRACKS	YES
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	NO
DOWNSTREAM OF A LAKE	NO
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	NO
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	NO
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	YES

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
COACHELLA	Hazmat Manufacturing Facility	Armtec Defense Products	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Cochella

Scenario: M7.1 on San Andreas Fault, epicenter northeast of Coachella

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$7,165.91
Non-Structural Damage	$32,197.80
Building Damage	$39,363.72
Contents Damage	$10,265.21
Inventory Loss	$112.53
Relocation Cost	$183.07
Income Loss	$731.50
Rental Income Loss	$1,956.08
Wage Loss	$832.12
Total Loss	$53,444.23

Commercial Casualties for Daytime Event	
Medical Aid	1
Hospital Treatment	1
Life-Threatening Severity	0
Death	0

Commuting Casualties for Daytime Event	
Medical Aid	0
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Cochella

Scenario: M7.1 on San Andreas Fault, epicenter northeast of Coachella

Educational Casualties for Daytime Event	
Medical Aid	2
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

Hotels Casualties for Daytime Event	
Medical Aid	0
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

Industrial Casualties for Daytime Event	
Medical Aid	1
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

Other Residential Casualties for Daytime Event	
Medical Aid	5
Hospital Treatment	1
Life-Threatening Severity	0
Death	0

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Cochella

Scenario: M7.1 on San Andreas Fault, epicenter northeast of Coachella

Single Family Casualties for Daytime Event	
Medical Aid	2
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

Total Casualties for Daytime Event	
Medical Aid	11
Hospital Treatment	2
Life-Threatening Severity	0
Death	1

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
L	Generate new literature for dissemination to:
M	◊ Government employees
L	◊ Businesses
L	◊ Hotel/motel literature
L	◊ Local radio stations for education
L	◊ Public education via utilities
L	◊ Identify/create television documentary content
L	Improve the Emergency Alert System (EAS)
L	◊ Consider integration with radio notification systems
L	◊ Upgrade alerting and warning systems for hearing impaired
L	◊ Training and maintenance
L	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
N/A	Require earthquake gas shutoffs on remodels/new construction
L	Evaluate re-enforcing reservoir concrete bases
L	Evaluate EOCs for seismic stability
L	Install earthquake cutoffs at reservoirs
L	Install earthquake-warning devices at critical facilities
L	Develop a dam inundation plan for new Diamond Valley Reservoir
L	Earthquake retrofitting
L	◊ Bridges/dams/pipelines
L	◊ Government buildings/schools
L	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
L	Ensure Uniform Building Code compliance
L	◊ Update to current compliance when retrofitting
L	Insurance coverage on public facilities
L	Funding for non-structural abatement (Earthquake kits, etc.)

L	Pre - identify empty commercial space for seismic re-location
L	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
L	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals
L	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
M	Fire sprinkler ordinance for all structures
L	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
L	◊ Links to jurisdictions
L	◊ Alerting information
L	◊ Volunteer information
L	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
L	Harden repeater sites
L	Continue existing interoperability project
L	Strengthen/harden
L	Relocate
L	Redundancy
L	Mobile repeaters

FLOODS

L	Update development policies for flood plains
L	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
L	Develop greenbelt requirements in new developments
L	Update weather pattern/flood plain maps
L	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
L	Required water flow/runoff plans for new development
L	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
L	Maintenance of storm sewers/flood channels
L	Create map of flood channels/diversions/water systems etc
L	Require digital floor plans on new non-residential construction

L	Upgrade dirt embankments to concrete
L	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
L	Increase sandbag distribution capacities
L	Develop pre-planned response plan for floods
L	◊ Evacuation documentation
L	◊ Re-examine historical flooding data for potential street re-design
L	Training for city/county PIOs about flood issues
L	Warning systems - ensure accurate information provided
L	◊ Publicize flood plain information (website?)
L	◊ Install warning/water level signage
L	◊ Enhanced public information
L	◊ Road closure compliance
L	◊ Shelter locations
L	◊ Pre-event communications
L	Look at County requirements for neighborhood access
L	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
L	Ensure critical facilities are hardened/backed up
L	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
L	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
L	Traffic light protection
L	Upkeep of diversionary devices
N/A	Install more turn-off valves on pipelines
L	Backup generation facilities
L	Identify swift water rescue capabilities across County

WILDFIRES

L	Aggressive weed abatement program
L	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
L	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information
L	Enhanced fire fighting equipment

N/A	Fire spotter program/red flag program
L	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
L	Public education program
L	◊ Weather reporting/alerting
L	◊ Building protection
L	◊ Respiration
L	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
L	Fuel/dead tree removal
L	Strategic pre-placement of fire fighting equipment
L	Establish FEMA coordination processes based on ICS
L	Brush clearings around repeaters
L	Research new technologies for identifying/tracking fires
L	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
N/A	Provide fire-resistant gel to homeowners
N/A	Involve insurance agencies in mitigation programs
L	Clear out abandoned vehicles from oases
L	Code enforcement
L	Codes prohibiting fireworks
L	Fuel modification/removal
L	Evaluate building codes
L	Maintaining catch basins

OTHER HAZARDS

L	Improve pipeline maintenance
L	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
L	General public drought awareness
L	◊ Lawn watering rotation
N/A	Develop County drought plan
N/A	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
L	Rotational crop planning/soil stabilization

L	Enhance agricultural checkpoint enforcement
L	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
L	Improve/maintain blackout notification plan.
L	Support business continuity planning for utility outages
L	Terrorism training/equipment for first responders
L	◊ Terrorism planning/coordination
L	◊ Staffing for terrorism mitigation
L	Create a SONGS regional planning group
L	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
L	Develop plan for supplemental water sources
L	Public education on low water landscaping
L	Salton Sea desalinization
L	Establish agriculture security standards (focus on water supply)
L	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable
L	Upgrade valves on California aqueduct
L	Public education
L	◊ Bi-lingual signs
L	◊ Blackout information
L	Notification system for rail traffic - container contents
L	Control and release of terrorism intelligence
L	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Coachella
Contact: George Torres
Phone: (760) 398-3502

MITIGATION STRATEGY INFORMATION

Proposal Name:

Disaster Community Planning

Proposal Location:

Coachella City wide

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
x	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History — List any previous disaster related events (dates, costs, etc)

There is no current community outreach and training programs for multi-hazard events.

Description of Mitigation Goal Narrative: Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

Create and provide public awareness and mitigation training for homes and business for the following events: earthquake, floods and extreme weather events. The goal of the training would be to prepare the public for a disastrous event and teach them how to minimize damage to their homes and businesses.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	x	No		Responsible Agency: City of Coachella

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

x	Unfunded proposal - funds are not available for the proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
x	Pre-Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Y	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: **City of Coachella**		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES __X__ NO _____**	
Current Population in Jurisdiction or Served	26,700	Projected Population in Jurisdiction or Served - in 2010	40,000
Current Sq Miles in Jurisdiction or Served	29.36	Projected Sq Miles in Jurisdiction or Served - in 2010	35
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	Yes	If yes, please list ordinance or regulation number. Ordinance # 709	
What is the number one land issue your agency will face in the next five years	Extensive Residential and Commercial Development		
Approximate Number of Homes/Apts/etc.	5,500	Projected Number of Homes/Apts/etc.- in 2010	8,500
Approximate Total Residential Value	1200000.	Projected Residential Total Value - in 2010	22100000.
Approximate Number of Commercial Businesses	200	Projected Number of Commercial Businesses - in 2010	250
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	0	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	0
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	5% $600,000	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	10% $2,210,000
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	0	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	0
Approximate Percentage of Commercial Businesses in flood hazard zones	0	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	0
Approximate Percentage of Commercial Businesses in earthquake hazard zones	5%	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	10%
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	0	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	0	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	20	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	30
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **City of Coachella**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 22, 2004**
Local Point of Contact: **George Torres**	**Address:** **1515 Sixth Street** **Coachella, CA 92236**	
Title: **Emergency Services Coordinator**		
Agency: **City of Coachella**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	Part II, Coachella Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Coachella Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Coachella Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Coachella Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Insect Infestation Pages 81 – 84 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Civil unrest Pages 129 – 131 Terrorism Pages 135 – 139 Part II, Coachella Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Coachella Section	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Coachella Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Coachella Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY

ROADWAY CROSSING RIVER/STREAM	**NO**
NON REINFORCED BUILDINGS	**YES**
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	**YES**
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	**NO**
FOREST AREA IN JURISDICTION	**NO**
FOREST AREA NEXT TO JURISDICTION	**NO**
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	**NO**
MAJOR GAS/OIL PIPELINES IN JURISDICTION	**YES**
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	**NO**
RAILROAD TRACKS IN JURISDICTION	**YES**
RAILROAD TRACKS NEXT TO JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES IN JURISDICTION	**YES**
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	**NO**

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**YES**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**YES**
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**YES**
DOWNSTREAM FROM A RESERVOIR	**YES**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**YES**
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**YES**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**YES**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**NO**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**YES**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**YES**
HAVE BEEN DAMAGED BY FOREST FIRE	**YES**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**YES**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**YES**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**YES**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	YES
NEAR FLOOD PLAIN	YES
NEAR RAILROAD TRACKS	YES
NEAR A DAM	NO
UPSTREAM FROM A DAM	YES
DOWNSTREAM FROM A DAM	NO
DOWNSTREAM OF A LAKE	YES
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	YES
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	YES
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	YES

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	YES
COULD BE CONSIDERED A BIO-HAZARD RISK	YES

Specific Hazards Summary				
Jurisdiction	**Hazard Type**	**Hazard Name**	**In Jurisdiction?**	**Adjacent to Jurisdiction?**
CORONA	Dam	Lake Mathews	No	Yes
CORONA	Dam	Prado	No	Yes
CORONA	Fault	Elsinore	Yes	Yes
CORONA	Flood Channel	Mabey Canyon	Yes	No
CORONA	Flood Channel	Temescal Creek	Yes	Yes
CORONA	Hazmat Manufacturing Facility	Corona Energy Partners	Yes	No
CORONA	Hazmat Manufacturing Facility	Corona Products	Yes	No
CORONA	Hazmat Manufacturing Facility	Dart Containers	Yes	No
CORONA	Hazmat Manufacturing Facility	G & S Associates	Yes	No
CORONA	Hazmat Manufacturing Facility	Golden Cheese	Yes	No
CORONA	Hazmat Manufacturing Facility	GTM, Inc.	Yes	No
CORONA	Hazmat Manufacturing Facility	Hi-Country	Yes	No
CORONA	Hazmat Manufacturing Facility	US Battery	Yes	No

Dam Name	LAKE MATTHEWS	MABEY CANYON	OAK STREET	LEE LAKE
River	COLORADO RIVER	MABEY CREEK	OAK STREET CR	TEMESCAL CREEK
Nearest City	RIVERSIDE	CORONA	CORONA	CORONA
Height (feet)	264	46	36	47
Storage (acre-feet)		111	400	2,800
Year Built	1918	1974	1979	1919
Drainage Area (Sq miles)	40	1.5	6.02	53
Hazard Type	High	High	High	Significant

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Corona

Scenario: M6.7 on Elsinore Fault
Epicenter in/near Southwest of Corona

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$121,777.43
Non-Structural Damage	$495,846.69
Building Damage	$617,624.08
Contents Damage	$185,940.89
Inventory Loss	$10,987.63
Relocation Cost	$2,723.25
Income Loss	$25,377.07
Rental Income Loss	$37,225.37
Wage Loss	$30,086.29
Total Loss	$909,964.55

Commercial Casualties for Daytime Event	
Medical Aid	62
Hospital Treatment	20
Life-Threatening Severity	3
Death	7

Commuting Casualties for Daytime Event	
Medical Aid	0
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

L	Aggressive public education campaign in light of predictions
L	Generate new literature for dissemination to:
L	◊ Government employees
L	◊ Businesses
L	◊ Hotel/motel literature
L	◊ Local radio stations for education
L	◊ Public education via utilities
L	◊ Identify/create television documentary content
H	Improve the Emergency Alert System (EAS)
H	◊ Consider integration with radio notification systems
H	◊ Upgrade alerting and warning systems for hearing impaired
H	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
L	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
M	Evaluate re-enforcing reservoir concrete bases
L	Evaluate EOCs for seismic stability
M	Install earthquake cutoffs at reservoirs
M	Install earthquake-warning devices at critical facilities
M	Develop a dam inundation plan for new Diamond Valley Reservoir
M	Earthquake retrofitting
H	◊ Bridges/dams/pipelines
H	◊ Government buildings/schools
H	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections
M	Ensure Uniform Building Code compliance
M	◊ Update to current compliance when retrofitting
L	Insurance coverage on public facilities
L	Funding for non-structural abatement (Earthquake kits, etc.)
L	Pre - identify empty commercial space for seismic re-location

L	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
L	Mapping of liquefaction zones
L	Incorporate County geologist data into planning
L	Backup water supplies for hospitals
M	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
L	Fire sprinkler ordinance for all structures
L	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
L	◊ Links to jurisdictions
L	◊ Alerting information
L	◊ Volunteer information
L	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
H	Harden repeater sites
H	Continue existing interoperability project
N/A	Strengthen/harden
L	Relocate
H	Redundancy
M	Mobile repeaters

FLOODS

L	Update development policies for flood plains
L	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
L	Develop greenbelt requirements in new developments
L	Update weather pattern/flood plain maps
L	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
L	Required water flow/runoff plans for new development
L	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
L	Create map of flood channels/diversions/water systems etc
L	Require digital floor plans on new non-residential construction
M	Upgrade dirt embankments to concrete

L	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
L	Increase sandbag distribution capacities
L	Develop pre-planned response plan for floods
M	◊ Evacuation documentation
M	◊ Re-examine historical flooding data for potential street re-design
L	Training for city/county PIOs about flood issues
L	Warning systems - ensure accurate information provided
L	◊ Publicize flood plain information (website?)
L	◊ Install warning/water level signage
L	◊ Enhanced public information
L	◊ Road closure compliance
L	◊ Shelter locations
L	◊ Pre-event communications
L	Look at County requirements for neighborhood access
L	◊ Secondary means of ingress/egress
M	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
L	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
M	Riverbed maintenance
M	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
M	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
L	Traffic light protection
M	Upkeep of diversionary devices
M	Install more turn-off valves on pipelines
M	Backup generation facilities
M	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
M	◊ Networking of agencies for weed abatement
M	Develop strategic plan for forest management
M	Public education on wildfire defense
M	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information
M	Enhanced fire fighting equipment
L	Fire spotter program/red flag program

L	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
L	Public education program
L	◊ Weather reporting/alerting
M	◊ Building protection
L	◊ Respiration
L	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
L	Fuel/dead tree removal
L	Strategic pre-placement of fire fighting equipment
L	Establish FEMA coordination processes based on ICS
L	Brush clearings around repeaters
M	Research new technologies for identifying/tracking fires
M	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
L	Clear out abandoned vehicles from oases
H	Code enforcement
H	Codes prohibiting fireworks
H	Fuel modification/removal
L	Evaluate building codes
M	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
M	Wetlands mosquito mitigation (West Nile Virus)
M	Insect control study
M	Increase County Vector Control capacities
L	General public drought awareness
L	◊ Lawn watering rotation
M	Develop County drought plan
M	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement

N/A	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
H	Improved notification plan on runaway trains
M	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
H	Terrorism training/equipment for first responders
H	◊ Terrorism planning/coordination
M	◊ Staffing for terrorism mitigation
L	Create a SONGS regional planning group
L	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
M	Develop plan for supplemental water sources
L	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
M	ID mutual aid agreements
M	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
L	Public education
L	◊ Bi-lingual signs
L	◊ Blackout information
M	Notification system for rail traffic - container contents
H	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Corona
Contact: Lynn Rowe
Phone: 951-736-2458

MITIGATION STRATEGY INFORMATION

Proposal Name:

Urban Wildland Interface Master Plan

Proposal Location:

City of Corona and interface jurisdictions

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
X	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History

List any previous disaster related events (dates, costs, etc)

January 1, 2003 to December 31, 2003; Corona Fire Department responded to 105 reports of vegetation fire. Various historical interface vegetation fires have occurred. According to the Nature Conservancy, the Santa Ana Mountain Range in the Cleveland National Forest is the largest intact natural landscape in Southern California.

Corona has been identified as a community at risk, according to FEMA Gegion IX Community Status list. The risk to the community is not only from wildfire, but also from flooding that occurs when a fire ravaged area con no longer retain the soil. The Wildland Interface plan will provide specific guidance on how to achieve the goals set forth in the city's General Plan, 2003, p 190.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

The City of Corona has approximately 12 miles of interface with the Cleveland national Forest and approximately 10 miles of interface with State or County Responsibility Area. Presently, there is no comprehensive master plan to address fire protection strategies in these rapidly developing interface zones. Additionally, there is little coordination with other invested stake-holders, such as the Cleveland National forest, the City of Corona Planning Department and /or the Nature Conservancy, for example. Construction standards, development impact on threatened and endangered species, public access and other planning issues need to be incorporated into an Urban Wildland Interface Master Plan. This Master Plan will identify and coordinate all future efforts for planning and development within this corridor.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

X	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
X	Hazard Mitigation Funds

	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: **City of Corona**		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES __X__ NO _____**	
Current Population in Jurisdiction or Served	141,000	Projected Population in Jurisdiction or Served - in 2010	148,300
Current Sq Miles in Jurisdiction or Served	38.54 Sq miles	Projected Sq Miles in Jurisdiction or Served - in 2010	
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	Yes	Ordinance No. 2429 Ordinance No. 1973, 2077 Corona Municipal Code Chapters 2.52, 3.36	
What is the number one land issue your agency will face in the next five years			
Approximate Number of Homes/Apts/etc.	43,807	Projected Number of Homes/Apts/etc.- in 2010	45,000
Approximate Total Residential Value		Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses	4,900	Projected Number of Commercial Businesses - in 2010	
Approximate Percentage of Homes/Apts/etc in flood hazard zones	.7%	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	.9%
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones	2.8%	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	3%
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones	.5%	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	1%
Approximate Percentage of Commercial Businesses in flood hazard zones	.7%	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	.9%
Approximate Percentage of Commercial Businesses in earthquake hazard zones	.3%	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	.5%
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	0	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones		Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	0	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	.5%
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance? N/A	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: City of Corona	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: County of Riverside**	**Date of Completion:**

Local Point of Contact: Lynn Rowe	**Address:** 815 West Sixth Street Corona, CA 92882
Title: Disaster Preparedness Analyst	
Agency: Corona Fire Department	
Phone Number: 951-736-2458	**E-Mail:** Lynn.Rowe@ci.corona,ca.us

	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part I General	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	Part II Corona Supplemental - Ordinance No. 2429 Of Chapter 2.52 of the Corona Municipal Code	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II - Corona Section	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pg 28-40 Flooding Pg 41-53 Earthquakes Pg 54-66 Extreme Weather 67-76 HazMat Incidents 94-101 Transportation 102-110 Pipeline 111-114 Blackouts 115-118		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**[No]/[Yes]** If yes, where in MJP: Part II - Corona Section	**[N] [S]**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part II - Corona Section	**[N] [S]**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part II - Corona Section	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part II - Corona Section Supplemental Questionnaire / HAZUS Map	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part II - Corona Section Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c) (3) (iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Part II – Corona Section Mitigation Strategy Proposal	**[N] [S]**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I Pages 38-101		
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part II - Corona Section Supplemental Questionnaire	**[N] [S]**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.			

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Desert Hot Springs

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		DESERT HOT SPRINGS		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	Emergency Program Manager		
First Name:	Ernie	Last Name:	Calderon	
Agency Address:	Street:	65950 Pierson Blvd.		
	City:	Desert Hot Springs		
	State:	CA		
	Zip:	92240		
Contact Phone	760-2514921		FAX	760-251-7896
E-mail	e.calderon@ci.desert-hot-springs.ca.us			

Population Served	17,200	Square Miles Served	26

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	3/7/1998

Does your organization have a disaster/emergency operations plan?	NO
What year was your plan last updated?	3/7/1998
Do you have a recovery annex or section in your plan?	NO
Do you have a terrorism/WMD annex or section in your plan?	NO

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**NO**
NEAR FLOOD PLAIN	**NO**
NEAR RAILROAD TRACKS	**NO**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**NO**
DOWNSTREAM OF A LAKE	**NO**
DOWNSTREAM FROM A RESERVOIR	**NO**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**NO**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**NO**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**NO**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	
HAVE BEEN DAMAGED BY FLOOD	
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	
HAVE BEEN DAMAGED BY FOREST FIRE	
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	
HAVE BEEN IMPACTED BY A PIPELINE EVENT	

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	
NEAR FLOOD PLAIN	**NO**
NEAR RAILROAD TRACKS	
NEAR A DAM	
UPSTREAM FROM A DAM	
DOWNSTREAM FROM A DAM	
DOWNSTREAM OF A LAKE	
DOWNSTREAM FROM A RESERVOIR	
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	
ON AN EARTHQUAKE FAULT	
NEAR AN EARTHQUAKE FAULT	
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	
IN A FOREST AREA	
NEAR A FOREST AREA	
NEAR A MAJOR HIGHWAY	
A HAZARDOUS WASTE FACILITY	
NEAR A HAZARDOUS WASTE FACILITY	
A HAZARDOUS STORAGE FACILITY	
NEAR A HAZARDOUS STORAGE FACILITY	
NON REINFORCED BUILDINGS	
A MAJOR GAS/OIL PIPELINE	
NEAR A MAJOR GAS/OIL PIPELINE	

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	**NO**
COULD BE CONSIDERED A BIO-HAZARD RISK	**NO**

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
DESERT HOT SPRINGS	Fault	Sam Amdreas	No	Yes
DESERT HOT SPRINGS	Lake	Country Lake	Yes	No
DESERT HOT SPRINGS	Pipeline	Along I-10	No	Yes
DESERT HOT SPRINGS	Railroad Track	Santa Fe	No	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Desert Hot Springs

Scenario: M7.1 on San Andreas Fault
Epicenter Northeast of Cathedral City

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$19,091.54
Non-Structural Damage	$83,640.43
Building Damage	$102,731.96
Contents Damage	$22,632.09
Inventory Loss	$188.26
Relocation Cost	$443.48
Income Loss	$2,005.40
Rental Income Loss	$6,124.59
Wage Loss	$2,394.82

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
M	Generate new literature for dissemination to:
M	◊ Government employees
M	◊ Businesses
M	◊ Hotel/motel literature
L	◊ Local radio stations for education
L	◊ Public education via utilities
L	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
N/A	◊ Consider integration with radio notification systems
N/A	◊ Upgrade alerting and warning systems for hearing impaired
N/A	◊ Training and maintenance
H	Procure earthquake-warning devices for critical facilities
H	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
H	Evaluate re-enforcing reservoir concrete bases
N/A	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
H	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
H	◊ Bridges/dams/pipelines
H	◊ Government buildings/schools
H	◊ Mobile home parks
H	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
N/A	Ensure Uniform Building Code compliance
M	◊ Update to current compliance when retrofitting
N/A	Insurance coverage on public facilities
H	Funding for non-structural abatement (Earthquake kits, etc.)

N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
M	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals
N/A	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
N/A	Fire sprinkler ordinance for all structures
H	Evaluate adequacy of reservoir capacity for sprinkler systems
N/A	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
M	◊ Links to jurisdictions
M	◊ Alerting information
M	◊ Volunteer information
H	Evaluate depths of aquifers/wells for adequacy during quakes
H	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
H	Harden repeater sites
M	Continue existing interoperability project
H	Strengthen/harden
H	Relocate
M	Redundancy
H	Mobile repeaters

FLOODS

H	Update development policies for flood plains
H	Public education on locations of flood plains
H	Develop multi-jurisdictional working group on floodplain management
	Develop greenbelt requirements in new developments
H	Update weather pattern/flood plain maps
	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
H	Perform GIS mapping of flood channels, etc.
H	Install vehicular crossing gates/physical barriers for road closure
H	Maintenance of storm sewers/flood channels
H	Create map of flood channels/diversions/water systems etc
	Require digital floor plans on new non-residential construction

H	Upgrade dirt embankments to concrete
	Conduct countywide needs study on drainage capabilities
	Increase number of pumping stations
	Increase sandbag distribution capacities
	Develop pre-planned response plan for floods
	◊ Evacuation documentation
	◊ Re-examine historical flooding data for potential street re-design
H	Training for city/county PIOs about flood issues
	Warning systems - ensure accurate information provided
	◊ Publicize flood plain information (website?)
	◊ Install warning/water level signage
	◊ Enhanced public information
	◊ Road closure compliance
	◊ Shelter locations
	◊ Pre-event communications
	Look at County requirements for neighborhood access
	◊ Secondary means of ingress/egress
	Vegetation restoration programs
	Ensure critical facilities are hardened/backed up
	Hardening water towers
	Terrorism Surveillance - cameras at reservoirs/dams
	Riverbed maintenance
	Evaluate existing lift stations for adequacy
	Acquisition of property for on-site retention
	Evaluate regulations on roof drainage mechanisms
	Erosion-resistant plants
H	Traffic light protection
	Upkeep of diversionary devices
H	Install more turn-off valves on pipelines
H	Backup generation facilities
	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
M	◊ Networking of agencies for weed abatement
L	Develop strategic plan for forest management
L	Public education on wildfire defense
H	Encourage citizen surveillance and reporting
H	Identify hydrants with equipment ownership information
H	Enhanced fire fighting equipment

L	Fire spotter program/red flag program
L	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
M	Volunteer home inspection program
M	Public education program
L	◊ Weather reporting/alerting
L	◊ Building protection
L	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
L	Fuel/dead tree removal
H	Strategic pre-placement of fire fighting equipment
H	Establish FEMA coordination processes based on ICS
H	Brush clearings around repeaters
H	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
H	"Red Tag" homes in advance of event
H	Provide fire-resistant gel to homeowners
H	Involve insurance agencies in mitigation programs
H	Clear out abandoned vehicles from oases
H	Code enforcement
H	Codes prohibiting fireworks
H	Fuel modification/removal
H	Evaluate building codes
H	Maintaining catch basins

OTHER HAZARDS

	Improve pipeline maintenance
	Wetlands mosquito mitigation (West Nile Virus)
	Insect control study
	Increase County Vector Control capacities
	General public drought awareness
	◊ Lawn watering rotation
	Develop County drought plan
	Mitigation of landslide-prone areas
	Develop winter storm sheltering plan
	Ease permitting process for building transmission lines
	Evaluate restrictions on dust/dirt/generating activities during wind seasons
	Rotational crop planning/soil stabilization

	Enhance agricultural checkpoint enforcement
	Agriculture - funding of detection programs
	Communications of pipeline maps (based on need to know)
	Improved notification plan on runaway trains
	Improve/maintain blackout notification plan.
	Support business continuity planning for utility outages
	Terrorism training/equipment for first responders
	◊ Terrorism planning/coordination
	◊ Staffing for terrorism mitigation
	Create a SONGS regional planning group
	◊ Include dirty bomb planning
	Cooling stations - MOUs in place
	Fire Ant eradication program
	White Fly infestation abatement/eradication program
	Develop plan for supplemental water sources
	Public education on low water landscaping
	Salton Sea desalinization
	Establish agriculture security standards (focus on water supply)
	ID mutual aid agreements
	Vulnerability assessment on fiber-optic cable
	Upgrade valves on California aqueduct
	Public education
	◊ Bi-lingual signs
	◊ Blackout information
	Notification system for rail traffic - container contents
	Control and release of terrorism intelligence
	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Desert Hot Springs	
Contact:	Ernie Calderon, Emergency Services Manager
Phone:	(760) 251-4921

MITIGATION STRATEGY INFORMATION

Proposal Name:

Master Drainage Study

Proposal Location:

City Limits and Sphere of Influence

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History

In the past 10 years the City and County have spent over 2.3 million dollars to improve drainage and flooding in the hillside and in the central city areas, part of which is in the Mission Creek Channel, The Little Morongo Channel, and the Verbena Channel. The City's Civic Center and Local Disaster Centers are located in parts of Flood Zone AO and Zone X. We have significantly reduced the Flood Hazards for this area by implementing Flood Control Devices. We are in currently in the process of updating our Flood Plain Maps for the east portion of the city. The last Map was created in May of 1985.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

Remapping the Flood zones is required to show the true condition of the Flood zones. Currently we are in the design process of a new City Hall and Civic Center which will hold the Emergency Operation Center. I.e. Flood zone AO and X which we feel no longer exists.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

	Unfunded project - funds are not available for the project at this time
X	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Pre-Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine its cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Desert Hot Springs, Ca		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES XX NO**	
Current Population in Jurisdiction or Served	17,800	Projected Population in Jurisdiction or Served - in 2010	32,000
Current Sq Miles in Jurisdiction or Served	26	Projected Sq Miles in Jurisdiction or Served - in 2010	35
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	YES	If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years	Water	Water	
Approximate Number of Homes/Apts/etc.	2300	Projected Number of Homes/Apts/etc.- in 2010	6900
Approximate Total Residential Value	300,000	Projected Residential Total Value - in 2010	500,000
Approximate Number of Commercial Businesses	60	Projected Number of Commercial Businesses - in 2010	80
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	30 $90,000	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	10 $50,000
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	15 $45,000	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	15 $75,000
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	80 $240,000	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	50 $250,000
Approximate Percentage of Commercial Businesses in flood hazard zones	10	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	10
Approximate Percentage of Commercial Businesses in earthquake hazard zones	80	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	80
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	5	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	5
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	0	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	0	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	YES	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes? Yes			

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **City of Desert Hot Springs**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 8, 2004**
Local Point of Contact: **Ernie Calderon**		**Address:** **65950 Pierson Blvd.** **Desert Hot Springs, Ca. 92240**
Title: **Emergency Program Manager**		
Agency: **City of Desert Hot Springs**		
Phone Number: **(760) 251-4921**		**E-Mail: e.calderon@ci.desert-hot-springs.ca.us**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 3-7**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	Part II, Desert Hot Springs Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Desert Hot Springs Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Desert Hot Springs Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Desert Hot Springs Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Insect Infestation Pages 81 – 84 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Airline / airport emergencies Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Part II, Desert Hot Springs Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Desert Hot Springs Section	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Desert Hot Springs Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Desert Hot Springs Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Hemet

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		HEMET		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	Emergency Services Coordinator		
First Name:	Joe	Last Name:	Glenn	
Agency Address:	Street:	445 East Florida Avenue		
	City:	Hemet		
	State:	CA		
	Zip:	92543		
Contact Phone	951-765-2451		FAX	951-765-2328
E-mail	jglenn@cityofhemet.org			

Population Served	62,200	Square Miles Served	25.97

Does your organization have a general plan?	NO
Does your organization have a safety component to the general plan?	NO
What year was your plan last updated?	

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	1998
Do you have a recovery annex or section in your plan?	NO
Do you have a terrorism/WMD annex or section in your plan?	NO

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	**YES**
AIRPORT NEXT TO JURISDICTION	**NO**
DAIRY INDUSTRY	**NO**
POULTRY INDUSTRY	**NO**
CROPS/ORCHARDS	**YES**
DAMS IN JURISDICTION	**YES**
DAMS NEXT TO JURISDICTION	**YES**
LAKE/RESERVOIR IN JURISDICTION	**YES**
LAKE/RESERVOIR NEAR JURISDICTION	**YES**
JURISDICTION IN FLOOD PLAIN	**YES**
CONTROLLED FLOOD CONTROL CHANNEL	**YES**
UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
EARTHQUAKE FAULTS IN JURISDICTION	**YES**
EARTHQUAKE FAULTS NEXT TO JURISDICTION	**YES**
MOBILE HOME PARKS	**YES**
NON-REINFORCED FREEWAY BRIDGES	**NO**
NON-REINFORCED BRIDGES	**NO**
BRIDGES IN FLOOD PLAIN	**NO**
BRIDGES OVER OR ACROSS RIVER/STREAM	**NO**
ROADWAY CROSSING RIVER/STREAM	**NO**
NON REINFORCED BUILDINGS	**YES**
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	**YES**
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	**NO**
FOREST AREA IN JURISDICTION	**NO**
FOREST AREA NEXT TO JURISDICTION	**YES**
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	**NO**
MAJOR GAS/OIL PIPELINES IN JURISDICTION	**NO**
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	**NO**
RAILROAD TRACKS IN JURISDICTION	**YES**
RAILROAD TRACKS NEXT TO JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	**NO**

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**YES**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**YES**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**NO**
DOWNSTREAM OF A LAKE	**YES**
DOWNSTREAM FROM A RESERVOIR	**NO**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**NO**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**YES**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**NO**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	
HAVE BEEN DAMAGED BY FLOOD	
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	
HAVE BEEN DAMAGED BY FOREST FIRE	
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	
HAVE BEEN IMPACTED BY A PIPELINE EVENT	

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	YES
NEAR FLOOD PLAIN	YES
NEAR RAILROAD TRACKS	YES
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	YES
DOWNSTREAM OF A LAKE	NO
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	NO
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
HEMET	Dam	Diamond Valley Lake	Yes	Yes
HEMET	Fault	San Jacinto Fault Zone	Yes	Yes
HEMET	Flood Channel	Unknown	Yes	No
HEMET	Lake	Diamond Valley Lake	Yes	Yes
HEMET	Railroad Track	Unknown	Yes	No
HEMET	River	San Jacinto River	No	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Hemet

Scenario: M7.1 on San Jacinto Fault
Epicenter Between San Jacinto & Beaumont

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$79,038.50
Non-Structural Damage	$317,404.28
Building Damage	$396,442.78
Contents Damage	$90,629.43
Inventory Loss	$1,766.88
Relocation Cost	$1,701.73
Income Loss	$12,839.28
Rental Income Loss	$22,193.19
Wage Loss	$17,638.23
Total Loss	$543,211.52

Commercial Casualties for Daytime Event	
Medical Aid	45
Hospital Treatment	21
Life-Threatening Severity	5
Death	11

Commuting Casualties for Daytime Event	
Medical Aid	0
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Hemet

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
M	Generate new literature for dissemination to:
L	◊ Government employees
M	◊ Businesses
L	◊ Hotel/motel literature
M	◊ Local radio stations for education
L	◊ Public education via utilities
L	◊ Identify/create television documentary content
L	Improve the Emergency Alert System (EAS)
L	◊ Consider integration with radio notification systems
L	◊ Upgrade alerting and warning systems for hearing impaired
M	◊ Training and maintenance
L	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
H	Provide training to hospital staffs
L	Require earthquake gas shutoffs on remodels/new construction
L	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
L	Install earthquake cutoffs at reservoirs
L	Install earthquake-warning devices at critical facilities
H	Develop a dam inundation plan for new Diamond Valley Reservoir
L	Earthquake retrofitting
L	◊ Bridges/dams/pipelines
L	◊ Government buildings/schools
L	◊ Mobile home parks
M	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
M	Insurance coverage on public facilities

L	Funding for non-structural abatement (Earthquake kits, etc.)
L	Pre - identify empty commercial space for seismic re-location
L	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
M	Mapping of liquefaction zones
M	Incorporate County geologist data into planning
L	Backup water supplies for hospitals
L	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
L	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
M	Website with mitigation/contractor/retrofitting information
M	◊ Links to jurisdictions
M	◊ Alerting information
M	◊ Volunteer information
M	Evaluate depths of aquifers/wells for adequacy during quakes
M	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
H	Harden repeater sites
H	Continue existing interoperability project
H	Strengthen/harden
M	Relocate
H	Redundancy
M	Mobile repeaters

FLOODS

M	Update development policies for flood plains
M	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
M	Develop greenbelt requirements in new developments
M	Update weather pattern/flood plain maps
H	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
M	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
M	Create map of flood channels/diversions/water systems etc

L	Require digital floor plans on new non-residential construction
L	Upgrade dirt embankments to concrete
M	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
L	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
M	◊ Evacuation documentation
M	◊ Re-examine historical flooding data for potential street re-design
L	Training for city/county PIOs about flood issues
M	Warning systems - ensure accurate information provided
L	◊ Publicize flood plain information (website?)
L	◊ Install warning/water level signage
M	◊ Enhanced public information
L	◊ Road closure compliance
L	◊ Shelter locations
L	◊ Pre-event communications
M	Look at County requirements for neighborhood access
M	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
H	Ensure critical facilities are hardened/backed up
M	Hardening water towers
H	Terrorism Surveillance - cameras at reservoirs/dams
M	Riverbed maintenance
M	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
L	Traffic light protection
L	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
L	Backup generation facilities
M	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
H	◊ Networking of agencies for weed abatement
L	Develop strategic plan for forest management
M	Public education on wildfire defense
M	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information

M	Enhanced fire fighting equipment
L	Fire spotter program/red flag program
L	◊ Expand to other utilities
M	Research on insect/pest mitigation technologies
H	Volunteer home inspection program
	Public education program
L	◊ Weather reporting/alerting
M	◊ Building protection
M	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
L	Fuel/dead tree removal
L	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
H	Brush clearings around repeaters
L	Research new technologies for identifying/tracking fires
M	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
L	Clear out abandoned vehicles from oases
H	Code enforcement
H	Codes prohibiting fireworks
M	Fuel modification/removal
M	Evaluate building codes
H	Maintaining catch basins

OTHER HAZARDS

L	Improve pipeline maintenance
H	Wetlands mosquito mitigation (West Nile Virus)
L	Insect control study
H	Increase County Vector Control capacities
M	General public drought awareness
M	◊ Lawn watering rotation
L	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons

L	Rotational crop planning/soil stabilization
L	Enhance agricultural checkpoint enforcement
L	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
M	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
H	Terrorism training/equipment for first responders
H	◊ Terrorism planning/coordination
H	◊ Staffing for terrorism mitigation
M	Create a SONGS regional planning group
M	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
M	Develop plan for supplemental water sources
L	Public education on low water landscaping
L	Salton Sea desalinization
L	Establish agriculture security standards (focus on water supply)
L	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable
L	Upgrade valves on California aqueduct
M	Public education
L	◊ Bi-lingual signs
L	◊ Blackout information
L	Notification system for rail traffic - container contents
H	Control and release of terrorism intelligence
L	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Hemet
Contact: Joseph Glenn
Phone: 951-765-2451

MITIGATION STRATEGY INFORMATION

Proposal Name:

Diamond Valley Lake Inundation Plan

Proposal Location:

Diamond Valley Lake and surrounding communities

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
X	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History

List any previous disaster related events (dates, costs, etc)

Last year, the Metropolitan Water District began the final phase of filling the newly constructed Diamond Valley. Although initial mapping of the flood inundation potential have been developed, the Coty of Hemet's Emergency Operations Plan has not been fully updated to meet this new threat.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the Proposal, any history related to the Proposal. List the activities necessary for its completion in the narrative section below.

With the completion of this Hazard Identification Plan, the City of Hemet now has a better understanding of the threat that the new dam has on the City. With the newly developed dam inundation maps from the County's GIS Department, the City can now complete the planning process for this threat. This planning process will include a review of the maps and other data by all City Departments. There will then be planning meeting to determine what updates need to be made to the City's Disaster Plan as well as the City's General Plan. It is estimated that this will take approximately six top nine months to complete. The only non-internal cost will be the cost of additional updated flood maps from the County's GIS Department. All other costs will be internal personnel and printing costs.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

	Unfunded project - funds are not available for the project at this time
X	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: CITY OF HEMET	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES**		
Current Population in Jurisdiction or Served	65,408	Projected Population in Jurisdiction or Served - in 2010	75,000
Current Sq Miles in Jurisdiction or Served	25.97	Projected Sq Miles in Jurisdiction or Served - in 2010	35.00
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	YES	If yes, please list ordinance or regulation number. City Ord. 1076	
What is the number one land issue your agency will face in the next five years	MSHCP	**Multi-Species Habitat Conservation Plan**	
Approximate Number of Homes/Apts/etc.	25,686	Projected Number of Homes/Apts/etc.- in 2010	27,500
Approximate Total Residential Value	5,137,200,000	Projected Residential Total Value - in 2010	5,500,000,000
Approximate Number of Commercial Businesses	2,016	Projected Number of Commercial Businesses - in 2010	2,250
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	65% $3,339,180,000	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	65% $3,575,000,000
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	100% $5,137,200,000	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	100% $5,500,000,000
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	5% $256,860,000	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	10% $550,000,000
Approximate Percentage of Commercial Businesses in flood hazard zones	65%	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	65%
Approximate Percentage of Commercial Businesses in earthquake hazard zones	100%	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	100%
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	0%	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	5%
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	10	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	15
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	10	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	15
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	YES	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?		YES	

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **City of Hemet**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 20, 2004**
Local Point of Contact: **Joe Glenn**	**Address:** **445 East Florida Avenue** **Hemet, CA 92543**	
Title: **Emergency Services Coordinator**		
Agency: City of Hemet

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 3 -7**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		

Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).	Part II, City of Hemet Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, City of Hemet Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II City of Hemet Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, City of Hemet Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pages 28 – 40 Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Landslides Pages 77 – 80 Insect Infestation Pages 81 – 84 Dam failure Pages 85 – 93 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Airline / airport emergencies Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Part II, City of Hemet Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, City of Hemet Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	

	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II City of Hemet Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, City of Hemet Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**

INDIAN WELLS	Reservoir	Lake Cahuilla	No	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Indian Wells

Scenario: M7.1 on San Andreas Fault, epicenter northeast of Coachella

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$2,899.71
Non-Structural Damage	$14,881.65
Building Damage	$17,781.36
Contents Damage	$5,021.69
Inventory Loss	$81.65
Relocation Cost	$86.94
Income Loss	$1,112.92
Rental Income Loss	$1,044.15
Wage Loss	$1,139.87
Total Loss	$26,268.58

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
H	Generate new literature for dissemination to:
H	◊ Government employees
H	◊ Businesses
H	◊ Hotel/motel literature
H	◊ Local radio stations for education
H	◊ Public education via utilities
H	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
N/A	◊ Consider integration with radio notification systems
N/A	◊ Upgrade alerting and warning systems for hearing impaired
N/A	◊ Training and maintenance
H	Procure earthquake-warning devices for critical facilities
H	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
M	Require earthquake gas shutoffs on remodels/new construction
M	Evaluate re-enforcing reservoir concrete bases
H	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
H	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
H	◊ Bridges/dams/pipelines
H	◊ Government buildings/schools
H	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
H	Insurance coverage on public facilities
H	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
M	Mapping of liquefaction zones
M	Incorporate County geologist data into planning
H	Backup water supplies for hospitals

N/A	Evaluate pipeline seismic resiliency
M	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
H	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
H	Website with mitigation/contractor/retrofitting information
H	◊ Links to jurisdictions
H	◊ Alerting information
H	◊ Volunteer information
M	Evaluate depths of aquifers/wells for adequacy during quakes
N/A	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

	Communications Interoperability
	Harden repeater sites
	Continue existing interoperability project
	Strengthen/harden
	Relocate
	Redundancy
	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
N/A	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
L	Develop greenbelt requirements in new developments
L	Update weather pattern/flood plain maps
L	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
M	Required water flow/runoff plans for new development
M	Perform GIS mapping of flood channels, etc.
M	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
M	Create map of flood channels/diversions/water systems etc
M	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
N/A	Increase sandbag distribution capacities
H	Develop pre-planned response plan for floods
	◊ Evacuation documentation
	◊ Re-examine historical flooding data for potential street re-design
H	Training for city/county PIOs about flood issues
M	Warning systems - ensure accurate information provided
	◊ Publicize flood plain information (website?)

	◊ Install warning/water level signage
	◊ Enhanced public information
	◊ Road closure compliance
	◊ Shelter locations
	◊ Pre-event communications
M	Look at County requirements for neighborhood access
	◊ Secondary means of ingress/egress
M	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
M	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
L	Riverbed maintenance
L	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
M	Traffic light protection
M	Upkeep of diversionary devices
M	Install more turn-off valves on pipelines
M	Backup generation facilities
M	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
H	Encourage citizen surveillance and reporting
M	Identify hydrants with equipment ownership information
H	Enhanced fire fighting equipment
N/A	Fire spotter program/red flag program
	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies
N/A	Volunteer home inspection program
N/A	Public education program
	◊ Weather reporting/alerting
	◊ Building protection
	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
L	Fuel/dead tree removal
L	Strategic pre-placement of fire fighting equipment
L	Establish FEMA coordination processes based on ICS
L	Brush clearings around repeaters

L	Research new technologies for identifying/tracking fires
L	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
M	Involve insurance agencies in mitigation programs
H	Clear out abandoned vehicles from oases
H	Code enforcement
H	Codes prohibiting fireworks
L	Fuel modification/removal
L	Evaluate building codes
L	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
N/A	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
N/A	General public drought awareness
	◊ Lawn watering rotation
N/A	Develop County drought plan
N/A	Mitigation of landslide-prone areas
N/A	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
N/A	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
H	Improve/maintain blackout notification plan.
H	Support business continuity planning for utility outages
M	Terrorism training/equipment for first responders
	◊ Terrorism planning/coordination
	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
	◊ Include dirty bomb planning
H	Cooling stations - MOUs in place
M	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
H	Develop plan for supplemental water sources
M	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
M	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable

N/A	Upgrade valves on California aqueduct
H	Public education
	◊ Bi-lingual signs
	◊ Blackout information
M	Notification system for rail traffic - container contents
M	Control and release of terrorism intelligence
L	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction:	City of Indian Wells
Contact:	Matthew Creason, and Melton Windsor, Public Safety Division
Phone:	(760) 346-2489

MITIGATION STRATEGY INFORMATION

Proposal Name:

Construct an new Emergency Operation Center for the City of Indian Wells

Proposal Location:

City of Indian Wells Public Safety Building

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	Currently the City of Indian Wells operates the Emergency Operation Center in a Sheriff's Departments Substation, which is located in an earthquake fault zone. The facility does not meet current earthquake standards. I addition, the facility has become inadequate to the City's needs to effectively operate a full EOC. During the City's EOC activations in the Earthquake Drills, our Emergency Managers identified that our current level of staffing cannot fit into the EOC. The training for our staff had to be held in two rotations. If a large event was to hit the City of Indian Wells and full activation was required, the E.O.C. we would have to be moved to a larger building at City Hall.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

The City of Indian Wells needs a new EOC that is in a current earthquake standard facility. The new EOC will be able to handle the each Section of the SEMS function and the staff members that are involved in the sections. The new EOC would also have a separate area for meeting for the Management Teams, PIO room for adequate news media meetings, Radio Room, a Fax Center and a Satellite Communication Center for the communication issues.

The EOC would also be able to house, store the emergency food and water, paper supplies a Television and a copier. Each department would have access to Internet terminals to send e-mails and to access the RIMS programs. The computers would allow the Finance Department the ability to track all of the City's expenditures on the computers. This would give the City of Indian Wells the ability to create an EOC more effective in relation to the growing staff and a growing population in any Disaster.

As part of this project, the City will begin to look at new locations for an EOC. The project will identify non-risk locations for the new EOC and determine what equipment will be needed. Once a location has been determined, facility costs will be established and various funding sources will be identified.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency: City of Indian Wells

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

	Unfunded project - funds are not available for the project at this time
X	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: City of Indian Wells		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES XX NO**	
Current Population in Jurisdiction or Served	4003	Projected Population in Jurisdiction or Served - in 2010	5833
Current Sq Miles in Jurisdiction or Served	12.9	Projected Sq Miles in Jurisdiction or Served - in 2010	12.9
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	YES	If yes, please list ordinance or regulation number. CHAPTER 2.32 CIVIL DEFENSE AND DISASTER PREPAREDNESS	
What is the number one land issue your agency will face in the next five years	Water issues		
Approximate Number of Homes/Apts/etc.	4346	Projected Number of Homes/Apts/etc.- in 2010	5261
Approximate Total Residential Value	3.13 billion	Projected Residential Total Value - in 2010	4 billion

Approximate Percentage of Commercial Businesses in earthquake hazard zones		Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	5
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	4	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	5
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	4	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	5
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	4	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	5
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Indian Wells**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 8, 2004**
Local Point of Contact: **Matt Creason and Mel Windsor**	**Address:** **440850 El Dorado Drive** **Indian Wells, Ca 92210**

However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Indian Wells Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Indian Wells Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Landslides Pages 77 – 80 Insect Infestation Pages 81 – 84 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Civil unrest Pages 129 – 131 Terrorism Pages 135 – 139 Part II, Indian Wells Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Indian Wells Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Indian Wells Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Indian Wells Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Indio

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		INDIO		
Type Agency/Jurisdiction:		City Indio		
Contact Person:	Title:	Administrative Proposal Manager		
First Name:	Mark	Last Name:	Wasserman	
Agency Address:	Street:	100 Civic Center Mall		
	City:	Indio		
	State:	CA		
	Zip:	92202		
Contact Phone	760-342-6500		FAX	760-342-6597
E-mail	mwasserman@indio.org			

Population Served	54,500
Square Miles Served	26

Does your organization have a general plan?	Yes
Does your organization have a safety component to the general plan?	Yes
What year was your plan last updated?	

Does your organization have a disaster/emergency operations plan?	Yes
What year was your plan last updated?	2004
Do you have a recovery annex or section in your plan?	No
Do you have a terrorism/WMD annex or section in your plan?	No

ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	Y
COULD BE CONSIDERED A BIO-HAZARD RISK	Y

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
INDIO	Aqueduct	Coachella Canal	Yes	No
INDIO	Fault	San Andreas	No	Yes
INDIO	Fault	San Jacinto	No	Yes
INDIO	Flood Channel	Coachella Valley Stormwater Channel	Yes	No
INDIO	Flood Channel	La Quinta Evacuation Channel	Yes	No
INDIO	Pipeline	10 Freeway pipelines	No	Yes
INDIO	Reservoir	Lake Cahuilla	No	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Indio

Scenario: M7.1 on San Andreas Fault, epicenter northeast of Coachella

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$16,181.42
Non-Structural Damage	$72,866.84
Building Damage	$89,048.27
Contents Damage	$24,665.11
Inventory Loss	$541.10
Relocation Cost	$443.55
Income Loss	$4,022.25
Rental Income Loss	$5,418.83
Wage Loss	$5,432.16
Total Loss	$129,571.28

Commercial Casualties for Daytime Event	
Medical Aid	7
Hospital Treatment	2
Life-Threatening Severity	0
Death	1

Commuting Casualties for Daytime Event	
Medical Aid	0
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
L	Generate new literature for dissemination to:
L	◊ Government employees
L	◊ Businesses
L	◊ Hotel/motel literature
L	◊ Local radio stations for education
L	◊ Public education via utilities
L	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
L	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
L	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
L	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
L	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
L	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
L	◊ Government buildings/schools
L	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
L	Insurance coverage on public facilities
L	Funding for non-structural abatement (Earthquake kits, etc.)
L	Pre - identify empty commercial space for seismic re-location

L	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
N/A	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals
N/A	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
M	Fire sprinkler ordinance for all structures
N/A	Evaluate adequacy of reservoir capacity for sprinkler systems
N/A	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
L	◊ Links to jurisdictions
L	◊ Alerting information
L	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
M	Harden repeater sites
M	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
M	Redundancy
M	Mobile repeaters

FLOODS

L	Update development policies for flood plains
L	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
L	Develop greenbelt requirements in new developments
L	Update weather pattern/flood plain maps
L	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
L	Required water flow/runoff plans for new development
L	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
L	Maintenance of storm sewers/flood channels
L	Create map of flood channels/diversions/water systems etc
L	Require digital floor plans on new non-residential construction
L	Upgrade dirt embankments to concrete

L	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
L	Increase sandbag distribution capacities
L	Develop pre-planned response plan for floods
	◊ Evacuation documentation
	◊ Re-examine historical flooding data for potential street re-design
L	Training for city/county PIOs about flood issues
L	Warning systems - ensure accurate information provided
	◊ Publicize flood plain information (website?)
	◊ Install warning/water level signage
	◊ Enhanced public information
	◊ Road closure compliance
	◊ Shelter locations
	◊ Pre-event communications
L	Look at County requirements for neighborhood access
	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
L	Ensure critical facilities are hardened/backed up
L	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
L	Riverbed maintenance
L	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
L	Traffic light protection
L	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
L	Backup generation facilities
L	Identify swift water rescue capabilities across County

WILDFIRES

L	Aggressive weed abatement program
	◊ Networking of agencies for weed abatement
L	Develop strategic plan for forest management
L	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information
L	Enhanced fire fighting equipment
L	Fire spotter program/red flag program

	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
L	Public education program
	◊ Weather reporting/alerting
	◊ Building protection
	◊ Respiration
L	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
L	Fuel/dead tree removal
L	Strategic pre-placement of fire fighting equipment
L	Establish FEMA coordination processes based on ICS
L	Brush clearings around repeaters
L	Research new technologies for identifying/tracking fires
L	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
L	Clear out abandoned vehicles from oases
L	Code enforcement
L	Codes prohibiting fireworks
L	Fuel modification/removal
L	Evaluate building codes
L	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
H	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
L	General public drought awareness
	◊ Lawn watering rotation
N/A	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
L	Rotational crop planning/soil stabilization
L	Enhance agricultural checkpoint enforcement

L	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
L	Improve/maintain blackout notification plan.
L	Support business continuity planning for utility outages
L	Terrorism training/equipment for first responders
	◊ Terrorism planning/coordination
	◊ Staffing for terrorism mitigation
L	Create a SONGS regional planning group
	◊ Include dirty bomb planning
M	Cooling stations - MOUs in place
M	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
N/A	Develop plan for supplemental water sources
L	Public education on low water landscaping
N/A	Salton Sea desalinization
L	Establish agriculture security standards (focus on water supply)
L	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable
L	Upgrade valves on California aqueduct
M	Public education
	◊ Bi-lingual signs
	◊ Blackout information
N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: The City of Indio
Contact: Mark Wasserman
Phone: (760) 342-6500

MITIGATION STRATEGY INFORMATION

Proposal Name:

Review and Assessment Mapping of the City Flood and Storm Water Improvements

Proposal Location:

City Sphere of Influence

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History

List any previous disaster related events (dates, costs, etc)

Storm water run-off over the last several years has created numerous flooded streets and intersections, causing a hazard to the driving public as well as a potential threat of flooding homes and businesses. In the past six years, the City has spent millions of dollars to improve storm water drainage and floodwater flow throughout the city. This work, plus the new land development in the incorporated areas of the city and the unincorporated areas just outside the city limits has dramatically changed the storm water flow and drainage in the city.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

With the recent changes in the flow of storm water in the City, the flood mapping for the City and its immediate area need updating. These updated maps will help in the planning process for both Emergency Management and future development in the City. Updated maps will also potentially help the residents and businesses of the community with their insurance rates. Many insurance companies base their insurance rates on older FEMA flood maps. These maps do not show current development or local improvements in the storm drain systems.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

	Unfunded proposal - funds are not available for the proposal at this time
	Local jurisdiction General Fund
X	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Pre-Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine its cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: City of Indio		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES X NO**	
Current Population in Jurisdiction or Served	59,000	Projected Population in Jurisdiction or Served - in 2010	130,000
Current Sq Miles in Jurisdiction or Served	24.8	Projected Sq Miles in Jurisdiction or Served - in 2010	29
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	No	If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years	Residential Growth		
Approximate Number of Homes/Apts/etc.	25,000	Projected Number of Homes/Apts/etc.- in 2010	50,000
Approximate Total Residential Value	$4.5 Billion	Projected Residential Total Value - in 2010	$10.0 Billion
Approximate Number of Commercial Businesses	2,000	Projected Number of Commercial Businesses - in 2010	3,000
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	50 $2,250,000,000	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	50 $5,000,000,000
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	100 $4,500,000,000	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	100 $10,000,000,000
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	0	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	0
Approximate Percentage of Commercial Businesses in flood hazard zones	50	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	50
Approximate Percentage of Commercial Businesses in earthquake hazard zones	100	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	100
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	0	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	5	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	10
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	25	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	50
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes? Yes			

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: Indio	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 8, 2004**
Local Point of Contact: Mark Wasserman	**Address:** 100 Civic Center Mall Indio, Ca 92202	
Title: Emergency Services Coordinator		
Agency: City of Indio		
Phone Number: 760-342-6530	**E-Mail: mwasserman@indio.org**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	Part II, Indio Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Indio Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Indio Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Indio Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
RISK ASSESSMENT

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Lake Elsinore

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		LAKE ELSINORE		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	ESC		
First Name:	Bill	Last Name:	Payne	
Agency Address:	Street:	130 So. Main St.		
	City:	Lake Elsinore		
	State:	CA		
	Zip:	92530		
Contact Phone	951-674-5170		FAX	
E-mail	bpayne@lake-elsinore.org			

Population Served	33,050
Square Miles Served	38

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	1/1/1990

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	1/1/1990
Do you have a recovery annex or section in your plan?	NO
Do you have a terrorism/WMD annex or section in your plan?	NO

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	**YES**
AIRPORT NEXT TO JURISDICTION	**NO**
DAIRY INDUSTRY	**YES**
POULTRY INDUSTRY	**YES**
CROPS/ORCHARDS	**NO**
DAMS IN JURISDICTION	**NO**

LAKE/RESERVOIR NEAR JURISDICTION	**NO**
JURISDICTION IN FLOOD PLAIN	**YES**
CONTROLLED FLOOD CONTROL CHANNEL	**YES**
UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
EARTHQUAKE FAULTS IN JURISDICTION	**YES**
EARTHQUAKE FAULTS NEXT TO JURISDICTION	**NO**
MOBILE HOME PARKS	**YES**
NON-REINFORCED FREEWAY BRIDGES	**NO**
NON-REINFORCED BRIDGES	**NO**
BRIDGES IN FLOOD PLAIN	**YES**
BRIDGES OVER OR ACROSS RIVER/STREAM	**YES**
ROADWAY CROSSING RIVER/STREAM	**YES**
NON REINFORCED BUILDINGS	**YES**
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	**YES**
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	**NO**
FOREST AREA IN JURISDICTION	**NO**
FOREST AREA NEXT TO JURISDICTION	**YES**
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	**YES**
MAJOR GAS/OIL PIPELINES IN JURISDICTION	**YES**
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	**NO**
RAILROAD TRACKS IN JURISDICTION	**NO**
RAILROAD TRACKS NEXT TO JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	**YES**
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	**NO**

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**NO**
NEAR FLOOD PLAIN	**YES**
NEAR RAILROAD TRACKS	**NO**
NEAR A DAM	**YES**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**YES**
DOWNSTREAM FROM A RESERVOIR	**YES**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**YES**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**YES**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**YES**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**YES**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**YES**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**YES**
HAVE BEEN DAMAGED BY FOREST FIRE	**YES**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**YES**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	YES
NEAR RAILROAD TRACKS	NO
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	YES
DOWNSTREAM OF A LAKE	YES
DOWNSTREAM FROM A RESERVOIR	YES
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	YES
ON AN EARTHQUAKE FAULT	YES
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	YES
IN A FOREST AREA	NO
NEAR A FOREST AREA	YES
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	YES
COULD BE CONSIDERED A BIO-HAZARD RISK	YES

Specific Hazards Summary				
Jurisdiction	**Hazard Type**	**Hazard Name**	**In Jurisdiction?**	**Adjacent to Jurisdiction?**
LAKE ELSINORE	Dam	Canyon Lake Dam	No	No
LAKE ELSINORE	Dam	Diamond Valley Lake Dam	No	No

River	SAN JACINTO RIVER	SAN JACINTO RV
Nearest City	LAKE ELSINORE	LAKE ELSINORE
Height (feet)	37	94
Storage (acre-feet)	178	
Year Built	1959	1928
Drainage Area (Sq mil	1.6	664
Hazard Type	Significant	High

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Lake Elsinore

Scenario: M6.9 on Elsinore Fault
Epicenter Near Lake Elsinore

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$44,661.19
Non-Structural Damage	$186,271.73
Building Damage	$230,932.92
Contents Damage	$59,213.14
Inventory Loss	$1,657.72
Relocation Cost	$1,009.34
Income Loss	$7,945.15
Rental Income Loss	$11,679.34
Wage Loss	$8,542.80
Total Loss	$320,980.37

Commercial Casualties for Daytime Event	
Medical Aid	12
Hospital Treatment	6
Life-Threatening Severity	1
Death	3

Commuting Casualties for Daytime Event	
Medical Aid	0
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Lake Elsinore

Scenario: M6.9 on Elsinore Fault
Epicenter Near Lake Elsinore

Educational Casualties for Daytime Event	
Medical Aid	20
Hospital Treatment	5
Life-Threatening Severity	1
Death	2

Hotels Casualties for Daytime Event	
Medical Aid	0

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
M	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
M	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
H	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
H	Install earthquake cutoffs at reservoirs
M	Install earthquake-warning devices at critical facilities
H	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
	◊ Bridges/dams/pipelines
	◊ Government buildings/schools
	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections
M	Ensure Uniform Building Code compliance
	◊ Update to current compliance when retrofitting
L	Insurance coverage on public facilities
L	Funding for non-structural abatement (Earthquake kits, etc.)
L	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
H	Mapping of liquefaction zones
M	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals

N/A	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
L	Fire sprinkler ordinance for all structures
L	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
M	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

M	Communications Interoperability
L	Harden repeater sites
M	Continue existing interoperability project
	Strengthen/harden
	Relocate
	Redundancy
	Mobile repeaters

FLOODS

H	Update development policies for flood plains
H	Public education on locations of flood plains
H	Develop multi-jurisdictional working group on floodplain management
M	Develop greenbelt requirements in new developments
H	Update weather pattern/flood plain maps
H	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
M	Perform GIS mapping of flood channels, etc.
M	Install vehicular crossing gates/physical barriers for road closure
H	Maintenance of storm sewers/flood channels
M	Create map of flood channels/diversions/water systems etc
L	Require digital floor plans on new non-residential construction
L	Upgrade dirt embankments to concrete
M	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
L	Increase sandbag distribution capacities
H	Develop pre-planned response plan for floods
	◊ Evacuation documentation
	◊ Re-examine historical flooding data for potential street re-design
M	Training for city/county PIOs about flood issues
M	Warning systems - ensure accurate information provided
	◊ Publicize flood plain information (website?)

	◊ Install warning/water level signage
	◊ Enhanced public information
	◊ Road closure compliance
	◊ Shelter locations
	◊ Pre-event communications
M	Look at County requirements for neighborhood access
	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
L	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
L	Riverbed maintenance
L	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
L	Traffic light protection
M	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
M	Backup generation facilities
L	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
	◊ Networking of agencies for weed abatement
L	Develop strategic plan for forest management
L	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information
L	Enhanced fire fighting equipment
M	Fire spotter program/red flag program
	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
M	Public education program
	◊ Weather reporting/alerting
	◊ Building protection
	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
M	Fuel/dead tree removal
M	Strategic pre-placement of fire fighting equipment
N/A	Establish FEMA coordination processes based on ICS
M	Brush clearings around repeaters

L	Research new technologies for identifying/tracking fires
L	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
L	Clear out abandoned vehicles from oases
M	Code enforcement
M	Codes prohibiting fireworks
M	Fuel modification/removal
M	Evaluate building codes
M	Maintaining catch basins

OTHER HAZARDS

L	Improve pipeline maintenance
L	Wetlands mosquito mitigation (West Nile Virus)
M	Insect control study
M	Increase County Vector Control capacities
L	General public drought awareness
	◊ Lawn watering rotation
N/A	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
N/A	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
L	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
L	Terrorism training/equipment for first responders
	◊ Terrorism planning/coordination
	◊ Staffing for terrorism mitigation
M	Create a SONGS regional planning group
	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
L	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
M	Develop plan for supplemental water sources
L	Public education on low water landscaping
N/A	Salton Sea desalinization
L	Establish agriculture security standards (focus on water supply)
M	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable

N/A	Upgrade valves on California aqueduct
L	Public education
	◊ Bi-lingual signs
	◊ Blackout information
N/A	Notification system for rail traffic - container contents
M	Control and release of terrorism intelligence
L	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Lake Elsinore	
Contact:	Bill Payne
Phone:	(951) 674-5170

MITIGATION STRATEGY INFORMATION

Proposal Name:

Crossing barriers on roadways

Proposal Location:

Various locations throughout the city

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
X	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	There are numerous locations throughout the city where floodwater from continuous raining flows across roadways and sidewalks. There have been instances where citizens have tried to cross such situations and have become stuck. This is a substantial safety concern.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the Proposal, any history related to the Proposal. List the activities necessary for its completion in the narrative section below.

The known roadways that continually flood will have protective barriers/gates placed across them prior to floodwaters reaching the area. These devices will keep motorists away from the hazardous situations and divert them to more suitable roadways in time of flooding.

Does your jurisdiction have primary responsibility for the Proposal? If not, what agency does?

Yes	X	No	X	Responsible Agency: Additional partners could include Riverside County Flood Control.

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this Proposal

	Unfunded Proposal - funds are not available for the Proposal at this time
	Local jurisdiction General Fund
X	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Y	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: City of Lake Elsinore		DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES X NO	
Current Population in Jurisdiction or Served	35,358	Projected Population in Jurisdiction or Served - in 2010	43,000
Current Sq Miles in Jurisdiction or Served	38	Projected Sq Miles in Jurisdiction or Served - in 2010	42
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	YES	If yes, please list ordinance or regulation number. Ordinance 920	
What is the number one land issue your agency will face in the next five years	Increasing Development		
Approximate Number of Homes/Apts/etc.	23,000	Projected Number of Homes/Apts/etc.- in 2010	25,000
Approximate Total Residential Value	$9,062,000,000	Projected Residential Total Value - in 2010	$9,850,000,000
Approximate Number of Commercial Businesses	749	Projected Number of Commercial Businesses - in 2010	820
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	15% $1,359,000	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	18% $1,773,000,000
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	100% $9,062,000,000	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	100% $9,850,000,000
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	5% $453,100,000	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	9% $886,500,000
Approximate Percentage of Commercial Businesses in flood hazard zones	10%	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	10%
Approximate Percentage of Commercial Businesses in earthquake hazard zones	100%	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	100%
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	0%	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	1%
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	12	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	12
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	all	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	all
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	YES	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			YES

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction:	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan:**	**Date of Completion:**
City of Lake Elsinore	**Riverside County OES**	

Local Point of Contact: **Bill Payne**	**Address:** **521 North Langstaff** **Lake Elsinore, CA 92530**
Title: **Public Works Director**	
Agency: **Lake Elsinore Public Works.**	
Phone Number: 951-674-5170	**E-Mail:** **bpayne@lake-elsinore.org**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	Part I pages 3-7	[M] [NM]	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.		
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	Yes Part II Lake Elsinore Section Supplemental Questionnaire	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Yes Part II Lake Elsinore Section	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part II City of Lake Elsinore Section		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**[Yes]** If yes, where in MJP: Part II City of Lake Elsinore Section	**[N] [S]**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part II City of Lake Elsinore Section	**[N] [S]**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part II City of Lake Elsinore Section	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part II City of Lake Elsinore Section Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part II City of Lake Elsinore Section Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Part II City of Lake Elsinore Section Hazard Mitigation Strategy Proposal	**[N] [S]**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I pages 38-101		
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part II City of Lake Elsinore Section Supplemental Questionnaire	**[N] [S]**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.			

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of La Quinta

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		LA QUINTA		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	Community Safety Manager		
First Name:	Deby	Last Name:	Conrad	
Agency Address:	Street:	P.O. Box 1504		
	City:	La Quinta		
	State:	CA		
	Zip:	92253-1504		
Contact Phone	(760) 777-7014		FAX	(760) 777-7011
E-mail	dconrad@la-quinta.org			

Population Served	30,450
Square Miles Served	30

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	3/20/2002

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	3/20/2002
Do you have a recovery annex or section in your plan?	NO
Do you have a terrorism/WMD annex or section in your plan?	NO

FOREST AREA IN JURISDICTION	**NO**
FOREST AREA NEXT TO JURISDICTION	**NO**
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	**NO**
MAJOR GAS/OIL PIPELINES IN JURISDICTION	**NO**
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	**NO**
RAILROAD TRACKS IN JURISDICTION	**NO**
RAILROAD TRACKS NEXT TO JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	**NO**

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**NO**
NEAR RAILROAD TRACKS	**NO**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**NO**
DOWNSTREAM OF A LAKE	**NO**
DOWNSTREAM FROM A RESERVOIR	**NO**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**NO**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**YES**
ON AN EARTHQUAKE FAULT	**NO**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**NO**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**YES**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**YES**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**NO**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	NO
NEAR RAILROAD TRACKS	NO
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	NO
DOWNSTREAM OF A LAKE	NO
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	NO
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	NO
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
LA QUINTA	Aqueduct	Coachella Canal	Yes	No
LA QUINTA	Fault	San Andreas	No	Yes
LA QUINTA	Fault	San Jacinto	No	Yes
LA QUINTA	Flood Channel	Coachella Valley Stormwater Channel	Yes	No
LA QUINTA	Flood Channel	La Quinta Evacuation Channel	Yes	No
LA QUINTA	Pipeline	10 Freeway pipelines	No	Yes
LA QUINTA	Reservoir	Lake Cahuilla	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of La Quinta

Scenario: M7.1 on San Andreas Fault, epicenter northeast of Coachella

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$8,631.40
Non-Structural Damage	$37,098.89
Building Damage	$45,730.30
Contents Damage	$10,707.57
Inventory Loss	$97.82
Relocation Cost	$184.89
Income Loss	$699.23
Rental Income Loss	$1,584.26
Wage Loss	$759.34
Total Loss	$59,763.39

Commercial Casualties for Daytime Event	
Medical Aid	0
Hospital Treatment	0
Life-Threatening Severity	0

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
M	Generate new literature for dissemination to:
M	◊ Government employees
M	◊ Businesses
M	◊ Hotel/motel literature
M	◊ Local radio stations for education
M	◊ Public education via utilities
M	◊ Identify/create television documentary content
H	Improve the Emergency Alert System (EAS)
M	◊ Consider integration with radio notification systems
M	◊ Upgrade alerting and warning systems for hearing impaired
M	◊ Training and maintenance
N/A	Procure earthquake-warning devices for critical facilities
N/A	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
N/A	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
N/A	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
N/A	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
N/A	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
N/A	◊ Government buildings/schools
N/A	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
M	Insurance coverage on public facilities
M	Funding for non-structural abatement (Earthquake kits, etc.)

N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
N/A	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals
N/A	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
M	Fire sprinkler ordinance for all structures
N/A	Evaluate adequacy of reservoir capacity for sprinkler systems
N/A	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
N/A	◊ Links to jurisdictions
N/A	◊ Alerting information
N/A	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
N/A	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
M	Harden repeater sites
H	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
N/A	Redundancy
N/A	Mobile repeaters

FLOODS

M	Update development policies for flood plains
M	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
M	Develop greenbelt requirements in new developments
M	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
M	Required water flow/runoff plans for new development
L	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
N/A	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
L	Require digital floor plans on new non-residential construction

L	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
M	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
N/A	◊ Evacuation documentation
N/A	◊ Re-examine historical flooding data for potential street re-design
N/A	Training for city/county PIOs about flood issues
H	Warning systems - ensure accurate information provided
M	◊ Publicize flood plain information (website?)
M	◊ Install warning/water level signage
M	◊ Enhanced public information
M	◊ Road closure compliance
H	◊ Shelter locations
H	◊ Pre-event communications
N/A	Look at County requirements for neighborhood access
H	◊ Secondary means of ingress/egress
M	Vegetation restoration programs
N/A	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
L	Traffic light protection
L	Upkeep of diversionary devices
M	Install more turn-off valves on pipelines
M	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

L	Aggressive weed abatement program
L	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
M	Identify hydrants with equipment ownership information
N	Enhanced fire fighting equipment

L	Fire spotter program/red flag program
N/A	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies
N/A	Volunteer home inspection program
L	Public education program
L	◊ Weather reporting/alerting
L	◊ Building protection
L	◊ Respiration
N/A	Pre-identify shelters/recovery centers/other resources
M	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
N/A	Fuel/dead tree removal
M	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
M	Brush clearings around repeaters
N/A	Research new technologies for identifying/tracking fires
M	Procure/deploy backup communications equipments
N/A	"Red Tag" homes in advance of event
N/A	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
H	Code enforcement
H	Codes prohibiting fireworks
N/A	Fuel modification/removal
H	Evaluate building codes
N/A	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
M	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
L	Increase County Vector Control capacities
L	General public drought awareness
N/A	◊ Lawn watering rotation
N/A	Develop County drought plan
N/A	Mitigation of landslide-prone areas
N/A	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
M	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization

N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
N/A	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
M	Improve/maintain blackout notification plan.
N/A	Support business continuity planning for utility outages
H	Terrorism training/equipment for first responders
M	◊ Terrorism planning/coordination
M	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
L	◊ Include dirty bomb planning
N/A	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
N/A	Develop plan for supplemental water sources
M	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
H	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
M	Public education
L	◊ Bi-lingual signs
M	◊ Blackout information
N/A	Notification system for rail traffic - container contents
H	Control and release of terrorism intelligence
M	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of La Quinta	
Contact:	Deby Conrad, Community Safety Manager
Phone:	(760) 777-7022

MITIGATION STRATEGY INFORMATION

Proposal Name:

Master Drainage Study

Proposal Location:

City sphere of influence

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History

In the past fifteen years, the City has spent millions of dollars to improve drainage in the lower Cove and Village area of the City, part of which was the Bear Creek Channel. The City's Civic Center is located in the AO Floodzone. We believe the AO Floodzone is sigificantly decreased in size if not eliminated altogether. We are currently updating the Floodplain Maps done August 19, 1991.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

Remapping the Flood zones is required to show the true condition of the various Flood zones in the City. We are currently in the design process of a new Emergency Operations Center for the City which is to be located on the Civic Center Campus i.e. Flood zone AO of which we feel no longer exists.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	X	No		Responsible Agency: The City of La Quinta

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

	Unfunded proposal - funds are not available for the proposal at this time
X	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: City of La Quinta	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _X_ NO _____**		
Current Population in Jurisdiction or Served	32,522	Projected Population in Jurisdiction or Served - in 2010	42,500
Current Sq Miles in Jurisdiction or Served	35.05	Projected Sq Miles in Jurisdiction or Served - in 2010	50
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	Yes	If yes, please list ordinance or regulation number. Ordinance 48	
What is the number one land issue your agency will face in the next five years	Flooding		
Approximate Number of Homes/Apts/etc.	15,946	Projected Number of Homes/Apts/etc.- in 2010	20,000
Approximate Total Residential Value	$4,451,501,306.	Projected Residential Total Value - in 2010	$5,000,000,000.
Approximate Number of Commercial Businesses	100	Projected Number of Commercial Businesses - in 2010	125
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	25% $1,112,875,326	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	50% $2,500,000,000
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	100% $4,451,501,306	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	100% $5,000,000,000
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	0%	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	0%
Approximate Percentage of Commercial Businesses in flood hazard zones	40%	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	50%
Approximate Percentage of Commercial Businesses in earthquake hazard zones	100%	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	100%
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	0%	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	0%
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	40%	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	50%
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	100%	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	100%
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0%	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0%
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?		Yes	

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: La Quinta	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 8, 2004**
Local Point of Contact: Deby Conrad	**Address:** 78-495 Called Tapioca La Quinta, Ca 92253	
Title: Community Safety Manager		
Agency: City of La Quinta		
Phone Number: 760-777-7022	**E-Mail:** dconrad@la-quinta.org

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	

PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).	Part II, La Quinta Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, La Quinta Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II La Quinta Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, La Quinta Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Landslides Pages 77 – 80 Insect Infestation Pages 81 – 84 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Civil unrest Pages 129 – 131 Terrorism Pages 135 – 139 Part II, La Quinta Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, La Quinta Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II La Quinta Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, La Quinta Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Moreno Valley

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		MORENO VALLEY		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	Program Manager		
First Name:	LeAnn	Last Name:	Coletta	
Agency Address:	Street:	14177 Frederick Street		
	City:	Moreno Valley		
	State:	CA		
	Zip:	92584		
Contact Phone	951-413-3809		FAX	951-413-3801
E-mail	leannc@moval.org			

Population Served	150,203	Square Miles Served	50

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	6/24/2003

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	6/24/2003
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	YES

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	**NO**
AIRPORT NEXT TO JURISDICTION	**YES**
DAIRY INDUSTRY	**NO**
POULTRY INDUSTRY	**NO**
CROPS/ORCHARDS	**YES**
DAMS IN JURISDICTION	**YES**

FREEWAY/MAJOR HIGHWAY IN JURISDICTION	**YES**
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	**YES**
FOREST AREA IN JURISDICTION	**NO**
FOREST AREA NEXT TO JURISDICTION	**YES**
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	**NO**
MAJOR GAS/OIL PIPELINES IN JURISDICTION	**YES**
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	**YES**
RAILROAD TRACKS IN JURISDICTION	**NO**
RAILROAD TRACKS NEXT TO JURISDICTION	**YES**
HAZARDOUS WASTE FACILITIES IN JURISDICTION	**YES**
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	**YES**
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	**YES**
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	**YES**

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**NO**
NEAR FLOOD PLAIN	**NO**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**YES**
UPSTREAM FROM A DAM	**YES**
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**YES**
DOWNSTREAM FROM A RESERVOIR	**YES**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**NO**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**YES**
A HAZARDOUS STORAGE FACILITY	**YES**
NEAR A HAZARDOUS STORAGE FACILITY	**YES**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**YES**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**YES**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**YES**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	NO
NEAR RAILROAD TRACKS	YES
NEAR A DAM	YES
UPSTREAM FROM A DAM	YES
DOWNSTREAM FROM A DAM	YES
DOWNSTREAM OF A LAKE	YES
DOWNSTREAM FROM A RESERVOIR	YES
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	YES
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	YES
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	YES
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	YES
NEAR A MAJOR GAS/OIL PIPELINE	YES

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	YES
COULD BE CONSIDERED A BIO-HAZARD RISK	YES

Specific Hazards Summary				
Jurisdiction	**Hazard Type**	**Hazard Name**	**In Jurisdiction?**	**Adjacent to Jurisdiction?**
MORENO VALLEY	Dam	Lake Perris Dam	No	Yes
MORENO VALLEY	Dam	Perris Dam	Yes	No
MORENO VALLEY	Dam	Pigeon Pass Dam	Yes	No
MORENO VALLEY	Fault	San Jacinto Fault	Yes	No
MORENO VALLEY	Flood Channel	Oleander Channel	Yes	No
MORENO VALLEY	Flood Channel	Perris Valley Channel	Yes	No
MORENO VALLEY	Flood Channel	Quincy Flood Channel	Yes	No
MORENO VALLEY	Hazmat Storage Location	Ammonia	Yes	No
MORENO VALLEY	Hazmat Storage Location	Chlorine	Yes	No
MORENO VALLEY	Hazmat Storage Location	Fuel	Yes	No
MORENO VALLEY	Hazmat Storage Location	Hazardous Waste	Yes	No
MORENO VALLEY	Lake	Lake Perris	No	Yes
MORENO VALLEY	Pipeline	High Pressure Gas Line	Yes	No
MORENO VALLEY	Pipeline	Jet Fuel Line	Yes	No
MORENO VALLEY	Railroad Track	Santa Fe Railroad	No	Yes
MORENO VALLEY	Railroad Track	Union Pacific	No	Yes
MORENO VALLEY	Reservoir	Poor Man's Resevoir	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Moreno Valley

Scenario: M6.9 on Northern San Jacinto Fault
Epicenter Near Eastern Moreno Valley

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$102,582.50
Non-Structural Damage	$446,425.42
Building Damage	$549,007.94
Contents Damage	$143,035.12
Inventory Loss	$2,048.62
Relocation Cost	$2,505.99
Income Loss	$16,292.15
Rental Income Loss	$27,786.23
Wage Loss	$20,935.74
Total Loss	$761,611.72

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
L	Generate new literature for dissemination to:
L	◊ Government employees
L	◊ Businesses
L	◊ Hotel/motel literature
L	◊ Local radio stations for education
L	◊ Public education via utilities
L	◊ Identify/create television documentary content
H	Improve the Emergency Alert System (EAS)
H	◊ Consider integration with radio notification systems
H	◊ Upgrade alerting and warning systems for hearing impaired
H	◊ Training and maintenance
H	Procure earthquake-warning devices for critical facilities
H	Reinforce emergency response facilities
M	Provide training to hospital staffs
L	Require earthquake gas shutoffs on remodels/new construction
L	Evaluate re-enforcing reservoir concrete bases
H	Evaluate EOCs for seismic stability
L	Install earthquake cutoffs at reservoirs
H	Install earthquake-warning devices at critical facilities
H	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
H	◊ Bridges/dams/pipelines
H	◊ Government buildings/schools
H	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
H	Insurance coverage on public facilities
H	Funding for non-structural abatement (Earthquake kits, etc.)

L	Pre - identify empty commercial space for seismic re-location
L	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
H	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
M	Backup water supplies for hospitals
H	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
L	Fire sprinkler ordinance for all structures
N/a	Evaluate adequacy of reservoir capacity for sprinkler systems
N/a	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
L	◊ Links to jurisdictions
L	◊ Alerting information
L	◊ Volunteer information
L	Evaluate depths of aquifers/wells for adequacy during quakes
H	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
H	Harden repeater sites
H	Continue existing interoperability project
H	Strengthen/harden
M	Relocate
M	Redundancy
M	Mobile repeaters

FLOODS

L	Update development policies for flood plains
L	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
L	Develop greenbelt requirements in new developments
M	Update weather pattern/flood plain maps
L	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
L	Required water flow/runoff plans for new development
M	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
M	Create map of flood channels/diversions/water systems etc
L	Require digital floor plans on new non-residential construction
M	Upgrade dirt embankments to concrete

L	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
L	Increase sandbag distribution capacities
L	Develop pre-planned response plan for floods
L	◊ Evacuation documentation
L	◊ Re-examine historical flooding data for potential street re-design
L	Training for city/county PIOs about flood issues
L	Warning systems - ensure accurate information provided
L	◊ Publicize flood plain information (website?)
L	◊ Install warning/water level signage
L	◊ Enhanced public information
L	◊ Road closure compliance
L	◊ Shelter locations
L	◊ Pre-event communications
L	Look at County requirements for neighborhood access
L	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
M	Hardening water towers
H	Terrorism Surveillance - cameras at reservoirs/dams
M	Riverbed maintenance
L	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
L	Traffic light protection
L	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
M	Backup generation facilities
L	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
M	◊ Networking of agencies for weed abatement
M	Develop strategic plan for forest management
M	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
M	Identify hydrants with equipment ownership information
M	Enhanced fire fighting equipment
L	Fire spotter program/red flag program

L	◊ Expand to other utilities
M	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
M	Public education program
M	◊ Weather reporting/alerting
M	◊ Building protection
M	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
M	Fuel/dead tree removal
H	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
H	Brush clearings around repeaters
L	Research new technologies for identifying/tracking fires
M	Procure/deploy backup communications equipments
M	"Red Tag" homes in advance of event
H	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
M	Clear out abandoned vehicles from oases
M	Code enforcement
M	Codes prohibiting fireworks
M	Fuel modification/removal
L	Evaluate building codes
M	Maintaining catch basins

OTHER HAZARDS

M	Improve pipeline maintenance
M	Wetlands mosquito mitigation (West Nile Virus)
M	Insect control study
M	Increase County Vector Control capacities
L	General public drought awareness
L	◊ Lawn watering rotation
L	Develop County drought plan
M	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
L	Rotational crop planning/soil stabilization
L	Enhance agricultural checkpoint enforcement

L	Agriculture - funding of detection programs
M	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
L	Improve/maintain blackout notification plan.
L	Support business continuity planning for utility outages
M	Terrorism training/equipment for first responders
M	◊ Terrorism planning/coordination
M	◊ Staffing for terrorism mitigation
L	Create a SONGS regional planning group
M	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
L	Develop plan for supplemental water sources
L	Public education on low water landscaping
L	Salton Sea desalinization
M	Establish agriculture security standards (focus on water supply)
L	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable
M	Upgrade valves on California aqueduct
M	Public education
L	◊ Bi-lingual signs
L	◊ Blackout information
L	Notification system for rail traffic - container contents
M	Control and release of terrorism intelligence
L	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Moreno Valley
Contact: LeAnn M. Coletta
Phone: 951.413.3809

MITIGATION STRATEGY INFORMATION

Proposal Name:

Cactus Channel Flood Control

Proposal Location:

Heacock and Cactus, Moreno Valley, CA

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History

The Cactus Channel is a concern of the City of Moreno Valley, March AFB Civil Engineers, and the Joint Powers Authority (JPA). During raining and flooding, the water quickly rises in this area causing a great concern. During prior rains, the March AFB has shut off transformers to avoid damage from rising water.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the Proposal, any history related to the Proposal. List the activities necessary for its completion in the narrative section below.

To avoid damage, we feel that the Cactus Channel needs to be reworked to prevent rising water from damaging surrounding areas. Currently, the channel is an eroded dirt channel. Our plan is to design a concrete wall channel with a sandy bottom. We plan to follow the existing alignment near the Elsworth entrance at the March ARB going easterly towards Heacock for slightly more than one mile.

Does your jurisdiction have primary responsibility for the Proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this Proposal

	Unfunded Proposal - funds are not available for the Proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: City of Moreno Valley		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _X_ NO _____**	
Current Population in Jurisdiction or Served	155,105	Projected Population in Jurisdiction or Served - in 2010	168,298
Current Sq Miles in Jurisdiction or Served	50	Projected Sq Miles in Jurisdiction or Served - in 2010	50
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	Yes	If yes, please list ordinance or regulation number. Ordinance 325, Resolution 91-95, 91-96, 91-97, 95-33, 95-34, 95-68	
What is the number one land issue your agency will face in the next five years	Growth related issues such as traffic		
Approximate Number of Homes/Apts/etc.	41,431	Projected Number of Homes/Apts/etc.- in 2010	45,013
Approximate Total Residential Value	$11,328,395,468.00	Projected Residential Total Value - in 2010	$12,307,814,564.00
Approximate Number of Commercial Businesses	4,719	Projected Number of Commercial Businesses - in 2010	4,766
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	<1% $113,283,954	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	<. 50% $61,539,072
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	100% $11,328,395,468.00	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	100% $12,307,814,564
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	5% $566,419,773	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	5% $615,390,728
Approximate Percentage of Commercial Businesses in flood hazard zones	2%	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	3%
Approximate Percentage of Commercial Businesses in earthquake hazard zones	100%	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	100%
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	0%	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	0%
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	0%	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	0%
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	100%	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	100%
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0%	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0%
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: City of Moreno Valley	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County Operational Area**	**Date of Completion:**

Local Point of Contact: LeAnn M. Coletta	**Address:** 14177 Frederick Street P.O. Box 88005 Moreno Valley, CA 92552
Title: Program Manager	
Agency: City of Moreno Valley	
Phone Number: 951.413.8114	**E-Mail:** leannc@moval.org

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 3 -7**	**M**	

PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).	Part II, City of Moreno Valley Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, City of Moreno Valley Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II City of Moreno Valley Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, City of Moreno Valley Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pages 28 – 40 Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Dam failure Pages 85 – 93 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Airline / airport emergencies Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Civil unrest Pages 129 – 131 Jails and prisons incidents Pages 132 – 134 Terrorism Pages 135 – 139 Part II, City of Moreno Valley Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, City of Moreno Valley Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	

	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II City of Moreno Valley Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, City of Moreno Valley Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Murrieta

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		MURRIETA		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	Battalion Chief		
First Name:	John	Last Name:	Thomas	
Agency Address:	Street:	41825 Juniper Street		
	City:	Murrieta		
	State:	CA		
	Zip:	92562		
Contact Phone	951-461-6156		FAX	951-677-6799
E-mail	jthomas@murrieta.org			

Population Served	71,000
Square Miles Served	34

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	2004
Do you have a recovery annex or section in your plan?	NO
Do you have a terrorism/WMD annex or section in your plan?	NO

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	**NO**
AIRPORT NEXT TO JURISDICTION	**YES**
DAIRY INDUSTRY	**NO**
POULTRY INDUSTRY	**NO**
CROPS/ORCHARDS	**NO**
DAMS IN JURISDICTION	**NO**
DAMS NEXT TO JURISDICTION	**YES**
LAKE/RESERVOIR IN JURISDICTION	**NO**

EARTHQUAKE FAULTS NEXT TO JURISDICTION	**YES**
MOBILE HOME PARKS	**YES**
NON-REINFORCED FREEWAY BRIDGES	**NO**
NON-REINFORCED BRIDGES	**NO**
BRIDGES IN FLOOD PLAIN	**NO**
BRIDGES OVER OR ACROSS RIVER/STREAM	**YES**
ROADWAY CROSSING RIVER/STREAM	**YES**
NON REINFORCED BUILDINGS	**NO**
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	**YES**
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	**YES**
FOREST AREA IN JURISDICTION	**NO**
FOREST AREA NEXT TO JURISDICTION	**NO**
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	**YES**
MAJOR GAS/OIL PIPELINES IN JURISDICTION	**YES**
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	**YES**
RAILROAD TRACKS IN JURISDICTION	**NO**
RAILROAD TRACKS NEXT TO JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	**NO**

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**NO**
NEAR FLOOD PLAIN	**YES**
NEAR RAILROAD TRACKS	**NO**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**YES**
DOWNSTREAM FROM A RESERVOIR	**YES**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**NO**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**YES**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**NO**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**NO**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**NO**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**NO**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**NO**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	YES
NEAR RAILROAD TRACKS	NO
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	YES
DOWNSTREAM OF A LAKE	YES
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	YES
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
MURRIETA	Dam	Diamond Valey Lake	No	Yes
MURRIETA	Fault	Elsinore	Yes	No
MURRIETA	Flood Channel	Line G	Yes	No
MURRIETA	Lake	Diamond Valley Lake	No	Yes
MURRIETA	Lake	Lake Skinner	No	Yes
MURRIETA	River	Murrieta Creek	Yes	No
MURRIETA	Stream	Warm Springs	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools

- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Murrieta

Scenario: M6.7 on Southern Elsinore Fault
Epicenter on Border of Murrieta/Temecula

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$47,785.38
Non-Structural Damage	$201,068.44
Building Damage	$248,853.80
Contents Damage	$68,715.72
Inventory Loss	$1,965.79
Relocation Cost	$1,112.84
Income Loss	$10,673.39
Rental Income Loss	$12,221.76
Wage Loss	$12,787.14
Total Loss	$356,330.40

Commercial Casualties for Daytime Event	
Medical Aid	17
Hospital Treatment	6
Life-Threatening Severity	1
Death	3

Commuting Casualties for Daytime Event	
Medical Aid	0
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

SUMMARIZED HAZUS RESULTS

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

LOW	Aggressive public education campaign in light of predictions
LOW	Generate new literature for dissemination to:
LOW	◊ Government employees
LOW	◊ Businesses
LOW	◊ Hotel/motel literature
LOW	◊ Local radio stations for education
LOW	◊ Public education via utilities
LOW	◊ Identify/create television documentary content
LOW	Improve the Emergency Alert System (EAS)
LOW	◊ Consider integration with radio notification systems
LOW	◊ Upgrade alerting and warning systems for hearing impaired
LOW	◊ Training and maintenance
N/A	Procure earthquake-warning devices for critical facilities
MED	Reinforce emergency response facilities
LOW	Provide training to hospital staffs
N/A	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
LOW	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
N/A	Install earthquake-warning devices at critical facilities
LOW	Develop a dam inundation plan for new Diamond Valley Reservoir
MED	Earthquake retrofitting
MED	◊ Bridges/dams/pipelines
MED	◊ Government buildings/schools
LOW	◊ Mobile home parks
MED	Develop educational materials on structural reinforcement and home inspections
HIGH	Ensure Uniform Building Code compliance
HIGH	◊ Update to current compliance when retrofitting
N/A	Insurance coverage on public facilities
MED	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location

N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
LOW	Mapping of liquefaction zones
MED	Incorporate County geologist data into planning
MED	Backup water supplies for hospitals
LOW	Evaluate pipeline seismic resiliency
LOW	Pre-positioning of temporary response structures
LOW	Fire sprinkler ordinance for all structures
N/A	Evaluate adequacy of reservoir capacity for sprinkler systems
N/A	Training/standardization for contractors performing retrofitting
LOW	Website with mitigation/contractor/retrofitting information
LOW	◊ Links to jurisdictions
LOW	◊ Alerting information
LOW	◊ Volunteer information
LOW	Evaluate depths of aquifers/wells for adequacy during quakes
LOW	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

HIGH	Communications Interoperability
HIGH	Harden repeater sites
MED	Continue existing interoperability project
MED	Strengthen/harden
LOW	Relocate
LOW	Redundancy
MED	Mobile repeaters

FLOODS

LOW	Update development policies for flood plains
LOW	Public education on locations of flood plains
LOW	Develop multi-jurisdictional working group on floodplain management
LOW	Develop greenbelt requirements in new developments
LOW	Update weather pattern/flood plain maps
LOW	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
MED	Required water flow/runoff plans for new development
HIGH	Perform GIS mapping of flood channels, etc.
HIGH	Install vehicular crossing gates/physical barriers for road closure
HIGH	Maintenance of storm sewers/flood channels
HIGH	Create map of flood channels/diversions/water systems etc
LOW	Require digital floor plans on new non-residential construction
LOW	Upgrade dirt embankments to concrete

LOW	Conduct countywide needs study on drainage capabilities
LOW	Increase number of pumping stations
LOW	Increase sandbag distribution capacities
MED	Develop pre-planned response plan for floods
MED	◊ Evacuation documentation
LOW	◊ Re-examine historical flooding data for potential street re-design
HIGH	Training for city/county PIOs about flood issues
HIGH	Warning systems - ensure accurate information provided
MED	◊ Publicize flood plain information (website?)
MED	◊ Install warning/water level signage
MED	◊ Enhanced public information
MED	◊ Road closure compliance
MED	◊ Shelter locations
HIGH	◊ Pre-event communications
LOW	Look at County requirements for neighborhood access
LOW	◊ Secondary means of ingress/egress
LOW	Vegetation restoration programs
MED	Ensure critical facilities are hardened/backed up
LOW	Hardening water towers
LOW	Terrorism Surveillance - cameras at reservoirs/dams
MED	Riverbed maintenance
LOW	Evaluate existing lift stations for adequacy
LOW	Acquisition of property for on-site retention
LOW	Evaluate regulations on roof drainage mechanisms
LOW	Erosion-resistant plants
LOW	Traffic light protection
MED	Upkeep of diversionary devices
LOW	Install more turn-off valves on pipelines
LOW	Backup generation facilities
MED	Identify swift water rescue capabilities across County

WILDFIRES

HIGH	Aggressive weed abatement program
HIGH	◊ Networking of agencies for weed abatement
MED	Develop strategic plan for forest management
MED	Public education on wildfire defense
MED	Encourage citizen surveillance and reporting
LOW	Identify hydrants with equipment ownership information
MED	Enhanced fire fighting equipment
LOW	Fire spotter program/red flag program

LOW	◊ Expand to other utilities
HIGH	Research on insect/pest mitigation technologies
LOW	Volunteer home inspection program
HIGH	Public education program
LOW	◊ Weather reporting/alerting
MED	◊ Building protection
MED	◊ Respiration
HIGH	Pre-identify shelters/recovery centers/other resources
MED	Roofing materials/defensive spacing regulations
HIGH	Community task forces for planning and education
N/A	Fuel/dead tree removal
LOW	Strategic pre-placement of fire fighting equipment
MED	Establish FEMA coordination processes based on ICS
HIGH	Brush clearings around repeaters
LOW	Research new technologies for identifying/tracking fires
MED	Procure/deploy backup communications equipments
MED	"Red Tag" homes in advance of event
LOW	Provide fire-resistant gel to homeowners
LOW	Involve insurance agencies in mitigation programs
LOW	Clear out abandoned vehicles from oases
HIGH	Code enforcement
HIGH	Codes prohibiting fireworks
HIGH	Fuel modification/removal
MED	Evaluate building codes
HIGH	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
HIGH	Wetlands mosquito mitigation (West Nile Virus)
MED	Insect control study
HIGH	Increase County Vector Control capacities
LOW	General public drought awareness
LOW	◊ Lawn watering rotation
MED	Develop County drought plan
LOW	Mitigation of landslide-prone areas
MED	Develop winter storm sheltering plan
LOW	Ease permitting process for building transmission lines
LOW	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement

N/A	Agriculture - funding of detection programs
HIGH	Communications of pipeline maps (based on need to know)
MED	Improved notification plan on runaway trains
MED	Improve/maintain blackout notification plan.
MED	Support business continuity planning for utility outages
HIGH	Terrorism training/equipment for first responders
HIGH	◊ Terrorism planning/coordination
HIGH	◊ Staffing for terrorism mitigation
MED	Create a SONGS regional planning group
HIGH	◊ Include dirty bomb planning
LOW	Cooling stations - MOUs in place
LOW	Fire Ant eradication program
LOW	White Fly infestation abatement/eradication program
MED	Develop plan for supplemental water sources
LOW	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
LOW	ID mutual aid agreements
MED	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
LOW	Public education
LOW	◊ Bi-lingual signs
LOW	◊ Blackout information
N/A	Notification system for rail traffic - container contents
MED	Control and release of terrorism intelligence
LOW	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Murrieta	
Contact:	John Thomas
Phone:	915-830-1987

MITIGATION STRATEGY INFORMATION

Proposal Name:

Mitigating Flood and mosquito threat form the California Oaks Retention Basin

Proposal Location:

In the City of Murrieta west of Jackson Ave.

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
X	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	The California Oaks Retention Basin was built in 1989. Since then, two major floods have generated millions of dollars in damages. We have been in a 10-year drought and we now have an opportunity to correct a problem. Riverside County has been hit hard by the West Nile Virus. This proposal will minimize the City of Murrieta's target hazard for mosquitoes and crows.

Description of Mitigation Goal Narrative: Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

The California Oaks Retention Basin has become a local hazard for children, homeless, and a breeding ground for mosquitoes. The intention of this proposal is to reduce the water in the flood control retention basin. The constant flow of water into the basin currently dissipates through percolation to the underground and evaporation. It takes a sizable amount of rain to fill the basin. When storm water has exceeded the capacity of the retention basin water discharges through spillways. These spillways become clogged with vegetation growing in the retention basin. For 10 months out of the year, the basin is more of a swamp allowing mosquitoes to breed next to apartments. With the increased hazards associated with stagnating water in populated areas The City of Murrieta needs to change the nature of the retention basin. Proposed is a new drainpipe that will keep the amount of water down to better batch the daily irrigation run off water that comes in to the retention basin.
By adding a new drain that lowers the low point of the basin nuisance water flow will not accumulate. The vegetation will change and the City will be able to control and maintain the retention basin. The retention basin has been an attractive nuisance. Children and the homeless are drawn to the area and it is not a safe place. Vegetation and silt has decreased the total capacity of the basin. In 1991 over 10 million and 1993 15 million dollars were spent repairing damage from floods directly related to the excess flood water coming from the retention basin because it was over capacity. There were several rescues of people in harms way. The new threat from mosquitoes further emphasizes the need to reduce the hazards associated with the California Oaks retention basin.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	X	No		Responsible Agency: The City of Murrieta

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

X	Unfunded proposal - funds are not available for the proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Pre-Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine its cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: City Of Murrieta	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _X_ NO _____**		
Current Population in Jurisdiction or Served	**77,000**	Projected Population in Jurisdiction or Served - in 2010	**110,000**
Current Sq Miles in Jurisdiction or Served	**34**	Projected Sq Miles in Jurisdiction or Served - in 2010	**34-44**
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	**Yes**	If yes, please list ordinance or regulation number. Fire Protection Plan	
What is the number one land issue your agency will face in the next five years	Rapid Growth		
Approximate Number of Homes/Apts/etc.	**22,000**	Projected Number of Homes/Apts/etc.- in 2010	**35,000**
Approximate Total Residential Value	**550 Million**	Projected Residential Total Value - in 2010	**700 Million**
Approximate Number of Commercial Businesses	**2890**	Projected Number of Commercial Businesses - in 2010	**4,000**
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	**10% $55,000,000**	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	**8% $56,000,000**
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	**15% $82,500,000**	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	**15% $105,000,000**
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	**10% $55,000,000**	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	**5% $35,000,000**
Approximate Percentage of Commercial Businesses in flood hazard zones	**5**	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	**0**
Approximate Percentage of Commercial Businesses in earthquake hazard zones	**20**	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	**20**
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	**0**	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	**0**
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	**0**	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	**0**
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	**2**	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	**2**
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	**0**	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	**0**
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	**Yes**	If not, how will your jurisdiction do plan maintenance? Plan to be developed	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes? Yes			

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **City of Murrieta Fire Department**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan Riverside County OES**	**Date of Completion:** **September 30, 2004**
Local Point of Contact: John Thomas		**Address:** **41825 Juniper St.** **Murrieta, Ca. 92562**
Title: **Emergency Preparedness Public Information Coordinator**		
Agency: City of Murrieta Fire Department		
Phone Number: 951-830-1987		**E-Mail: jthomas@murrieta.org**

Insert State Requirement here	**N/A**	

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 3 -7**	**M**	

PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).	Part II, City of Murrieta Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, City of Murrieta Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II City of Murrieta Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, City of Murrieta Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Dam failure Pages 85 – 93 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Airline / airport emergencies Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Part II, City of Murrieta Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, City of Murrieta Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II City of Murrieta Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, City of Murrieta Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Norco

Scenario: M6.7 on Elsinore Fault
Epicenter in/near Southwest of Corona

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$27,062.76
Non-Structural Damage	$102,891.26
Building Damage	$129,954.03
Contents Damage	$38,700.09
Inventory Loss	$1,166.44
Relocation Cost	$668.71
Income Loss	$8,079.19
Rental Income Loss	$9,060.22
Wage Loss	$6,431.83
Total Loss	$194,060.50

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

L	Aggressive public education campaign in light of predictions
L	Generate new literature for dissemination to:
L	◊ Government employees
L	◊ Businesses
L	◊ Hotel/motel literature
L	◊ Local radio stations for education
L	◊ Public education via utilities
L	◊ Identify/create television documentary content
H	Improve the Emergency Alert System (EAS)
H	◊ Consider integration with radio notification systems
H	◊ Upgrade alerting and warning systems for hearing impaired
H	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
L	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
M	Evaluate re-enforcing reservoir concrete bases
L	Evaluate EOCs for seismic stability
M	Install earthquake cutoffs at reservoirs
M	Install earthquake-warning devices at critical facilities
M	Develop a dam inundation plan for new Diamond Valley Reservoir
M	Earthquake retrofitting
H	◊ Bridges/dams/pipelines
H	◊ Government buildings/schools
H	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections
M	Ensure Uniform Building Code compliance
M	◊ Update to current compliance when retrofitting
L	Insurance coverage on public facilities
L	Funding for non-structural abatement (Earthquake kits, etc.)
L	Pre - identify empty commercial space for seismic re-location

L	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
L	Mapping of liquefaction zones
L	Incorporate County geologist data into planning
L	Backup water supplies for hospitals
M	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
L	Fire sprinkler ordinance for all structures
L	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
L	◊ Links to jurisdictions
L	◊ Alerting information
L	◊ Volunteer information
L	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
H	Harden repeater sites
H	Continue existing interoperability project
N/A	Strengthen/harden
L	Relocate
H	Redundancy
M	Mobile repeaters

FLOODS

L	Update development policies for flood plains
L	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
L	Develop greenbelt requirements in new developments
L	Update weather pattern/flood plain maps
L	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
L	Required water flow/runoff plans for new development
L	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
L	Create map of flood channels/diversions/water systems etc
L	Require digital floor plans on new non-residential construction
M	Upgrade dirt embankments to concrete

L	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
L	Increase sandbag distribution capacities
L	Develop pre-planned response plan for floods
M	◊ Evacuation documentation
M	◊ Re-examine historical flooding data for potential street re-design
L	Training for city/county PIOs about flood issues
L	Warning systems - ensure accurate information provided
L	◊ Publicize flood plain information (website?)
L	◊ Install warning/water level signage
L	◊ Enhanced public information
L	◊ Road closure compliance
L	◊ Shelter locations
L	◊ Pre-event communications
L	Look at County requirements for neighborhood access
L	◊ Secondary means of ingress/egress
M	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
L	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
M	Riverbed maintenance
M	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
M	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
L	Traffic light protection
M	Upkeep of diversionary devices
M	Install more turn-off valves on pipelines
M	Backup generation facilities
M	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
M	◊ Networking of agencies for weed abatement
M	Develop strategic plan for forest management
M	Public education on wildfire defense
M	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information
M	Enhanced fire fighting equipment
L	Fire spotter program/red flag program

L	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
L	Public education program
L	◊ Weather reporting/alerting
M	◊ Building protection
L	◊ Respiration
L	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
L	Fuel/dead tree removal
L	Strategic pre-placement of fire fighting equipment
L	Establish FEMA coordination processes based on ICS
L	Brush clearings around repeaters
M	Research new technologies for identifying/tracking fires
M	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
L	Clear out abandoned vehicles from oases
H	Code enforcement
H	Codes prohibiting fireworks
H	Fuel modification/removal
L	Evaluate building codes
M	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
M	Wetlands mosquito mitigation (West Nile Virus)
M	Insect control study
M	Increase County Vector Control capacities
L	General public drought awareness
L	◊ Lawn watering rotation
M	Develop County drought plan
M	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement

N/A	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
H	Improved notification plan on runaway trains
M	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
H	Terrorism training/equipment for first responders
H	◊ Terrorism planning/coordination
M	◊ Staffing for terrorism mitigation
L	Create a SONGS regional planning group
L	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
M	Develop plan for supplemental water sources
L	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
M	ID mutual aid agreements
M	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
L	Public education
L	◊ Bi-lingual signs
L	◊ Blackout information
M	Notification system for rail traffic - container contents
H	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Norco
Contact: Robert Franck
Phone: (951) 737-8097 Ext. 2222

MITIGATION STRATEGY INFORMATION

Proposal Name:

Santa Ana River Bottom Interface Zone Fuel Management

Proposal Location:

The northern boundary of the city from the Hamner Ave bridge east to the city limit.

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
X	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History

List any previous disaster related events (dates, costs, etc)

During the past 20 years there have been regularly recurring wildfire events in the Santa Ana River bottom north of the City of Norco. These events have required the mobilization and commitment of large firefighting forces and have resulted in the destruction and/or damage to many homes in the subject area. The most recent destructive event was on January 6, 2002 when a Santa Ana Wind driven arson fire destroyed two homes and damaged six others.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

An aggressive fuel management program is needed in order to maintain a reasonable defense zone against the transmission of fire from the river bottom into the City. The Army Corps of Engineers “Bluff Stabilization Proposal” provided a mineral soil buffer of approximately 100 feet from the river bottom vegetation and the base of the Norco Bluffs. Maintenance of this mineral soil buffer will provide for a dramatically reduced communication of fire from the river bottom onto the homes situated along the Norco Bluffs between the Hamner Ave bridge and the northeast border of the city.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

X	Unfunded proposal - funds are not available for the proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

YES	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

JURISDICTION: Norco	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES __X__ NO _____**		
Current Population in Jurisdiction or Served	**26,000**	Projected Population in Jurisdiction or Served - in 2010	**30,000**
Current Sq Miles in Jurisdiction or Served	**14.7**	Projected Sq Miles in Jurisdiction or Served - in 2010	**14.7**
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	**YES**	If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years			
Approximate Number of Homes/Apts/etc.	**7,000**	Projected Number of Homes/Apts/etc.- in 2010	**8,000**
Approximate Total Residential Value		Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses	**800**	Projected Number of Commercial Businesses - in 2010	**850**
Approximate Percentage of Homes/Apts/etc in flood hazard zones	**1**	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	**1**
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones	**1**	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	**1**
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones	**10**	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	**11**
Approximate Percentage of Commercial Businesses in flood hazard zones	**1**	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	**1**
Approximate Percentage of Commercial Businesses in earthquake hazard zones	**1**	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	**1**
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	**.5**	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	**.5**
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	**0**	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	**0**
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	**0**	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	**0**
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	**0**	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	**0**
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	**YES**	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes? YES			

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Norco**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 9, 2004**
Local Point of Contact: **Bob Franck**		**Address:** **P.O. Box 428** **Norco, CA 91760**
Title: **Emergency Services Coordinator**		
Agency: **City of Norco**		
Phone Number: (951) 737-8097		**E-Mail: bfranck@ci.norco.ca.us**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 3-7**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	

Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).	Part II, Norco Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Norco Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Norco Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Norco Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Landslides Pages 77 – 80 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Terrorism Pages 135 – 139 Part II, Norco Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Norco Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Norco Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Norco Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Palm Desert

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		PALM DESERT		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	Risk Manager		
First Name:	Gary	Last Name:	Rosenblum	
Agency Address:	Street:	73510 Fred Waring Drive		
	City:	Palm Desert		
	State:	CA		
	Zip:	92260		
Contact Phone	760-346-0611 Ext. 318		FAX	760-776-6395
E-mail	info@palm-desert.org			

Population Served	43,900
Square Miles Served	25

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	1998
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	NO

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	**NO**
AIRPORT NEXT TO JURISDICTION	**NO**
DAIRY INDUSTRY	**NO**
POULTRY INDUSTRY	**NO**
CROPS/ORCHARDS	**NO**
DAMS IN JURISDICTION	**NO**
DAMS NEXT TO JURISDICTION	**NO**
LAKE/RESERVOIR IN JURISDICTION	**NO**
LAKE/RESERVOIR NEAR JURISDICTION	**NO**
JURISDICTION IN FLOOD PLAIN	**NO**
CONTROLLED FLOOD CONTROL CHANNEL	**NO**
UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
EARTHQUAKE FAULTS IN JURISDICTION	**YES**
EARTHQUAKE FAULTS NEXT TO JURISDICTION	**YES**
MOBILE HOME PARKS	**YES**
NON-REINFORCED FREEWAY BRIDGES	**NO**
NON-REINFORCED BRIDGES	**NO**
BRIDGES IN FLOOD PLAIN	**NO**
BRIDGES OVER OR ACROSS RIVER/STREAM	**YES**
ROADWAY CROSSING RIVER/STREAM	**YES**
NON REINFORCED BUILDINGS	**NO**
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	**NO**
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	**YES**
FOREST AREA IN JURISDICTION	**NO**
FOREST AREA NEXT TO JURISDICTION	**YES**
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	**NO**
MAJOR GAS/OIL PIPELINES IN JURISDICTION	**NO**
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	**YES**
RAILROAD TRACKS IN JURISDICTION	**NO**
RAILROAD TRACKS NEXT TO JURISDICTION	**YES**
HAZARDOUS WASTE FACILITIES IN JURISDICTION	**YES**
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	**YES**
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	**NO**

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**NO**
NEAR FLOOD PLAIN	**NO**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**NO**
DOWNSTREAM OF A LAKE	**NO**
DOWNSTREAM FROM A RESERVOIR	**NO**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**NO**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**YES**
A HAZARDOUS STORAGE FACILITY	**YES**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**NO**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**NO**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**NO**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	NO
NEAR RAILROAD TRACKS	NO
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	NO
DOWNSTREAM OF A LAKE	NO
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	NO
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
PALM DESERT	Aqueduct	Coachella Canal	Yes	No
PALM DESERT	Fault	San Andreas	No	Yes
PALM DESERT	Fault	San Jacinto	No	Yes
PALM DESERT	Flood Channel	Coachella Valley Stormwater Channel	Yes	No
PALM DESERT	Flood Channel	La Quinta Evacuation Channel	Yes	No
PALM DESERT	Pipeline	10 Freeway pipelines	No	Yes
PALM DESERT	Reservoir	Lake Cahuilla	No	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Palm Desert

Scenario: M7.1 on San Andreas Fault, epicenter northeast of Coachella

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$8,063.73
Non-Structural Damage	$37,790.08
Building Damage	$45,853.80
Contents Damage	$12,579.60
Inventory Loss	$217.79
Relocation Cost	$235.76
Income Loss	$2,621.25
Rental Income Loss	$2,491.17
Wage Loss	$2,646.46
Total Loss	$66,645.84

Commercial Casualties for Daytime Event	
Medical Aid	5
Hospital Treatment	1
Life-Threatening Severity	0
Death	0

Commuting Casualties for Daytime Event	
Medical Aid	0
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
L	Generate new literature for dissemination to:
L	◊ Government employees
L	◊ Businesses
L	◊ Hotel/motel literature
L	◊ Local radio stations for education
L	◊ Public education via utilities
L	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
L	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
L	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
L	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
L	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
L	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
L	◊ Government buildings/schools
L	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
L	Insurance coverage on public facilities
L	Funding for non-structural abatement (Earthquake kits, etc.)

L	Pre - identify empty commercial space for seismic re-location
L	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
N/A	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals
N/A	Evaluate pipeline seismic resiliency
M	Pre-positioning of temporary response structures
N/A	Fire sprinkler ordinance for all structures
N/A	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
L	◊ Links to jurisdictions
L	◊ Alerting information
L	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
N/A	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

N/A	Communications Interoperability
N/A	Harden repeater sites
N/A	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
N/A	Redundancy
N/A	Mobile repeaters

FLOODS

L	Update development policies for flood plains
L	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
L	Develop greenbelt requirements in new developments
L	Update weather pattern/flood plain maps
L	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
L	Required water flow/runoff plans for new development
L	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
L	Maintenance of storm sewers/flood channels
L	Create map of flood channels/diversions/water systems etc
L	Require digital floor plans on new non-residential construction

L	Upgrade dirt embankments to concrete
L	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
L	Increase sandbag distribution capacities
L	Develop pre-planned response plan for floods
	◊ Evacuation documentation
	◊ Re-examine historical flooding data for potential street re-design
L	Training for city/county PIOs about flood issues
L	Warning systems - ensure accurate information provided
	◊ Publicize flood plain information (website?)
	◊ Install warning/water level signage
	◊ Enhanced public information
	◊ Road closure compliance
	◊ Shelter locations
	◊ Pre-event communications
L	Look at County requirements for neighborhood access
	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
L	Ensure critical facilities are hardened/backed up
L	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
L	Riverbed maintenance
L	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
L	Traffic light protection
L	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
L	Backup generation facilities
L	Identify swift water rescue capabilities across County

WILDFIRES

L	Aggressive weed abatement program
	◊ Networking of agencies for weed abatement
L	Develop strategic plan for forest management
L	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information
L	Enhanced fire fighting equipment

L	Fire spotter program/red flag program
	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
L	Public education program
	◊ Weather reporting/alerting
	◊ Building protection
	◊ Respiration
L	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
L	Fuel/dead tree removal
L	Strategic pre-placement of fire fighting equipment
L	Establish FEMA coordination processes based on ICS
L	Brush clearings around repeaters
L	Research new technologies for identifying/tracking fires
L	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
L	Clear out abandoned vehicles from oases
L	Code enforcement
L	Codes prohibiting fireworks
L	Fuel modification/removal
L	Evaluate building codes
L	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
H	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
L	General public drought awareness
	◊ Lawn watering rotation
N/A	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
H	Evaluate restrictions on dust/dirt/generating activities during wind seasons
L	Rotational crop planning/soil stabilization

L	Enhance agricultural checkpoint enforcement
L	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
L	Improve/maintain blackout notification plan.
L	Support business continuity planning for utility outages
L	Terrorism training/equipment for first responders
	◊ Terrorism planning/coordination
	◊ Staffing for terrorism mitigation
L	Create a SONGS regional planning group
	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
M	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
N/A	Develop plan for supplemental water sources
L	Public education on low water landscaping
L	Salton Sea desalinization
L	Establish agriculture security standards (focus on water supply)
L	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable
L	Upgrade valves on California aqueduct
L	Public education
	◊ Bi-lingual signs
	◊ Blackout information
N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction:	Palm Desert
Contact:	Gary Rosenblum
Phone:	760-346-0611

MITIGATION STRATEGY INFORMATION

Proposal Name:

Portola Avenue Bridge over Whitewater Channel

Proposal Location:

Portola Avenue

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

x	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History — List any previous disaster related events (dates, costs, etc)

Portola Avenue washout in 1976 and 1979

Description of Mitigation Goal Narrative: — Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

Changes to the road with minimal road elevation and installation of culverts failed to prevent road closure in 1992 flood. Future road closures and potential damage to culvert system from future floods. Bridge will keep central City artery open in emergency weather events

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	x	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

	Unfunded proposal - funds are not available for the proposal at this time
x	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
x	Pre-Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: City of Palm Desert		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES __X__ NO _____**	
Current Population in Jurisdiction or Served	48,000	Projected Population in Jurisdiction or Served - in 2010	53,000
Current Sq Miles in Jurisdiction or Served	26	Projected Sq Miles in Jurisdiction or Served - in 2010	26
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	Yes		
What is the number one land issue your agency will face in the next five years	Adequate Housing		
Approximate Number of Homes/Apts/etc.	32,000	Projected Number of Homes/Apts/etc.- in 2010	36,000
Approximate Total Residential Value	$10 Billion	Projected Residential Total Value - in 2010	$12 Billion
Approximate Number of Commercial Businesses	2,000	Projected Number of Commercial Businesses - in 2010	2,500
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	0	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	100 $10,000,000,000	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	100 $12,000,000,000
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	0	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	0
Approximate Percentage of Commercial Businesses in flood hazard zones	0	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	0
Approximate Percentage of Commercial Businesses in earthquake hazard zones	100	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	100
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	0	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	0	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	10	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	10
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting			Yes

purposes?	

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Palm Desert**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 8, 2004**
Local Point of Contact: **Gary Rosenblum**	**Address:** **73-510 Fred Waring Drive** **Palm Desert, Ca 92292260**	
Title: **Emergency Services Coordinator**		
Agency: **City of Palm Desert**		
Phone Number: **760-346-0611**	**E-Mail: grosenblum@ci.palm-desert.ca.us**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	Part II, Palm Desert Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Palm Desert Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Palm Desert Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Palm Desert Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Landslides Pages 77 – 80 Insect Infestation Pages 81 – 84 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Terrorism Pages 135 – 139 Part II, Palm Desert Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Palm Desert Section	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Palm Desert Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Palm Desert Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Palm Springs

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		PALM SPRINGS		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	Fire Chief		
First Name:	Blake	Last Name:	Goetz	
Agency Address:	Street:	300 N. El Cielo Rd.		
	City:	Palm Springs		
	State:	CA		
	Zip:	92262		
Contact Phone	760-323-8185		FAX	760-778-8427
E-mail	BlakeG@ci.palm-springs.ca.us			

Population Served	44,000
Square Miles Served	96

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	3/1/2004

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	3/1/2004
Do you have a recovery annex or section in your plan?	NO
Do you have a terrorism/WMD annex or section in your plan?	YES

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	**YES**
AIRPORT NEXT TO JURISDICTION	**NO**
DAIRY INDUSTRY	**NO**
POULTRY INDUSTRY	**NO**
CROPS/ORCHARDS	**NO**
DAMS IN JURISDICTION	**YES**
DAMS NEXT TO JURISDICTION	**NO**
LAKE/RESERVOIR IN JURISDICTION	**NO**
LAKE/RESERVOIR NEAR JURISDICTION	**NO**
JURISDICTION IN FLOOD PLAIN	**YES**
CONTROLLED FLOOD CONTROL CHANNEL	**YES**
UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
EARTHQUAKE FAULTS IN JURISDICTION	**YES**
EARTHQUAKE FAULTS NEXT TO JURISDICTION	**YES**
MOBILE HOME PARKS	**YES**
NON-REINFORCED FREEWAY BRIDGES	**NO**
NON-REINFORCED BRIDGES	**NO**
BRIDGES IN FLOOD PLAIN	**YES**
BRIDGES OVER OR ACROSS RIVER/STREAM	**YES**
ROADWAY CROSSING RIVER/STREAM	**YES**

FREEWAY/MAJOR HIGHWAY IN JURISDICTION	**YES**
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	**YES**
FOREST AREA IN JURISDICTION	**NO**
FOREST AREA NEXT TO JURISDICTION	**YES**
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	**NO**
MAJOR GAS/OIL PIPELINES IN JURISDICTION	**YES**
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	**YES**
RAILROAD TRACKS IN JURISDICTION	**YES**
RAILROAD TRACKS NEXT TO JURISDICTION	**YES**
HAZARDOUS WASTE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	**YES**
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	**YES**

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**YES**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**NO**
DOWNSTREAM OF A LAKE	**NO**
DOWNSTREAM FROM A RESERVOIR	**NO**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**NO**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**YES**
NEAR A HAZARDOUS STORAGE FACILITY	**YES**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**YES**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**YES**
HAVE BEEN DAMAGED BY FOREST FIRE	**YES**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**YES**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**YES**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	YES
NEAR RAILROAD TRACKS	NO
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	NO
DOWNSTREAM OF A LAKE	NO
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	NO
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	NO
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	YES
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary				
Jurisdiction	**Hazard Type**	**Hazard Name**	**In Jurisdiction?**	**Adjacent to Jurisdiction?**
PALM SPRINGS	Dam	Dry Falls	Yes	No
PALM SPRINGS	Fault	Garnet Hill Fault	Yes	No
PALM SPRINGS	Fault	San Andreas Fault	No	Yes
PALM SPRINGS	Flood Channel	South Palm Canyon Wash	Yes	No
PALM SPRINGS	Flood Channel	Tahquitz Creek	Yes	No
PALM SPRINGS	Flood Channel	Whitewater River	Yes	No
PALM SPRINGS	Pipeline	High Pressure Liquid Petroleum	Yes	Yes
PALM SPRINGS	Pipeline	So Calif. Gas high Pressure	Yes	Yes
PALM SPRINGS	Railroad Track	Union Pacific	Yes	Yes

Dams Summary	
Dam Name	TAHCHEVAH
River	TACHEVAH CREEK
Nearest City	PALM SPRINGS
Height (feet)	42
Storage (acre-feet)	
Year Built	1964
Drainage Area (Sq miles)	3.2
Hazard Type	High

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Palm Springs

Scenario: M7.1 on San Andreas Fault
Epicenter Northeast of Cathedral City

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$68,041.05
Non-Structural Damage	$298,834.77
Building Damage	$366,875.81
Contents Damage	$92,603.06
Inventory Loss	$1,454.59
Relocation Cost	$1,744.12
Income Loss	$20,816.51
Rental Income Loss	$26,999.38
Wage Loss	$28,256.85
Total Loss	$538,750.30

Commercial Casualties for Daytime Event	
Medical Aid	92
Hospital Treatment	26
Life-Threatening Severity	4
Death	9

Commuting Casualties for Daytime Event	
Medical Aid	0
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

SUMMARIZED HAZUS RESULTS

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
	Generate new literature for dissemination to:
H	◊ Government employees
M	◊ Businesses
L	◊ Hotel/motel literature
H	◊ Local radio stations for education
L	◊ Public education via utilities
H	◊ Identify/create television documentary content
	Improve the Emergency Alert System (EAS)
L	◊ Consider integration with radio notification systems
L	◊ Upgrade alerting and warning systems for hearing impaired
M	◊ Training and maintenance
H	Procure earthquake-warning devices for critical facilities
L	Reinforce emergency response facilities
L	Provide training to hospital staffs
M	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
H	Install earthquake cutoffs at reservoirs
M	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
	Earthquake retrofitting
N/a	◊ Bridges/dams/pipelines
L	◊ Government buildings/schools
N/A	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
H	Insurance coverage on public facilities
H	Funding for non-structural abatement (Earthquake kits, etc.)
L	Pre - identify empty commercial space for seismic re-location
H	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
L	Mapping of liquefaction zones
M	Incorporate County geologist data into planning
M	Backup water supplies for hospitals

M	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
M	Fire sprinkler ordinance for all structures
M	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
M	◊ Alerting information
M	◊ Volunteer information
M	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
H	Harden repeater sites
H	Continue existing interoperability project
M	Strengthen/harden
M	Relocate
H	Redundancy
H	Mobile repeaters

FLOODS

L	Update development policies for flood plains
H	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
M	Develop greenbelt requirements in new developments
H	Update weather pattern/flood plain maps
H	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
L	Perform GIS mapping of flood channels, etc.
H	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
L	Create map of flood channels/diversions/water systems etc
H	Require digital floor plans on new non-residential construction
L	Upgrade dirt embankments to concrete
L	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
L	Increase sandbag distribution capacities
L	Develop pre-planned response plan for floods
	◊ Evacuation documentation
M	◊ Re-examine historical flooding data for potential street re-design
L	Training for city/county PIOs about flood issues
L	Warning systems - ensure accurate information provided
	◊ Publicize flood plain information (website?)

M	◊ Install warning/water level signage
H	◊ Enhanced public information
H	◊ Road closure compliance
H	◊ Shelter locations
H	◊ Pre-event communications
	Look at County requirements for neighborhood access
M	◊ Secondary means of ingress/egress
M	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
L	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
M	Riverbed maintenance
L	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
H	Erosion-resistant plants
L	Traffic light protection
L	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
L	Backup generation facilities
H	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
H	◊ Networking of agencies for weed abatement
M	Develop strategic plan for forest management
H	Public education on wildfire defense
H	Encourage citizen surveillance and reporting
M	Identify hydrants with equipment ownership information
H	Enhanced fire fighting equipment
L	Fire spotter program/red flag program
L	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
	Public education program
M	◊ Weather reporting/alerting
M	◊ Building protection
M	◊ Respiration
H	Pre-identify shelters/recovery centers/other resources
H	Roofing materials/defensive spacing regulations
N/A	Community task forces for planning and education
N/A	Fuel/dead tree removal
H	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
L	Brush clearings around repeaters

M	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
N/A	"Red Tag" homes in advance of event
N/A	Provide fire-resistant gel to homeowners
N/A	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
H	Code enforcement
H	Codes prohibiting fireworks
H	Fuel modification/removal
H/A	Evaluate building codes
N/A	Maintaining catch basins

OTHER HAZARDS

M	Improve pipeline maintenance
M	Wetlands mosquito mitigation (West Nile Virus)
L	Insect control study
N/A	Increase County Vector Control capacities
	General public drought awareness
L	◊ Lawn watering rotation
L	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
M	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
H	Communications of pipeline maps (based on need to know)
M	Improved notification plan on runaway trains
H	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
	Terrorism training/equipment for first responders
H	◊ Terrorism planning/coordination
M	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
M	◊ Include dirty bomb planning
H	Cooling stations - MOUs in place
M	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
H	Develop plan for supplemental water sources
M	Public education on low water landscaping
N/A	Salton Sea desalinization
N	Establish agriculture security standards (focus on water supply)
N/A	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable

N/A	Upgrade valves on California aqueduct
	Public education
M	◊ Bi-lingual signs
M	◊ Blackout information
L	Notification system for rail traffic - container contents
H	Control and release of terrorism intelligence
L	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Palm Springs	
Contact:	Blake Goetz, Fire Chief
Phone:	(760) 323-8182

MITIGATION STRATEGY INFORMATION

Proposal Name:

Construct an all weather roadway on N. Indian Canyon Way between Tramview Road and Interstate 10

Proposal Location:

Palm Springs City (northern section)

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
X	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History

List any previous disaster related events (dates, costs, etc)

1993 $550,000, 1996 $400,000 Indian Canyon was washed away on both occasions at the Whitewater River Channel. This site has also required debris clearance projects on many other occasions when the road is closed due to water, sand and debris (most winter storms).

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

Indian Canyon Road needs to be elevated and culverts placed underneath the road to allow water, sand and mud to flow under the road, not over it, or eroding the roadbed rendering it unsafe.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency: City of Palm Springs

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

X	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: PALM SPRINGS		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES X NO ____**	
Current Population in Jurisdiction or Served	**44,500**	Projected Population in Jurisdiction or Served - in 2010	**50,000**
Current Sq Miles in Jurisdiction or Served	**101**	Projected Sq Miles in Jurisdiction or Served - in 2010	**101**
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	**YES**	If yes, please list ordinance or regulation number. **2.20 "DISASTER ORDINANCE"**	
What is the number one land issue your agency will face in the next five years	**Earthquake/ Population Growth**		
Approximate Number of Homes/Apts/etc.	**28,228**	Projected Number of Homes/Apts/etc.- in 2010	**35,073**
Approximate Total Residential Value	**5 Billion**	Projected Residential Total Value - in 2010	**7 Billion**
Approximate Number of Commercial Businesses	**2,500**	Projected Number of Commercial Businesses - in 2010	**2,900**
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	**5% in A Zone $250,000,000**	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	**2% $140,000,000**
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	**Alquist/Priolo Zone 0%**	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	**≤1% $70,000,000**
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	**0% Zone 5% Urban Interface $250,000,000**	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	**0% 7% Urban Interface $490,000,000**
Approximate Percentage of Commercial Businesses in flood hazard zones	**≤2%**	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	**≤1%**
Approximate Percentage of Commercial Businesses in earthquake hazard zones	**≤1%**	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	**≤1%**
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	**0%**	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	**0%**
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	**0**	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	**0**
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	**0**	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	**0**
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	**0**	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	**0**
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	**Yes**	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			**Yes**

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Palm Springs**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 8, 2004**
Local Point of Contact: **Chief Blake Goetz**		**Address:** **300 N. El Cielo Road** **Palm Springs, Ca 92262**
Title: **Fire Chief**		
Agency: **City of Palm Springs**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

Mitigation Strategy	**N**	**S**
Multi-Jurisdictional Mitigation Actions: §201.6(c)(3)(iv)		

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES	Part II, Palm Springs Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Palm Springs Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Palm Springs Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Palm Springs Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Landslides Pages 77 – 80 Insect Infestation Pages 81 – 84 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Airline / airport emergencies Pages	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
		102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Civil unrest Pages 129 – 131 Jails and prisons incidents Pages 132 – 134 Terrorism Pages 135 – 139 Part II, Palm Springs Section		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Palm Springs Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Palm Springs Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Palm Springs Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Perris

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		PERRIS		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	Emergency Services Coordinator		
First Name:	Walt	Last Name:	Carter	
Agency Address:	Street:	101 N. D St.		
	City:	Perris		
	State:	CA		
	Zip:	92572		
Contact Phone	943-6603		FAX	
E-mail	wcarter@perris-ca.org			

Population Served	38,200
Square Miles Served	35

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	1998
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	YES

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	**YES**
AIRPORT NEXT TO JURISDICTION	**NO**
DAIRY INDUSTRY	**NO**
POULTRY INDUSTRY	**NO**
CROPS/ORCHARDS	**NO**
DAMS IN JURISDICTION	**YES**
DAMS NEXT TO JURISDICTION	**NO**
LAKE/RESERVOIR IN JURISDICTION	**YES**
LAKE/RESERVOIR NEAR JURISDICTION	**NO**
JURISDICTION IN FLOOD PLAIN	**YES**
CONTROLLED FLOOD CONTROL CHANNEL	**YES**
UNCONTROLLED FLOOD CONTROL CHANNEL	**YES**
EARTHQUAKE FAULTS IN JURISDICTION	**YES**
EARTHQUAKE FAULTS NEXT TO JURISDICTION	**YES**
MOBILE HOME PARKS	**YES**
NON-REINFORCED FREEWAY BRIDGES	**NO**
NON-REINFORCED BRIDGES	**NO**
BRIDGES IN FLOOD PLAIN	**YES**
BRIDGES OVER OR ACROSS RIVER/STREAM	**YES**
ROADWAY CROSSING RIVER/STREAM	**YES**
NON REINFORCED BUILDINGS	**YES**
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	**YES**
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	**YES**
FOREST AREA IN JURISDICTION	**NO**
FOREST AREA NEXT TO JURISDICTION	**NO**
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	**YES**
MAJOR GAS/OIL PIPELINES IN JURISDICTION	**NO**
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	**NO**
RAILROAD TRACKS IN JURISDICTION	**YES**
RAILROAD TRACKS NEXT TO JURISDICTION	**YES**
HAZARDOUS WASTE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	**YES**
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	**NO**

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**NO**
NEAR FLOOD PLAIN	**YES**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**YES**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**NO**
DOWNSTREAM FROM A RESERVOIR	**YES**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**NO**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**YES**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**NO**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**NO**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**NO**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	YES
NEAR RAILROAD TRACKS	YES
NEAR A DAM	YES
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	NO
DOWNSTREAM OF A LAKE	NO
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	YES
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	YES
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
PERRIS	Aqueduct	Perris Aqueduct	Yes	No
PERRIS	Dam	Perris Lake Dam	Yes	No
PERRIS	Fault	San Jacinto Fault	No	Yes
PERRIS	Flood Channel	Perris Flood Control Channel	Yes	No
PERRIS	Flood Channel	Romoland Channel	Yes	No
PERRIS	Flood Channel	Sunset Channel	Yes	No
PERRIS	Hazmat Storage Location	EMWD	Yes	No
PERRIS	Lake	Lake Perris Lake	Yes	No
PERRIS	Railroad Track	Santa Fe Burlington Northern	Yes	Yes
PERRIS	Reservoir	Lake Perris	Yes	No
PERRIS	River	San Jacinto River	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Perris

Scenario: M6.9 on Northern San Jacinto Fault
Epicenter Near Eastern Moreno Valley

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$31,808.27
Non-Structural Damage	$129,044.78
Building Damage	$160,853.05
Contents Damage	$38,204.29
Inventory Loss	$962.30
Relocation Cost	$715.91
Income Loss	$2,756.15
Rental Income Loss	$7,395.39
Wage Loss	$4,127.03
Total Loss	$215,014.11

Commercial Casualties for Daytime Event

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
M	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
M	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
M	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
M	Install earthquake-warning devices at critical facilities
M	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
	◊ Bridges/dams/pipelines
	◊ Government buildings/schools
	◊ Mobile home parks
M	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
H	Ensure Uniform Building Code compliance
	◊ Update to current compliance when retrofitting
H	Insurance coverage on public facilities
M	Funding for non-structural abatement (Earthquake kits, etc.)

M	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
L	Mapping of liquefaction zones
M	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals
M	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
M	Fire sprinkler ordinance for all structures
M	Evaluate adequacy of reservoir capacity for sprinkler systems
M	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
M	Evaluate depths of aquifers/wells for adequacy during quakes
M	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

M	Communications Interoperability
	Harden repeater sites
N/A	Continue existing interoperability project
	Strengthen/harden
	Relocate
	Redundancy
	Mobile repeaters

FLOODS

M	Update development policies for flood plains
M	Public education on locations of flood plains
M	Develop multi-jurisdictional working group on floodplain management
M	Develop greenbelt requirements in new developments
M	Update weather pattern/flood plain maps
M	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
M	Perform GIS mapping of flood channels, etc.
H	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
M	Create map of flood channels/diversions/water systems etc
M	Require digital floor plans on new non-residential construction

L	Upgrade dirt embankments to concrete
M	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
M	Increase sandbag distribution capacities
H	Develop pre-planned response plan for floods
	◊ Evacuation documentation
	◊ Re-examine historical flooding data for potential street re-design
M	Training for city/county PIOs about flood issues
M	Warning systems - ensure accurate information provided
	◊ Publicize flood plain information (website?)
	◊ Install warning/water level signage
	◊ Enhanced public information
	◊ Road closure compliance
	◊ Shelter locations
	◊ Pre-event communications
M	Look at County requirements for neighborhood access
	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
M	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
	Riverbed maintenance
M	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
M	Traffic light protection
	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
M	Backup generation facilities
	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
	◊ Networking of agencies for weed abatement
M	Develop strategic plan for forest management
H	Public education on wildfire defense
H	Encourage citizen surveillance and reporting
M	Identify hydrants with equipment ownership information
H	Enhanced fire fighting equipment

M	Fire spotter program/red flag program
	◊ Expand to other utilities
M	Research on insect/pest mitigation technologies
M	Volunteer home inspection program
M	Public education program
	◊ Weather reporting/alerting
	◊ Building protection
	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
M	Roofing materials/defensive spacing regulations
M	Community task forces for planning and education
L	Fuel/dead tree removal
H	Strategic pre-placement of fire fighting equipment
H	Establish FEMA coordination processes based on ICS
L	Brush clearings around repeaters
L	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
M	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
	Clear out abandoned vehicles from oases
H	Code enforcement
M	Codes prohibiting fireworks
M	Fuel modification/removal
M	Evaluate building codes
M	Maintaining catch basins

OTHER HAZARDS

M	Improve pipeline maintenance
L	Wetlands mosquito mitigation (West Nile Virus)
L	Insect control study
L	Increase County Vector Control capacities
M	General public drought awareness
	◊ Lawn watering rotation
L	Develop County drought plan
M	Mitigation of landslide-prone areas
M	Develop winter storm sheltering plan
	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
L	Rotational crop planning/soil stabilization

L	Enhance agricultural checkpoint enforcement
L	Agriculture - funding of detection programs
	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
M	Improve/maintain blackout notification plan.
L	Support business continuity planning for utility outages
L	Terrorism training/equipment for first responders
	◊ Terrorism planning/coordination
	◊ Staffing for terrorism mitigation
	Create a SONGS regional planning group
	◊ Include dirty bomb planning
	Cooling stations - MOUs in place
M	Fire Ant eradication program
	White Fly infestation abatement/eradication program
M	Develop plan for supplemental water sources
L	Public education on low water landscaping
N/A	Salton Sea desalinization
M	Establish agriculture security standards (focus on water supply)
H	ID mutual aid agreements
M	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
M	Public education
	◊ Bi-lingual signs
	◊ Blackout information
M	Notification system for rail traffic - container contents
L	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Perris	
Contact:	Walter Carter III
Phone:	951-943-6603

MITIGATION STRATEGY INFORMATION

Proposal Name:

Update City's Building Codes

Proposal Location:

City of Perris

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
X	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History — List any previous disaster related events (dates, costs, etc)

The City of Perris is currently using 2001 California State Building Code. This building code is updated yearly, to meet the changing needs of construction in California and address the various hazards know to exist in the State.

The City of Perris has not adopted the most current set of California Building Codes.

Description of Mitigation Goal Narrative: Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

There have been significant changes in the California Building Code over the last several years. The California Building Codes are generally used as the minimum standard for building codes in a city or county. The California Building Code has specific building standards to help mitigate the damage commercial and residential property from earthquakes, wildland fires, floods, etc. These codes are also used as requirements for any upgrades or additions to buildings.

This mitigation strategy would be to review the current City Building Codes and determine the necessary updates. In addition to this review and updating of standards, the City may determine that there is a need to increase specific codes to heighten the mitigation level for specific standards.

An example of this would be the addition of a 100' clear zone requirement for property in a rural area to reduce the impact of a wildland fire.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

	Unfunded proposal - funds are not available for the proposal at this time
X	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Yes	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: City of Perris	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES XXX NO _____**		
Current Population in Jurisdiction or Served	**38,000**	Projected Population in Jurisdiction or Served - in 2010	**75,000**
Current Sq Miles in Jurisdiction or Served	**33**	Projected Sq Miles in Jurisdiction or Served - in 2010	**33**
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	**YES**	If yes, please list ordinance or regulation number. City Ordinance 892	
What is the number one land issue your agency will face in the next five years	Multi-species Habitat Conservation Program		
Approximate Number of Homes/Apts/etc.	**15,500**	Projected Number of Homes/Apts/etc.- in 2010	**23,000**
Approximate Total Residential Value	**$372 Billion**	Projected Residential Total Value - in 2010	**$805 Billion**
Approximate Number of Commercial Businesses	**UNK**	Projected Number of Commercial Businesses - in 2010	**UNK**
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	**80% $297,000,000,000**	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	**95% $764,750,000,000**
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	**100% $372,000,000,000**	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	**100% $805,000,000,000**
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	**5% $18,600,000,000**	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	**5% %40,250,000,000**
Approximate Percentage of Commercial Businesses in flood hazard zones	**75%**	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	**75%**
Approximate Percentage of Commercial Businesses in earthquake hazard zones	**100%**	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	**100%**
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	**0%**	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	**0%**
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	**17**	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	**23**
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	**30**	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	**40**
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	**0**	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	**0**
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	**YES**	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes? YES			

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **City of Perris**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 8, 2004**
Local Point of Contact: **Walt Carter**	**Address:** **101 N. D St.** **Perris, Ca.**

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Rancho Mirage

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		RANCHO MIRAGE		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	ESC		
First Name:	Richard	Last Name:	Signs	
Agency Address:	Street:	69825 Highway 111		
	City:	Rancho Mirage		
	State:	Ca		
	Zip:	92270		
Contact Phone	760-324-4511		FAX	
E-mail	Richards@ci.rancho-mirage.ca.us			

Population Served	14,950	Square Miles Served	25

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	NO
What year was your plan last updated?	

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	1998
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	NO

FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	**YES**
FOREST AREA IN JURISDICTION	**NO**
FOREST AREA NEXT TO JURISDICTION	**NO**
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	**NO**
MAJOR GAS/OIL PIPELINES IN JURISDICTION	**NO**
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	**YES**
RAILROAD TRACKS IN JURISDICTION	**NO**
RAILROAD TRACKS NEXT TO JURISDICTION	**YES**
HAZARDOUS WASTE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	**NO**

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**NO**
NEAR RAILROAD TRACKS	**NO**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**NO**
DOWNSTREAM OF A LAKE	**NO**
DOWNSTREAM FROM A RESERVOIR	**NO**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**NO**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**NO**
NEAR AN EARTHQUAKE FAULT	**NO**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**NO**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**YES**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**NO**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	NO
NEAR RAILROAD TRACKS	NO
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	NO
DOWNSTREAM OF A LAKE	NO
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	NO
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	NO
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdictio	Hazard Type	Hazard Name	In Jurisdiction	Adjacent to Jurisdiction
RANCHO MIRAGE	Fault	San Andreas	No	Yes
RANCHO MIRAGE	Flood Channel	White Water Channel	Yes	No
RANCHO MIRAGE	Pipeline	Fuel Pipeline at I-10 Freeway	No	Yes
RANCHO MIRAGE	Railroad Track	at I-10	No	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Rancho Mirage

Scenario: M7.1 on San Andreas Fault
Epicenter Northeast of Cathedral City

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$44,376.03
Non-Structural Damage	$177,369.46
Building Damage	$221,745.49
Contents Damage	$56,751.82
Inventory Loss	$919.18

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
H	Generate new literature for dissemination to:
H	◊ Government employees
H	◊ Businesses
H	◊ Hotel/motel literature
H	◊ Local radio stations for education
H	◊ Public education via utilities
H	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
N/A	◊ Consider integration with radio notification systems
N/A	◊ Upgrade alerting and warning systems for hearing impaired
N/A	◊ Training and maintenance
L	Procure earthquake-warning devices for critical facilities
H	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
N/A	Require earthquake gas shutoffs on remodels/new construction
L	Evaluate re-enforcing reservoir concrete bases
H	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
N/A	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
M	◊ Bridges/dams/pipelines
H	◊ Government buildings/schools
L	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
H	Insurance coverage on public facilities
M	Funding for non-structural abatement (Earthquake kits, etc.)

L	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
L	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals
M	Evaluate pipeline seismic resiliency
H	Pre-positioning of temporary response structures
N/A	Fire sprinkler ordinance for all structures
L	Evaluate adequacy of reservoir capacity for sprinkler systems
M	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
N/A	◊ Links to jurisdictions
L	◊ Alerting information
H	◊ Volunteer information
H	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
H	Harden repeater sites
H	Continue existing interoperability project
H	Strengthen/harden
H	Relocate
H	Redundancy
N/A	Mobile repeaters

FLOODS

L	Update development policies for flood plains
H	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
H	Develop greenbelt requirements in new developments
H	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
H	Perform GIS mapping of flood channels, etc.
H	Install vehicular crossing gates/physical barriers for road closure
H	Maintenance of storm sewers/flood channels
L	Create map of flood channels/diversions/water systems etc
H	Require digital floor plans on new non-residential construction

N/A	Upgrade dirt embankments to concrete
L	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
H	Increase sandbag distribution capacities
L	Develop pre-planned response plan for floods
N/A	◊ Evacuation documentation
L	◊ Re-examine historical flooding data for potential street re-design
H	Training for city/county PIOs about flood issues
H	Warning systems - ensure accurate information provided
L	◊ Publicize flood plain information (website?)
L	◊ Install warning/water level signage
H	◊ Enhanced public information
H	◊ Road closure compliance
L	◊ Shelter locations
H	◊ Pre-event communications
L	Look at County requirements for neighborhood access
L	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
H	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
L	Riverbed maintenance
L	Evaluate existing lift stations for adequacy
M	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
H	Traffic light protection
L	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
L	Backup generation facilities
L	Identify swift water rescue capabilities across County

WILDFIRES

L	Aggressive weed abatement program
L	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
H	Encourage citizen surveillance and reporting
N/A	Identify hydrants with equipment ownership information
L	Enhanced fire fighting equipment

L	Fire spotter program/red flag program
L	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
L	Public education program
L	◊ Weather reporting/alerting
L	◊ Building protection
L	◊ Respiration
L	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
L	Fuel/dead tree removal
L	Strategic pre-placement of fire fighting equipment
L	Establish FEMA coordination processes based on ICS
L	Brush clearings around repeaters
N/A	Research new technologies for identifying/tracking fires
L	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
L	Clear out abandoned vehicles from oases
M	Code enforcement
L	Codes prohibiting fireworks
M	Fuel modification/removal
H	Evaluate building codes
M	Maintaining catch basins

OTHER HAZARDS

H	Improve pipeline maintenance
L	Wetlands mosquito mitigation (West Nile Virus)
L	Insect control study
L	Increase County Vector Control capacities
L	General public drought awareness
L	◊ Lawn watering rotation
N/A	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization

N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
N/A	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
L	Improve/maintain blackout notification plan.
L	Support business continuity planning for utility outages
N/A	Terrorism training/equipment for first responders
L	◊ Terrorism planning/coordination
M	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
L	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
L	Develop plan for supplemental water sources
L	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
L	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
H	Public education
L	◊ Bi-lingual signs
H	◊ Blackout information
N/A	Notification system for rail traffic - container contents
H	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction:	City of Rancho Mirage
Contact:	Bruce Harry - Public Works Director
Phone:	760-324-4511

MITIGATION STRATEGY INFORMATION

Proposal Name:

Frank Sinatra Crossing Gates

Proposal Location:

Frank Sinatra Dr @ White Water Wash

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History — List any previous disaster related events (dates, costs, etc)

Costs incurred - 1993 $550,000, 1996 $400,000 Indian Canyon was washed away on both occasions at the Whitewater River Channel. This site has also required debris clearance projects on many other occasions when the road is closed due to water, sand and debris (most winter storms). There is an extreme "loss of life" concern with this area because of the high level and speed of water flowing in the wash and the number of motorists who attempt to drive through the rushing water.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

The Mitigation Goal is directed at the "loss of life" concern. The plan will be to install large crossing arms on both sides of the wash. The arms would be on both sides of the roadway to reduce the ability of a motorist going around the crossing arm and attempting to cross the rushing water. There will be warning signals on the street for approaching motorists as well as warning lights on the cross arms themselves (similar to railroad crossing arms. The arms would be capable of being locked in either the open or closed positions.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency: City of Rancho Mirage

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

X	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: City of Rancho Mirage		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES XX NO**	
Current Population in Jurisdiction or Served	15697	Projected Population in Jurisdiction or Served - in 2010	19,764
Current Sq Miles in Jurisdiction or Served	24.68	Projected Sq Miles in Jurisdiction or Served - in 2010	26.71
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	Yes	If yes, please list ordinance or regulation number. Mun. Code 100 & 72	
What is the number one land issue your agency will face in the next five years	Flooding or Earthquake		
Approximate Number of Homes/Apts/etc.	12,306	Projected Number of Homes/Apts/etc.- in 2010	16,958
Approximate Total Residential Value	574,000	Projected Residential Total Value - in 2010	825,475
Approximate Number of Commercial Businesses	475	Projected Number of Commercial Businesses - in 2010	600
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	0 %	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	0 %
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	0 %	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	0 %
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	0 %	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	0 %
Approximate Percentage of Commercial Businesses in flood hazard zones	0 %	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	0 %
Approximate Percentage of Commercial Businesses in earthquake hazard zones	0 %	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	0 %
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	0 %	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	0 %
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	None	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	None
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	None	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	None
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	None	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	None
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Rancho Mirage**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 8, 2004**
Local Point of Contact: **Dick Signs**	**Address:** **68-825 Highway 111** **Rancho Mirage, Ca 92270**	
Title: **Emergency Services Coordinator**		
Agency: **Rancho Mirage City Hall**		
Phone Number: **760-324-4511**	**E-Mail: Richards@ci.rancho-mirage.ca.us**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	Part II, Rancho Mirage Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Rancho Mirage Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Rancho Mirage Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Rancho Mirage Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Terrorism Pages 135 – 139 Part II, Rancho Mirage Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Rancho Mirage Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Rancho Mirage Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Rancho Mirage Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Riverside

Scenario: M6.7 on Elsinore Fault
Epicenter in/near Southwest of Corona

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$42,821.27
Non-Structural Damage	$207,053.75
Building Damage	$249,875.06
Contents Damage	$73,643.86
Inventory Loss	$1,681.72
Relocation Cost	$1,290.14
Income Loss	$9,775.62
Rental Income Loss	$14,145.95
Wage Loss	$13,063.17
Total Loss	$363,475.44

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
H	Generate new literature for dissemination to:
H	◊ Government employees
H	◊ Businesses
H	◊ Hotel/motel literature
H	◊ Local radio stations for education
H	◊ Public education via utilities
H	◊ Identify/create television documentary content
M	Improve the Emergency Alert System (EAS)
M	◊ Consider integration with radio notification systems
M	◊ Upgrade alerting and warning systems for hearing impaired
M	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
M	Provide training to hospital staffs
M	Require earthquake gas shutoffs on remodels/new construction
M	Evaluate re-enforcing reservoir concrete bases
L	Evaluate EOCs for seismic stability
L	Install earthquake cutoffs at reservoirs
L	Install earthquake-warning devices at critical facilities
NA	Develop a dam inundation plan for new Diamond Valley Reservoir
	Earthquake retrofitting
M	◊ Bridges/dams/pipelines
M	◊ Government buildings/schools
H	◊ Mobile home parks
H	Develop educational materials on structural reinforcement and home inspections
	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
M	Insurance coverage on public facilities
L	Funding for non-structural abatement (Earthquake kits, etc.)

NA	Pre - identify empty commercial space for seismic re-location
NA	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
M	Mapping of liquefaction zones
M	Incorporate County geologist data into planning
H	Backup water supplies for hospitals
M	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
L	Evaluate adequacy of reservoir capacity for sprinkler systems
M	Training/standardization for contractors performing retrofitting
	Website with mitigation/contractor/retrofitting information
M	◊ Links to jurisdictions
M	◊ Alerting information
M	◊ Volunteer information
M	Evaluate depths of aquifers/wells for adequacy during quakes
M	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
H	Harden repeater sites
H	Continue existing interoperability project
H	Strengthen/harden
H	Relocate
H	Redundancy
H	Mobile repeaters

FLOODS

M	Update development policies for flood plains
M	Public education on locations of flood plains
M	Develop multi-jurisdictional working group on floodplain management
M	Develop greenbelt requirements in new developments
M	Update weather pattern/flood plain maps
H	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
M	Required water flow/runoff plans for new development
H	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
L	Maintenance of storm sewers/flood channels
H	Create map of flood channels/diversions/water systems etc
L	Require digital floor plans on new non-residential construction

L	Upgrade dirt embankments to concrete
L	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
H	Increase sandbag distribution capacities
	Develop pre-planned response plan for floods
M	◊ Evacuation documentation
M	◊ Re-examine historical flooding data for potential street re-design
M	Training for city/county PIOs about flood issues
	Warning systems - ensure accurate information provided
M	◊ Publicize flood plain information (website?)
L	◊ Install warning/water level signage
M	◊ Enhanced public information
H	◊ Road closure compliance
H	◊ Shelter locations
H	◊ Pre-event communications
	Look at County requirements for neighborhood access
M	◊ Secondary means of ingress/egress
M	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
H	Hardening water towers
H	Terrorism Surveillance - cameras at reservoirs/dams
M	Riverbed maintenance
M	Evaluate existing lift stations for adequacy
M	Acquisition of property for on-site retention
M	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
M	Traffic light protection
M	Upkeep of diversionary devices
M	Install more turn-off valves on pipelines
H	Backup generation facilities
H	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
H	◊ Networking of agencies for weed abatement
NA	Develop strategic plan for forest management
H	Public education on wildfire defense
H	Encourage citizen surveillance and reporting
H	Identify hydrants with equipment ownership information
H	Enhanced fire fighting equipment

H	Fire spotter program/red flag program
H	◊ Expand to other utilities
M	Research on insect/pest mitigation technologies
M	Volunteer home inspection program
	Public education program
H	◊ Weather reporting/alerting
H	◊ Building protection
H	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
M	Roofing materials/defensive spacing regulations
M	Community task forces for planning and education
M	Fuel/dead tree removal
H	Strategic pre-placement of fire fighting equipment
H	Establish FEMA coordination processes based on ICS
H	Brush clearings around repeaters
H	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
H	"Red Tag" homes in advance of event
H	Provide fire-resistant gel to homeowners
H	Involve insurance agencies in mitigation programs
M	Clear out abandoned vehicles from oases
H	Code enforcement
M	Codes prohibiting fireworks
M	Fuel modification/removal
M	Evaluate building codes
M	Maintaining catch basins

OTHER HAZARDS

M	Improve pipeline maintenance
M	Wetlands mosquito mitigation (West Nile Virus)
M	Insect control study
M	Increase County Vector Control capacities
M	General public drought awareness
M	◊ Lawn watering rotation
M	Develop County drought plan
NA	Mitigation of landslide-prone areas
NA	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
NA	Rotational crop planning/soil stabilization

NA	Enhance agricultural checkpoint enforcement
M	Agriculture - funding of detection programs
M	Communications of pipeline maps (based on need to know)
M	Improved notification plan on runaway trains
M	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
H	Terrorism training/equipment for first responders
H	◊ Terrorism planning/coordination
H	◊ Staffing for terrorism mitigation
H	Create a SONGS regional planning group
H	◊ Include dirty bomb planning
M	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
M	Develop plan for supplemental water sources
M	Public education on low water landscaping
NA	Salton Sea desalinization
M	Establish agriculture security standards (focus on water supply)
M	ID mutual aid agreements
H	Vulnerability assessment on fiber-optic cable
M	Upgrade valves on California aqueduct
	Public education
M	◊ Bi-lingual signs
M	◊ Blackout information
M	Notification system for rail traffic - container contents
H	Control and release of terrorism intelligence
NA	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Riverside - Public Utilities Department	
Contact:	Stephen E. Lafon, Electric Operations Manager
Phone:	(951) 351-6344

MITIGATION STRATEGY INFORMATION

Proposal Name:

Freeman Substation - Flood Mitigation

Proposal Location:

Freeman Substation 3301 Gibson Street, Riverside, CA 92504

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
X	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History

List any previous disaster related events (dates, costs, etc)

None

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the Proposal, any history related to the Proposal. List the activities necessary for its completion in the narrative section below.

Freeman Substation is located in the inundation area for a failure of the Mockingbird Canyon Dam. In the event of a dam failure, the substation would be flooded causing extensive damage to electrical equipment and interrupting electric service to essential emergency services such as Parkview Hospital, California Higway Patrol, City of Riverside Corporation Yard, Lincoln Street Police Station and the Utilities Operation Center. Mitigation would require the construction of drainage features such as a levee to divert the inundation flow around the Proposal site, or relocation of the substation to a safer location.

Does your jurisdiction have primary responsibility for the Proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this Proposal

X	Unfunded Proposal - funds are not available for the Proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Pending	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: City of Riverside		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES __X__ NO_____**	
Current Population in Jurisdiction or Served	285,000	Projected Population in Jurisdiction or Served - in 2010	359,000
Current Sq Miles in Jurisdiction or Served	81 sq. miles	Projected Sq Miles in Jurisdiction or Served - in 2010	90 sq. miles
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	Yes	If yes, please list ordinance or regulation number. Chapter 9.20 of the Riverside Municipal Code	
What is the number one land issue your agency will face in the next five years	Commercial & residential development		
Approximate Number of Homes/Apts/etc.	90,511	Projected Number of Homes/Apts/etc.- in 2010	96,307
Approximate Total Residential Value	$310,000	Projected Residential Total Value - in 2010	$347,200
Approximate Number of Commercial Businesses	19,146	Projected Number of Commercial Businesses - in 2010	22,018
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	35% $108,500	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	35% $121,520
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	100% $310,000	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	100% $347,200
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	10% $31,000	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	10% $34,720
Approximate Percentage of Commercial Businesses in flood hazard zones	35%	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	35%
Approximate Percentage of Commercial Businesses in earthquake hazard zones	100%	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	100%
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	10%	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	10%
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	40	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	46
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	125	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	131
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	10	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	10
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **City of Riverside**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County Operational Area**	**Date of Completion:** **September 10, 2004**
Local Point of Contact: **Carmen Nieves**	**Address:** **4102 Orange Street Riverside, Ca 92501**	
Title: **Emergency Services Coordinator**		
Agency: **Riverside Fire Department**		
Phone Number: **951-826-5550**	**E-Mail: cnieves@riversideca.gov**

However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is	PART I Wildfire Pgs 28 – 40 Flooding Pgs 41 – 53 Earthquakes Pgs 54 – 66 Extreme Weather Pgs 67 – 76 Landslides Pgs 77 – 80 Insect Infestation Pgs 81 – 84 Dam failure Pgs 85 – 93		

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Hazmat incidents Pgs 94 – 101 Highway emergencies Pgs 102 – 110 Rail line emergencies Pgs 102 – 110 Airline / airport emergencies Pgs 102 – 110 Pipeline/Aqueduct incidents Pgs 111 – 114 Blackout Pgs 115 – 118 Toxic pollution Pgs 119 – 124 Nuclear incidents Pgs 125 – 128 Civil unrest Pgs 129 – 131 Jails and prisons incidents Pgs 132 – 134 Terrorism Pgs 135 – 139		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**[No]/[Yes]** If yes, where in MJP: Yes - Part 2, Riverside City Section	**[N] [S]**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Yes, page 19=139	**[N] [S]**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	No	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Yes Part 2,	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the*

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
		Riverside City Section		*plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Yes Part 2, Riverside City Section - Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part 2, Riverside City Section	**[N] [S]**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Yes, Riverside Section, Supplemental questionnaire		
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	No	**[N] [S]**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.			

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of San Jacinto

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		SAN JACINTO		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:			
First Name:	Barry	Last Name:	Mulcock	
Agency Address:	Street:	270 Bissel Pl.		
	City:	San Jacinto		
	State:	CA		
	Zip:	92583		
Contact Phone	(951) 487-7386		FAX	
E-mail	bmulcock@sanjacintoca.us			

Population Served	26,050
Square Miles Served	27

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	NO
What year was your plan last updated?	

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	1995
Do you have a recovery annex or section in your plan?	NO
Do you have a terrorism/WMD annex or section in your plan?	NO

Where is your EOC located?

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	NO
AIRPORT NEXT TO JURISDICTION	YES
DAIRY INDUSTRY	YES
POULTRY INDUSTRY	YES
CROPS/ORCHARDS	NO
DAMS IN JURISDICTION	NO
DAMS NEXT TO JURISDICTION	YES
LAKE/RESERVOIR IN JURISDICTION	NO
LAKE/RESERVOIR NEAR JURISDICTION	YES
JURISDICTION IN FLOOD PLAIN	YES
CONTROLLED FLOOD CONTROL CHANNEL	NO
UNCONTROLLED FLOOD CONTROL CHANNEL	NO
EARTHQUAKE FAULTS IN JURISDICTION	YES
EARTHQUAKE FAULTS NEXT TO JURISDICTION	YES
MOBILE HOME PARKS	YES

NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
San Jacinto	Dam	Diamond Valley Lake	No	Yes
San Jacinto	Fault	San Jacinto Fault Zone	Yes	No
San Jacinto	Flood Channel	Unknown	Yes	No
San Jacinto	Lake	Diamond Valley Lake	No	Yes
San Jacinto	Railroad Track	Unknown	Yes	No
San Jacinto	River	San Jacinto River	No	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of San Jacinto

Scenario: M7.1 on San Jacinto Fault
Epicenter Between San Jacinto & Beaumont

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$31,364.67
Non-Structural Damage	$125,091.45
Building Damage	$156,456.12
Contents Damage	$35,435.73
Inventory Loss	$831.14
Relocation Cost	$660.95
Income Loss	$2,805.93
Rental Income Loss	$7,712.86
Wage Loss	$3,933.75
Total Loss	$207,836.46

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
L	Generate new literature for dissemination to:
L	◊ Government employees
L	◊ Businesses
L	◊ Hotel/motel literature
M	◊ Local radio stations for education
L	◊ Public education via utilities
L	◊ Identify/create television documentary content
L	Improve the Emergency Alert System (EAS)
L	◊ Consider integration with radio notification systems
L	◊ Upgrade alerting and warning systems for hearing impaired
L	◊ Training and maintenance
L	Procure earthquake-warning devices for critical facilities
L	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
L	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
L	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
M	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
M	◊ Bridges/dams/pipelines
L	◊ Government buildings/schools
L	◊ Mobile home parks
H	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
M	Insurance coverage on public facilities
L	Funding for non-structural abatement (Earthquake kits, etc.)
L	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
L	Mapping of liquefaction zones
M	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals

L	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
L	Fire sprinkler ordinance for all structures
L	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
M	◊ Links to jurisdictions
M	◊ Alerting information
L	◊ Volunteer information
M	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
L	Harden repeater sites
M	Continue existing interoperability project
M	Strengthen/harden
M	Relocate
M	Redundancy
L	Mobile repeaters

FLOODS

M	Update development policies for flood plains
M	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
M	Develop greenbelt requirements in new developments
L	Update weather pattern/flood plain maps
M	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
M	Perform GIS mapping of flood channels, etc.
M	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
M	Create map of flood channels/diversions/water systems etc
L	Require digital floor plans on new non-residential construction
M	Upgrade dirt embankments to concrete
M	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
L	Increase sandbag distribution capacities
L	Develop pre-planned response plan for floods
L	◊ Evacuation documentation
M	◊ Re-examine historical flooding data for potential street re-design
L	Training for city/county PIOs about flood issues
L	Warning systems - ensure accurate information provided
L	◊ Publicize flood plain information (website?)
L	◊ Install warning/water level signage
L	◊ Enhanced public information
M	◊ Road closure compliance
L	◊ Shelter locations
L	◊ Pre-event communications
M	Look at County requirements for neighborhood access
M	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
L	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
L	Riverbed maintenance
M	Evaluate existing lift stations for adequacy
M	Acquisition of property for on-site retention
M	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
L	Traffic light protection
L	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
M	Backup generation facilities
L	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
M	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
M	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information
M	Enhanced fire fighting equipment
N/A	Fire spotter program/red flag program
N/A	◊ Expand to other utilities
M	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
L	Public education program
L	◊ Weather reporting/alerting
L	◊ Building protection
L	◊ Respiration
L	Pre-identify shelters/recovery centers/other resources
M	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
M	Fuel/dead tree removal
L	Strategic pre-placement of fire fighting equipment
L	Establish FEMA coordination processes based on ICS
N/A	Brush clearings around repeaters
L	Research new technologies for identifying/tracking fires
M	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
L	Clear out abandoned vehicles from oases
H	Code enforcement
H	Codes prohibiting fireworks
L	Fuel modification/removal
M	Evaluate building codes
M	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
H	Wetlands mosquito mitigation (West Nile Virus)
L	Insect control study
M	Increase County Vector Control capacities
M	General public drought awareness
L	◊ Lawn watering rotation
L	Develop County drought plan
N/A	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
M	Evaluate restrictions on dust/dirt/generating activities during wind seasons
L	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
L	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
L	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
M	Terrorism training/equipment for first responders
M	◊ Terrorism planning/coordination
L	◊ Staffing for terrorism mitigation
L	Create a SONGS regional planning group
L	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
M	Develop plan for supplemental water sources
M	Public education on low water landscaping
N/A	Salton Sea desalinization
L	Establish agriculture security standards (focus on water supply)
L	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
L	Public education
L	◊ Bi-lingual signs
L	◊ Blackout information
L	Notification system for rail traffic - container contents
L	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of San Jacinto	
Contact:	Barry Mulcock
Phone:	(951) 487-7386 or (951) 232-7247

MITIGATION STRATEGY INFORMATION

Proposal Name:

San Jacinto River Levee Mitigation Plan

Proposal Location:

San Jacinto River Levee – West of Sanderson Avenue to Lake Park Bridge

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
x	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	1980 floods with an estimated property damage of $6 Million in today's dollars. Later in 1993, a minor five-year flood occurred again causing a levee rupture in several locations at an estimated damage of $625,000.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

The goal of the San Jacinto River Levee project will be to limit the flood risk to populated areas, protecting residential, commercial, and agricultural uses in the general vicinity of the flood plain. The estimated cost of the levee expansion is $8,000,000.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	X	No	x	Responsible Agency: Joint project with Riverside County Flood Control and Water Conservation District (RCFC&WCD) and City of San Jacinto

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

x	Unfunded proposal - funds are not available for the proposal at this time. Partially funded by RCFC&WCD
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? Yes (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: San Jacinto	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES __X__ NO _____**		
Current Population in Jurisdiction or Served	**26,041**	Projected Population in Jurisdiction or Served - in 2010	**90,000**
Current Sq Miles in Jurisdiction or Served	**26.81**	Projected Sq Miles in Jurisdiction or Served - in 2010	**32 Sq. Miles**
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	**Yes**	If yes, please list ordinance or regulation number. 1029 – Fire Severity Zones; 1071 – Administration of Disaster Operations and Relief	
What is the number one land issue your agency will face in the next five years	Highway 79 Realignment		
Approximate Number of Homes/Apts/etc.	**8151**	Projected Number of Homes/Apts/etc.- in 2010	**35,000**

Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	**0%**	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	**0%**
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	**0%**	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	**0%**
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	**Yes**	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes? Yes			

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: City of San Jacinto	Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES	Date of Completion: September 8, 2004
Local Point of Contact: Barry Mulcock	Address: 270 Bissel Pl. San Jacinto Ca. 92582	
Title: City of San Jacinto Public Works - Street Division Supervisor		
Agency: City of San Jacinto		
Phone Number: (951) 487-7386	E-Mail: bmulcock@sanjacintoca.us

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	Part II, SAN JACINTO Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, SAN JACINTO Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	SAN JACINTO Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, SAN JACINTO Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pgs 41 – 53 Earthquakes Pgs 54 – 66 Extreme Weather Pgs 67 – 76 Hazmat incidents Pgs 94 – 101 Blackout Pgs 115 – 118 Nuclear incidents Pgs 125 – 128 Part II, San Jacinto Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** If yes, where in MJP: Yes, Part II, SAN JACINTO Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & SAN JACINTO Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, SAN JACINTO Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

City of Temecula

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		Temecula		
Type Agency/Jurisdiction:		City		
Contact Person:	Title:	Assistant to the City Manager		
First Name:	Grant	Last Name:	Yates	
Agency Address:	Street:	43200 Business Park Dr		
	City:	Temecula		
	State:	CA		
	Zip:	92589		
Contact Phone	951 506-5100		FAX	951 694-6499
E-mail	grant.yates@cityoftemecula.org			

Population Served	80,000
Square Miles Served	27

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	1998
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	YES

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	NO
AIRPORT NEXT TO JURISDICTION	YES
DAIRY INDUSTRY	NO
POULTRY INDUSTRY	NO
CROPS/ORCHARDS	NO
DAMS IN JURISDICTION	NO
DAMS NEXT TO JURISDICTION	YES
LAKE/RESERVOIR IN JURISDICTION	NO
LAKE/RESERVOIR NEAR JURISDICTION	YES
JURISDICTION IN FLOOD PLAIN	YES
CONTROLLED FLOOD CONTROL CHANNEL	YES
UNCONTROLLED FLOOD CONTROL CHANNEL	YES
EARTHQUAKE FAULTS IN JURISDICTION	YES
EARTHQUAKE FAULTS NEXT TO JURISDICTION	YES
MOBILE HOME PARKS	YES
NON-REINFORCED FREEWAY BRIDGES	NO
NON-REINFORCED BRIDGES	NO
BRIDGES IN FLOOD PLAIN	YES
BRIDGES OVER OR ACROSS RIVER/STREAM	YES
ROADWAY CROSSING RIVER/STREAM	YES
NON REINFORCED BUILDINGS	YES
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	YES
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	YES
FOREST AREA IN JURISDICTION	NO
FOREST AREA NEXT TO JURISDICTION	YES
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	YES
MAJOR GAS/OIL PIPELINES IN JURISDICTION	YES
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	YES
RAILROAD TRACKS IN JURISDICTION	NO
RAILROAD TRACKS NEXT TO JURISDICTION	NO
HAZARDOUS WASTE FACILITIES IN JURISDICTION	NO
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	NO
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	YES
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	NO

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**NO**
NEAR FLOOD PLAIN	**YES**
NEAR RAILROAD TRACKS	**NO**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**YES**
DOWNSTREAM FROM A RESERVOIR	**YES**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**YES**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**YES**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**YES**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**YES**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**YES**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**NO**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	YES
NEAR RAILROAD TRACKS	NO
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	NO
DOWNSTREAM OF A LAKE	NO
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	NO
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	NO
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	YES
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	NO
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	YES
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	YES
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	YES
COULD BE CONSIDERED A BIO-HAZARD RISK	YES

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
Temecula	Dam	Diamond Valley Reservoir	No	Yes
Temecula	Fault	Earthquake Fault	Yes	Yes
Temecula	Hazmat Manufacturing Facility	International Rectifier	Yes	No

Dams Summary

Dam Name	SKINNER CLEARWELL	VAIL	ROBERT A SKINNER
River	OFFSTREAM	TEMECULA CREEK	TUCALOTA CREEK
Nearest City	TEMECULA	TEMECULA	TEMECULA
Height (feet)	44	152	109
Storage (acre-feet)	410		
Year Built	1991	1949	1973
Drainage Area (Sq miles)	0	306	51
Hazard Type	Significant	High	High

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Temecula

Scenario: M6.7 on Southern Elsinore Fault
Epicenter on Border of Murrieta/Temecula

Direct Economic Loss Estimates (thous. $)	
Structural Damage	$24,477.20
Non-Structural Damage	$105,263.77
Building Damage	$129,740.93
Contents Damage	$41,253.19
Inventory Loss	$1,741.54
Relocation Cost	$605.92
Income Loss	$6,714.01
Rental Income Loss	$7,577.22
Wage Loss	$7,949.31
Total Loss	$195,582.10

Commercial Casualties for Daytime Event	
Medical Aid	19
Hospital Treatment	5
Life-Threatening Severity	1
Death	2

Commuting Casualties for Daytime Event	
Medical Aid	0
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

SUMMARIZED HAZUS RESULTS

Jurisdiction: City of Temecula

Scenario: M6.7 on Southern Elsinore Fault
Epicenter on Border of Murrieta/Temecula

Educational Casualties for Daytime Event	
Medical Aid	7
Hospital Treatment	1
Life-Threatening Severity	0
Death	0

Hotels Casualties for Daytime Event	
Medical Aid	0
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

Industrial Casualties for Daytime Event	
Medical Aid	18
Hospital Treatment	5
Life-Threatening Severity	1
Death	1

Other Residential Casualties for Daytime Event	
Medical Aid	2
Hospital Treatment	0
Life-Threatening Severity	0
Death	0

SUMMARIZED HAZUS RESULTS

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
M	Generate new literature for dissemination to:
M	◊ Government employees
M	◊ Businesses
M	◊ Hotel/motel literature
M	◊ Local radio stations for education
H	◊ Public education via utilities
L	◊ Identify/create television documentary content
H	Improve the Emergency Alert System (EAS)
H	◊ Consider integration with radio notification systems
M	◊ Upgrade alerting and warning systems for hearing impaired
M	◊ Training and maintenance
H	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
H	Provide training to hospital staffs
L	Require earthquake gas shutoffs on remodels/new construction
M	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
H	Install earthquake cutoffs at reservoirs
M	Install earthquake-warning devices at critical facilities
H	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
H	◊ Bridges/dams/pipelines
M	◊ Government buildings/schools
M	◊ Mobile home parks
H	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
M	Insurance coverage on public facilities
M	Funding for non-structural abatement (Earthquake kits, etc.)
L	Pre - identify empty commercial space for seismic re-location

L	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
H	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
M	Backup water supplies for hospitals
H	Evaluate pipeline seismic resiliency
M	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
M	Evaluate adequacy of reservoir capacity for sprinkler systems
H	Training/standardization for contractors performing retrofitting
H	Website with mitigation/contractor/retrofitting information
H	◊ Links to jurisdictions
H	◊ Alerting information
H	◊ Volunteer information
M	Evaluate depths of aquifers/wells for adequacy during quakes
H	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
H	Harden repeater sites
H	Continue existing interoperability project
H	Strengthen/harden
L	Relocate
H	Redundancy
M	Mobile repeaters

FLOODS

H	Update development policies for flood plains
H	Public education on locations of flood plains
H	Develop multi-jurisdictional working group on floodplain management
H	Develop greenbelt requirements in new developments
H	Update weather pattern/flood plain maps
M	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
H	Perform GIS mapping of flood channels, etc.
M	Install vehicular crossing gates/physical barriers for road closure
H	Maintenance of storm sewers/flood channels
H	Create map of flood channels/diversions/water systems etc
M	Require digital floor plans on new non-residential construction
M	Upgrade dirt embankments to concrete

M	Conduct countywide needs study on drainage capabilities
M	Increase number of pumping stations
M	Increase sandbag distribution capacities
H	Develop pre-planned response plan for floods
H	◊ Evacuation documentation
H	◊ Re-examine historical flooding data for potential street re-design
M	Training for city/county PIOs about flood issues
M	Warning systems - ensure accurate information provided
H	◊ Publicize flood plain information (website?)
M	◊ Install warning/water level signage
H	◊ Enhanced public information
M	◊ Road closure compliance
M	◊ Shelter locations
H	◊ Pre-event communications
M	Look at County requirements for neighborhood access
M	◊ Secondary means of ingress/egress
H	Vegetation restoration programs
H	Ensure critical facilities are hardened/backed up
M	Hardening water towers
M	Terrorism Surveillance - cameras at reservoirs/dams
M	Riverbed maintenance
M	Evaluate existing lift stations for adequacy
M	Acquisition of property for on-site retention
M	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
H	Traffic light protection
M	Upkeep of diversionary devices
M	Install more turn-off valves on pipelines
M	Backup generation facilities
M	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
M	◊ Networking of agencies for weed abatement
H	Develop strategic plan for forest management
H	Public education on wildfire defense
H	Encourage citizen surveillance and reporting
H	Identify hydrants with equipment ownership information
H	Enhanced fire fighting equipment
M	Fire spotter program/red flag program

M	◊ Expand to other utilities
M	Research on insect/pest mitigation technologies
M	Volunteer home inspection program
H	Public education program
H	◊ Weather reporting/alerting
H	◊ Building protection
M	◊ Respiration
H	Pre-identify shelters/recovery centers/other resources
H	Roofing materials/defensive spacing regulations
H	Community task forces for planning and education
H	Fuel/dead tree removal
M	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
H	Brush clearings around repeaters
M	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
M	"Red Tag" homes in advance of event
H	Provide fire-resistant gel to homeowners
M	Involve insurance agencies in mitigation programs
M	Clear out abandoned vehicles from oases
H	Code enforcement
H	Codes prohibiting fireworks
H	Fuel modification/removal
H	Evaluate building codes
M	Maintaining catch basins

OTHER HAZARDS

M	Improve pipeline maintenance
M	Wetlands mosquito mitigation (West Nile Virus)
M	Insect control study
M	Increase County Vector Control capacities
M	General public drought awareness
M	◊ Lawn watering rotation
M	Develop County drought plan
M	Mitigation of landslide-prone areas
M	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
M	Evaluate restrictions on dust/dirt/generating activities during wind seasons
L	Rotational crop planning/soil stabilization
L	Enhance agricultural checkpoint enforcement

L	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
M	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
H	Terrorism training/equipment for first responders
H	◊ Terrorism planning/coordination
M	◊ Staffing for terrorism mitigation
H	Create a SONGS regional planning group
M	◊ Include dirty bomb planning
M	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
M	Develop plan for supplemental water sources
M	Public education on low water landscaping
L	Salton Sea desalinization
L	Establish agriculture security standards (focus on water supply)
M	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable
H	Upgrade valves on California aqueduct
H	Public education
H	◊ Bi-lingual signs
M	◊ Blackout information
M	Notification system for rail traffic - container contents
H	Control and release of terrorism intelligence
M	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: City of Temecula	
Contact:	Grant Yates
Phone:	(951) 506-5100

MITIGATION STRATEGY INFORMATION

Proposal Name:

Dam innundation plan for Diamond Valley Reservoir

Proposal Location:

Diamond Valley Lake

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
X	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History

List any previous disaster related events (dates, costs, etc)

Diamond Valley Reservior is the largest and newest lake in the County and planning for the possibility of a dam failure is important to the City of Temecula, which lies in the probable areas of concern. Currently the State of California has not reviewed the flood inundation maps from the Metropolitan Water District

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

To our knowledge, there are dam innundation maps for Lake Skinner and Vail Lake, which could also negatively impact the City of Temecula. Planning for the worst case scenario, an innundation map of Diamond Valley could become an invaluable tool for the City of Temecula. Initial maps from MWD and the County GIS Agency have shown that the water flow from Diamond Valley Dam will have a major impact on the City and its surrounding area. The goal of this mitigation project will be to have planning sessions and table top exercises with all of the involved agencies to develop response plans relating to a dam failure. These plans will be updated once the State of California reviews and approves the MWD maps.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No	X	Responsible Agency: Additional partners could include Riverside County, County Flood Control, and the Cities of Hemet and Murrietta.

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

X	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? YES (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

JURISDICTION: **City of Temecula**		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES X NO**	
Current Population in Jurisdiction or Served	77,500	Projected Population in Jurisdiction or Served - in 2010	100,000
Current Sq Miles in Jurisdiction or Served	28.1	Projected Sq Miles in Jurisdiction or Served - in 2010	30
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	Yes	If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years	Growth from unincorporated areas		
Approximate Number of Homes/Apts/etc.	25,000	Projected Number of Homes/Apts/etc.- in 2010	35,000
Approximate Total Residential Value	$8.5 Billion	Projected Residential Total Value - in 2010	$15 Billion
Approximate Number of Commercial Businesses	3,000	Projected Number of Commercial Businesses - in 2010	3,500
Approximate Percentage of Homes/Apts/etc in flood hazard zones and dollar loss	>1% $85,000,000	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010 and dollar loss	>1% $150,000,000
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones and dollar loss	>1% $85,000,000	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010 and dollar loss	>1% $150,000,000
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones and dollar loss	>1% $85,000,000	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010 and dollar loss	>1% $150,000,000
Approximate Percentage of Commercial Businesses in flood hazard zones	>1%	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	>1%
Approximate Percentage of Commercial Businesses in earthquake hazard zones	20%	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	20%
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	0%	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	>1%
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	See Above	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	See Above	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	See Above	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **City of Temecula**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 8, 2004**
Local Point of Contact: **Grant Yates**		**Address:** **43200 Business Park Drive** **Temecula, CA 92592**
Title: **Assistant to the City Manager**		
Agency: **City of Temecula**		
Phone Number: **(951) 506-5100**		**E-Mail: grant.yates@cityoftemecula.org**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

Mitigation Strategy	**N**	**S**
Multi-Jurisdictional Mitigation Actions: §201.6(c)(3)(iv)		

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	Part II, TEMECULA Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, TEMECULA Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	TEMECULA Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, TEMECULA Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pgs 41 – 53 Earthquakes Pgs 54 – 66 Extreme Weather Pgs 67 – 76 Hazmat incidents Pgs 94 – 101 Blackout Pgs 115 – 118 Nuclear incidents Pgs 125 – 128 Part II, Temecula Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** If yes, where in MJP: Yes, Part II, TEMECULA Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & TEMECULA Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, TEMECULA Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

Soboba Band of Luiseno Indians

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		Soboba Band of Luiseno Indians		
Type Agency/Jurisdiction:		Tribal Organization		
Contact Person:	Title:	Public Safety Office		
First Name:	Edward	Last Name:	Lisle	
Agency Address:	Street:	P.O.Box 817		
	City:	San Jacinto		
	State:	CA		
	Zip:	92581		
Contact Phone	951-654-2883 Ext. 193		FAX	951-665-1353
E-mail	elisle@soboba.com			

Population Served	300 Tribual Residents	Square Miles Served	11

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	NO
What year was your plan last updated?	1/12/2003

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	1/12/2003
Do you have a recovery annex or section in your plan?	NO
Do you have a terrorism/WMD annex or section in your plan?	YES

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	NO
AIRPORT NEXT TO JURISDICTION	NO
DAIRY INDUSTRY	YES
POULTRY INDUSTRY	NO
CROPS/ORCHARDS	YES
DAMS IN JURISDICTION	NO
DAMS NEXT TO JURISDICTION	YES
LAKE/RESERVOIR IN JURISDICTION	NO
LAKE/RESERVOIR NEAR JURISDICTION	YES
JURISDICTION IN FLOOD PLAIN	YES
CONTROLLED FLOOD CONTROL CHANNEL	YES
UNCONTROLLED FLOOD CONTROL CHANNEL	NO
EARTHQUAKE FAULTS IN JURISDICTION	YES
EARTHQUAKE FAULTS NEXT TO JURISDICTION	NO
MOBILE HOME PARKS	YES
NON-REINFORCED FREEWAY BRIDGES	NO
NON-REINFORCED BRIDGES	NO
BRIDGES IN FLOOD PLAIN	NO
BRIDGES OVER OR ACROSS RIVER/STREAM	NO
ROADWAY CROSSING RIVER/STREAM	YES
NON REINFORCED BUILDINGS	YES
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	NO
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	NO
FOREST AREA IN JURISDICTION	YES
FOREST AREA NEXT TO JURISDICTION	YES
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	YES
MAJOR GAS/OIL PIPELINES IN JURISDICTION	NO
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	NO
RAILROAD TRACKS IN JURISDICTION	NO
RAILROAD TRACKS NEXT TO JURISDICTION	NO
HAZARDOUS WASTE FACILITIES IN JURISDICTION	NO
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	NO
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	NO
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	NO

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**NO**
NEAR RAILROAD TRACKS	**NO**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**YES**
DOWNSTREAM FROM A RESERVOIR	**NO**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**YES**
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	**NO**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**YES**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**NO**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**NO**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**YES**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**NO**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**NO**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**NO**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION

DOES YOUR ORGANIZATION HAVE AN EOC	**YES**
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**NO**
NEAR RAILROAD TRACKS	**NO**
NEAR A DAM	**YES**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**NO**
DOWNSTREAM OF A LAKE	**YES**
DOWNSTREAM FROM A RESERVOIR	**NO**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	**NO**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**YES**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**NO**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**NO**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**NO**

OTHER FACILITY INFORMATION

ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	**YES**
COULD BE CONSIDERED A BIO-HAZARD RISK	**YES**

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
Soboba Band of Luiseno Indians	Fault	San Jacinto	Yes	No
Soboba Band of Luiseno Indians	Flood Channel	San Jacinto River	Yes	No
Soboba Band of Luiseno Indians	Lake	Hemet Lake/Dam	No	Yes
Soboba Band of Luiseno Indians	River	San Jacinto	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION VULNERABILITY WORKSHEET

NAME: Edward Lisle AGENCY: Soboba Band of Luiseno Indians DATE: 9/2/04

	COUNTY		LOCAL JURISDICTION

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
H	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
L	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
	Provide training to hospital staffs
	Require earthquake gas shutoffs on remodels/new construction
	Evaluate re-enforcing reservoir concrete bases
	Evaluate EOCs for seismic stability
	Install earthquake cutoffs at reservoirs
L	Install earthquake-warning devices at critical facilities
	Develop a dam inundation plan for new Diamond Valley Reservoir
L	Earthquake retrofitting
	◊ Bridges/dams/pipelines

	◊ Government buildings/schools
L	◊ Mobile home parks
	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
	◊ Update to current compliance when retrofitting
	Insurance coverage on public facilities
	Funding for non-structural abatement (Earthquake kits, etc.)
	Pre - identify empty commercial space for seismic re-location
	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
L	Mapping of liquefaction zones
L	Incorporate County geologist data into planning
	Backup water supplies for hospitals
	Evaluate pipeline seismic resiliency
	Pre-positioning of temporary response structures
	Fire sprinkler ordinance for all structures
	Evaluate adequacy of reservoir capacity for sprinkler systems
	Training/standardization for contractors performing retrofitting
	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
	Evaluate depths of aquifers/wells for adequacy during quakes
	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
	Harden repeater sites
	Continue existing interoperability project
	Strengthen/harden
	Relocate
	Redundancy
	Mobile repeaters

FLOODS

M	Update development policies for flood plains
	Public education on locations of flood plains
	Develop multi-jurisdictional working group on floodplain management
	Develop greenbelt requirements in new developments
	Update weather pattern/flood plain maps
	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
	Required water flow/runoff plans for new development
L	Perform GIS mapping of flood channels, etc.
	Install vehicular crossing gates/physical barriers for road closure
	Maintenance of storm sewers/flood channels
	Create map of flood channels/diversions/water systems etc
	Require digital floor plans on new non-residential construction
L	Upgrade dirt embankments to concrete
	Conduct countywide needs study on drainage capabilities
	Increase number of pumping stations
	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
	◊ Evacuation documentation
	◊ Re-examine historical flooding data for potential street re-design
	Training for city/county PIOs about flood issues
M	Warning systems - ensure accurate information provided
	◊ Publicize flood plain information (website?)
	◊ Install warning/water level signage
	◊ Enhanced public information
	◊ Road closure compliance
	◊ Shelter locations
	◊ Pre-event communications
	Look at County requirements for neighborhood access
	◊ Secondary means of ingress/egress
M	Vegetation restoration programs
	Ensure critical facilities are hardened/backed up
	Hardening water towers

	Terrorism Surveillance - cameras at reservoirs/dams
M	Riverbed maintenance
	Evaluate existing lift stations for adequacy
	Acquisition of property for on-site retention
	Evaluate regulations on roof drainage mechanisms
	Erosion-resistant plants
	Traffic light protection
	Upkeep of diversionary devices
	Install more turn-off valves on pipelines
	Backup generation facilities
	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
	◊ Networking of agencies for weed abatement
M	Develop strategic plan for forest management
M	Public education on wildfire defense
H	Encourage citizen surveillance and reporting
	Identify hydrants with equipment ownership information
H	Enhanced fire fighting equipment
	Fire spotter program/red flag program
	◊ Expand to other utilities
	Research on insect/pest mitigation technologies
	Volunteer home inspection program
	Public education program
	◊ Weather reporting/alerting
	◊ Building protection
	◊ Respiration
	Pre-identify shelters/recovery centers/other resources
	Roofing materials/defensive spacing regulations
	Community task forces for planning and education
	Fuel/dead tree removal
	Strategic pre-placement of fire fighting equipment

	Establish FEMA coordination processes based on ICS
	Brush clearings around repeaters
	Research new technologies for identifying/tracking fires
	Procure/deploy backup communications equipments
	"Red Tag" homes in advance of event
	Provide fire-resistant gel to homeowners
	Involve insurance agencies in mitigation programs
	Clear out abandoned vehicles from oases
	Code enforcement
	Codes prohibiting fireworks
M	Fuel modification/removal
H	Evaluate building codes
	Maintaining catch basins

OTHER HAZARDS

	Improve pipeline maintenance
	Wetlands mosquito mitigation (West Nile Virus)
	Insect control study
	Increase County Vector Control capacities
	General public drought awareness
	◊ Lawn watering rotation
	Develop County drought plan
	Mitigation of landslide-prone areas
	Develop winter storm sheltering plan
	Ease permitting process for building transmission lines
	Evaluate restrictions on dust/dirt/generating activities during wind seasons
	Rotational crop planning/soil stabilization
	Enhance agricultural checkpoint enforcement
	Agriculture - funding of detection programs
	Communications of pipeline maps (based on need to know)
	Improved notification plan on runaway trains
	Improve/maintain blackout notification plan.
	Support business continuity planning for utility outages

	Terrorism training/equipment for first responders
	◊ Terrorism planning/coordination
	◊ Staffing for terrorism mitigation
L	Create a SONGS regional planning group
	◊ Include dirty bomb planning
	Cooling stations - MOUs in place
	Fire Ant eradication program
	White Fly infestation abatement/eradication program
	Develop plan for supplemental water sources
	Public education on low water landscaping
	Salton Sea desalinization
	Establish agriculture security standards (focus on water supply)
	ID mutual aid agreements
	Vulnerability assessment on fiber-optic cable
	Upgrade valves on California aqueduct
	Public education
	◊ Bi-lingual signs
	◊ Blackout information
	Notification system for rail traffic - container contents
	Control and release of terrorism intelligence
	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY
PROPOSAL #1

Jurisdiction: Soboba Band of Luiseño Indians	
Contact:	Tobin White (Tribal Administrator) / Ed Lisle (Public Safety)
Phone:	951-2765 / 951-665-1318

MITIGATION STRATEGY INFORMATION

Proposal Name:

Soboba Wildland Fire Interface

Proposal Location:

Soboba Band Of Luiseño Indians Reservation

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
X	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	The Soboba Band of Luiseño Indians has experienced several wild land fires in the past years that have threatened both homes and historical sites on tribal property. Although the damage from these fires was minor, the loss potential was great. The last fire was in 2003 (Canyon Fire) that burnt 800 acres of reservation property and damaged several outbuildings.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the Proposal, any history related to the Proposal. List the activities necessary for its completion in the narrative section below.

The mitigation strategy would be to initiate a Wildland Urban Interface Program that heightens the mitigation level for this specific standard.

Parts of this plan will include:
1 - Establishing a 30' diameter clear zone around residential properties and historical sites.
2 - Mowing of vacant weed infested lots.
3 - Enhancing our education program for tribal members on fire safety.
4 - Developing a more detailed evacuation plan for tribal residents.

This will help reduce the impact of wildland fires upon the reservation's property and historical sites.

Does your jurisdiction have primary responsibility for the Proposal? If not, what agency does?

Yes	**X**	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this Proposal

	Unfunded Proposal - funds are not available for the Proposal at this time
X	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
X	Non-FEMA Hazard Mitigation Funds - BIA Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

YES	Has your jurisdiction evaluated this mitigation strategy to determine its cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY
PROPOSAL #2

Jurisdiction: Soboba Band of Luiseño Indians	
Contact:	Tobin White (Tribal Administrator) / Ed Lisle (Tribal Safety)
Phone:	951-2765 / 951-665-1318

MITIGATION STRATEGY INFORMATION

Proposal Name:

Soboba Building Code Update

Proposal Location:

Soboba Band Of Luiseño Indians Reservation

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
X	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture – crop related mitigation
	Agriculture – animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	The Soboba Band of Luiseño Indians has experienced flooding due to reservoir dam failure in the 1980's. Tribal land and historical sites are located within the San Jacinto Vault Zone. The current building codes used for construction on tribal land are not current concerning fire, earthquake, or flood standards. Damage from any of these events could be devastating.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the Proposal, any history related to the Proposal. List the activities necessary for its completion in the narrative section below.

The California Building Codes are generally used as the minimum standard for building codes in a city or county. The California Building Code has specific building standards to help mitigate the damage commercial and residential property from earthquakes, wildland fires, floods, etc. These codes are also used as requirements for any upgrades or additions to buildings.

This mitigation strategy would be to review the current City Building Codes and determine the necessary updates. In addition to this review and updating of standards, the tribe may determine that there is a need to increase specific codes to heighten the mitigation level for specific standards.

Under the proposal, all future structures will adhere to the Uniform Building Codes and will meet earthquake, fire, and flood standards.

Existing buildings on tribal property will be evaluated in regards to The Uniform Building Code Standards to determine if modifications would be cost effective.
.

Does your jurisdiction have primary responsibility for the Proposal? If not, what agency does?

Yes	**X**	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this Proposal

	Unfunded Proposal - funds are not available for the Proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

YES Has your jurisdiction evaluated this mitigation strategy to determine its cost benefits?
(i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Soboba Band of Luiseño Indians	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES X NO**		
Current Population in Jurisdiction or Served	400	Projected Population in Jurisdiction or Served - in 2010	600
Current Sq Miles in Jurisdiction or Served	10.6	Projected Sq Miles in Jurisdiction or Served - in 2010	10.6
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	YES	If yes, please list ordinance or regulation number. Pending Tribal Council Adoption	
What is the number one land issue your agency will face in the next five years		Land Use - Expansion of facilities	
Approximate Number of Homes/Apts/etc.	200	Projected Number of Homes/Apts/etc.- in 2010	300
Approximate Total Residential Value	$ 2 MILLION	Projected Residential Total Value - in 2010	$ 3 MILLION

Approximate Percentage of Commercial Businesses in wildland fire hazard zones	0	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	2	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	2
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	5 + 3 HISTORICAL SITES	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	6 + 3 HISTORICAL SITES
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	5 + 3 HISTORICAL SITES	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	5 + 3 HISTORICAL SITES
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	YES	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			YES

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Soboba Band of Luiseño Indians**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: 9/9/04**
Local Point of Contact: **Ed Lisle**	**Address:** P.O.Box 817 San Jacinto Ca. 92581

Desert Regional Medical Center	Hazmat Manufacturing Facility	spent laboraory waste	Yes	No
Desert Regional Medical Center	Pipeline	oil	Yes	Yes
Desert Regional Medical Center	Railroad Track	railroad track in hospital territory	Yes	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: Desert Regional Medical Center
Contact: Deborah Miller
Phone: 760-323-6425

MITIGATION STRATEGY INFORMATION

Proposal Name:

Countywide Hospital Mitigation Proposal - Emergency Portable Shelters and Treatment Areas

Proposal Location:

Desert Regional Medical Center, 1150 North Indian Canyon Drive, Palm Springs, CA 92262

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning and Response(i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	Although a hospital in Riverside County has never suffered the dynamic physical damage that was suffered by several hospitals in the Northridge earthquake or in other major earthquakes, the potential for such damage to one or more local hospitals is great. In conducting the countywide hazard assessment, all of the hospitals were found to be at some level of "earthquake risk" because of their proximity to one or more earthquake faults in the county.

Description of Mitigation Goal Narrative: Give a detailed description of the need for the Proposal, any history related to the Proposal. List the activities necessary for its completion in the narrative section below.

In conducting the hazard assessment as a group, the hospitals in the county determined that one of the most critical issues was the problem of immediately sheltering critical hospital patients after any disastrous event where the hospital is no longer safe for patients. This event could be an earthquake, flood, hazardous materials event, or other event that would require patients to be removed from the normal protection of their hospital room.

When the hospitals reviewed this type of event, one of the issues they looked at was the ability to quickly transport a large number of critical patients from one hospital to another. I looking at recent events such as the fires in October of 2003 where an entire hospital had to be evacuated because of the impending forest fire, one of the immediate concerns was the amount of time it took to gather enough methods of transportation to move all of the patients. This timeframe was several hours. Because the event was a fire, many of the patients were left inside the hospital. However, had the hospital been damaged from an earthquake, the patients would have been moved outside while awaiting transportation.

Having critical patients awaiting transportation and/or receiving treatment outside for an extended period of time has raised numerous safety, weather related, and welfare issues for those patients. To reduce the impact of the earthquake on the patients in the hospitals, the hospitals have determined that an important mitigation effort would be the purchase of several portable shelters that could be used in the event of an earthquake or other similar event. These tents could also be used as "surge capacity tents" in the event of a disaster not directly affecting the patients in the hospital, but causing a large number of victims to come to the hospital. These tents would remain portable so that they could be transported around the county in the event of a hospital receiving major damage.

Does your jurisdiction have primary responsibility for the Proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this Proposal

X	Unfunded Proposal - funds are not available for the Proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Yes	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION VULNERABILITY WORKSHEET

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
N/A	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
N/A	Reinforce emergency response facilities
H	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
N/A	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
N/A	◊ Government buildings/schools
N/A	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
N/A	Insurance coverage on public facilities
N/A	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
H	Backup water supplies for hospitals

N/A	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
H	Evaluate adequacy of reservoir capacity for sprinkler systems
H	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
N/A	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
N/A	Harden repeater sites
N/A	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
N/A	Redundancy
N/A	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
N/A	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
N/A	Develop greenbelt requirements in new developments
N/A	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
N/A	Required water flow/runoff plans for new development
N/A	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
N/A	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
N/A	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
N/A	◊ Evacuation documentation
N/A	◊ Re-examine historical flooding data for potential street re-design
N/A	Training for city/county PIOs about flood issues
N/A	Warning systems - ensure accurate information provided
N/A	◊ Publicize flood plain information (website?)

N/A	◊ Install warning/water level signage
N/A	◊ Enhanced public information
N/A	◊ Road closure compliance
L	◊ Shelter locations
N/A	◊ Pre-event communications
N/A	Look at County requirements for neighborhood access
N/A	◊ Secondary means of ingress/egress
N/A	Vegetation restoration programs
N/A	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
N/A	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
N/A	Traffic light protection
N/A	Upkeep of diversionary devices
N/A	Install more turn-off valves on pipelines
H	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
N/A	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
N/A	Identify hydrants with equipment ownership information
N/A	Enhanced fire fighting equipment
N/A	Fire spotter program/red flag program
N/A	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies
N/A	Volunteer home inspection program
N/A	Public education program
N/A	◊ Weather reporting/alerting
N/A	◊ Building protection
M	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
N/A	Roofing materials/defensive spacing regulations
M	Community task forces for planning and education
N/A	Fuel/dead tree removal
H	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
N/A	Brush clearings around repeaters

N/A	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
N/A	"Red Tag" homes in advance of event
N/A	Provide fire-resistant gel to homeowners
N/A	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
H	Code enforcement
N/A	Codes prohibiting fireworks
N/A	Fuel modification/removal
H	Evaluate building codes
N/A	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
N/A	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
N/A	General public drought awareness
N/A	◊ Lawn watering rotation
N/A	Develop County drought plan
N/A	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
N/A	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
N/A	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
N/A	Improve/maintain blackout notification plan.
N/A	Support business continuity planning for utility outages
N/A	Terrorism training/equipment for first responders
N/A	◊ Terrorism planning/coordination
N/A	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
N/A	◊ Include dirty bomb planning
N/A	Cooling stations - MOUs in place
N/A	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
N/A	Develop plan for supplemental water sources
N/A	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
H	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable

N/A	Upgrade valves on California aqueduct
M	Public education
N/A	◊ Bi-lingual signs
N/A	◊ Blackout information
N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Desert Regional	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES NO XXX**		
Current Population in Jurisdiction or Served	120,000	Projected Population in Jurisdiction or Served - in 2010	136,000
Current Sq Miles in Jurisdiction or Served		Projected Sq Miles in Jurisdiction or Served - in 2010	
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?		If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years			
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010	
Approximate Total Residential Value		Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses		Projected Number of Commercial Businesses - in 2010	
Approximate Percentage of Homes/Apts/etc in flood hazard zones		Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones		Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones		Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in flood hazard zones		Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in earthquake hazard zones		Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	1	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	1	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.		Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Desert Regional Medical Center**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 21, 2004**
Local Point of Contact: **Deborah Miller**		**Address:** **1150 N Indian Canyon Drive** **Palms Springs, CA 92262**
Title: **Safety Officer**		
Agency: **Desert Regional Medical Center**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	[M] [NM]	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.		

Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).	Part II, Desert Regional Medical Center Section	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Desert Regional Medical Center Section	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	Part II, Desert Regional Medical Center Section, Supplemental Questionnaire	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Desert Regional Medical Center Section	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pgs 41 – 53 Earthquakes Pgs 54 – 66 Extreme Weather Pgs 67 – 76 Hazmat incidents Pgs 94 – 101 Blackout Pgs 115 – 118 Nuclear incidents Pgs 125 – 128 Part II, Desert Regional Medical Center Section		

	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**[No]/[Yes]** If yes, where in MJP: Yes, Part II, Desert Regional Medical Center Section	**[N] [S]**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**[N] [S]**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & Desert Regional Medical Center Section Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Desert Regional Medical Center Section	**[N] [S]**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143		
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**[N] [S]**	

ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143		

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

Contact Person:	Title:			
First Name:	Richard	Last Name:	Greener	
Agency Address:	Street:	1117 East Devonshire Ave,		
	City:	Hemet		
	State:	CA		
	Zip:	92543		
Contact Phone	951-652-2811 Ext. 5075		FAX	
E-mail	rgreener@vhs.dst.ca.us			

Population Served	0
Square Miles Served	0

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	1/1/2003

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	1/1/2003
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	YES

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	NO
AIRPORT NEXT TO JURISDICTION	NO
DAIRY INDUSTRY	NO
POULTRY INDUSTRY	NO
CROPS/ORCHARDS	NO
DAMS IN JURISDICTION	YES
DAMS NEXT TO JURISDICTION	NO
LAKE/RESERVOIR IN JURISDICTION	YES
LAKE/RESERVOIR NEAR JURISDICTION	NO
JURISDICTION IN FLOOD PLAIN	YES
CONTROLLED FLOOD CONTROL CHANNEL	YES
UNCONTROLLED FLOOD CONTROL CHANNEL	YES
EARTHQUAKE FAULTS IN JURISDICTION	YES
EARTHQUAKE FAULTS NEXT TO JURISDICTION	NO
MOBILE HOME PARKS	NO
NON-REINFORCED FREEWAY BRIDGES	NO
NON-REINFORCED BRIDGES	NO
BRIDGES IN FLOOD PLAIN	NO
BRIDGES OVER OR ACROSS RIVER/STREAM	NO
ROADWAY CROSSING RIVER/STREAM	NO
NON REINFORCED BUILDINGS	NO
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	YES
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	NO
FOREST AREA IN JURISDICTION	NO
FOREST AREA NEXT TO JURISDICTION	NO
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	NO
MAJOR GAS/OIL PIPELINES IN JURISDICTION	NO
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	NO
RAILROAD TRACKS IN JURISDICTION	NO
RAILROAD TRACKS NEXT TO JURISDICTION	YES
HAZARDOUS WASTE FACILITIES IN JURISDICTION	YES
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	NO
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	YES
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	NO

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**NO**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**YES**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**YES**
DOWNSTREAM FROM A RESERVOIR	**YES**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	**NO**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**NO**
A HAZARDOUS WASTE FACILITY	**YES**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**YES**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**NO**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	
HAVE BEEN DAMAGED BY FLOOD	
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	
HAVE BEEN DAMAGED BY FOREST FIRE	
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	
HAVE BEEN IMPACTED BY A PIPELINE EVENT	

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	YES
NEAR FLOOD PLAIN	
NEAR RAILROAD TRACKS	
NEAR A DAM	
UPSTREAM FROM A DAM	
DOWNSTREAM FROM A DAM	YES
DOWNSTREAM OF A LAKE	YES
DOWNSTREAM FROM A RESERVOIR	YES
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	
ON AN EARTHQUAKE FAULT	YES
NEAR AN EARTHQUAKE FAULT	
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	
IN A FOREST AREA	
NEAR A FOREST AREA	
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	YES
NEAR A HAZARDOUS WASTE FACILITY	
A HAZARDOUS STORAGE FACILITY	YES
NEAR A HAZARDOUS STORAGE FACILITY	
NON REINFORCED BUILDINGS	
A MAJOR GAS/OIL PIPELINE	
NEAR A MAJOR GAS/OIL PIPELINE	

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	YES

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction ?	Adjacent to Jurisdiction?
Hemet Valley Medical Center	Dam	Diamond Valley Dam	No	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION VULNERABILITY WORKSHEET

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation activities or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
N/A	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
N/A	Reinforce emergency response facilities
H	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
N/A	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
N/A	◊ Government buildings/schools
N/A	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
N/A	Insurance coverage on public facilities
N/A	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
H	Incorporate County geologist data into planning

H	Backup water supplies for hospitals
N/A	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
H	Evaluate adequacy of reservoir capacity for sprinkler systems
H	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
N/A	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
N/A	Harden repeater sites
N/A	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
N/A	Redundancy
N/A	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
N/A	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
N/A	Develop greenbelt requirements in new developments
N/A	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
N/A	Required water flow/runoff plans for new development
N/A	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
N/A	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
N/A	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
N/A	◊ Evacuation documentation
N/A	◊ Re-examine historical flooding data for potential street re-design
N/A	Training for city/county PIOs about flood issues
N/A	Warning systems - ensure accurate information provided
N/A	◊ Publicize flood plain information (website?)
N/A	◊ Install warning/water level signage
N/A	◊ Enhanced public information
N/A	◊ Road closure compliance
L	◊ Shelter locations
N/A	◊ Pre-event communications
N/A	Look at County requirements for neighborhood access
N/A	◊ Secondary means of ingress/egress
N/A	Vegetation restoration programs
N/A	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
N/A	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
N/A	Traffic light protection
N/A	Upkeep of diversionary devices
N/A	Install more turn-off valves on pipelines

H	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
N/A	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
N/A	Identify hydrants with equipment ownership information
N/A	Enhanced fire fighting equipment
N/A	Fire spotter program/red flag program
N/A	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies
N/A	Volunteer home inspection program
N/A	Public education program
N/A	◊ Weather reporting/alerting
N/A	◊ Building protection
M	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
N/A	Roofing materials/defensive spacing regulations
M	Community task forces for planning and education
M	Fuel/dead tree removal
H	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
N/A	Brush clearings around repeaters
N/A	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
N/A	"Red Tag" homes in advance of event
N/A	Provide fire-resistant gel to homeowners
N/A	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
H	Code enforcement
N/A	Codes prohibiting fireworks
N/A	Fuel modification/removal
H	Evaluate building codes
N/A	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
N/A	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
N/A	General public drought awareness

N/A	◊ Lawn watering rotation
N/A	Develop County drought plan
N/A	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
N/A	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
N/A	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
N/A	Improve/maintain blackout notification plan.
N/A	Support business continuity planning for utility outages
N/A	Terrorism training/equipment for first responders
N/A	◊ Terrorism planning/coordination
N/A	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
N/A	◊ Include dirty bomb planning
N/A	Cooling stations - MOUs in place
N/A	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
N/A	Develop plan for supplemental water sources
N/A	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
H	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
M	Public education
N/A	◊ Bi-lingual signs
N/A	◊ Blackout information
N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

H	SB1953 NPC2 – Stage 1 (essential equipment anchorage/emergency generator)
H	SB1953 – Stage 2 projected 2008 “B” building structurally updated/ “A” building all essential functions removed. (extension requested)
H	Update EMS radio system
H	Underground fuel lines/self control fuel links/leak detection system

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction:	Hemet Valley Medical Center
Contact:	Richard Greener
Phone:	(951) 652-2811 Ext. 5075

MITIGATION STRATEGY INFORMATION

Proposal Name:

Countywide Hospital Mitigation Proposal - Emergency Portable Shelters and Treatment Areas

Proposal Location:

1117 East Devonshire Ave, Hemet, CA 92543

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning and Response(i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	Although a hospital in Riverside County has never suffered the dynamic physical damage that was suffered by several hospitals in the Northridge earthquake or in other major earthquakes, the potential for such damage to one or more local hospitals is great. In conducting the countywide hazard assessment, all of the hospitals were found to be at some level of "earthquake risk" because of their proximity to one or more earthquake faults in the county.

Description of Mitigation Goal Narrative: Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

In conducting the hazard assessment as a group, the hospitals in the county determined that one of the most critical issues was the problem of immediately sheltering critical hospital patients after any disastrous event where the hospital is no longer safe for patients. This event could be an earthquake, flood, hazardous materials event, or other event that would require patients to be removed from the normal protection of their hospital room.

When the hospitals reviewed this type of event, one of the issues they looked at was the ability to quickly transport a large number of critical patients from one hospital to another. I looking at recent events such as the fires in October of 2003 where an entire hospital had to be evacuated because of the impending forest fire, one of the immediate concerns was the amount of time it took to gather enough methods of transportation to move all of the patients. This timeframe was several hours. Because the event was a fire, many of the patients were left inside the hospital. However, had the hospital been damaged from an earthquake, the patients would have been moved outside while awaiting transportation.

Having critical patients awaiting transportation and/or receiving treatment outside for an extended period of time has raised numerous safety, weather related, and welfare issues for those patients. To reduce the impact of the earthquake on the patients in the hospitals, the hospitals have determined that an important mitigation effort would be the purchase of several portable shelters that could be used in the event of an earthquake or other similar event. These tents could also be used as "surge capacity tents" in the event of a disaster not directly affecting the patients in the hospital, but causing a large number of victims to come to the hospital. These tents would remain portable so that they could be transported around the county in the event of a hospital receiving major damage.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

X	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Yes	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Hemet Valley Medical Center	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES NO XXX**		
Current Population in Jurisdiction or Served		Projected Population in Jurisdiction or Served - in 2010	
Current Sq Miles in Jurisdiction or Served		Projected Sq Miles in Jurisdiction or Served - in 2010	
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?		If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years			
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010	
Approximate Total Residential Value		Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses		Projected Number of Commercial Businesses - in 2010	
Approximate Percentage of Homes/Apts/etc in flood hazard zones		Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones		Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones		Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in flood hazard zones		Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in earthquake hazard zones		Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	1	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	1	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	1	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	1
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Hemet Valley Medical Center**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion:** **September 8, 2004**
Local Point of Contact: **Richard Greener**	**Address:** **1116 E. Latham** **Hemet, CA. 92543**	
Title: **Director of Safety**		
Agency: Hemet Valley Medical Center

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	

Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).	Part II, Hemet Valley Part II Hemet Valley Medical Center Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Hemet Valley Medical Center Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Hemet Valley Medical Center Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Hemet Valley Medical Center Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Earthquakes Pages 54 – 66 Wildfire Pgs 28 – 40 Flooding Pgs 41 – 53 Weather Pages 67 – 76 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Part II, Hemet Valley Medical Center Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Hemet Valley Medical Center Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Hemet Valley Medical Center Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Hemet Valley Medical Center Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

Inland Valley Medical Center

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		Inland Valley Medical Center		
Type Agency/Jurisdiction:		Hospital		
Contact Person:	Title:	Disaster Coordinator		
First Name:	Maureen	Last Name:	Bowlin	
Agency Address:	Street:	36485 Inland Valley Drive		
	City:	Wildomar		
	State:	Ca.		
	Zip:	92595		
Contact Phone	(951) 677-1111		FAX	
E-mail	maureen.bowlin@uhsinc.com			

Population Served	0	Square Miles Served	0

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	6/1/2003

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	6/1/2003
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	YES

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	NO
AIRPORT NEXT TO JURISDICTION	NO
DAIRY INDUSTRY	NO
POULTRY INDUSTRY	NO
CROPS/ORCHARDS	NO
DAMS IN JURISDICTION	YES
DAMS NEXT TO JURISDICTION	YES
LAKE/RESERVOIR IN JURISDICTION	YES
LAKE/RESERVOIR NEAR JURISDICTION	YES

RAILROAD TRACKS NEXT TO JURISDICTION	
HAZARDOUS WASTE FACILITIES IN JURISDICTION	YES
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	YES
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	YES
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	YES

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**YES**
NEAR RAILROAD TRACKS	**NO**
NEAR A DAM	**YES**
UPSTREAM FROM A DAM	**YES**
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**YES**
DOWNSTREAM FROM A RESERVOIR	**YES**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	
NEAR A FOREST AREA	
NEAR A MAJOR HIGHWAY	
A HAZARDOUS WASTE FACILITY	
NEAR A HAZARDOUS WASTE FACILITY	
A HAZARDOUS STORAGE FACILITY	
NEAR A HAZARDOUS STORAGE FACILITY	
NON REINFORCED BUILDINGS	
A MAJOR GAS/OIL PIPELINE	
NEAR A MAJOR GAS/OIL PIPELINE	

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**NO**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	YES
NEAR FLOOD PLAIN	YES
NEAR RAILROAD TRACKS	NO
NEAR A DAM	YES
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	YES
DOWNSTREAM OF A LAKE	YES
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	YES
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	YES
NEAR A FOREST AREA	
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	YES
NEAR A HAZARDOUS WASTE FACILITY	YES
A HAZARDOUS STORAGE FACILITY	YES
NEAR A HAZARDOUS STORAGE FACILITY	YES
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
Inland Valley	Dam	Diamond Valey Lake	No	Yes
Inland Valley	Fault	Elsinore	Yes	No
Inland Valley	Flood Channel	Line G	Yes	No
Inland Valley	Lake	Diamond Valley Lake	No	Yes
Inland Valley	Lake	Lake Skinner	No	Yes
Inland Valley	River	Murrieta Creek	Yes	No
Inland Valley	Stream	Warm Springs	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION VULNERABILITY WORKSHEET

NAME: Maureen Bowlin(Disaster Coordinator) AGENCY: **Inland Valley Medical Center** DATE: **6/30/04**

	COUNTY		LOCAL JURISDICTION

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
N/A	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
N/A	Reinforce emergency response facilities
H	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
N/A	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
N/A	◊ Government buildings/schools
N/A	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
N/A	Insurance coverage on public facilities
N/A	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
H	Backup water supplies for hospitals

N/A	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
H	Evaluate adequacy of reservoir capacity for sprinkler systems
H	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
N/A	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
N/A	Harden repeater sites
N/A	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
N/A	Redundancy
N/A	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
N/A	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
N/A	Develop greenbelt requirements in new developments
N/A	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
N/A	Required water flow/runoff plans for new development
N/A	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
N/A	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
N/A	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
N/A	◊ Evacuation documentation
N/A	◊ Re-examine historical flooding data for potential street re-design
N/A	Training for city/county PIOs about flood issues
N/A	Warning systems - ensure accurate information provided
N/A	◊ Publicize flood plain information (website?)
N/A	◊ Install warning/water level signage
N/A	◊ Enhanced public information
N/A	◊ Road closure compliance
L	◊ Shelter locations
N/A	◊ Pre-event communications
N/A	Look at County requirements for neighborhood access
N/A	◊ Secondary means of ingress/egress
N/A	Vegetation restoration programs
N/A	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
N/A	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
N/A	Traffic light protection
N/A	Upkeep of diversionary devices
N/A	Install more turn-off valves on pipelines
H	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
N/A	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
N/A	Identify hydrants with equipment ownership information
N/A	Enhanced fire fighting equipment
N/A	Fire spotter program/red flag program
N/A	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies
N/A	Volunteer home inspection program
N/A	Public education program
N/A	◊ Weather reporting/alerting
N/A	◊ Building protection
M	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
N/A	Roofing materials/defensive spacing regulations
M	Community task forces for planning and education
M	Fuel/dead tree removal
H	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
N/A	Brush clearings around repeaters
N/A	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
N/A	"Red Tag" homes in advance of event
N/A	Provide fire-resistant gel to homeowners
N/A	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
H	Code enforcement
N/A	Codes prohibiting fireworks
N/A	Fuel modification/removal
H	Evaluate building codes
N/A	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
N/A	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
N/A	General public drought awareness
N/A	◊ Lawn watering rotation
N/A	Develop County drought plan
N/A	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
N/A	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
N/A	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
N/A	Improve/maintain blackout notification plan.
N/A	Support business continuity planning for utility outages
N/A	Terrorism training/equipment for first responders
N/A	◊ Terrorism planning/coordination
N/A	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
N/A	◊ Include dirty bomb planning
N/A	Cooling stations - MOUs in place
N/A	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
N/A	Develop plan for supplemental water sources
N/A	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
H	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
M	Public education
N/A	◊ Bi-lingual signs
N/A	◊ Blackout information
N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

PLEASE LIST ANY ADDITIONAL MITIGATION GOALS AND PRIORITY LEVEL FOR YOUR AGENCY OR FACILITY HERE.

H	SB1953 NPC2 – Stage 1 (essential equipment anchorage/emergency generator)
H	SB1953 – Stage 2 projected 2008 “B” building structurally updated/ “A” building all essential functions removed. (extension requested)
H	Update EMS radio system
H	Underground fuel lines/self control fuel links/leak detection system

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: Inland Valley Medical Center	
Contact:	Maureen Bowlin(Disaster Coordinator)/Brian Tickel(Safety Officer)
Phone:	951-696-6184

MITIGATION STRATEGY INFORMATION

Proposal Name:

Countywide Hospital Mitigation Proposal - Emergency Portable Shelters and Treatment Areas

Proposal Location:

Inland Valley Medical Center 36485 Inland Valley Drive, Wildomar, Ca. 92591

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning and Response (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	Although a hospital in Riverside County has never suffered the dynamic physical damage that was suffered by several hospitals in the Northridge earthquake or in other major earthquakes, the potential for such damage to one or more local hospitals is great. In conducting the countywide hazard assessment, all of the hospitals were found to be at some level of "earthquake risk" because of their proximity to one or more earthquake faults in the county.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

In conducting the hazard assessment as a group, the hospitals in the county determined that one of the most critical issues was the problem of immediately sheltering critical hospital patients after any disastrous event, where the hospital is no longer safe for patients. This event could be an earthquake, flood, hazardous materials event, or other event that would require patients to be removed from the normal protection of their hospital room.

When the hospitals reviewed this type of event, one of the issues they looked at was the ability to quickly transport a large number of critical patients from one hospital to another. I looking at recent events such as the fires in October of 2003, where an entire hospital had to be evacuated because of the impending forest fire, one of the immediate concerns was the amount of time it took to gather enough methods of transportation to move all of the patients. This timeframe was several hours. Because the event was a fire, many of the patients were left inside the hospital. However, had the hospital been damaged from an earthquake, the patients would have been moved outside while awaiting transportation.

Having critical patients awaiting transportation and/or receiving treatment outside for an extended period of time has raised numerous safety, weather related, and welfare issues for those patients. To reduce the impact of the earthquake on the patients in the hospitals, the hospitals have determined that an important mitigation effort would be the purchase of several portable shelters that could be used in the event of an earthquake or other similar event. These tents could also be used as "surge capacity tents" in the event of a disaster not directly affecting the patients in the hospital, but causing a large number of victims to come to the hospital. These tents would remain portable so that they could be transported around the county in the event of a hospital receiving major damage.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

X	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Yes	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Inland Valley Medical Center	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES NO XXXX**		
Current Population in Jurisdiction or Served		Projected Population in Jurisdiction or Served - in 2010	
Current Sq Miles in Jurisdiction or Served		Projected Sq Miles in Jurisdiction or Served - in 2010	
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?		If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years			
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010	
Approximate Total Residential Value		Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses		Projected Number of Commercial Businesses - in 2010	
Approximate Percentage of Homes/Apts/etc in flood hazard zones		Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones		Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones		Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in flood hazard zones		Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in earthquake hazard zones		Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	1	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	1	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.		Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Inland Valley Medical Center** **Southwest Healthcare System**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 21, 2004**
Local Point of Contact: **Maureen Bowlin RN CEN MICN**	**Address:** **36485 Inland Valley Drive.** **Wildomar** **CA. 92595**	
Title: **Disaster Coordinator**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	

Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).	Part II, Inland Valley Medical Center Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Inland Valley Medical Center Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Inland Valley Medical Center Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Inland Valley Medical Center Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pgs 28 – 40 Flooding Pgs 41 – 53 Earthquakes Pages 54 – 66 Dam failure Pgs 85 – 93 Weather Pages 67 – 76 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Part II, Inland Valley Medical Center Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Inland Valley Medical Center Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Inland Valley Medical Center Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Inland Valley Medical Center Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goals identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
N/A	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
N/A	Reinforce emergency response facilities
H	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
N/A	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
N/A	◊ Government buildings/schools
N/A	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
N/A	Insurance coverage on public facilities
N/A	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
H	Incorporate County geologist data into planning

H	Backup water supplies for hospitals
N/A	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
H	Evaluate adequacy of reservoir capacity for sprinkler systems
H	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
N/A	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
N/A	Harden repeater sites
N/A	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
N/A	Redundancy
N/A	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
N/A	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
N/A	Develop greenbelt requirements in new developments
N/A	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
N/A	Required water flow/runoff plans for new development
N/A	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
N/A	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
N/A	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
N/A	◊ Evacuation documentation
N/A	◊ Re-examine historical flooding data for potential street re-design
N/A	Training for city/county PIOs about flood issues

N/A	Warning systems - ensure accurate information provided
N/A	◊ Publicize flood plain information (website?)
N/A	◊ Install warning/water level signage
N/A	◊ Enhanced public information
N/A	◊ Road closure compliance
L	◊ Shelter locations
N/A	◊ Pre-event communications
N/A	Look at County requirements for neighborhood access
N/A	◊ Secondary means of ingress/egress
N/A	Vegetation restoration programs
N/A	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
N/A	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
N/A	Traffic light protection
N/A	Upkeep of diversionary devices
N/A	Install more turn-off valves on pipelines
H	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
N/A	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
N/A	Identify hydrants with equipment ownership information
N/A	Enhanced fire fighting equipment
N/A	Fire spotter program/red flag program
N/A	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies
N/A	Volunteer home inspection program
N/A	Public education program
N/A	◊ Weather reporting/alerting
N/A	◊ Building protection
M	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
N/A	Roofing materials/defensive spacing regulations
M	Community task forces for planning and education
N/A	Fuel/dead tree removal

H	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
N/A	Brush clearings around repeaters
N/A	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
N/A	"Red Tag" homes in advance of event
N/A	Provide fire-resistant gel to homeowners
N/A	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
H	Code enforcement
N/A	Codes prohibiting fireworks
N/A	Fuel modification/removal
H	Evaluate building codes
N/A	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
N/A	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
N/A	General public drought awareness
N/A	◊ Lawn watering rotation
N/A	Develop County drought plan
N/A	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
N/A	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
N/A	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
N/A	Improve/maintain blackout notification plan.
N/A	Support business continuity planning for utility outages
N/A	Terrorism training/equipment for first responders
N/A	◊ Terrorism planning/coordination
N/A	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
N/A	◊ Include dirty bomb planning
N/A	Cooling stations - MOUs in place
N/A	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
N/A	Develop plan for supplemental water sources
N/A	Public education on low water landscaping

N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
H	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
M	Public education
N/A	◊ Bi-lingual signs
N/A	◊ Blackout information
N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction:	JOHN F. KENNEDY MEMORIAL HOSPITAL
Contact:	Molly Groban, MS, RN, Clinical Manager ED
Phone:	760-775-8481

MITIGATION STRATEGY INFORMATION

Proposal Name:

Countywide Hospital Mitigation Proposal - Emergency Portable Shelters and Treatment Areas

Proposal Location:

47-111 Monroe Street, Indio, California 90221

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning and Response(i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	Although a hospital in Riverside County has never suffered the dynamic physical damage that was suffered by several hospitals in the Northridge earthquake or in other major earthquakes, the potential for such damage to one or more local hospitals is great. In conducting the countywide hazard assessment, all of the hospitals were found to be at some level of "earthquake risk" because of their proximity to one or more earthquake faults in the county.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

In conducting the hazard assessment as a group, the hospitals in the county determined that one of the most critical issues was the problem of immediately sheltering critical hospital patients after any disastrous event where the hospital is no longer safe for patients. This event could be an earthquake, flood, hazardous materials event, or other event that would require patients to be removed from the normal protection of their hospital room.

When the hospitals reviewed this type of event, one of the issues they looked at was the ability to quickly transport a large number of critical patients from one hospital to another. I looking at recent events such as the fires in October of 2003 where an entire hospital had to be evacuated because of the impending forest fire, one of the immediate concerns was the amount of time it took to gather enough methods of transportation to move all of the patients. This timeframe was several hours. Because the event was a fire, many of the patients were left inside the hospital. However, had the hospital been damaged from an earthquake, the patients would have been moved outside while awaiting transportation.

Having critical patients awaiting transportation and/or receiving treatment outside for an extended period of time has raised numerous safety, weather related, and welfare issues for those patients. To reduce the impact of the earthquake on the patients in the hospitals, the hospitals have determined that an important mitigation effort would be the purchase of several portable shelters that could be used in the event of an earthquake or other similar event. These tents could also be used as "surge capacity tents" in the event of a disaster not directly affecting the patients in the hospital, but causing a large number of victims to come to the hospital. These tents would remain portable so that they could be transported around the county in the event of a hospital receiving major damage.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

X	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Yes	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: JFK Hospital	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES NO XXXX**		
Current Population in Jurisdiction or Served	120,000	Projected Population in Jurisdiction or Served - in 2010	136,000
Current Sq Miles in Jurisdiction or Served		Projected Sq Miles in Jurisdiction or Served - in 2010	
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?		If yes, please list ordinance or regulation number. Hospital Policy - #402	
What is the number one land issue your agency will face in the next five years			
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010	
Approximate Total Residential Value		Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses		Projected Number of Commercial Businesses - in 2010	
Approximate Percentage of Homes/Apts/etc in flood hazard zones		Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones		Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones		Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in flood hazard zones		Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in earthquake hazard zones		Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	1	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	1	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.		Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **JOHN F. KENNEDY MEMORIAL HOSPITAL**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 8, 2004**
Local Point of Contact: Molly Groban, MS, RN,		**Address:** 47-111 Monroe Street, Indio, California 90221
Title: Clinical Manager ED		
Agency: JOHN F. KENNEDY MEMORIAL HOSPITAL

Part II, JFK Hospital Section, Supplemental Questionnaire	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, JFK Hospital Section	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pgs 41 – 53 Earthquakes Pgs 54 – 66 Extreme Weather Pgs 67 – 76 Hazmat incidents Pgs 94 – 101 Blackout Pgs 115 – 118 Nuclear incidents Pgs 125 – 128 Part II, JFK Hospital Section		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**[No]/[Yes]** If yes, where in MJP: Yes, Part II, JFK Hospital Section	**[N] [S]**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**[N] [S]**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & JFK Hospital Section Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, JFK Hospital Section	**[N] [S]**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143		
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**[N] [S]**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143

Kaiser Hospital	Hazmat Storage Location	Hospital Storage Site	Yes	No
Kaiser Hospital	Lake	Lake Mathews	No	Yes
Kaiser Hospital	Railroad Track	Union Pacific	No	Yes
Kaiser Hospital	Reservoir	Tilden	No	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION VULNERABILITY WORKSHEET

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
	Generate new literature for dissemination to:
	◊ Government employees
L	◊ Businesses
L	◊ Hotel/motel literature
L	◊ Local radio stations for education
L	◊ Public education via utilities
LM	◊ Identify/create television documentary content
M	Improve the Emergency Alert System (EAS)
M	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
M	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
H	Provide training to hospital staffs
M	Require earthquake gas shutoffs on remodels/new construction
M	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
M	Install earthquake cutoffs at reservoirs
M	Install earthquake-warning devices at critical facilities
	Develop a dam inundation plan for new Diamond Valley Reservoir
	Earthquake retrofitting
H	◊ Bridges/dams/pipelines
H	◊ Government buildings/schools
	◊ Mobile home parks
	Develop educational materials on structural reinforcement and home inspections
	Ensure Uniform Building Code compliance
	◊ Update to current compliance when retrofitting
	Insurance coverage on public facilities
	Funding for non-structural abatement (Earthquake kits, etc.)
	Pre - identify empty commercial space for seismic re-location
	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
	Mapping of liquefaction zones
	Incorporate County geologist data into planning
H	Backup water supplies for hospitals
	Evaluate pipeline seismic resiliency

	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
	Evaluate adequacy of reservoir capacity for sprinkler systems
H	Training/standardization for contractors performing retrofitting
	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
	Evaluate depths of aquifers/wells for adequacy during quakes
	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
H	Harden repeater sites
	Continue existing interoperability project
	Strengthen/harden
	Relocate
H	Redundancy
H	Mobile repeaters

FLOODS

M	Update development policies for flood plains
M	Public education on locations of flood plains
M	Develop multi-jurisdictional working group on floodplain management
	Develop greenbelt requirements in new developments
M	Update weather pattern/flood plain maps
	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
M	Required water flow/runoff plans for new development
M	Perform GIS mapping of flood channels, etc.
H	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
M	Create map of flood channels/diversions/water systems etc
	Require digital floor plans on new non-residential construction
	Upgrade dirt embankments to concrete
	Conduct countywide needs study on drainage capabilities
	Increase number of pumping stations
M	Increase sandbag distribution capacities
	Develop pre-planned response plan for floods
	◊ Evacuation documentation
	◊ Re-examine historical flooding data for potential street re-design
H	Training for city/county PIOs about flood issues
H	Warning systems - ensure accurate information provided
	◊ Publicize flood plain information (website?)
	◊ Install warning/water level signage
	◊ Enhanced public information
	◊ Road closure compliance
	◊ Shelter locations
	◊ Pre-event communications
	Look at County requirements for neighborhood access
	◊ Secondary means of ingress/egress
	Vegetation restoration programs
	Ensure critical facilities are hardened/backed up
	Hardening water towers
	Terrorism Surveillance - cameras at reservoirs/dams
	Riverbed maintenance
	Evaluate existing lift stations for adequacy
	Acquisition of property for on-site retention
	Evaluate regulations on roof drainage mechanisms
	Erosion-resistant plants
	Traffic light protection
	Upkeep of diversionary devices
	Install more turn-off valves on pipelines
	Backup generation facilities
	Identify swift water rescue capabilities across County

WILDFIRES

	Aggressive weed abatement program
	◊ Networking of agencies for weed abatement
	Develop strategic plan for forest management
	Public education on wildfire defense
	Encourage citizen surveillance and reporting
	Identify hydrants with equipment ownership information
	Enhanced fire fighting equipment
	Fire spotter program/red flag program
	◊ Expand to other utilities
	Research on insect/pest mitigation technologies
	Volunteer home inspection program
	Public education program
	◊ Weather reporting/alerting
	◊ Building protection
	◊ Respiration
	Pre-identify shelters/recovery centers/other resources
	Roofing materials/defensive spacing regulations
	Community task forces for planning and education
	Fuel/dead tree removal
	Strategic pre-placement of fire fighting equipment
	Establish FEMA coordination processes based on ICS
	Brush clearings around repeaters
	Research new technologies for identifying/tracking fires
	Procure/deploy backup communications equipments
	"Red Tag" homes in advance of event
	Provide fire-resistant gel to homeowners
	Involve insurance agencies in mitigation programs
	Clear out abandoned vehicles from oases
	Code enforcement
	Codes prohibiting fireworks
	Fuel modification/removal
	Evaluate building codes
	Maintaining catch basins

OTHER HAZARDS

	Improve pipeline maintenance
	Wetlands mosquito mitigation (West Nile Virus)
	Insect control study
	Increase County Vector Control capacities
	General public drought awareness
	◊ Lawn watering rotation
	Develop County drought plan
	Mitigation of landslide-prone areas
	Develop winter storm sheltering plan
	Ease permitting process for building transmission lines
	Evaluate restrictions on dust/dirt/generating activities during wind seasons
	Rotational crop planning/soil stabilization
	Enhance agricultural checkpoint enforcement
	Agriculture - funding of detection programs
	Communications of pipeline maps (based on need to know)
	Improved notification plan on runaway trains
	Improve/maintain blackout notification plan.
	Support business continuity planning for utility outages
	Terrorism training/equipment for first responders
	◊ Terrorism planning/coordination
	◊ Staffing for terrorism mitigation
	Create a SONGS regional planning group
	◊ Include dirty bomb planning
	Cooling stations - MOUs in place
	Fire Ant eradication program
	White Fly infestation abatement/eradication program
	Develop plan for supplemental water sources
	Public education on low water landscaping
	Salton Sea desalinization
	Establish agriculture security standards (focus on water supply)
	ID mutual aid agreements
	Vulnerability assessment on fiber-optic cable
	Upgrade valves on California aqueduct
	Public education
	◊ Bi-lingual signs
	◊ Blackout information
	Notification system for rail traffic - container contents
	Control and release of terrorism intelligence
	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: Kaiser Permanente
Contact: Rick Davis
Phone: (951)427-7282

MITIGATION STRATEGY INFORMATION

Proposal Name:

Countywide Hospital Mitigation Proposal - Emergency Portable Shelters and Treatment Areas

Proposal Location:

10800 Magnolia Ave. Riverside, Ca.

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning and Response (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	Although a hospital in Riverside County has never suffered the dynamic physical damage that was suffered by several hospitals in the Northridge earthquake or in other major earthquakes, the potential for such damage to one or more local hospitals is great. In conducting the countywide hazard assessment, all of the hospitals were found to be at some level of "earthquake risk" because of their proximity to one or more earthquake faults in the county.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the Proposal, any history related to the Proposal. List the activities necessary for its completion in the narrative section below.

In conducting the hazard assessment as a group, the hospitals in the county determined that one of the most critical issues was the problem of immediately sheltering critical hospital patients after any disastrous event where the hospital is no longer safe for patients. This event could be an earthquake, flood, hazardous materials event, or other event that would require patients to be removed from the normal protection of their hospital room.

When the hospitals reviewed this type of event, one of the issues they looked at was the ability to quickly transport a large number of critical patients from one hospital to another. I looking at recent events such as the fires in October of 2003 where an entire hospital had to be evacuated because of the impending forest fire, one of the immediate concerns was the amount of time it took to gather enough methods of transportation to move all of the patients. This timeframe was several hours. Because the event was a fire, many of the patients were left inside the hospital. However, had the hospital been damaged from an earthquake, the patients would have been moved outside while awaiting transportation.

Having critical patients awaiting transportation and/or receiving treatment outside for an extended period of time has raised numerous safety, weather related, and welfare issues for those patients. To reduce the impact of the earthquake on the patients in the hospitals, the hospitals have determined that an important mitigation effort would be the purchase of several portable shelters that could be used in the event of an earthquake or other similar event. These tents could also be used as "surge capacity tents" in the event of a disaster not directly affecting the patients in the hospital, but causing a large number of victims to come to the hospital. These tents would remain portable so that they could be transported around the county in the event of a hospital receiving major damage.

Does your jurisdiction have primary responsibility for the Proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this Proposal

X	Unfunded Proposal - funds are not available for the Proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Yes	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Kaiser Permanente		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO XXXX**	
Current Population in Jurisdiction or Served	25,000	Projected Population in Jurisdiction or Served - in 2010	45,000
Current Sq Miles in Jurisdiction or Served	25	Projected Sq Miles in Jurisdiction or Served - in 2010	25
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	No	If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years	Uncontrolled expansion of residential and commercial areas within our service area.		
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010	
Approximate Total Residential Value		Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses		Projected Number of Commercial Businesses - in 2010

Approximate Percentage of Homes/Apts/etc in earthquake hazard zones		Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones		Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in flood hazard zones		Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in earthquake hazard zones		Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones		Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	1	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.		Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Kaiser Permanente**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 8, 2004**
Local Point of Contact: **Rick Davis**	**Address:** **10800 Magnolia Ave. Riverside, Ca. 92505**	
Title: **Manager, Environmental Health and Safety**

	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Kaiser Hospital Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Kaiser Hospital Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

Menifee Valley Medical Center

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		Menifee Valley Medical Center		
Type Agency/Jurisdiction:		Hospital		
Contact Person:	Title:			
First Name:	Richard	Last Name:	Greener	
Agency Address:	Street:	28400 McCall Boulevard		
	City:	Sun City		
	State:	CA		
	Zip:	92586		
Contact Phone	951-652-2811	Ext. 5076	FAX	
E-mail	rgreener@vhs.dst.ca.us			

Population Served	Square Miles Served

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	2003

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	2003
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	YES

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	
AIRPORT NEXT TO JURISDICTION	
DAIRY INDUSTRY	
POULTRY INDUSTRY	
CROPS/ORCHARDS	
DAMS IN JURISDICTION	YES
DAMS NEXT TO JURISDICTION	
LAKE/RESERVOIR IN JURISDICTION	YES
LAKE/RESERVOIR NEAR JURISDICTION	
JURISDICTION IN FLOOD PLAIN	YES
CONTROLLED FLOOD CONTROL CHANNEL	YES
UNCONTROLLED FLOOD CONTROL CHANNEL	YES
EARTHQUAKE FAULTS IN JURISDICTION	YES
EARTHQUAKE FAULTS NEXT TO JURISDICTION	
MOBILE HOME PARKS	
NON-REINFORCED FREEWAY BRIDGES	
NON-REINFORCED BRIDGES	
BRIDGES IN FLOOD PLAIN	
BRIDGES OVER OR ACROSS RIVER/STREAM	
ROADWAY CROSSING RIVER/STREAM	
NON REINFORCED BUILDINGS	
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	YES
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	
FOREST AREA IN JURISDICTION	
FOREST AREA NEXT TO JURISDICTION	
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	
MAJOR GAS/OIL PIPELINES IN JURISDICTION	
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	
RAILROAD TRACKS IN JURISDICTION	
RAILROAD TRACKS NEXT TO JURISDICTION	
HAZARDOUS WASTE FACILITIES IN JURISDICTION	YES
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	YES
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**YES**
UPSTREAM FROM A DAM	
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**YES**
DOWNSTREAM FROM A RESERVOIR	**YES**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	
IN A FOREST AREA	
NEAR A FOREST AREA	
NEAR A MAJOR HIGHWAY	
A HAZARDOUS WASTE FACILITY	
NEAR A HAZARDOUS WASTE FACILITY	
A HAZARDOUS STORAGE FACILITY	
NEAR A HAZARDOUS STORAGE FACILITY	
NON REINFORCED BUILDINGS	
A MAJOR GAS/OIL PIPELINE	
NEAR A MAJOR GAS/OIL PIPELINE	

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	
HAVE BEEN DAMAGED BY FLOOD	
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	
HAVE BEEN DAMAGED BY FOREST FIRE	
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	
HAVE BEEN IMPACTED BY A PIPELINE EVENT	

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	YES
NEAR FLOOD PLAIN	
NEAR RAILROAD TRACKS	
NEAR A DAM	
UPSTREAM FROM A DAM	
DOWNSTREAM FROM A DAM	YES
DOWNSTREAM OF A LAKE	YES
DOWNSTREAM FROM A RESERVOIR	YES
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	
ON AN EARTHQUAKE FAULT	YES
NEAR AN EARTHQUAKE FAULT	
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	
IN A FOREST AREA	
NEAR A FOREST AREA	
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	YES
NEAR A HAZARDOUS WASTE FACILITY	
A HAZARDOUS STORAGE FACILITY	YES
NEAR A HAZARDOUS STORAGE FACILITY	
NON REINFORCED BUILDINGS	
A MAJOR GAS/OIL PIPELINE	
NEAR A MAJOR GAS/OIL PIPELINE	

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	YES

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
Menifee Valley	Dam	Diamond Valey Lake	No	Yes

Menifee Valley	Lake	Diamond Valley Lake	No	Yes
Menifee Valley	Lake	Lake Skinner	No	Yes
Menifee Valley	River	Murrieta Creek	Yes	No
Menifee Valley	Stream	Warm Springs	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
N/A	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
N/A	Reinforce emergency response facilities
H	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
N/A	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
N/A	◊ Government buildings/schools
N/A	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
N/A	Insurance coverage on public facilities
N/A	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
H	Backup water supplies for hospitals

N/A	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
H	Evaluate adequacy of reservoir capacity for sprinkler systems
H	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
N/A	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
N/A	Harden repeater sites
N/A	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
N/A	Redundancy
N/A	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
N/A	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
N/A	Develop greenbelt requirements in new developments
N/A	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
N/A	Required water flow/runoff plans for new development
N/A	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
N/A	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
N/A	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
N/A	◊ Evacuation documentation
N/A	◊ Re-examine historical flooding data for potential street re-design
N/A	Training for city/county PIOs about flood issues
N/A	Warning systems - ensure accurate information provided
N/A	◊ Publicize flood plain information (website?)
N/A	◊ Install warning/water level signage
N/A	◊ Enhanced public information
N/A	◊ Road closure compliance
L	◊ Shelter locations
N/A	◊ Pre-event communications
N/A	Look at County requirements for neighborhood access
N/A	◊ Secondary means of ingress/egress
N/A	Vegetation restoration programs
N/A	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
N/A	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
N/A	Traffic light protection
N/A	Upkeep of diversionary devices
N/A	Install more turn-off valves on pipelines
H	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
N/A	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
N/A	Identify hydrants with equipment ownership information
N/A	Enhanced fire fighting equipment
N/A	Fire spotter program/red flag program
N/A	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies
N/A	Volunteer home inspection program
N/A	Public education program
N/A	◊ Weather reporting/alerting
N/A	◊ Building protection
M	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
N/A	Roofing materials/defensive spacing regulations
M	Community task forces for planning and education
M	Fuel/dead tree removal
H	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
N/A	Brush clearings around repeaters
N/A	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
N/A	"Red Tag" homes in advance of event
N/A	Provide fire-resistant gel to homeowners
N/A	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
H	Code enforcement
N/A	Codes prohibiting fireworks
N/A	Fuel modification/removal
H	Evaluate building codes
N/A	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
N/A	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
N/A	General public drought awareness
N/A	◊ Lawn watering rotation
N/A	Develop County drought plan
N/A	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
N/A	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
N/A	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
N/A	Improve/maintain blackout notification plan.
N/A	Support business continuity planning for utility outages
N/A	Terrorism training/equipment for first responders
N/A	◊ Terrorism planning/coordination
N/A	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
N/A	◊ Include dirty bomb planning
N/A	Cooling stations - MOUs in place
N/A	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
N/A	Develop plan for supplemental water sources
N/A	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
H	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
M	Public education
N/A	◊ Bi-lingual signs
N/A	◊ Blackout information
N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)
H	SB1953 NPC2 – Stage 1 (essential equipment anchorage/emergency generator)
H	SB1953 – Stage 2 projected 2008 “B” building structurally updated/ “A” building all essential functions removed. (extension requested)
H	Update EMS radio system
H	Underground fuel lines/self control fuel links/leak detection system

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: Menifee Valley Medical Center	
Contact:	Richard Greener
Phone:	(951) 652-2811 Ext. 5075

MITIGATION STRATEGY INFORMATION

Proposal Name:

Countywide Hospital Mitigation Proposal - Emergency Portable Shelters and Treatment Areas

Proposal Location:

28400 McCall Blvd, Sun City, CA 92586

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning and Response(i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	Although a hospital in Riverside County has never suffered the dynamic physical damage that was suffered by several hospitals in the Northridge earthquake or in other major earthquakes, the potential for such damage to one or more local hospitals is great. In conducting the countywide hazard assessment, all of the hospitals were found to be at some level of "earthquake risk" because of their proximity to one or more earthquake faults in the county.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

In conducting the hazard assessment as a group, the hospitals in the county determined that one of the most critical issues was the problem of immediately sheltering critical hospital patients after any disastrous event where the hospital is no longer safe for patients. This event could be an earthquake, flood, hazardous materials event, or other event that would require patients to be removed from the normal protection of their hospital room.

When the hospitals reviewed this type of event, one of the issues they looked at was the ability to quickly transport a large number of critical patients from one hospital to another. I looking at recent events such as the fires in October of 2003 where an entire hospital had to be evacuated because of the impending forest fire, one of the immediate concerns was the amount of time it took to gather enough methods of transportation to move all of the patients. This timeframe was several hours. Because the event was a fire, many of the patients were left inside the hospital. However, had the hospital been damaged from an earthquake, the patients would have been moved outside while awaiting transportation.

Having critical patients awaiting transportation and/or receiving treatment outside for an extended period of time has raised numerous safety, weather related, and welfare issues for those patients. To reduce the impact of the earthquake on the patients in the hospitals, the hospitals have determined that an important mitigation effort would be the purchase of several portable shelters that could be used in the event of an earthquake or other similar event. These tents could also be used as "surge capacity tents" in the event of a disaster not directly affecting the patients in the hospital, but causing a large number of victims to come to the hospital. These tents would remain portable so that they could be transported around the county in the event of a hospital receiving major damage.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

X	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Yes	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Menifee Valley Medical Center		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO XXXX**	
Current Population in Jurisdiction or Served		Projected Population in Jurisdiction or Served - in 2010

Approximate Percentage of Commercial Businesses in earthquake hazard zones		Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	1	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	1	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.		Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Menifee Valley Medical Center**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 21, 2004**
Local Point of Contact: **Richard Greener**		**Address:** **28400 McCall Blvd** **Sun City, CA. 92586**

Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	Part II, Menifee Valley Medical Center Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Menifee Valley Medical Center Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Menifee Valley Medical Center Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Menifee Valley Medical Center Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Part II, Menifee Valley Medical Center Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Menifee Valley Medical Center Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Menifee Valley Medical Center Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Menifee Valley Medical Center Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

Moreno Valley Community Hospital

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		Moreno Valley Community Hospital		
Type Agency/Jurisdiction:		Hospital		
Contact Person:	Title:			
First Name:	Richard	Last Name:	Greener	
Agency Address:	Street:	27300 Iris Ave		
	City:	Moreno Valley		
	State:	Ca.		
	Zip:	92555		
Contact Phone	951-652-2811	Ext. 5075	FAX	
E-mail	rgreener@vhs.dst.ca.us			

Population Served	Square Miles Served

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	2003

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	2003
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	YES

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	
AIRPORT NEXT TO JURISDICTION	
DAIRY INDUSTRY	
POULTRY INDUSTRY	
CROPS/ORCHARDS	
DAMS IN JURISDICTION	YES
DAMS NEXT TO JURISDICTION	
LAKE/RESERVOIR IN JURISDICTION	
LAKE/RESERVOIR NEAR JURISDICTION	YES
JURISDICTION IN FLOOD PLAIN	YES
CONTROLLED FLOOD CONTROL CHANNEL	YES
UNCONTROLLED FLOOD CONTROL CHANNEL	YES
EARTHQUAKE FAULTS IN JURISDICTION	YES
EARTHQUAKE FAULTS NEXT TO JURISDICTION	
MOBILE HOME PARKS	
NON-REINFORCED FREEWAY BRIDGES	
NON-REINFORCED BRIDGES	
BRIDGES IN FLOOD PLAIN

FREEWAY/MAJOR HIGHWAY IN JURISDICTION	YES
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	
FOREST AREA IN JURISDICTION	
FOREST AREA NEXT TO JURISDICTION	
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	
MAJOR GAS/OIL PIPELINES IN JURISDICTION	YES
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	
RAILROAD TRACKS IN JURISDICTION	
RAILROAD TRACKS NEXT TO JURISDICTION	
HAZARDOUS WASTE FACILITIES IN JURISDICTION	YES
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	YES
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	YES

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**YES**
UPSTREAM FROM A DAM	
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**YES**
DOWNSTREAM FROM A RESERVOIR	**YES**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	
IN A FOREST AREA	
NEAR A FOREST AREA	
NEAR A MAJOR HIGHWAY	
A HAZARDOUS WASTE FACILITY	**YES**
NEAR A HAZARDOUS WASTE FACILITY	
A HAZARDOUS STORAGE FACILITY	
NEAR A HAZARDOUS STORAGE FACILITY	
NON REINFORCED BUILDINGS	
A MAJOR GAS/OIL PIPELINE	
NEAR A MAJOR GAS/OIL PIPELINE	

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	
HAVE BEEN DAMAGED BY FLOOD	
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	
HAVE BEEN DAMAGED BY FOREST FIRE	
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	
HAVE BEEN IMPACTED BY A PIPELINE EVENT	

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	YES
NEAR FLOOD PLAIN	
NEAR RAILROAD TRACKS	
NEAR A DAM	
UPSTREAM FROM A DAM	
DOWNSTREAM FROM A DAM	YES
DOWNSTREAM OF A LAKE	YES
DOWNSTREAM FROM A RESERVOIR	YES
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	
ON AN EARTHQUAKE FAULT	YES
NEAR AN EARTHQUAKE FAULT

MORENO VALLEY	Reservoir	Poor Man's Resevoir	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
N/A	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
N/A	Reinforce emergency response facilities
H	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
N/A	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
N/A	◊ Government buildings/schools
N/A	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
N/A	Insurance coverage on public facilities
N/A	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
H	Backup water supplies for hospitals

N/A	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
H	Evaluate adequacy of reservoir capacity for sprinkler systems
H	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
N/A	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
N/A	Harden repeater sites
N/A	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
N/A	Redundancy
N/A	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
N/A	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
N/A	Develop greenbelt requirements in new developments
N/A	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
N/A	Required water flow/runoff plans for new development
N/A	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
N/A	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
N/A	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
N/A	◊ Evacuation documentation
N/A	◊ Re-examine historical flooding data for potential street re-design
N/A	Training for city/county PIOs about flood issues
N/A	Warning systems - ensure accurate information provided
N/A	◊ Publicize flood plain information (website?)
N/A	◊ Install warning/water level signage
N/A	◊ Enhanced public information
N/A	◊ Road closure compliance
L	◊ Shelter locations
N/A	◊ Pre-event communications
N/A	Look at County requirements for neighborhood access
N/A	◊ Secondary means of ingress/egress
N/A	Vegetation restoration programs
N/A	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
N/A	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
N/A	Traffic light protection
N/A	Upkeep of diversionary devices
N/A	Install more turn-off valves on pipelines
H	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
N/A	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
N/A	Identify hydrants with equipment ownership information
N/A	Enhanced fire fighting equipment
N/A	Fire spotter program/red flag program
N/A	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies
N/A	Volunteer home inspection program
N/A	Public education program
N/A	◊ Weather reporting/alerting
N/A	◊ Building protection
M	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
N/A	Roofing materials/defensive spacing regulations
M	Community task forces for planning and education
M	Fuel/dead tree removal
H	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
N/A	Brush clearings around repeaters
N/A	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
N/A	"Red Tag" homes in advance of event
N/A	Provide fire-resistant gel to homeowners
N/A	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
H	Code enforcement
N/A	Codes prohibiting fireworks
N/A	Fuel modification/removal
H	Evaluate building codes
N/A	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
N/A	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
N/A	General public drought awareness
N/A	◊ Lawn watering rotation
N/A	Develop County drought plan
N/A	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
N/A	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
N/A	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
N/A	Improve/maintain blackout notification plan.
N/A	Support business continuity planning for utility outages
N/A	Terrorism training/equipment for first responders
N/A	◊ Terrorism planning/coordination
N/A	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
N/A	◊ Include dirty bomb planning
N/A	Cooling stations - MOUs in place
N/A	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
N/A	Develop plan for supplemental water sources
N/A	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
H	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
M	Public education
N/A	◊ Bi-lingual signs
N/A	◊ Blackout information
N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)
H	SB1953 NPC2 – Stage 1 (essential equipment anchorage/emergency generator)
H	SB1953 – Stage 2 projected 2008 “B” building structurally updated/ “A” building all essential functions removed. (extension requested)
H	Update EMS radio system
H	Underground fuel lines/self control fuel links/leak detection system

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: Moreno Valley Community Hospital	
Contact:	Richard Greener
Phone:	(951) 652-2811 Ext. 5075

MITIGATION STRATEGY INFORMATION

Proposal Name:

Countywide Hospital Mitigation Proposal - Emergency Portable Shelters and Treatment Areas

Proposal Location:

27300 Iris Ave, Moreno Valley, CA 92555

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning and Response(i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	Although a hospital in Riverside County has never suffered the dynamic physical damage that was suffered by several hospitals in the Northridge earthquake or in other major earthquakes, the potential for such damage to one or more local hospitals is great. In conducting the countywide hazard assessment, all of the hospitals were found to be at some level of "earthquake risk" because of their proximity to one or more earthquake faults in the county.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

In conducting the hazard assessment as a group, the hospitals in the county determined that one of the most critical issues was the problem of immediately sheltering critical hospital patients after any disastrous event where the hospital is no longer safe for patients. This event could be an earthquake, flood, hazardous materials event, or other event that would require patients to be removed from the normal protection of their hospital room.

When the hospitals reviewed this type of event, one of the issues they looked at was the ability to quickly transport a large number of critical patients from one hospital to another. I looking at recent events such as the fires in October of 2003 where an entire hospital had to be evacuated because of the impending forest fire, one of the immediate concerns was the amount of time it took to gather enough methods of transportation to move all of the patients. This timeframe was several hours. Because the event was a fire, many of the patients were left inside the hospital. However, had the hospital been damaged from an earthquake, the patients would have been moved outside while awaiting transportation.

Having critical patients awaiting transportation and/or receiving treatment outside for an extended period of time has raised numerous safety, weather related, and welfare issues for those patients. To reduce the impact of the earthquake on the patients in the hospitals, the hospitals have determined that an important mitigation effort would be the purchase of several portable shelters that could be used in the event of an earthquake or other similar event. These tents could also be used as "surge capacity tents" in the event of a disaster not directly affecting the patients in the hospital, but causing a large number of victims to come to the hospital. These tents would remain portable so that they could be transported around the county in the event of a hospital receiving major damage.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

X	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Yes	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: **Moreno Valley Community Hospital**		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO XXXX**	
Current Population in Jurisdiction or Served		Projected Population in Jurisdiction or Served - in 2010	
Current Sq Miles in Jurisdiction or Served		Projected Sq Miles in Jurisdiction or Served - in 2010	
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?		If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years			
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010	
Approximate Total Residential Value		Projected Residential Total Value - in 2010

Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	1	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	1	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.		Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: Moreno Valley Community Hospital	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 21, 2004**
Local Point of Contact: **Richard Greener**	**Address:** 27300 Iris Avenue Moreno Valley CA. 92360	
Title: **Director of Safety**		
Agency: Moreno Valley Community Hospital		
Phone Number: (951) 652-2811 x 5075	**Email: rgreener@vhs.dst.ca.us**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	

Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).	Part II, Moreno Valley Community Hospital Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Moreno Valley Community Hospital Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Moreno Valley Community Hospital Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Moreno Valley Community Hospital Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Part II, Moreno Valley Community Hospital Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Moreno Valley Community Hospital Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Moreno Valley Community Hospital Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Moreno Valley Community Hospital Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

Parkview Community Hospital

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		Parkview Community Hospital		
Type Agency/Jurisdiction:		Hospital		
Contact Person:	Title:			
First Name:	Jan	Last Name:	Sweezer	
Agency Address:	Street:	3865 Jackson,		
	City:	Riverside		
	State:	Ca.		
	Zip:	92503		
Contact Phone	951-688-2211	Ext. 2459	FAX	
E-mail	jsweezer@pchmc.org			

Population Served	0
Square Miles Served	0

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	1/1/2004

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	1/1/2004
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	YES

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	YES
AIRPORT NEXT TO JURISDICTION	NO
DAIRY INDUSTRY	NO
POULTRY INDUSTRY	NO
CROPS/ORCHARDS	NO
DAMS IN JURISDICTION	YES
DAMS NEXT TO JURISDICTION	NO
LAKE/RESERVOIR IN JURISDICTION	YES
LAKE/RESERVOIR NEAR JURISDICTION	NO
JURISDICTION IN FLOOD PLAIN	YES
CONTROLLED FLOOD CONTROL CHANNEL	YES
UNCONTROLLED FLOOD CONTROL CHANNEL	YES
EARTHQUAKE FAULTS IN JURISDICTION	YES
EARTHQUAKE FAULTS NEXT TO JURISDICTION	NO
MOBILE HOME PARKS	NO
NON-REINFORCED FREEWAY BRIDGES	NO
NON-REINFORCED BRIDGES	NO
BRIDGES IN FLOOD PLAIN	NO
BRIDGES OVER OR ACROSS RIVER/STREAM	NO
ROADWAY CROSSING RIVER/STREAM	NO
NON REINFORCED BUILDINGS	NO
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	YES
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	NO
FOREST AREA IN JURISDICTION	NO
FOREST AREA NEXT TO JURISDICTION	NO
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	NO
MAJOR GAS/OIL PIPELINES IN JURISDICTION	NO
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	NO
RAILROAD TRACKS IN JURISDICTION	YES
RAILROAD TRACKS NEXT TO JURISDICTION	NO
HAZARDOUS WASTE FACILITIES IN JURISDICTION	NO
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	NO
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	YES
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	NO

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**NO**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**YES**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**NO**
DOWNSTREAM FROM A RESERVOIR	**YES**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**YES**
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	**NO**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**YES**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**NO**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**YES**
HAVE BEEN DAMAGED BY FLOOD	**NO**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**YES**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	YES
NEAR FLOOD PLAIN	NO
NEAR RAILROAD TRACKS	YES
NEAR A DAM	YES
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	YES
DOWNSTREAM OF A LAKE	YES
DOWNSTREAM FROM A RESERVOIR	YES
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	YES
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	YES
A HAZARDOUS STORAGE FACILITY	YES
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
Parkview Hospital	Hazmat Storage Location	Hospital Chemical Storage	Yes	No
Parkview Hospital	Lake	Lake Mathews	No	Yes
Parkview Hospital	Railroad Track	Unio Pacific	No	Yes
Parkview Hospital	Reservoir	Tilden	No	Yes
Parkview Hospital	River	Santa Ana River	No	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
N/A	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
N/A	Reinforce emergency response facilities
H	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
H	Install earthquake cutoffs at reservoirs
N/A	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
N/A	◊ Government buildings/schools
N/A	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
H	Insurance coverage on public facilities
N/A	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location

N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
H	Backup water supplies for hospitals
N/A	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
H	Evaluate adequacy of reservoir capacity for sprinkler systems
H	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
H	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
N/A	Harden repeater sites
N/A	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
N/A	Redundancy
H	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
M	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
N/A	Develop greenbelt requirements in new developments
N/A	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
N/A	Required water flow/runoff plans for new development
N/A	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
N/A	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
N/A	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
M	◊ Evacuation documentation
N/A	◊ Re-examine historical flooding data for potential street re-design
H	Training for city/county PIOs about flood issues
N/A	Warning systems - ensure accurate information provided
N/A	◊ Publicize flood plain information (website?)
N/A	◊ Install warning/water level signage
M	◊ Enhanced public information
N/A	◊ Road closure compliance
H	◊ Shelter locations
M	◊ Pre-event communications
N/A	Look at County requirements for neighborhood access
N/A	◊ Secondary means of ingress/egress
N/A	Vegetation restoration programs
N/A	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
N/A	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants

N/A	Traffic light protection
N/A	Upkeep of diversionary devices
N/A	Install more turn-off valves on pipelines
H	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
N/A	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
H	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
N/A	Identify hydrants with equipment ownership information
N/A	Enhanced fire fighting equipment
N/A	Fire spotter program/red flag program
N/A	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies
N/A	Volunteer home inspection program
M	Public education program
M	◊ Weather reporting/alerting
M	◊ Building protection
M	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
N/A	Roofing materials/defensive spacing regulations
M	Community task forces for planning and education
M	Fuel/dead tree removal
H	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
N/A	Brush clearings around repeaters
N/A	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
N/A	"Red Tag" homes in advance of event
N/A	Provide fire-resistant gel to homeowners
N/A	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
H	Code enforcement
N/A	Codes prohibiting fireworks
N/A	Fuel modification/removal
H	Evaluate building codes
N/A	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
N/A	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
N/A	General public drought awareness
N/A	◊ Lawn watering rotation
N/A	Develop County drought plan
N/A	Mitigation of landslide-prone areas
M	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
N/A	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
N/A	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
N/A	Improve/maintain blackout notification plan.
N/A	Support business continuity planning for utility outages
H	Terrorism training/equipment for first responders and hospitals
H	◊ Terrorism planning/coordination
H	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
M	◊ dirty bomb planning
N/A	Cooling stations - MOUs in place
N/A	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
N/A	Develop plan for supplemental water sources
N/A	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
H	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
M	Public education
N/A	◊ Bi-lingual signs
N/A	◊ Blackout information
N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction:	Parkview Community Hospital
Contact:	Jan Sweezer/ Keith Grindle
Phone:	951-688-2211

MITIGATION STRATEGY INFORMATION

Proposal Name:

Countywide Hospital Mitigation Proposal - Emergency Portable Shelters and Treatment Areas

Proposal Location:

Parkview Community Hospital, 3865 Jackson, Riverside, Ca. 92503

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning and Response(i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	Although a hospital in Riverside County has never suffered the dynamic physical damage that was suffered by several hospitals in the Northridge earthquake or in other major earthquakes, the potential for such damage to one or more local hospitals is great. In conducting the countywide hazard assessment, all of the hospitals were found to be at some level of "earthquake risk" because of their proximity to one or more earthquake faults in the county.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

In conducting the hazard assessment as a group, the hospitals in the county determined that one of the most critical issues was the problem of immediately sheltering critical hospital patients after any disastrous event where the hospital is no longer safe for patients. This event could be an earthquake, flood, hazardous materials event, or other event that would require patients to be removed from the normal protection of their hospital room.

When the hospitals reviewed this type of event, one of the issues they looked at was the ability to quickly transport a large number of critical patients from one hospital to another. I looking at recent events such as the fires in October of 2003 where an entire hospital had to be evacuated because of the impending forest fire, one of the immediate concerns was the amount of time it took to gather enough methods of transportation to move all of the patients. This timeframe was several hours. Because the event was a fire, many of the patients were left inside the hospital. However, had the hospital been damaged from an earthquake, the patients would have been moved outside while awaiting transportation.

Having critical patients awaiting transportation and/or receiving treatment outside for an extended period of time has raised numerous safety, weather related, and welfare issues for those patients. To reduce the impact of the earthquake on the patients in the hospitals, the hospitals have determined that an important mitigation effort would be the purchase of several portable shelters that could be used in the event of an earthquake or other similar event. These tents could also be used as "surge capacity tents" in the event of a disaster not directly affecting the patients in the hospital, but causing a large number of victims to come to the hospital. These tents would remain portable so that they could be transported around the county in the event of a hospital receiving major damage.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

X	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Yes	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Parkview Community Hospital		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO __XXX__**	
Current Population in Jurisdiction or Served	285,000	Projected Population in Jurisdiction or Served - in 2010	359,000
Current Sq Miles in Jurisdiction or Served	80	Projected Sq Miles in Jurisdiction or Served - in 2010	80
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?		If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years			
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010	
Approximate Total Residential Value		Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses		Projected Number of Commercial Businesses - in 2010	
Approximate Percentage of Homes/Apts/etc in flood hazard zones		Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones		Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones		Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in flood hazard zones		Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in earthquake hazard zones	1	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	1
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	1	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	1	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.		Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Parkview Community Hospital**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion:** **September 8, 2004**
Local Point of Contact: **Jan Sweezer**		**Address:** **3865 Jackson** **Riverside, Ca. 92503**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	Part II, Parkview Community Hospital Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Part II, Parkview Community Hospital Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Parkview Community Hospital Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Parkview Community Hospital Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Parkview Community Hospital Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		Rancho Springs Medical Center		
Type Agency/Jurisdiction:		Hospital		
Contact Person:	Title:	Disaster Coordinator		
First Name:	Maureen	Last Name:	Bowlin	
Agency Address:	Street:	25500 Medical Center Drive		
	City:	Murrieta		
	State:	CA		
	Zip:	92562		
Contact Phone	(951) 696-6000		FAX	
E-mail	Maureen.bowlin@uhsinc.com			

Population Served	0
Square Miles Served	0

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	6/1/2003

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	6/1/2003
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	YES

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	NO
AIRPORT NEXT TO JURISDICTION	NO
DAIRY INDUSTRY	NO
POULTRY INDUSTRY	NO
CROPS/ORCHARDS	NO
DAMS IN JURISDICTION	YES
DAMS NEXT TO JURISDICTION	NO
LAKE/RESERVOIR IN JURISDICTION	YES
LAKE/RESERVOIR NEAR JURISDICTION	NO
JURISDICTION IN FLOOD PLAIN	YES
CONTROLLED FLOOD CONTROL CHANNEL	YES
UNCONTROLLED FLOOD CONTROL CHANNEL	YES
EARTHQUAKE FAULTS IN JURISDICTION	YES
EARTHQUAKE FAULTS NEXT TO JURISDICTION	NO
MOBILE HOME PARKS	YES
NON-REINFORCED FREEWAY BRIDGES	NO
NON-REINFORCED BRIDGES	NO
BRIDGES IN FLOOD PLAIN	YES
BRIDGES OVER OR ACROSS RIVER/STREAM	NO
ROADWAY CROSSING RIVER/STREAM	NO
NON REINFORCED BUILDINGS	NO
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	NO
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	YES
FOREST AREA IN JURISDICTION	YES
FOREST AREA NEXT TO JURISDICTION	NO
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	NO
MAJOR GAS/OIL PIPELINES IN JURISDICTION	NO
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	NO
RAILROAD TRACKS IN JURISDICTION	NO
RAILROAD TRACKS NEXT TO JURISDICTION	NO
HAZARDOUS WASTE FACILITIES IN JURISDICTION	YES
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	NO
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	YES
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	NO

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

	YES
IN A FLOOD PLAIN	YES
NEAR FLOOD PLAIN	NO
NEAR RAILROAD TRACKS	YES
NEAR A DAM	YES
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	YES
DOWNSTREAM OF A LAKE	YES
DOWNSTREAM FROM A RESERVOIR	YES
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	YES
ON AN EARTHQUAKE FAULT	YES
NEAR AN EARTHQUAKE FAULT	NO
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	YES
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	YES
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	
HAVE BEEN DAMAGED BY FLOOD	
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	
HAVE BEEN DAMAGED BY FOREST FIRE	
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	
HAVE BEEN IMPACTED BY A PIPELINE EVENT	

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	YES
NEAR FLOOD PLAIN	NO
NEAR RAILROAD TRACKS	NO
NEAR A DAM	YES
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	YES
DOWNSTREAM OF A LAKE	YES
DOWNSTREAM FROM A RESERVOIR	YES
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	YES
ON AN EARTHQUAKE FAULT	YES
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	YES
NEAR A FOREST AREA	YES
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	YES
A HAZARDOUS STORAGE FACILITY	YES
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
Rancho Springs Medical Center	Hazmat Storage Location	Hospital Stirage Site	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION VULNERABILITY WORKSHEET

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
N/A	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
N/A	Reinforce emergency response facilities
H	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
N/A	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
N/A	◊ Government buildings/schools
N/A	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
N/A	Insurance coverage on public facilities
N/A	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
H	Backup water supplies for hospitals

N/A	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
H	Evaluate adequacy of reservoir capacity for sprinkler systems
H	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
N/A	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
N/A	Harden repeater sites
N/A	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
N/A	Redundancy
N/A	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
N/A	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
N/A	Develop greenbelt requirements in new developments
N/A	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
N/A	Required water flow/runoff plans for new development
N/A	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
N/A	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
N/A	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
N/A	◊ Evacuation documentation
N/A	◊ Re-examine historical flooding data for potential street re-design
N/A	Training for city/county PIOs about flood issues
N/A	Warning systems - ensure accurate information provided
N/A	◊ Publicize flood plain information (website?)
N/A	◊ Install warning/water level signage
N/A	◊ Enhanced public information
N/A	◊ Road closure compliance
L	◊ Shelter locations
N/A	◊ Pre-event communications
N/A	Look at County requirements for neighborhood access
N/A	◊ Secondary means of ingress/egress
N/A	Vegetation restoration programs
N/A	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
N/A	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
N/A	Traffic light protection
N/A	Upkeep of diversionary devices
N/A	Install more turn-off valves on pipelines
H	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
N/A	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
N/A	Identify hydrants with equipment ownership information
N/A	Enhanced fire fighting equipment
N/A	Fire spotter program/red flag program
N/A	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies
N/A	Volunteer home inspection program
N/A	Public education program
N/A	◊ Weather reporting/alerting
N/A	◊ Building protection
M	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
N/A	Roofing materials/defensive spacing regulations
M	Community task forces for planning and education
M	Fuel/dead tree removal
H	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
N/A	Brush clearings around repeaters
N/A	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
N/A	"Red Tag" homes in advance of event
N/A	Provide fire-resistant gel to homeowners
N/A	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
H	Code enforcement
N/A	Codes prohibiting fireworks
N/A	Fuel modification/removal
H	Evaluate building codes
N/A	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
N/A	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
N/A	General public drought awareness
N/A	◊ Lawn watering rotation
N/A	Develop County drought plan
N/A	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
N/A	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
N/A	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
N/A	Improve/maintain blackout notification plan.
N/A	Support business continuity planning for utility outages
N/A	Terrorism training/equipment for first responders
N/A	◊ Terrorism planning/coordination
N/A	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
N/A	◊ Include dirty bomb planning
N/A	Cooling stations - MOUs in place
N/A	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
N/A	Develop plan for supplemental water sources
N/A	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
H	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
M	Public education
N/A	◊ Bi-lingual signs
N/A	◊ Blackout information
N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)
H	SB1953 NPC2 – Stage 1 (essential equipment anchorage/emergency generator)
H	SB1953 – Stage 2 projected 2008 “B” building structurally updated/ “A” building all essential functions removed. (extension requested)
H	Update EMS radio system
H	Underground fuel lines/self control fuel links/leak detection system

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: Rancho Springs Medical Center	
Contact:	Maureen Bowlin(Disaster Coordinator)/Brian Tickel(Safety Officer)
Phone:	951-696-6184

MITIGATION STRATEGY INFORMATION

Proposal Name:

Countywide Hospital Mitigation Proposal - Emergency Portable Shelters and Treatment Areas

Proposal Location:

25500 Medical Center Drive, Murrieta Ca. 92562

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning and Response(i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	Although a hospital in Riverside County has never suffered the dynamic physical damage that was suffered by several hospitals in the Northridge earthquake or in other major earthquakes, the potential for such damage to one or more local hospitals is great. In conducting the countywide hazard assessment, all of the hospitals were found to be at some level of "earthquake risk" because of their proximity to one or more earthquake faults in the county.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

In conducting the hazard assessment as a group, the hospitals in the county determined that one of the most critical issues was the problem of immediately sheltering critical hospital patients after any disastrous event where the hospital is no longer safe for patients. This event could be an earthquake, flood, hazardous materials event, or other event that would require patients to be removed from the normal protection of their hospital room.

When the hospitals reviewed this type of event, one of the issues they looked at was the ability to quickly transport a large number of critical patients from one hospital to another. I looking at recent events such as the fires in October of 2003 where an entire hospital had to be evacuated because of the impending forest fire, one of the immediate concerns was the amount of time it took to gather enough methods of transportation to move all of the patients. This timeframe was several hours. Because the event was a fire, many of the patients were left inside the hospital. However, had the hospital been damaged from an earthquake, the patients would have been moved outside while awaiting transportation.

Having critical patients awaiting transportation and/or receiving treatment outside for an extended period of time has raised numerous safety, weather related, and welfare issues for those patients. To reduce the impact of the earthquake on the patients in the hospitals, the hospitals have determined that an important mitigation effort would be the purchase of several portable shelters that could be used in the event of an earthquake or other similar event. These tents could also be used as "surge capacity tents" in the event of a disaster not directly affecting the patients in the hospital, but causing a large number of victims to come to the hospital. These tents would remain portable so that they could be transported around the county in the event of a hospital receiving major damage.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

X	Unfunded project - funds are not available for the project at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Yes	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: **Rancho Springs Medical Center**	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO XXXX**		
Current Population in Jurisdiction or Served		Projected Population in Jurisdiction or Served - in 2010	
Current Sq Miles in Jurisdiction or Served		Projected Sq Miles in Jurisdiction or Served - in 2010	
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?		If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years			
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010	
Approximate Total Residential Value		Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses		Projected Number of Commercial Businesses - in 2010	
Approximate Percentage of Homes/Apts/etc in flood hazard zones		Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones		Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones		Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in flood hazard zones		Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in earthquake hazard zones		Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	1	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	1	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.		Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Rancho Springs Medical Center**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 21, 2004**
Local Point of Contact: **Maureen Bowlin RN CEN MICN**		**Address:** **25500 Medical Center Drive, Murrieta Ca. 92562**

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildland Fires: Pages 28 - 40 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Part II, Rancho Springs Medical Center Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Rancho Springs Medical Center Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Rancho Springs Medical Center Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Rancho Springs Medical Center Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**

Does your organization have a general plan?	NO
Does your organization have a safety component to the general plan?	NO
What year was your plan last updated?	

Does your organization have a disaster/emergency operations plan?	Yes
What year was your plan last updated?	2001
Do you have a recovery annex or section in your plan?	NO
Do you have a terrorism/WMD annex or section in your plan?	NO

HAZARD IDENTIFICAION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	YES
AIRPORT NEXT TO JURISDICTION	NO
DAIRY INDUSTRY	NO
POULTRY INDUSTRY	NO
CROPS/ORCHARDS	NO
DAMS IN JURISDICTION	YES
DAMS NEXT TO JURISDICTION	NO
LAKE/RESERVOIR IN JURISDICTION	YES
LAKE/RESERVOIR NEAR JURISDICTION	NO
JURISDICTION IN FLOOD PLAIN	YES
CONTROLLED FLOOD CONTROL CHANNEL	YES
UNCONTROLLED FLOOD CONTROL CHANNEL	YES
EARTHQUAKE FAULTS IN JURISDICTION	YES
EARTHQUAKE FAULTS NEXT TO JURISDICTION	NO
MOBILE HOME PARKS	NO
NON-REINFORCED FREEWAY BRIDGES	NO
NON-REINFORCED BRIDGES	NO
BRIDGES IN FLOOD PLAIN	NO
BRIDGES OVER OR ACROSS RIVER/STREAM	NO
ROADWAY CROSSING RIVER/STREAM	NO
NON REINFORCED BUILDINGS	NO
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	YES
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	NO
FOREST AREA IN JURISDICTION	NO
FOREST AREA NEXT TO JURISDICTION	NO
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	NO
MAJOR GAS/OIL PIPELINES IN JURISDICTION	NO
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	NO
RAILROAD TRACKS IN JURISDICTION	YES
RAILROAD TRACKS NEXT TO JURISDICTION	NO
HAZARDOUS WASTE FACILITIES IN JURISDICTION	NO
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	NO
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	YES
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	NO

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**NO**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**YES**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**NO**
DOWNSTREAM FROM A RESERVOIR	**YES**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**YES**
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	**NO**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**YES**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**NO**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**YES**
HAVE BEEN DAMAGED BY FLOOD	**NO**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**YES**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	YES
NEAR FLOOD PLAIN	NO
NEAR RAILROAD TRACKS	YES
NEAR A DAM	YES
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	YES
DOWNSTREAM OF A LAKE	YES
DOWNSTREAM FROM A RESERVOIR	YES
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	YES
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	YES
A HAZARDOUS STORAGE FACILITY	YES
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
Riverside Community Hospital	Hazmat Storage Location	Hospital Chemical Storage	Yes	No
	Lake	Lake Mathews	No	Yes
	Railroad Track	Union Pacific	No	Yes
	Reservoir	Tilden	No	Yes
	River	Santa Ana River	No	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION VULNERABILITY WORKSHEET

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
N/A	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
N/A	Reinforce emergency response facilities
H	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
N/A	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
N/A	◊ Government buildings/schools
N/A	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
N/A	Insurance coverage on public facilities
N/A	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
H	Incorporate County geologist data into planning

H	Backup water supplies for hospitals
N/A	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
H	Evaluate adequacy of reservoir capacity for sprinkler systems
H	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
N/A	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
N/A	Harden repeater sites
N/A	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
N/A	Redundancy
N/A	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
N/A	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
N/A	Develop greenbelt requirements in new developments
N/A	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
N/A	Required water flow/runoff plans for new development
N/A	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
N/A	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
N/A	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
N/A	◊ Evacuation documentation
N/A	◊ Re-examine historical flooding data for potential street re-design
N/A	Training for city/county PIOs about flood issues

N/A	Warning systems - ensure accurate information provided
N/A	◊ Publicize flood plain information (website?)
N/A	◊ Install warning/water level signage
N/A	◊ Enhanced public information
N/A	◊ Road closure compliance
L	◊ Shelter locations
N/A	◊ Pre-event communications
N/A	Look at County requirements for neighborhood access
N/A	◊ Secondary means of ingress/egress
N/A	Vegetation restoration programs
N/A	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
N/A	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
N/A	Traffic light protection
N/A	Upkeep of diversionary devices
N/A	Install more turn-off valves on pipelines
H	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
N/A	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
N/A	Identify hydrants with equipment ownership information
N/A	Enhanced fire fighting equipment
N/A	Fire spotter program/red flag program
N/A	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies

N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)
H	SB1953 NPC2 – Stage 1 (essential equipment anchorage/emergency generator)
H	SB1953 – Stage 2 projected 2008 “B” building structurally updated/ “A” building all essential functions removed. (extension requested)
H	Update EMS radio system
H	Underground fuel lines/self control fuel links/leak detection system

PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: Riverside Community Hospital	
Contact:	Donnette Baehr
Phone:	951-788-3675

MITIGATION STRATEGY INFORMATION

Proposal Name:

Countywide Hospital Mitigation Proposal - Emergency Portable Shelters and Treatment Areas

Proposal Location:

Riverside Comm. Hospital, 4445 Magnolia Avenue, Riverside, CA 92501

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning and Response (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	Although a hospital in Riverside County has never suffered the dynamic physical damage that was suffered by several hospitals in the Northridge earthquake or in other major earthquakes, the potential for such damage to one or more local hospitals is great. In conducting the countywide hazard assessment, all of the hospitals were found to be at some level of "earthquake risk" because of their proximity to one or more earthquake faults in the county.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

In conducting the hazard assessment as a group, the hospitals in the county determined that one of the most critical issues was the problem of immediately sheltering of critical hospital patients after any disastrous event where the hospital is no longer safe for patients. This event could be an earthquake, flood, hazardous materials event, or other event that would require patients to be removed from the normal protection of their hospital room.

When the hospitals reviewed this type of event, one of the issues they looked at was the ability to quickly transport a large number of critical patients from one hospital to another. I looking at recent events such as the fires in October of 2003, where an entire hospital had to be evacuated because of the impending forest fire, one of the immediate concerns was the amount of time it took to gather enough methods of transportation to move all of the patients. This timeframe was several hours. Because the event was a fire, many of the patients were left inside the hospital. However, had the hospital been damaged from an earthquake, the patients would have been moved outside while awaiting transportation.

Having critical patients awaiting transportation and/or receiving treatment outside for an extended period of time has raised numerous safety, weather related, and welfare issues for those patients. To reduce the impact of the earthquake on the patients in the hospitals, the hospitals have determined that an important mitigation effort would be the purchase of several portable shelters that could be used in the event of an earthquake or other similar event. These tents could also be used as "surge capacity tents" in the event of a disaster not directly affecting the patients in the hospital, but causing a large number of victims to come to the hospital. These tents would remain portable so that they could be transported around the county in the event of a hospital receiving major damage.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

X	Unfunded proposal - funds are not available for the proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Yes	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Riverside Community Hospital		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO __XXX**	
Current Population in Jurisdiction or Served	285,000	Projected Population in Jurisdiction or Served - in 2010	359,000
Current Sq Miles in Jurisdiction or Served	80	Projected Sq Miles in Jurisdiction or Served - in 2010	80
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?		If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years			
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010	
Approximate Total Residential Value		Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses		Projected Number of Commercial Businesses - in 2010	
Approximate Percentage of Homes/Apts/etc in flood hazard zones		Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones		Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones		Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in flood hazard zones		Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in earthquake hazard zones	1	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	1
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	1	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	1	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.		Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Riverside Community Hospital**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion:** **September 8, 2004**
Local Point of Contact: **Donnette Baehr**		**Address:** **4445 Magnolia Avenue** **Riverside, CA 92501**

	Lake	Lake Mathews	No	Yes
	Railroad Track	Union Pacific	No	Yes
	Reservoir	Tilden	No	Yes
	River	Santa Ana River	No	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
L	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
H	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
H	Procure earthquake-warning devices for critical facilities
H	Reinforce emergency response facilities
M	Provide training to hospital staffs
M	Require earthquake gas shutoffs on remodels/new construction
M	Evaluate re-enforcing reservoir concrete bases
L	Evaluate EOCs for seismic stability
H	Install earthquake cutoffs at reservoirs
M	Install earthquake-warning devices at critical facilities
M	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
	◊ Bridges/dams/pipelines
	◊ Government buildings/schools
	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections
M	Ensure Uniform Building Code compliance
	◊ Update to current compliance when retrofitting
M	Insurance coverage on public facilities
L	Funding for non-structural abatement (Earthquake kits, etc.)
L	Pre - identify empty commercial space for seismic re-location

L	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
L	Mapping of liquefaction zones
M	Incorporate County geologist data into planning
H	Backup water supplies for hospitals
H	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
M	Fire sprinkler ordinance for all structures
L	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
M	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
H	Evaluate depths of aquifers/wells for adequacy during quakes
M	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
M	Harden repeater sites
L	Continue existing interoperability project
L	Strengthen/harden
L	Relocate
L	Redundancy
L	Mobile repeaters

FLOODS

L	Update development policies for flood plains
M	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
M	Develop greenbelt requirements in new developments
L	Update weather pattern/flood plain maps
L	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
L	Required water flow/runoff plans for new development
M	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
L	Create map of flood channels/diversions/water systems etc
M	Require digital floor plans on new non-residential construction
M	Upgrade dirt embankments to concrete

L	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
L	Increase sandbag distribution capacities
L	Develop pre-planned response plan for floods
	◊ Evacuation documentation
	◊ Re-examine historical flooding data for potential street re-design
M	Training for city/county PIOs about flood issues
H	Warning systems - ensure accurate information provided
	◊ Publicize flood plain information (website?)
	◊ Install warning/water level signage
	◊ Enhanced public information
	◊ Road closure compliance
	◊ Shelter locations
	◊ Pre-event communications
M	Look at County requirements for neighborhood access
	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
M	Hardening water towers
M	Terrorism Surveillance - cameras at reservoirs/dams
M	Riverbed maintenance
M	Evaluate existing lift stations for adequacy
M	Acquisition of property for on-site retention
M	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
M	Traffic light protection
M	Upkeep of diversionary devices
M	Install more turn-off valves on pipelines
M	Backup generation facilities
M	Identify swift water rescue capabilities across County

WILDFIRES

L	Aggressive weed abatement program
	◊ Networking of agencies for weed abatement
L	Develop strategic plan for forest management
M	Public education on wildfire defense
M	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information
L	Enhanced fire fighting equipment
L	Fire spotter program/red flag program

	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
L	Public education program
	◊ Weather reporting/alerting
	◊ Building protection
	◊ Respiration
L	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
L	Fuel/dead tree removal
L	Strategic pre-placement of fire fighting equipment
L	Establish FEMA coordination processes based on ICS
L	Brush clearings around repeaters
L	Research new technologies for identifying/tracking fires
L	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
L	Clear out abandoned vehicles from oases
L	Code enforcement
L	Codes prohibiting fireworks
L	Fuel modification/removal
L	Evaluate building codes
L	Maintaining catch basins

OTHER HAZARDS

L	Improve pipeline maintenance
M	Wetlands mosquito mitigation (West Nile Virus)
L	Insect control study
L	Increase County Vector Control capacities
L	General public drought awareness
	◊ Lawn watering rotation
L	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
M	Ease permitting process for building transmission lines
M	Evaluate restrictions on dust/dirt/generating activities during wind seasons
L	Rotational crop planning/soil stabilization
L	Enhance agricultural checkpoint enforcement

L	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
M	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
L	Terrorism training/equipment for first responders
	◊ Terrorism planning/coordination
	◊ Staffing for terrorism mitigation
M	Create a SONGS regional planning group
	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
L	Develop plan for supplemental water sources
L	Public education on low water landscaping
L	Salton Sea desalinization
L	Establish agriculture security standards (focus on water supply)
L	ID mutual aid agreements
M	Vulnerability assessment on fiber-optic cable
L	Upgrade valves on California aqueduct
L	Public education
	◊ Bi-lingual signs
	◊ Blackout information
L	Notification system for rail traffic - container contents
L	Control and release of terrorism intelligence
L	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: Alvord Unified School District
Contact: Sherry Kaib
Phone: (951) 509-5083

MITIGATION STRATEGY INFORMATION

Proposal Name:

Update of current disaster plan

Proposal Location:

10365 Keller Avenue, Riverside, CA 92505

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History

List any previous disaster related events (dates, costs, etc)

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

We need to update our Disaster Preparedness Plan since it has not been updated since 1992. In conjunction with County OES we will up date our district wide and site Disaster Preparedness plan in coordination with our district and site administrators. We would also like to establish SEMS training in our district.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

	Unfunded proposal - funds are not available for the proposal at this time
X	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Y	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Alvord Unified School District		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO __X__**	
Current Population in Jurisdiction or Served	19,000	Projected Population in Jurisdiction or Served - in 2010	21,000
Current Sq Miles in Jurisdiction or Served	30	Projected Sq Miles in Jurisdiction or Served - in 2010	30
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?		If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years			
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010	
Approximate Total Residential Value		Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses		Projected Number of Commercial Businesses - in 2010	
Approximate Percentage of Homes/Apts/etc in flood hazard zones		Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones		Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones		Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in flood hazard zones		Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in earthquake hazard zones		Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	3	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	3
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	21	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	25
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	YES	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Alvord USD**	**Title/Lead Jurisdiction Of Multi-Jurisdictional Plan:** **Riverside County Operational Area**	**Date Of Completion:** **9/24/04**
Local Point Of Contact: **Sherry Kaib**	**Address:** **10365 Keller Ave** **Riverside, CA 92505-1349**	
Title: Risk Manager		
Agency: **Alvord USD**		
Phone Number: **(951) 509-5011**	**E-Mail:** **skaib@alvord.k12.ca.us**

Insert State Requirement here	**N/A**	

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part 1, Page 6**	[M] [NM]	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.		
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	Yes - Part II Alvord Unified School District Section - Supplemental Questionnaire	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pgs 28 – 40 Flooding Pgs 41 – 53 Earthquakes Pgs 54 – 66 Dam failure Pgs 85 – 93 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Hazmat incidents Pgs 94 – 101 Pipeline/Aqueduct incidents Pgs 111 – 114 Blackout Pgs 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Weather Pages 67 – 76 Part II Alvord Unified School District Section -		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**[No]/[Yes]** If yes, where in MJP: Yes - Part II Alvord Unified School District Section -	**[N] [S]**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)		**[N] [S]**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)		**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)		**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part I, page 24-27 and Part II - Alvord Unified School District Section - Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II - Alvord Unified School District Section -	**[N] [S]**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143		
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143 and Part II - Alvord Unified School District Section - Supplemental Questionnaire for	**[N] [S]**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143		

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

Beaumont Unified School District

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		Beaumont Unified School District		
Type Agency/Jurisdiction:		Other Agency		
Contact Person:	Title:	Director of Facilities Planning		
First Name:	Greg	Last Name:	Bowers	
Agency Address:	Street:	500 Grace Ave.		
	City:	Beaumont		
	State:	CA		
	Zip:	92223		
Contact Phone	951/845-1631		FAX	951/769-7527
E-mail	bgowers@beaumontusd.k12.ca.us			
Population Served	20,000	Square Miles Served		110

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	2/10/2004
Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	2/10/2004
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	YES

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	**NO**
AIRPORT NEXT TO JURISDICTION	**NO**
DAIRY INDUSTRY	**NO**
POULTRY INDUSTRY	**NO**
CROPS/ORCHARDS	**NO**
DAMS IN JURISDICTION	**NO**
DAMS NEXT TO JURISDICTION	**NO**
LAKE/RESERVOIR IN JURISDICTION	**NO**
LAKE/RESERVOIR NEAR JURISDICTION	**NO**
JURISDICTION IN FLOOD PLAIN	**YES**
CONTROLLED FLOOD CONTROL CHANNEL	**NO**
UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
EARTHQUAKE FAULTS IN JURISDICTION	**YES**
EARTHQUAKE FAULTS NEXT TO JURISDICTION	**YES**
MOBILE HOME PARKS	**YES**
NON-REINFORCED FREEWAY BRIDGES	**NO**
NON-REINFORCED BRIDGES	**NO**
BRIDGES IN FLOOD PLAIN	**NO**
BRIDGES OVER OR ACROSS RIVER/STREAM	**NO**
ROADWAY CROSSING RIVER/STREAM	**NO**
NON REINFORCED BUILDINGS	**NO**
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	**YES**
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	**YES**
FOREST AREA IN JURISDICTION	**NO**
FOREST AREA NEXT TO JURISDICTION	**YES**
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	**NO**
MAJOR GAS/OIL PIPELINES IN JURISDICTION	**YES**
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	**YES**
RAILROAD TRACKS IN JURISDICTION	**YES**
RAILROAD TRACKS NEXT TO JURISDICTION	**YES**
HAZARDOUS WASTE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	**NO**
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	**NO**

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**YES**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**NO**
DOWNSTREAM OF A LAKE	**NO**
DOWNSTREAM FROM A RESERVOIR	**NO**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**NO**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**YES**
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**YES**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**NO**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	
HAVE BEEN DAMAGED BY FLOOD	
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	
HAVE BEEN DAMAGED BY FOREST FIRE	
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	
HAVE BEEN IMPACTED BY A PIPELINE EVENT	

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	YES
NEAR RAILROAD TRACKS	YES
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	NO
DOWNSTREAM OF A LAKE	NO
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	NO
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	YES

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
Beaumont USD	Fault	unknown	Yes	Yes
Beaumont USD	Pipeline	unknown	Yes	Yes
Beaumont USD	Railroad Track	unknown	Yes	Yes

JAIL/PRISON EVENT	1	2	1	2	19
OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
H	Generate new literature for dissemination to:
H	◊ Government employees
NA	◊ Businesses
NA	◊ Hotel/motel literature
NA	◊ Local radio stations for education
NA	◊ Public education via utilities
NA	◊ Identify/create television documentary content
H	Improve the Emergency Alert System (EAS)
H	◊ Consider integration with radio notification systems
H	◊ Upgrade alerting and warning systems for hearing impaired
H	◊ Training and maintenance
NA	Procure earthquake-warning devices for critical facilities
H	Reinforce emergency response facilities
NA	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
NA	Evaluate re-enforcing reservoir concrete bases
H	Evaluate EOCs for seismic stability
NA	Install earthquake cutoffs at reservoirs
NA	Install earthquake-warning devices at critical facilities
NA	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
NA	◊ Bridges/dams/pipelines
H	◊ Government buildings/schools
NA	◊ Mobile home parks
NA	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
H	Insurance coverage on public facilities
H	Funding for non-structural abatement (Earthquake kits, etc.)
NA	Pre - identify empty commercial space for seismic re-location
NA	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
NA	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
NA	Backup water supplies for hospitals

H	Evaluate pipeline seismic resiliency
NA	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
NA	Evaluate adequacy of reservoir capacity for sprinkler systems
H	Training/standardization for contractors performing retrofitting
H	Website with mitigation/contractor/retrofitting information
H	◊ Links to jurisdictions
H	◊ Alerting information
H	◊ Volunteer information
NA	Evaluate depths of aquifers/wells for adequacy during quakes
NA	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
H	Harden repeater sites
H	Continue existing interoperability project
H	Strengthen/harden
H	Relocate
H	Redundancy
H	Mobile repeaters

FLOODS

NA	Update development policies for flood plains
H	Public education on locations of flood plains
H	Develop multi-jurisdictional working group on floodplain management
NA	Develop greenbelt requirements in new developments
NA	Update weather pattern/flood plain maps
NA	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
NA	Required water flow/runoff plans for new development
NA	Perform GIS mapping of flood channels, etc.
H	Install vehicular crossing gates/physical barriers for road closure
H	Maintenance of storm sewers/flood channels
NA	Create map of flood channels/diversions/water systems etc
H	Require digital floor plans on new non-residential construction
H	Upgrade dirt embankments to concrete
NA	Conduct countywide needs study on drainage capabilities
NA	Increase number of pumping stations
NA	Increase sandbag distribution capacities
H	Develop pre-planned response plan for floods
H	◊ Evacuation documentation
H	◊ Re-examine historical flooding data for potential street re-design
H	Training for city/county PIOs about flood issues
H	Warning systems - ensure accurate information provided
H	◊ Publicize flood plain information (website?)

H	◊ Install warning/water level signage
H	◊ Enhanced public information
H	◊ Road closure compliance
H	◊ Shelter locations
H	◊ Pre-event communications
H	Look at County requirements for neighborhood access
H	◊ Secondary means of ingress/egress
NA	Vegetation restoration programs
H	Ensure critical facilities are hardened/backed up
NA	Hardening water towers
NA	Terrorism Surveillance - cameras at reservoirs/dams
NA	Riverbed maintenance
NA	Evaluate existing lift stations for adequacy
H	Acquisition of property for on-site retention
H	Evaluate regulations on roof drainage mechanisms
NA	Erosion-resistant plants
NA	Traffic light protection
NA	Upkeep of diversionary devices
NA	Install more turn-off valves on pipelines
NA	Backup generation facilities
NA	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
H	◊ Networking of agencies for weed abatement
NA	Develop strategic plan for forest management
NA	Public education on wildfire defense
H	Encourage citizen surveillance and reporting
NA	Identify hydrants with equipment ownership information
NA	Enhanced fire fighting equipment
NA	Fire spotter program/red flag program
NA	◊ Expand to other utilities
NA	Research on insect/pest mitigation technologies
NA	Volunteer home inspection program
H	Public education program
H	◊ Weather reporting/alerting
H	◊ Building protection
H	◊ Respiration
H	Pre-identify shelters/recovery centers/other resources
NA	Roofing materials/defensive spacing regulations
H	Community task forces for planning and education
NA	Fuel/dead tree removal
NA	Strategic pre-placement of fire fighting equipment
NA	Establish FEMA coordination processes based on ICS
NA	Brush clearings around repeaters
NA	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
NA	"Red Tag" homes in advance of event
NA	Provide fire-resistant gel to homeowners
NA	Involve insurance agencies in mitigation programs
NA	Clear out abandoned vehicles from oases
NA	Code enforcement
NA	Codes prohibiting fireworks
NA	Fuel modification/removal
NA	Evaluate building codes
H	Maintaining catch basins

OTHER HAZARDS

NA	Improve pipeline maintenance
H	Wetlands mosquito mitigation (West Nile Virus)
H	Insect control study
NA	Increase County Vector Control capacities
NA	General public drought awareness
NA	◊ Lawn watering rotation
NA	Develop County drought plan
NA	Mitigation of landslide-prone areas
NA	Develop winter storm sheltering plan
NA	Ease permitting process for building transmission lines
H	Evaluate restrictions on dust/dirt/generating activities during wind seasons
NA	Rotational crop planning/soil stabilization
NA	Enhance agricultural checkpoint enforcement
NA	Agriculture - funding of detection programs
H	Communications of pipeline maps (based on need to know)
H	Improved notification plan on runaway trains
NA	Improve/maintain blackout notification plan.
NA	Support business continuity planning for utility outages
NA	Terrorism training/equipment for first responders
NA	◊ Terrorism planning/coordination
NA	◊ Staffing for terrorism mitigation
NA	Create a SONGS regional planning group
NA	◊ Include dirty bomb planning
NA	Cooling stations - MOUs in place
NA	Fire Ant eradication program
NA	White Fly infestation abatement/eradication program
NA	Develop plan for supplemental water sources
NA	Public education on low water landscaping
NA	Salton Sea desalinization
NA	Establish agriculture security standards (focus on water supply)
NA	ID mutual aid agreements
NA	Vulnerability assessment on fiber-optic cable
NA	Upgrade valves on California aqueduct
H	Public education
H	◊ Bi-lingual signs
H	◊ Blackout information
NA	Notification system for rail traffic - container contents
NA	Control and release of terrorism intelligence
NA	Develop prison evacuation plan (shelter in place?)

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: Beaumont Unified School District
Contact: Gregory J. Bowers, Executive Director of Facilities Planning
Phone: (951) 845-1631

MITIGATION STRATEGY INFORMATION

Proposal Name:

District-Wide Emergency Preparedness

Proposal Location:

All Beaumont Unified School District facilities including but not limited to all K-12 school campuses, alternative education campuses, adult education campuses, the District Office, Transportation, Maintenance and Operstions, and Child Nutritional Services sites.

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
X	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
X	Development and implementation of mitigation education programs
	Development or improvement of warning systems
X	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History

List any previous disaster related events (dates, costs, etc)

Each school and District facility within the District, on a regular basis and as required by law, participates in a District-wide disaster drill as well as individual site disaster drill. Included, but not limited to, these drills include duck and cover, fire drills, lock-downs, etc. as mandated by California law. In addition, the governing board has recently updated and adopted new policies and procedures that address mitigation strategies in the event of a disaster. Each year the board re-adopts the district wide Emergency Preparedness and conducts a District-wide drill involving all school facilities. Site staff are trained in Standardized Emergency Management System (SEMS) procedures as well as Safe School Plans that will be implemented in handling disaster/crisis situations.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

There is a definite continual need to train and prepare staff for a disaster or crisis situation. Planning through regularly scheduled drills and training with increase the implement action success in the event of a real emergency. Our main purpose is to be ready and able in the face of a disaster. Being prepared will result in a reduction in personal injury or death and property loss.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	x	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

	Unfunded project - funds are not available for the project at this time
X	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Pre-Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: **Beaumont Unified School District**	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____NO XXXX_**		
Current Population in Jurisdiction or Served	**5304**	Projected Population in Jurisdiction or Served - in 2010	**9845**
Current Sq Miles in Jurisdiction or Served	**110**	Projected Sq Miles in Jurisdiction or Served - in 2010	**110**
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	**Yes**	If yes, please list ordinance or regulation number. Board Policy 3516 (Emergencies & Preparedness Plan, Administrative Regulation 3516 (Emergencies & Disaster Preparedness Plan), AR 3516.1 (Fire Drills & Fires), AR 3516.2 (Bomb Treats), AR 3516.3 (Earthquake Procedure System), and AR 3516.5 (Emergency Schedules).	
What is the number one land issue your agency will face in the next five years	Acquisition of school sites due to land development and unprecedented growth.		
Approximate Number of Homes/Apts/etc.	**NA**	Projected Number of Homes/Apts/etc.- in 2010	**NA**
Approximate Total Residential Value	**NA**	Projected Residential Total Value - in 2010	**NA**
Approximate Number of Commercial Businesses	**NA**	Projected Number of Commercial Businesses - in 2010	**NA**
Approximate Percentage of Homes/Apts/etc in flood hazard zones	**NA**	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	**NA**
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones	**NA**	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	**NA**
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones	**NA**	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	**NA**
Approximate Percentage of Commercial Businesses in flood hazard zones	**NA**	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	**NA**
Approximate Percentage of Commercial Businesses in earthquake hazard zones	**NA**	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	**NA**
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	**NA**	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	**NA**
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	**16**	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	**25**
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	**16**	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	**25**
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	**0**	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	**3**
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	**YES**	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes? **YES**			

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Beaumont USD**	**Title/Lead Jurisdiction Of Multi-Jurisdictional Plan:** **Riverside County Operational Area**	**Date Of Completion:** **9/24/04**
Local Point Of Contact: Gregory J. Bowers	**Address:** 500 Grace Ave. Beaumont, Ca. 92223	
Title: Executive Director Facilities Planning Department		
Agency: **Beaumont USD**		
Phone Number: (951) 845-1631, Ext. 338	**E-Mail:** gbowers@beaumontusd.k12.ca.us

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part 1, Page 6**	[M] [NM]	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.		

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	Yes - Part II Beaumont Unified School District Section - Supplemental Questionnaire	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pgs 28 – 40 Flooding Pgs 41 – 53 Earthquakes Pgs 54 – 66 Dam failure Pgs 85 – 93 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Hazmat incidents Pgs 94 – 101 Pipeline/Aqueduct incidents Pgs 111 – 114 Blackout Pgs 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Weather Pages 67 – 76 Part II Beaumont Unified School District Section -		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**[No]/[Yes]** If yes, where in MJP: Yes - Part II Beaumont Unified School District Section -	**[N] [S]**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)		**[N] [S]**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)		**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)		**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part I, page 24-27 and Part II - Beaumont Unified School District Section - Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II - Beaumont Unified School District Section -	**[N] [S]**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143		

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143 and Part II - Beaumont Unified School District Section - Supplemental Questionnaire for	**[N] [S]**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143

ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	
COULD BE CONSIDERED A BIO-HAZARD RISK	

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
LAKE ELSINORE	Dam	Canyon Lake Dam	No	No
LAKE ELSINORE	Dam	Diamond Valley Lake Dam	No	No
LAKE ELSINORE	Dam	Lake Hemet Dam	No	No
LAKE ELSINORE	Dam	Lake Perris Dam	No	No
LAKE ELSINORE	Fault	Elsinore Fault	Yes	No
LAKE ELSINORE	Flood Channel	Lake Elsinore Outflow Channel	Yes	No
LAKE ELSINORE	Lake	Canyon Lake	No	Yes
LAKE ELSINORE	Lake	Lake Elsinore	Yes	No
LAKE ELSINORE	River	San Jacinto River	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION VULNERABILITY WORKSHEET

NAME: Geneva Krag AGENCY: Lake Elsinore Unified School District DATE: 6/30/04

	COUNTY		LOCAL JURISDICTION

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

L	Aggressive public education campaign in light of predictions
M	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
M	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
L	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
NA	Provide training to hospital staffs
M	Require earthquake gas shutoffs on remodels/new construction
NA	Evaluate re-enforcing reservoir concrete bases
NA	Evaluate EOCs for seismic stability
NA	Install earthquake cutoffs at reservoirs
NA	Install earthquake-warning devices at critical facilities
NA	Develop a dam inundation plan for new Diamond Valley Reservoir
L	Earthquake retrofitting
	◊ Bridges/dams/pipelines
	◊ Government buildings/schools
	◊ Mobile home parks
NA	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
	◊ Update to current compliance when retrofitting
H	Insurance coverage on public facilities
M	Funding for non-structural abatement (Earthquake kits, etc.)
NA	Pre - identify empty commercial space for seismic re-location
NA	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
M	Mapping of liquefaction zones
M	Incorporate County geologist data into planning
NA	Backup water supplies for hospitals

NA	Evaluate pipeline seismic resiliency
M	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
NA	Evaluate adequacy of reservoir capacity for sprinkler systems
NA	Training/standardization for contractors performing retrofitting
NA	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
NA	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
NA	Harden repeater sites
M	Continue existing interoperability project
NA	Strengthen/harden
NA	Relocate
NA	Redundancy
NA	Mobile repeaters

FLOODS

NA	Update development policies for flood plains
NA	Public education on locations of flood plains
NA	Develop multi-jurisdictional working group on floodplain management
NA	Develop greenbelt requirements in new developments
NA	Update weather pattern/flood plain maps
NA	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
NA	Required water flow/runoff plans for new development
NA	Perform GIS mapping of flood channels, etc.
NA	Install vehicular crossing gates/physical barriers for road closure
L	Maintenance of storm sewers/flood channels
L	Create map of flood channels/diversions/water systems etc
H	Require digital floor plans on new non-residential construction
L	Upgrade dirt embankments to concrete
NA	Conduct countywide needs study on drainage capabilities
NA	Increase number of pumping stations
NA	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
	◊ Evacuation documentation
	◊ Re-examine historical flooding data for potential street re-design
NA	Training for city/county PIOs about flood issues
M	Warning systems - ensure accurate information provided
	◊ Publicize flood plain information (website?)

	◊ Install warning/water level signage
	◊ Enhanced public information
	◊ Road closure compliance
	◊ Shelter locations
	◊ Pre-event communications
M	Look at County requirements for neighborhood access
	◊ Secondary means of ingress/egress
NA	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
NA	Hardening water towers
NA	Terrorism Surveillance - cameras at reservoirs/dams
NA	Riverbed maintenance
NA	Evaluate existing lift stations for adequacy
NA	Acquisition of property for on-site retention
NA	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
NA	Traffic light protection
NA	Upkeep of diversionary devices
NA	Install more turn-off valves on pipelines
NA	Backup generation facilities
NA	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
	◊ Networking of agencies for weed abatement
NA	Develop strategic plan for forest management
NA	Public education on wildfire defense
NA	Encourage citizen surveillance and reporting
NA	Identify hydrants with equipment ownership information
NA	Enhanced fire fighting equipment
NA	Fire spotter program/red flag program
	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
NA	Volunteer home inspection program
NA	Public education program
	◊ Weather reporting/alerting
	◊ Building protection
	◊ Respiration
H	Pre-identify shelters/recovery centers/other resources
NA	Roofing materials/defensive spacing regulations
H	Community task forces for planning and education
NA	Fuel/dead tree removal
NA	Strategic pre-placement of fire fighting equipment
NA	Establish FEMA coordination processes based on ICS
NA	Brush clearings around repeaters

NA	Research new technologies for identifying/tracking fires
M	Procure/deploy backup communications equipments
NA	"Red Tag" homes in advance of event
NA	Provide fire-resistant gel to homeowners
M	Involve insurance agencies in mitigation programs
NA	Clear out abandoned vehicles from oases
NA	Code enforcement
NA	Codes prohibiting fireworks
NA	Fuel modification/removal
NA	Evaluate building codes
NA	Maintaining catch basins

OTHER HAZARDS

NA	Improve pipeline maintenance
NA	Wetlands mosquito mitigation (West Nile Virus)
NA	Insect control study
NA	Increase County Vector Control capacities
NA	General public drought awareness
	◊ Lawn watering rotation
NA	Develop County drought plan
NA	Mitigation of landslide-prone areas
NA	Develop winter storm sheltering plan
NA	Ease permitting process for building transmission lines
NA	Evaluate restrictions on dust/dirt/generating activities during wind seasons
NA	Rotational crop planning/soil stabilization
NA	Enhance agricultural checkpoint enforcement
NA	Agriculture - funding of detection programs
NA	Communications of pipeline maps (based on need to know)
NA	Improved notification plan on runaway trains
NA	Improve/maintain blackout notification plan.
NA	Support business continuity planning for utility outages
NA	Terrorism training/equipment for first responders
	◊ Terrorism planning/coordination
	◊ Staffing for terrorism mitigation
NA	Create a SONGS regional planning group
	◊ Include dirty bomb planning
NA	Cooling stations - MOUs in place
M	Fire Ant eradication program
NA	White Fly infestation abatement/eradication program
M	Develop plan for supplemental water sources
NA	Public education on low water landscaping
NA	Salton Sea desalinization
NA	Establish agriculture security standards (focus on water supply)
L	ID mutual aid agreements
NA	Vulnerability assessment on fiber-optic cable

NA	Upgrade valves on California aqueduct
M	Public education
	◊ Bi-lingual signs
	◊ Blackout information
NA	Notification system for rail traffic - container contents
NA	Control and release of terrorism intelligence
NA	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction:	Lake Elsinore Unified School District
Contact:	Geneva Krag, Safety Coordinator
Phone:	951-253-7028

MITIGATION STRATEGY INFORMATION

Proposal Name:

District-wide earthquake response training and functional drill

Proposal Location:

All school sites and district office locations in the District.

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
X	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	Each school site has individually participated in duck, cover, hold drills, fire drills, and lockdown drills on a periodic basis as required by California law. Each school site staff has had training in the structure of SEMS and how it works. However, there has not been a mandatory district-wide coordinated earthquake response drill in over four years. The entire school district is in the immediate proximety of two major active earthquake faults.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

As a result of the Mitigation Assessment by District staff and as part of the District's mitigation effort to enhance it's disaster response capabilities and reduce the potential loss of lives to students and staff, the District has established a requirement for all District sites to participate in a yearly functional earthquake exercise during the month of September. 2004 will be the first of these yearly events and will be held on September 30, 2004. Before each yearly drill, there will be training of staff and pre-planning coordination to comply with the Standardized Emergency Management System Emergency Response Plans already in place at each site and the District Office.

The need for district-wide drill planning, training and execution is obvious. The costs of these drills are measured in employee time throughout the District, training materials, communications materials (radios) and disaster supplies and c-bins for the supplies. The Safety Coordinator's planning and training time is the most significant individual time investment. With nearly 2,000 full time employees, the investment in individual time for these drills adds up to a significant investment. The savings to the District and community as a whole is measured in loss control.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

	Unfunded project - funds are not available for the project at this time
X	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Lake Elsinore USD	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO __XXX__**		
Current Population in Jurisdiction or Served	20,000	Projected Population in Jurisdiction or Served - in 2010	25,000
Current Sq Miles in Jurisdiction or Served	120	Projected Sq Miles in Jurisdiction or Served - in 2010	120
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	YES	If yes, please list ordinance or regulation number. Board Policy # 5142 and # 0451	
What is the number one land issue your agency will face in the next five years	Uncontrolled development within the district boundaries		
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010	
Approximate Total Residential Value		Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses		Projected Number of Commercial Businesses - in 2010	
Approximate Percentage of Homes/Apts/etc in flood hazard zones		Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones		Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones		Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in flood hazard zones		Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in earthquake hazard zones		Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	20	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	22
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	26	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	29
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	2	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	5
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?		Yes	

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: Lake Elsinore Unified School District	Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County Operational Area	Date of Completion: 9/24/04
Local Point of Contact: Geneva Krag	Address: 545 Chaney Street Lake Elsinore, CA. 92530	
Title: Safety Coordinator		
Agency: Lake Elsinore Unified School District		
Phone Number: (951) 245-8275	E-Mail: geneva.krag@leusd.k12.ca.us

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part 1, Page 6**	[M] [NM]	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.		
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	Yes - Part II Lake Elsinore USD Section - Supplemental Questionnaire	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
RISK ASSESSMENT				

Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pgs 28 – 40 Flooding Pgs 41 – 53 Earthquakes Pgs 54 – 66 Extreme Weather Pgs 67 – 76 Landslides Pgs 77 – 80 Dam failure Pgs 85 – 93 Hazmat incidents Pgs 94 – 101 Highway emergencies Pgs 102 – 110 Pipeline/Aqueduct incidents Pgs 111 – 114 Blackout Pgs 115 – 118 Toxic pollution Pgs 119 – 124 Part II Lake Elsinore USD Section -		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**[No]/[Yes]** If yes, where in MJP: Yes - Part II Lake Elsinore USD Section -	**[N] [S]**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)		**[N] [S]**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)		**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)		**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part I, page 24-27 and Part II - Lake Elsinore USD Section - Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II - Lake Elsinore USD Section -	**[N] [S]**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143		
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143 and Part II - Lake Elsinore USD Section - Supplemental Questionnaire for	**[N] [S]**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION VULNERABILITY WORKSHEET

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
M	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
H	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
H	Procure earthquake-warning devices for critical facilities
H	Reinforce emergency response facilities
M	Provide training to hospital staffs
L	Require earthquake gas shutoffs on remodels/new construction
H	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
H	Install earthquake cutoffs at reservoirs
H	Install earthquake-warning devices at critical facilities
M	Develop a dam inundation plan for new Diamond Valley Reservoir
M	Earthquake retrofitting
	◊ Bridges/dams/pipelines
	◊ Government buildings/schools
	◊ Mobile home parks
M	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
M	Ensure Uniform Building Code compliance
	◊ Update to current compliance when retrofitting
L	Insurance coverage on public facilities
M	Funding for non-structural abatement (Earthquake kits, etc.)

L	Pre - identify empty commercial space for seismic re-location
M	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
H	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
H	Backup water supplies for hospitals
H	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
L	Fire sprinkler ordinance for all structures
M	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
H	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
H	Evaluate depths of aquifers/wells for adequacy during quakes
M	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
M	Harden repeater sites
H	Continue existing interoperability project
M	Strengthen/harden
M	Relocate
H	Redundancy
M	Mobile repeaters

FLOODS

H	Update development policies for flood plains
H	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
L	Develop greenbelt requirements in new developments
L	Update weather pattern/flood plain maps
L	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
L	Required water flow/runoff plans for new development
M	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
H	Maintenance of storm sewers/flood channels
H	Create map of flood channels/diversions/water systems etc
L	Require digital floor plans on new non-residential construction

M	Upgrade dirt embankments to concrete
M	Conduct countywide needs study on drainage capabilities
M	Increase number of pumping stations
M	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
	◊ Evacuation documentation
	◊ Re-examine historical flooding data for potential street re-design
M	Training for city/county PIOs about flood issues
H	Warning systems - ensure accurate information provided
	◊ Publicize flood plain information (website?)
	◊ Install warning/water level signage
	◊ Enhanced public information
	◊ Road closure compliance
	◊ Shelter locations
	◊ Pre-event communications
M	Look at County requirements for neighborhood access
	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
M	Hardening water towers
H	Terrorism Surveillance - cameras at reservoirs/dams
H	Riverbed maintenance
M	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
M	Evaluate regulations on roof drainage mechanisms
M	Erosion-resistant plants
H	Traffic light protection
L	Upkeep of diversionary devices
H	Install more turn-off valves on pipelines
H	Backup generation facilities
H	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
	◊ Networking of agencies for weed abatement
H	Develop strategic plan for forest management
M	Public education on wildfire defense
L	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information
H	Enhanced fire fighting equipment

M	Fire spotter program/red flag program
	◊ Expand to other utilities
M	Research on insect/pest mitigation technologies
L	Volunteer home inspection program
L	Public education program
	◊ Weather reporting/alerting
	◊ Building protection
	◊ Respiration
M	Pre-identify shelters/recovery centers/other resources
M	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
H	Fuel/dead tree removal
M	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS
H	Brush clearings around repeaters
M	Research new technologies for identifying/tracking fires
M	Procure/deploy backup communications equipments
M	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
H	Involve insurance agencies in mitigation programs
M	Clear out abandoned vehicles from oases
H	Code enforcement
H	Codes prohibiting fireworks
M	Fuel modification/removal
H	Evaluate building codes
M	Maintaining catch basins

OTHER HAZARDS

M	Improve pipeline maintenance
H	Wetlands mosquito mitigation (West Nile Virus)
M	Insect control study
L	Increase County Vector Control capacities
L	General public drought awareness
	◊ Lawn watering rotation
M	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
M	Rotational crop planning/soil stabilization

M	Enhance agricultural checkpoint enforcement
M	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
H	Improved notification plan on runaway trains
M	Improve/maintain blackout notification plan.
H	Support business continuity planning for utility outages
H	Terrorism training/equipment for first responders
	◊ Terrorism planning/coordination
	◊ Staffing for terrorism mitigation
L	Create a SONGS regional planning group
	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
M	Develop plan for supplemental water sources
M	Public education on low water landscaping
L	Salton Sea desalinization
H	Establish agriculture security standards (focus on water supply)
M	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable
M	Upgrade valves on California aqueduct
H	Public education
	◊ Bi-lingual signs
L	◊ Blackout information
L	Notification system for rail traffic - container contents
M	Control and release of terrorism intelligence
L	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction:	MORENO VALLEY USD
Contact:	JOHN BALDARAY
Phone:	951-571-7827

MITIGATION STRATEGY INFORMATION

Proposal Name:

COMMUNICATION MODIFICATION

Proposal Location:

ALL SCHOOLS WITHIN THE DISTRICT

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
X	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History

The current communication system for district-wide emergency is severely lacking. The current system (besides normal equipment, i.e. phones, email, fax, etc.) consist of handheld radios that have proven to be inadequate during district-wide emergencies.

The communication traffic would limit the district quick reaction to those with immediate needs. Also, immediate and confidential communication with site administrators is almost nil.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

The purpose of the proposal would be to update the School District's communication plan by researching how best to supplement or replace current equipment.

The proposal will include the review of our current plan and new technology to make communication more efficient and to help speed recovery.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

	Unfunded proposal - funds are not available for the proposal at this time
X	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

YES	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Moreno Valley USD		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO XXX**	
Current Population in Jurisdiction or Served	38000	Projected Population in Jurisdiction or Served - in 2010	42000
Current Sq Miles in Jurisdiction or Served	56	Projected Sq Miles in Jurisdiction or Served - in 2010	56
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?		If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years	SITES FOR NEW SCHOOLS		
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010	
Approximate Total Residential Value		Projected Residential Total Value - in 2010

Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones		Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in flood hazard zones		Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in earthquake hazard zones		Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones		Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	40	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	45
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	3	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	YES	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			YES

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Moreno Valley Unified School District**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 15, 2004**
Local Point of Contact: **John Baldaray**	**Address:** **13911 Perris Blvd.** **Moreno Valley, CA 92553**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	

Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).	Part II, Moreno Valley Unified School District Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Moreno Valley Unified School District Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Moreno Valley Unified School District Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Moreno Valley Unified School District Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pages 28 – 40 Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Dam failure Pages 85 – 93 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Airline / airport emergencies Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Part II, Moreno Valley Unified School District Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Moreno Valley Unified School District Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Moreno Valley Unified School District Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Moreno Valley Unified School District Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**

Population Served	Approx 40 k	Square Miles Served	56

Does your organization have a general plan?	Yes
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	N/A

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	2004
Do you have a recovery annex or section in your plan?	NO
Do you have a terrorism/WMD annex or section in your plan?	NO

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	NO
AIRPORT NEXT TO JURISDICTION	YES
DAIRY INDUSTRY	YES
POULTRY INDUSTRY	YES
CROPS/ORCHARDS	YES
DAMS IN JURISDICTION	NO
DAMS NEXT TO JURISDICTION	YES
LAKE/RESERVOIR IN JURISDICTION	YES
LAKE/RESERVOIR NEAR JURISDICTION	YES
JURISDICTION IN FLOOD PLAIN	YES
CONTROLLED FLOOD CONTROL CHANNEL	YES
UNCONTROLLED FLOOD CONTROL CHANNEL	NO
EARTHQUAKE FAULTS IN JURISDICTION	NO
EARTHQUAKE FAULTS NEXT TO JURISDICTION	YES
MOBILE HOME PARKS	YES
NON-REINFORCED FREEWAY BRIDGES	NO
NON-REINFORCED BRIDGES	UNK
BRIDGES IN FLOOD PLAIN	UNK
BRIDGES OVER OR ACROSS RIVER/STREAM	YES
ROADWAY CROSSING RIVER/STREAM	YES
NON REINFORCED BUILDINGS	UNK
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	YES
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	YES
FOREST AREA IN JURISDICTION	NO
FOREST AREA NEXT TO JURISDICTION	NO
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	NO
MAJOR GAS/OIL PIPELINES IN JURISDICTION	YES
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	YES
RAILROAD TRACKS IN JURISDICTION	YES
RAILROAD TRACKS NEXT TO JURISDICTION	YES
HAZARDOUS WASTE FACILITIES IN JURISDICTION	UNK
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	UNK
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	UNK
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	UNK

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**NO**
NEAR FLOOD PLAIN	**YES**
NEAR RAILROAD TRACKS	**NO**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**YES**
DOWNSTREAM OF A LAKE	**YES**
DOWNSTREAM FROM A RESERVOIR	**YES**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**NO**
ON AN EARTHQUAKE FAULT	**NO**
NEAR AN EARTHQUAKE FAULT	**NO**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**YES**
NEAR A HAZARDOUS WASTE FACILITY	**YES**
A HAZARDOUS STORAGE FACILITY	**NO**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**NO**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**YES**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	YES
NEAR RAILROAD TRACKS	NO
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	YES
DOWNSTREAM OF A LAKE	YES
DOWNSTREAM FROM A RESERVOIR	YES
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	YES
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	NO
NEAR AN EARTHQUAKE FAULT	NO
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	YES
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	YES

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
Menifee USD	Dam	Diamond Valey Lake	No	Yes
Menifee USD	Fault	Elsinore	Yes	No
Menifee USD	Flood Channel	Line G	Yes	No
Menifee USD	Lake	Diamond Valley Lake	No	Yes
Menifee USD	Lake	Lake Skinner	No	Yes
Menifee USD	River	Murrieta Creek	Yes	No
Menifee USD	Stream	Warm Springs	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION VULNERABILITY WORKSHEET

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
	Generate new literature for dissemination to:
M	◊ Government employees
L	◊ Businesses
N/A	◊ Hotel/motel literature
M	◊ Local radio stations for education
L	◊ Public education via utilities
N/A	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
M	◊ Consider integration with radio notification systems
L	◊ Upgrade alerting and warning systems for hearing impaired
M	◊ Training and maintenance
N/A	Procure earthquake-warning devices for critical facilities
N/A	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
L	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
N/A	Install earthquake-warning devices at critical facilities
L	Develop a dam inundation plan for new Diamond Valley Reservoir
L	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
M	◊ Government buildings/schools
N/A	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
H	Insurance coverage on public facilities
L	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location

N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals
N/A	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
M	Fire sprinkler ordinance for all structures
N/A	Evaluate adequacy of reservoir capacity for sprinkler systems
N/A	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
N/A	◊ Links to jurisdictions
N/A	◊ Alerting information
N/A	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
N/A	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
L	Harden repeater sites
H	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
M	Redundancy
H	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
N/A	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
N/A	Develop greenbelt requirements in new developments
N/A	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
N/A	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
H	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete

N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
N/A	Increase sandbag distribution capacities
H	Develop pre-planned response plan for floods
H	◊ Evacuation documentation
N/A	◊ Re-examine historical flooding data for potential street re-design
N/A	Training for city/county PIOs about flood issues
H	Warning systems - ensure accurate information provided
N/A	◊ Publicize flood plain information (website?)
N/A	◊ Install warning/water level signage
N/A	◊ Enhanced public information
N/A	◊ Road closure compliance
H	◊ Shelter locations
H	◊ Pre-event communications
H	Look at County requirements for neighborhood access
H	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
N/A	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
N/A	Acquisition of property for on-site retention
N/A	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
N/A	Traffic light protection
N/A	Upkeep of diversionary devices
H	Install more turn-off valves on pipelines
H	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
N/A	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
N/A	Encourage citizen surveillance and reporting
H	Identify hydrants with equipment ownership information
N/A	Enhanced fire fighting equipment
N/A	Fire spotter program/red flag program

N/A	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies
N/A	Volunteer home inspection program
N/A	Public education program
N/A	◊ Weather reporting/alerting
N/A	◊ Building protection
N/A	◊ Respiration
H	Pre-identify shelters/recovery centers/other resources
N/A	Roofing materials/defensive spacing regulations
N/A	Community task forces for planning and education
N/A	Fuel/dead tree removal
N/A	Strategic pre-placement of fire fighting equipment
N/A	Establish FEMA coordination processes based on ICS
N/A	Brush clearings around repeaters
N/A	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
N/A	"Red Tag" homes in advance of event
N/A	Provide fire-resistant gel to homeowners
M	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
N/A	Code enforcement
N/A	Codes prohibiting fireworks
N/A	Fuel modification/removal
N/A	Evaluate building codes
H	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
N/A	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
N/A	General public drought awareness
N/A	◊ Lawn watering rotation
N/A	Develop County drought plan
N/A	Mitigation of landslide-prone areas
N/A	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
N/A	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement

N/A	Agriculture - funding of detection programs
N/A	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
N/A	Improve/maintain blackout notification plan.
N/A	Support business continuity planning for utility outages
N/A	Terrorism training/equipment for first responders
N/A	◊ Terrorism planning/coordination
N/A	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
N/A	◊ Include dirty bomb planning
N/A	Cooling stations - MOUs in place
N/A	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
N/A	Develop plan for supplemental water sources
N/A	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
N/A	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
N/A	Public education
N/A	◊ Bi-lingual signs
N/A	◊ Blackout information
N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction:	Menifee Union School District
Contact:	Bruce Shaw
Phone:	951-672-1851

MITIGATION STRATEGY INFORMATION

Proposal Name:

Menifee Union School District

Proposal Location:

District-Wide

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
X	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History — List any previous disaster related events (dates, costs, etc)

N/A

Description of Mitigation Goal Narrative: Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

AS A PUBLIC AGENCY SERVING THE CHILDREN OF THIS COMMUNITY, WE MUST ALWAYS STRIVE TO CONTINUALLY DEVELOP AND IMPROVE OUR DISASTER PREPAREDNESS

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

	Unfunded project - funds are not available for the project at this time
X	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Y	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Menifee Union School District	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO __X__**		
Current Population in Jurisdiction or Served	40,000	Projected Population in Jurisdiction or Served - in 2010	67,084
Current Sq Miles in Jurisdiction or Served	56	Projected Sq Miles in Jurisdiction or Served - in 2010	56
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	Yes	If yes, please list ordinance or regulation number. District Disaster Plan	
What is the number one land issue your agency will face in the next five years	Land acquisition for school sites		
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010	
Approximate Total Residential Value		Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses		Projected Number of Commercial Businesses - in 2010	
Approximate Percentage of Homes/Apts/etc in flood hazard zones		Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones		Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones		Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in flood hazard zones		Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in earthquake hazard zones		Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	0	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	0	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes? Yes			

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: Menifee Union School District	Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County Operational Area	Date of Completion: 9/24/04
Local Point of Contact: Bruce Shaw	Address: 30205 Menifee Road Menifee , CA . 92584	
Title: Facilities Coordinator		
Agency: Menifee Union School District		
Phone Number: (951) 672-1851	E-Mail: bshaw@menifeeusd.k12.ca.us

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part 1, Page 6**	[M] [NM]	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.		

Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	Yes - Part II Menifee USD Section - Supplemental Questionnaire	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pgs 28 – 40 Flooding Pgs 41 – 53 Earthquakes Pgs 54 – 66 Extreme Weather Pgs 67 – 76 Landslides Pgs 77 – 80 Dam failure Pgs 85 – 93 Hazmat incidents Pgs 94 – 101 Highway emergencies Pgs 102 – 110 Pipeline/Aqueduct incidents Pgs 111 – 114 Blackout Pgs 115 – 118 Toxic pollution Pgs 119 – 124 Part II Menifee USD Section -		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**[No]/[Yes]** If yes, where in MJP: Yes - Part II Menifee USD Section -	**[N] [S]**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)		**[N] [S]**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)		**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)		**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part I, page 24-27 and Part II - Menifee USD Section - Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II - Menifee USD Section -	**[N] [S]**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143		
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143 and Part II - Menifee USD Section - Supplemental Questionnaire for	**[N] [S]**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143		

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

Riverside Unified School District

RIVERSIDE COUNTY JURISDICTIONAL HAZARD INVENTORY

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		Riverside Unified School District		
Type Agency/Jurisdiction:		Other Agency		
Contact Person:	Title:	Assistant of Support-Operations		
First Name:	Kirk	Last Name:	Lewis	
Agency Address:	Street:	3380 14th Street		
	City:	Riverside		
	State:	Ca		
	Zip:	92501		
Contact Phone	951-788-7154		FAX	
E-mail	klewis@rusd.k12.ca.us			

Population Served	42,347
Square Miles Served	93

Does your organization have a general plan?	NO
Does your organization have a safety component to the general plan?	N/A
What year was your plan last updated?	N/A

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	2004
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	YES

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	**YES**
AIRPORT NEXT TO JURISDICTION	
DAIRY INDUSTRY	
POULTRY INDUSTRY	
CROPS/ORCHARDS	
DAMS IN JURISDICTION	
DAMS NEXT TO JURISDICTION	
LAKE/RESERVOIR IN JURISDICTION

NEAR A MAJOR GAS/OIL PIPELINE	

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	NO
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
Riverside Unified School District				
	Lake	Lake Mathews	No	Yes
	Railroad Track	Union Pacific	No	Yes
	Reservoir	Tilden	No	Yes
	River	Santa Ana River	No	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION VULNERABILITY WORKSHEET

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
H	Generate new literature for dissemination to:
H	◊ Government employees
H	◊ Businesses
M	◊ Hotel/motel literature
H	◊ Local radio stations for education
H	◊ Public education via utilities
H	◊ Identify/create television documentary content
H	Improve the Emergency Alert System (EAS)
H	◊ Consider integration with radio notification systems
H	◊ Upgrade alerting and warning systems for hearing impaired
H	◊ Training and maintenance
H	Procure earthquake-warning devices for critical facilities
H	Reinforce emergency response facilities
H	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
L	Evaluate re-enforcing reservoir concrete bases
M	Evaluate EOCs for seismic stability
L	Install earthquake cutoffs at reservoirs
M	Install earthquake-warning devices at critical facilities
L	Develop a dam inundation plan for new Diamond Valley Reservoir
H	Earthquake retrofitting
H	◊ Bridges/dams/pipelines
H	◊ Government buildings/schools
L	◊ Mobile home parks
H	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
H	Insurance coverage on public facilities
H	Funding for non-structural abatement (Earthquake kits, etc.)
L	Pre - identify empty commercial space for seismic re-location
L	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
L	Mapping of liquefaction zones
L	Incorporate County geologist data into planning

M	Backup water supplies for hospitals
M	Evaluate pipeline seismic resiliency
M	Pre-positioning of temporary response structures
M	Fire sprinkler ordinance for all structures
M	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
L	◊ Links to jurisdictions
M	◊ Alerting information
L	◊ Volunteer information
I	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
M	Harden repeater sites
M	Continue existing interoperability project
M	Strengthen/harden
L	Relocate
M	Redundancy
M	Mobile repeaters

FLOODS

L	Update development policies for flood plains
L	Public education on locations of flood plains
L	Develop multi-jurisdictional working group on floodplain management
L	Develop greenbelt requirements in new developments
L	Update weather pattern/flood plain maps
L	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
L	Required water flow/runoff plans for new development
L	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
L	Create map of flood channels/diversions/water systems etc
L	Require digital floor plans on new non-residential construction
L	Upgrade dirt embankments to concrete
L	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
L	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
M	◊ Evacuation documentation
M	◊ Re-examine historical flooding data for potential street re-design
M	Training for city/county PIOs about flood issues
H	Warning systems - ensure accurate information provided

M	◊ Publicize flood plain information (website?)
M	◊ Install warning/water level signage
H	◊ Enhanced public information
H	◊ Road closure compliance
H	◊ Shelter locations
H	◊ Pre-event communications
L	Look at County requirements for neighborhood access
L	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
L	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
L	Riverbed maintenance
L	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
L	Traffic light protection
L	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
M	Backup generation facilities
M	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
L	◊ Networking of agencies for weed abatement
L	Develop strategic plan for forest management
L	Public education on wildfire defense
M	Encourage citizen surveillance and reporting
M	Identify hydrants with equipment ownership information
L	Enhanced fire fighting equipment
L	Fire spotter program/red flag program
L	◊ Expand to other utilities
M	Research on insect/pest mitigation technologies
M	Volunteer home inspection program
M	Public education program
L	◊ Weather reporting/alerting
M	◊ Building protection
M	◊ Respiration
H	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
M	Community task forces for planning and education
M	Fuel/dead tree removal
L	Strategic pre-placement of fire fighting equipment
M	Establish FEMA coordination processes based on ICS

L	Brush clearings around repeaters
L	Research new technologies for identifying/tracking fires
M	Procure/deploy backup communications equipments
M	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
L	Involve insurance agencies in mitigation programs
L	Clear out abandoned vehicles from oases
M	Code enforcement
M	Codes prohibiting fireworks
L	Fuel modification/removal
L	Evaluate building codes
L	Maintaining catch basins

OTHER HAZARDS

L	Improve pipeline maintenance
L	Wetlands mosquito mitigation (West Nile Virus)
L	Insect control study
L	Increase County Vector Control capacities
M	General public drought awareness
M	◊ Lawn watering rotation
M	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
M	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
L	Rotational crop planning/soil stabilization
L	Enhance agricultural checkpoint enforcement
M	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
M	Improved notification plan on runaway trains
M	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
H	Terrorism training/equipment for first responders
H	◊ Terrorism planning/coordination
L	◊ Staffing for terrorism mitigation
L	Create a SONGS regional planning group
L	◊ Include dirty bomb planning
M	Cooling stations - MOUs in place
L	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
M	Develop plan for supplemental water sources
L	Public education on low water landscaping
L	Salton Sea desalinization
L	Establish agriculture security standards (focus on water supply)
H	ID mutual aid agreements

M	Vulnerability assessment on fiber-optic cable
L	Upgrade valves on California aqueduct
H	Public education
H	◊ Bi-lingual signs
H	◊ Blackout information
H	Notification system for rail traffic - container contents
M	Control and release of terrorism intelligence
L	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: Riverside Unified School District	
Contact:	Dr. Kirk Lewis
Phone:	(951) 788-7154

MITIGATION STRATEGY INFORMATION

Proposal Name:

Seismic Retrofit of School District Administration Building

Proposal Location:

3380 14th St., Riverside, CA 92501

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History

List any previous disaster related events (dates, costs, etc)

The Administration Building for the school district was originally built approximately forty years ago. Since the original construction, the building has had several internal tenant improvements; however it has never been completely retrofitted to meet current earthquake standards. This building serves as the Emergency Operations Center for the district during any major event or major disaster. The building is located in an earthquake prone area of Riverside County. Should an earthquake of 6.5 or higher occur, the potential for significant structural failure of the building is high.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the Proposal, any history related to the Proposal. List the activities necessary for its completion in the narrative section below.

The Administration Building would be evaluated to determine the amount of seismic retrofitting needed to bring the building up to current earthquake safety building codes. This study would include the general seismic structural stability of the building for a 6.5 earthquake. Upon completion of the study, funding sources would be identified for the seismic retrofitting.

Does your jurisdiction have primary responsibility for the Proposal? If not, what agency does?

Yes	X	No		

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this Proposal

	Unfunded Proposal - funds are not available for the Proposal at this time
X	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Pre-Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Yes	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Riverside Unified School District	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO XXX**		
Current Population in Jurisdiction or Served	**42,347**	Projected Population in Jurisdiction or Served - in 2010	**48,000**
Current Sq Miles in Jurisdiction or Served	**93**	Projected Sq Miles in Jurisdiction or Served - in 2010	**93**
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	**YES**	If yes, please list ordinance or regulation number. School District Disaster Plan	
What is the number one land issue your agency will face in the next five years	New School Site acquisition and development		
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010	
Approximate Total Residential Value		Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses		Projected Number of Commercial Businesses - in 2010

Approximate Percentage of Homes/Apts/etc in earthquake hazard zones		Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones		Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in flood hazard zones		Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in earthquake hazard zones		Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	
Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	**0**	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	**0**
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	**49**	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	**56**
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	**0**	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	**0**
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	**YES**	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes? YES			

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: Riverside Unified School District	Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES	Date of Completion: September 15, 2004
Local Point of Contact: Dr. Kirk Lewis	Address: 3380 14th St. Riverside, CA 92501	
Title: Assistant Supt. - Operations		
Agency: Riverside Unified School District

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES	Part II, Riverside Unified School District Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, Riverside Unified School District Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II Riverside Unified School District Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, Riverside Unified School District Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pages 28 – 40 Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Dam failure Pages 85 – 93 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Airline / airport emergencies Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Part II, Riverside Unified School District Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, Riverside Unified School District Section	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II Riverside Unified School District Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Riverside Unified School District Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**

ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	YES
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary				
Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
San Jacinto USD	Fault	San Jacinto Fault	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION VULNERABILITY WORKSHEET

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
L	Generate new literature for dissemination to:
M	◊ Government employees
L	◊ Businesses
L	◊ Hotel/motel literature
L	◊ Local radio stations for education
M	◊ Public education via utilities
M	◊ Identify/create television documentary content
M	Improve the Emergency Alert System (EAS)
M	◊ Consider integration with radio notification systems
M	◊ Upgrade alerting and warning systems for hearing impaired
M	◊ Training and maintenance
L	Procure earthquake-warning devices for critical facilities
L	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
M	Require earthquake gas shutoffs on remodels/new construction
L	Evaluate re-enforcing reservoir concrete bases
L	Evaluate EOCs for seismic stability
L	Install earthquake cutoffs at reservoirs
L	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
M	Earthquake retrofitting
M	◊ Bridges/dams/pipelines
M	◊ Government buildings/schools
L	◊ Mobile home parks
L	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
N/A	Insurance coverage on public facilities
M	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location

L	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
H	Mapping of liquefaction zones
H	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals
M	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
M	Fire sprinkler ordinance for all structures
M	Evaluate adequacy of reservoir capacity for sprinkler systems
M	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
L	◊ Links to jurisdictions
L	◊ Alerting information
L	◊ Volunteer information
M	Evaluate depths of aquifers/wells for adequacy during quakes
L	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

M	Communications Interoperability
M	Harden repeater sites
M	Continue existing interoperability project
L	Strengthen/harden
L	Relocate
L	Redundancy
L	Mobile repeaters

FLOODS

H	Update development policies for flood plains
H	Public education on locations of flood plains
H	Develop multi-jurisdictional working group on floodplain management
L	Develop greenbelt requirements in new developments
H	Update weather pattern/flood plain maps
L	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
M	Required water flow/runoff plans for new development
M	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
M	Maintenance of storm sewers/flood channels
M	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction
L	Upgrade dirt embankments to concrete

L	Conduct countywide needs study on drainage capabilities
L	Increase number of pumping stations
L	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
M	◊ Evacuation documentation
M	◊ Re-examine historical flooding data for potential street re-design
M	Training for city/county PIOs about flood issues
M	Warning systems - ensure accurate information provided
L	◊ Publicize flood plain information (website?)
L	◊ Install warning/water level signage
L	◊ Enhanced public information
M	◊ Road closure compliance
M	◊ Shelter locations
M	◊ Pre-event communications
L	Look at County requirements for neighborhood access
L	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
L	Ensure critical facilities are hardened/backed up
L	Hardening water towers
L	Terrorism Surveillance - cameras at reservoirs/dams
M	Riverbed maintenance
L	Evaluate existing lift stations for adequacy
N/A	Acquisition of property for on-site retention
L	Evaluate regulations on roof drainage mechanism
M	Erosion-resistant plants
L	Traffic light protection
L	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
M	Backup generation facilities
L	Identify swift water rescue capabilities across County

WILDFIRES

M	Aggressive weed abatement program
L	◊ Networking of agencies for weed abatement
L	Develop strategic plan for forest management
L	Public education on wildfire defense
M	Encourage citizen surveillance and reporting
L	Identify hydrants with equipment ownership information
M	Enhanced fire fighting equipment
L	Fire spotter program/red flag program

L	◊ Expand to other utilities
L	Research on insect/pest mitigation technologies
N/A	Volunteer home inspection program
L	Public education program
L	◊ Weather reporting/alerting
L	◊ Building protection
L	◊ Respiration
L	Pre-identify shelters/recovery centers/other resources
L	Roofing materials/defensive spacing regulations
L	Community task forces for planning and education
L	Fuel/dead tree removal
M	Strategic pre-placement of fire fighting equipment
L	Establish FEMA coordination processes based on ICS
M	Brush clearings around repeaters
L	Research new technologies for identifying/tracking fires
L	Procure/deploy backup communications equipments
L	"Red Tag" homes in advance of event
L	Provide fire-resistant gel to homeowners
M	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
M	Code enforcement
M	Codes prohibiting fireworks
L	Fuel modification/removal
L	Evaluate building codes
M	Maintaining catch basins

OTHER HAZARDS

L	Improve pipeline maintenance
L	Wetlands mosquito mitigation (West Nile Virus)
L	Insect control study
L	Increase County Vector Control capacities
L	General public drought awareness
L	◊ Lawn watering rotation
L	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
M	Evaluate restrictions on dust/dirt/generating activities during wind seasons
M	Rotational crop planning/soil stabilization
L	Enhance agricultural checkpoint enforcement

L	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
L	Improve/maintain blackout notification plan.
L	Support business continuity planning for utility outages
L	Terrorism training/equipment for first responders
L	◊ Terrorism planning/coordination
L	◊ Staffing for terrorism mitigation
L	Create a SONGS regional planning group
L	◊ Include dirty bomb planning
L	Cooling stations - MOUs in place
M	Fire Ant eradication program
L	White Fly infestation abatement/eradication program
L	Develop plan for supplemental water sources
L	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
L	ID mutual aid agreements
L	Vulnerability assessment on fiber-optic cable
L	Upgrade valves on California aqueduct
L	Public education
L	◊ Bi-lingual signs
L	◊ Blackout information
L	Notification system for rail traffic - container contents
L	Control and release of terrorism intelligence
L	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: San Jacinto Unified School District
Contact: Charles Pilkington
Phone: 951-654-7769

MITIGATION STRATEGY INFORMATION

Proposal Name:

New Emergency Operations Center Building/ Upgrade of Emegency Communications Systems

Proposal Location:

2045 S. San Jacinto Ave., San Jacinto, Ca. 92583

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
X	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

	List any previous disaster related events (dates, costs, etc)
Proposal/Event History	We need to build a new permanent building to replace the seventeen year old trailer now being used for the EOC and to upgrade existing emergency communications systems.

	Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.
Description of Mitigation Goal Narrative:	The purpose of this proposal would be to build a permanent building close to but separate from the District Office to be used as the Emergency Operations Center. Our existing EOC is an older trailer that isn't as natural disaster resistant as a permanent structure would be. Also we have members of R.A.C.E.S. housed in one end of the trailer and would like to get involvement with the Riverside County Sheriffs Department so space is an issue. We need to upgrade our emergency equipment, telephone and radio systems. We want better communication within the District but also the capability to communicate with county and state using the Western Disaster Network. With such a building during a disaster we would be better able to help not only our school district but also the community.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

	Unfunded proposal - funds are not available for the proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: San Jacinto USD	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO __X__**		
Current Population in Jurisdiction or Served	7,400	Projected Population in Jurisdiction or Served - in 2010	10,800
Current Sq Miles in Jurisdiction or Served	100	Projected Sq Miles in Jurisdiction or Served - in 2010	100
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	no	If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years	The impact of new homes on the planned school site development		
Approximate Number of Homes/Apts/etc.	N/A	Projected Number of Homes/Apts/etc.- in 2010	N/A
Approximate Total Residential Value	N/A	Projected Residential Total Value - in 2010	N/A
Approximate Number of Commercial Businesses	N/A	Projected Number of Commercial Businesses - in 2010	N/A
Approximate Percentage of Homes/Apts/etc in flood hazard zones	N/A	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	N/A
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones	N/A	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	N/A
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones	N/A	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	N/A
Approximate Percentage of Commercial Businesses in flood hazard zones	N/A	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	N/A
Approximate Percentage of Commercial Businesses in earthquake hazard zones	N/A	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	N/A
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	N/A	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	N/A
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	16 sites	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	22 sites
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	16 sites	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	22 sites
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	0	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	0
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes? Yes			YES

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **San Jacinto Unified School District**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 15, 2004**

Local Point of Contact: **Charles Pilkington**	**Address:** **2045 S. San Jacinto Ave.** **San Jacinto, Ca. 92583**

Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	**M**	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.	**M**	
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	Part II, San Jacinto Unified School District Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	Part II, San Jacinto Unified School District Section	**N**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	PART II San Jacinto Unified School District Section, Supplemental Questionnaire	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Part II, San Jacinto Unified School District Section	**S**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pages 28 – 40 Flooding Pages 41 – 53 Earthquakes Pages 54 – 66 Weather Pages 67 – 76 Dam failure Pages 85 – 93 Hazmat incidents Pages 94 – 101 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Airline / airport emergencies Pages 102 – 110 Pipeline/Aqueduct incidents Pages 111 – 114 Blackout Pages 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Part II, San Jacinto Unified School District Section	**S**	
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**Yes** Yes, Part II, San Jacinto Unified School District Section	**S**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**S**	

	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & PART II San Jacinto Unified School District Supplemental Questionnaire	**S**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, San Jacinto Unified School District Section	**N**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143	**S**	
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**S**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143	**S**	

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

Riverside County Office of Education, Children, and Family Services

LOCAL JURISDICTION HAZARD INVENTORY

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		Riverside Co. Office of Education Children and Family Services		
Type Agency/Jurisdiction:		County Agency		
Contact Person:	Title:	Program Development Specialist		
First Name:	Larry	Last Name:	Hernandez	
Agency Address:	Street:	4164 Brockton Ave.		
	City:	Riverside		
	State:	CA		
	Zip:	92502-0868		
Contact Phone	951-826-6302		FAX	951-826-4479
E-mail	lhernandez@rcoe.k12.ca.us			

Population Served	10,000
Square Miles Served	7,200

Does your organization have a general plan?	YES
Does your organization have a safety component to the general plan?	YES
What year was your plan last updated?	

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	
Do you have a recovery annex or section in your plan?	NO
Do you have a terrorism/WMD annex or section in your plan?	NO

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
Riverside Co. Educ Child & Family	Fault	lake elsinore	Yes	Yes
Riverside Co. Educ Child & Family	River	santa ana	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participant

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
	Generate new literature for dissemination to:
M	◊ Government employees
H	◊ Businesses
N/A	◊ Hotel/motel literature
L	◊ Local radio stations for education
N/A	◊ Public education via utilities
N/A	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
N/A	◊ Consider integration with radio notification systems
N/A	◊ Upgrade alerting and warning systems for hearing impaired
M	◊ Training and maintenance
N/A	Procure earthquake-warning devices for critical facilities
N/A	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
N/A	Require earthquake gas shutoffs on remodels/new construction
N/A	Evaluate re-enforcing reservoir concrete bases
N/A	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
N/A	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
M	◊ Government buildings/schools
L	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
N/A	Ensure Uniform Building Code compliance
N/A	◊ Update to current compliance when retrofitting
N/A	Insurance coverage on public facilities
H	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
N/A	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals

N/A	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
N/A	Fire sprinkler ordinance for all structures
N/A	Evaluate adequacy of reservoir capacity for sprinkler systems
N/A	Training/standardization for contractors performing retrofitting
N/A	Website with mitigation/contractor/retrofitting information
N/A	◊ Links to jurisdictions
N/A	◊ Alerting information
N/A	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
N/A	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
H	Harden repeater sites
N/A	Continue existing interoperability project
	Strengthen/harden
H	Relocate
H	Redundancy
N/A	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
L	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
N/A	Develop greenbelt requirements in new developments
L	Update weather pattern/flood plain maps
M	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
H	Required water flow/runoff plans for new development
N/A	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
N/A	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
M	Increase sandbag distribution capacities
N/A	Develop pre-planned response plan for floods
H	◊ Evacuation documentation
H	◊ Re-examine historical flooding data for potential street re-design
N/A	Training for city/county PIOs about flood issues
N/A	Warning systems - ensure accurate information provided
N/A	◊ Publicize flood plain information (website?)

N/A	◊ Install warning/water level signage
N/A	◊ Enhanced public information
N/A	◊ Road closure compliance
H	◊ Shelter locations
H	◊ Pre-event communications
N/A	Look at County requirements for neighborhood access
H	◊ Secondary means of ingress/egress
M	Vegetation restoration programs
M	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
N/A	Acquisition of property for on-site retention
N/A	Evaluate regulations on roof drainage mechanisms
N/A	Erosion-resistant plants
M	Traffic light protection
	Upkeep of diversionary devices
	Install more turn-off valves on pipelines
H	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

N/A	Aggressive weed abatement program
	◊ Networking of agencies for weed abatement
	Develop strategic plan for forest management
M	Public education on wildfire defense
H	Encourage citizen surveillance and reporting
N/A	Identify hydrants with equipment ownership information
N/A	Enhanced fire fighting equipment
N/A	Fire spotter program/red flag program
N/A	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies
H	Volunteer home inspection program
H	Public education program
N/A	◊ Weather reporting/alerting
N/A	◊ Building protection
N/A	◊ Respiration
H	Pre-identify shelters/recovery centers/other resources
N/A	Roofing materials/defensive spacing regulations
N/A	Community task forces for planning and education
N/A	Fuel/dead tree removal
N/A	Strategic pre-placement of fire fighting equipment
N/A	Establish FEMA coordination processes based on ICS
N/A	Brush clearings around repeaters

N/A	Research new technologies for identifying/tracking fires
N/A	Procure/deploy backup communications equipments
N/A	"Red Tag" homes in advance of event
N/A	Provide fire-resistant gel to homeowners
N/A	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
N/A	Code enforcement
L	Codes prohibiting fireworks
N/A	Fuel modification/removal
N/A	Evaluate building codes
N/A	Maintaining catch basins

OTHER HAZARDS

N/A	Improve pipeline maintenance
	Wetlands mosquito mitigation (West Nile Virus)
	Insect control study
	Increase County Vector Control capacities
	General public drought awareness
	◊ Lawn watering rotation
	Develop County drought plan
	Mitigation of landslide-prone areas
	Develop winter storm sheltering plan
	Ease permitting process for building transmission lines
	Evaluate restrictions on dust/dirt/generating activities during wind seasons
	Rotational crop planning/soil stabilization
	Enhance agricultural checkpoint enforcement
	Agriculture - funding of detection programs
	Communications of pipeline maps (based on need to know)
	Improved notification plan on runaway trains
M	Improve/maintain blackout notification plan.
M	Support business continuity planning for utility outages
N/A	Terrorism training/equipment for first responders
N/A	◊ Terrorism planning/coordination
N/A	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
N/A	◊ Include dirty bomb planning
N/A	Cooling stations - MOUs in place
L	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
N/A	Develop plan for supplemental water sources
N/A	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
N/A	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable

N/A	Upgrade valves on California aqueduct
N/A	Public education
N/A	◊ Bi-lingual signs
M	◊ Blackout information
N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: Riverside County Office of Education-Children and Family Services
Contact: Larry Hernandez
Phone: (951) 826-6673

MITIGATION STRATEGY INFORMATION

Proposal Name:

Earthquake Mitigation for Centerbased and State Preschool Programs

Proposal Location:

Riverside County

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History: List any previous disaster related events (dates, costs, etc)

Description of Mitigation Goal Narrative: Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

According to State licensing there is no enforcement for mitigation of pre-Kindegarden programs that fall under Title 22 regulations. Therefore it is our goal to retrofit any classroom with with the appropiate materials needed to reduce injury that may be caused by en earthquake event. At current the Children and Family Services Emergency Preparedness Program provides training for teachers and staff . Also there is a puppet show to train preK children in duck , cover and hold. Program is in its fifth year.It is our understanding that there is no other type of program similar in nature to ours throughout the state of California.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	X	No		Responsible Agency: Riverside County Office of Education-CFS

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

	Unfunded proposal - funds are not available for the proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds
y	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Riverside County Office of Education Children and Family Services	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO x**		
Current Population in Jurisdiction or Served	208,000	Projected Population in Jurisdiction or Served - in 2010	308,000
Current Sq Miles in Jurisdiction or Served	200,000	Projected Sq Miles in Jurisdiction or Served - in 2010	201,000
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	yes	If yes, please list ordinance or regulation number. Calif. Ed Code Title 22	
What is the number one land issue your agency will face in the next five years	costs		
Approximate Number of Homes/Apts/etc.	200,000	Projected Number of Homes/Apts/etc.- in 2010	300,000
Approximate Total Residential Value	2 billion	Projected Residential Total Value - in 2010	4 billion
Approximate Number of Commercial Businesses	100,000	Projected Number of Commercial Businesses - in 2010	200,000
Approximate Percentage of Homes/Apts/etc in flood hazard zones	25%	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	30%
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones	100%	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	100%
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones	20%	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	30%
Approximate Percentage of Commercial Businesses in flood hazard zones	10%	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	20%
Approximate Percentage of Commercial Businesses in earthquake hazard zones	100%	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	100%
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	5%	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	10%
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	25%	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	35%
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	100%	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	100%
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	5%	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	10%
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes? yes			

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Riverside County Office of Education-Children and Family Services**	**Title/Lead Jurisdiction Of Multi-Jurisdictional Plan:** **Riverside County Operational Area**	**Date Of Completion:** **9/24/04**
Local Point Of Contact: **Larry Hernandez**	**Address:** **3939 Thirteenth Street** **Riverside, CA 92502**	
Title: **Program Development Specialist-Emergency Services**		
Agency: **Riverside County Office of Education-Children and Family Services**		
Phone Number: **(951) 826-6302**	**E-Mail:** **lhernandez@rcoe.k12.ca.us**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part 1, Page 6**	[M] [NM]	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.		
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	Yes - Part II Riverside Co. Office of Education Children's Services Unit Section - Supplemental Questionnaire	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pgs 28 – 40 Flooding Pgs 41 – 53 Earthquakes Pgs 54 – 66 Dam failure Pgs 85 – 93 Transportation Incidents Pages 102 – 110 Rail line emergencies Pages 102 – 110 Hazmat incidents Pgs 94 – 101 Pipeline/Aqueduct incidents Pgs 111 – 114 Blackout Pgs 115 – 118 Toxic pollution Pages 119 – 124 Nuclear incidents Pages 125 – 128 Terrorism Pages 135 – 139 Weather Pages 67 – 76 Part II Riverside Co. A HAZARDOUS WASTE FACILITY	No
NEAR A HAZARDOUS WASTE FACILITY	No
A HAZARDOUS STORAGE FACILITY	No
NEAR A HAZARDOUS STORAGE FACILITY	Yes
NON REINFORCED BUILDINGS	Yes
A MAJOR GAS/OIL PIPELINE	No
NEAR A MAJOR GAS/OIL PIPELINE	No

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	Yes
COULD BE CONSIDERED A BIO-HAZARD RISK	No

Specific Hazards Summary				
Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
Idyllwild Fire Protection Dist.	Wildland Fire	Various Vegetation	Yes	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION VULNERABILITY WORKSHEET

NAME: Michael Norris AGENCY: Idyllwild Fire Protection District DATE: August 31, 2004

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

M	Aggressive public education campaign in light of predictions
	Generate new literature for dissemination to:
L	◊ Government employees
M	◊ Businesses
M	◊ Hotel/motel literature
M	◊ Local radio stations for education
M	◊ Public education via utilities
N/A	◊ Identify/create television documentary content
	Improve the Emergency Alert System (EAS)
N/A	◊ Consider integration with radio notification systems
N/A	◊ Upgrade alerting and warning systems for hearing impaired
N/A	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
H	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
H	Require earthquake gas shutoffs on remodels/new construction
L	Evaluate re-enforcing reservoir concrete bases
H	Evaluate EOCs for seismic stability
N/A	Install earthquake cutoffs at reservoirs
H	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
	Earthquake retrofitting
N/A	◊ Bridges/dams/pipelines
H	◊ Government buildings/schools
H	◊ Mobile home parks
M	Develop educational materials on structural reinforcement and home inspections
H	Ensure Uniform Building Code compliance
H	◊ Update to current compliance when retrofitting
H	Insurance coverage on public facilities
M	Funding for non-structural abatement (Earthquake kits, etc.)
M	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
M	Mapping of liquefaction zones
M	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals

N/A	Evaluate pipeline seismic resiliency
L	Pre-positioning of temporary response structures
H	Fire sprinkler ordinance for all structures
N/A	Evaluate adequacy of reservoir capacity for sprinkler systems
L	Training/standardization for contractors performing retrofitting
	Website with mitigation/contractor/retrofitting information
L	◊ Links to jurisdictions
L	◊ Alerting information
L	◊ Volunteer information
L	Evaluate depths of aquifers/wells for adequacy during quakes
M	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
H	Harden repeater sites
H	Continue existing interoperability project
H	Strengthen/harden
H	Relocate
H	Redundancy
H	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
N/A	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
H	Develop greenbelt requirements in new developments
N/A	Update weather pattern/flood plain maps
M	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
M	Required water flow/runoff plans for new development
L	Perform GIS mapping of flood channels, etc.
L	Install vehicular crossing gates/physical barriers for road closure
L	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
H	Require digital floor plans on new non-residential construction
M	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
M	Increase sandbag distribution capacities
M	Develop pre-planned response plan for floods
H	◊ Evacuation documentation
H	◊ Re-examine historical flooding data for potential street re-design
H	Training for city/county PIOs about flood issues
H	Warning systems - ensure accurate information provided
M	◊ Publicize flood plain information (website?)
H	◊ Install warning/water level signage
H	◊ Enhanced public information
H	◊ Road closure compliance
H	◊ Shelter locations
H	◊ Pre-event communications
	Look at County requirements for neighborhood access
H	◊ Secondary means of ingress/egress
L	Vegetation restoration programs
H	Ensure critical facilities are hardened/backed up
H	Hardening water towers
H	Terrorism Surveillance - cameras at reservoirs/dams
M	Riverbed maintenance
L	Evaluate existing lift stations for adequacy
L	Acquisition of property for on-site retention
M	Evaluate regulations on roof drainage mechanisms
L	Erosion-resistant plants
L	Traffic light protection
L	Upkeep of diversionary devices
L	Install more turn-off valves on pipelines
M	Backup generation facilities
H	Identify swift water rescue capabilities across County

WILDFIRES

H	Aggressive weed abatement program
H	◊ Networking of agencies for weed abatement
H	Develop strategic plan for forest management
H	Public education on wildfire defense
H	Encourage citizen surveillance and reporting
H	Identify hydrants with equipment ownership information
H	Enhanced fire fighting equipment
H	Fire spotter program/red flag program
H	◊ Expand to other utilities
H	Research on insect/pest mitigation technologies
H	Volunteer home inspection program
H	Public education program
H	◊ Weather reporting/alerting
H	◊ Building protection
H	◊ Respiration
H	Pre-identify shelters/recovery centers/other resources
H	Roofing materials/defensive spacing regulations
H	Community task forces for planning and education
H	Fuel/dead tree removal
H	Strategic pre-placement of fire fighting equipment
H	Establish FEMA coordination processes based on ICS
H	Brush clearings around repeaters
H	Research new technologies for identifying/tracking fires
H	Procure/deploy backup communications equipments
H	"Red Tag" homes in advance of event
H	Provide fire-resistant gel to homeowners
H	Involve insurance agencies in mitigation programs
H	Clear out abandoned vehicles from oases
H	Code enforcement
H	Codes prohibiting fireworks
H	Fuel modification/removal
H	Evaluate building codes
H	Maintaining catch basins

OTHER HAZARDS

M	Improve pipeline maintenance
L	Wetlands mosquito mitigation (West Nile Virus)
L	Insect control study
L	Increase County Vector Control capacities
L	General public drought awareness
L	◊ Lawn watering rotation
L	Develop County drought plan
L	Mitigation of landslide-prone areas
L	Develop winter storm sheltering plan
L	Ease permitting process for building transmission lines
L	Evaluate restrictions on dust/dirt/generating activities during wind seasons
L	Rotational crop planning/soil stabilization
L	Enhance agricultural checkpoint enforcement
L	Agriculture - funding of detection programs
L	Communications of pipeline maps (based on need to know)
L	Improved notification plan on runaway trains
L	Improve/maintain blackout notification plan.
L	Support business continuity planning for utility outages
H	Terrorism training/equipment for first responders
H	◊ Terrorism planning/coordination
H	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
M	◊ Include dirty bomb planning
N/A	Cooling stations - MOUs in place
N/A	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
H	Develop plan for supplemental water sources
L	Public education on low water landscaping
L	Salton Sea desalinization
L	Establish agriculture security standards (focus on water supply)
H	ID mutual aid agreements
H	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
L	Public education
L	◊ Bi-lingual signs
L	◊ Blackout information
L	Notification system for rail traffic - container contents
H	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: Idyllwild Fire Protection District
Contact: Mike Norris
Phone: 951-659-2153

MITIGATION STRATEGY INFORMATION

Proposal Name:

Seismic Retrofit of Fire Station

Proposal Location:

Idyllwild Fire Protection District Fire Station

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
X	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History	The IFPD's has only one fire station in the district. This station provides primary fire and medical response to this mountain community. The station was build in the early 1980's and has not been reviewed for seismic stability since construction. The Fire Station is located between two major faults in Riverside County. Should a earthquake of 6.5 or higher occur on either fault, the effect on the community of Idyllwild could be disastrous. With this being the only fire station in this mountainous area, an earthquake causing damage the station to a point that fire personnel or equipment are not able to respond, would greatly endanger all of the residents in this community.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the Proposal, any history related to the Proposal. List the activities necessary for its completion in the narrative section below.

The fire station would be evaluated to determine the amount of seismic retrofitting needed to bring the building up to current earthquake safety building codes. This study would include the general seismic structural stability of the building for a 6.5 earthquake. The study would also determine the stability of the equipment bay doors to determine if they would remain operational in a 6.5 earthquake. Upon completion of the study, funding sources would be identified for the seismic retrofitting.

Does your jurisdiction have primary responsibility for the Proposal? If not, what agency does?

Yes	X	No		

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this Proposal

	Unfunded Proposal - funds are not available for the Proposal at this time
X	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Yes	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Idyllwild Fire Protection District		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES ____ NO _X_**	
Current Population in Jurisdiction or Served	3,000	Projected Population in Jurisdiction or Served - in 2010	4,500
Current Sq Miles in Jurisdiction or Served	5 Sq miles	Projected Sq Miles in Jurisdiction or Served - in 2010	4 Sq miles
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	No	If yes, please list ordinance or regulation number. Covered under the County of Riverside Ordinances	
What is the number one land issue your agency will face in the next five years		Expansion of residential and commercial locations within the fire interface zone	
Approximate Number of Homes/Apts/etc.	1500	Projected Number of Homes/Apts/etc.- in 2010	1800
Approximate Total Residential Value	$3.75 million	Projected Residential Total Value - in 2010	$ 5 million
Approximate Number of Commercial Businesses	100	Projected Number of Commercial Businesses - in 2010	135
Approximate Percentage of Homes/Apts/etc in flood hazard zones	0	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	0
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones	100%	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	100%
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones	100%	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	100%
Approximate Percentage of Commercial Businesses in flood hazard zones	0	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	0
Approximate Percentage of Commercial Businesses in earthquake hazard zones	100%	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	100%
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	100%	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	100%
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	0	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	0
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	4	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	4
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	4	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	4
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Idyllwild Fire Protection District**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County**	**Date of Completion:** **9/14/04**
Local Point of Contact:	**Address:** Idyllwild Fire Protection District 54160 Maranatha Dr. PO Box 656 Idyllwild, CA 92549-0656	
Title: **Mike Norris, Fire Chief**		
Agency: **Idyllwild Fire Protection District**		
Phone Number: **(951) 659-2153**	**E-Mail: mikenorris@idyllwildfire.org**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	Part I pages 3-7	[M] [NM]	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.		
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	planning process and to develop a local hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	Yes Part II Idyllwild Fire Protection District Section Supplemental Questionnaire	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	Yes Part II Idyllwild Fire Protection District Section	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pgs 28 – 40 Earthquakes Pgs 54 – 66 Extreme Weather Pgs 67 – 76 Landslides Pgs 77 – 80 Insect Infestation Pgs 81 – 84 Hazmat incidents Pgs 94 – 101 Highway emergencies Pgs 102 – 110 Blackout Pgs 115 – 118 Terrorism Pgs 135 – 139 Part II Idyllwild Fire Protection District Section		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**[Yes]** If yes, where in MJP: Part II Idyllwild Fire Protection District Section	**[N] [S]**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part II Idyllwild Fire Protection District Section	**[N] [S]**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part II Idyllwild Fire Protection District Section	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part II Idyllwild Fire Protection District Section Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part II Idyllwild Fire Protection District Section Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Part II Idyllwild Fire Protection District Section Hazard Mitigation Strategy Proposal	**[N] [S]**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I pages 38-101		
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part II Idyllwild Fire Protection District Section Supplemental Questionnaire	**[N] [S]**	

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.			

JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

Elsinore Valley Municipal Water District

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		Elsinore Valley Municipal Water District		
Type Agency/Jurisdiction:		Other Agency		
Contact Person:	Title:	Director of Human Resources		
First Name:	David	Last Name:	Bell	
Agency Address:	Street:	31315 Chaney		
	City:	Lake Elsinore		
	State:	CA		
	Zip:	92531		
Contact Phone	951-674-3146		FAX	951-674-8376
E-mail	dbell@evmwd.net			

Population Served	100,000
	96

Does your organization have a general plan?	Yes
Does your organization have a safety component to the general plan?	Yes
What year was your plan last updated?	2003

Does your organization have a disaster/emergency operations plan?	Yes
What year was your plan last updated?	2004
Do you have a recovery annex or section in your plan?	Yes
Do you have a terrorism/WMD annex or section in your plan?	Yes

HAZARD IDENTIFICATION QUESTINNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	**No**
AIRPORT NEXT TO JURISDICTION	**No**
DAIRY INDUSTRY	**No**
POULTRY INDUSTRY	**No**
CROPS/ORCHARDS	**Yes**
DAMS IN JURISDICTION	**Yes**
DAMS NEXT TO JURISDICTION	**Yes**
LAKE/RESERVOIR IN JURISDICTION	**Yes**
LAKE/RESERVOIR NEAR JURISDICTION	**Yes**
JURISDICTION IN FLOOD PLAIN	**Yes**
CONTROLLED FLOOD CONTROL CHANNEL	**Yes**
UNCONTROLLED FLOOD CONTROL CHANNEL	**Yes**
EARTHQUAKE FAULTS IN JURISDICTION	**Yes**
EARTHQUAKE FAULTS NEXT TO JURISDICTION	**Yes**
MOBILE HOME PARKS	**Yes**
NON-REINFORCED FREEWAY BRIDGES	**No**
NON-REINFORCED BRIDGES	**No**
BRIDGES IN FLOOD PLAIN	**Yes**
BRIDGES OVER OR ACROSS RIVER/STREAM	**Yes**
ROADWAY CROSSING RIVER/STREAM	**Yes**
NON REINFORCED BUILDINGS	**No**
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	**Yes**
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	**Yes**
FOREST AREA IN JURISDICTION	**Yes**
FOREST AREA NEXT TO JURISDICTION	**Yes**
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	**Yes**
MAJOR GAS/OIL PIPELINES IN JURISDICTION	**Yes**
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	**Yes**
RAILROAD TRACKS IN JURISDICTION	**Yes**
RAILROAD TRACKS NEXT TO JURISDICTION	**Yes**
HAZARDOUS WASTE FACILITIES IN JURISDICTION	**Yes**
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	**Yes**
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	**Yes**
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	**Yes**

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

	YES
IN A FLOOD PLAIN	Yes
NEAR FLOOD PLAIN	Yes
NEAR RAILROAD TRACKS	Yes
NEAR A DAM	Yes
UPSTREAM FROM A DAM	Yes
DOWNSTREAM FROM A DAM	Yes
DOWNSTREAM OF A LAKE	Yes
DOWNSTREAM FROM A RESERVOIR	Yes
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	Yes
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	Yes
ON AN EARTHQUAKE FAULT	Yes
NEAR AN EARTHQUAKE FAULT	Yes
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	Yes
IN A FOREST AREA	Yes
NEAR A FOREST AREA	Yes
NEAR A MAJOR HIGHWAY	Yes
A HAZARDOUS WASTE FACILITY	Yes
NEAR A HAZARDOUS WASTE FACILITY	Yes
A HAZARDOUS STORAGE FACILITY	Yes
NEAR A HAZARDOUS STORAGE FACILITY	Yes
NON REINFORCED BUILDINGS	No
A MAJOR GAS/OIL PIPELINE	No
NEAR A MAJOR GAS/OIL PIPELINE	Yes

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	No
HAVE BEEN DAMAGED BY FLOOD	No
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	No
HAVE BEEN DAMAGED BY FOREST FIRE	No
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	No
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	No
HAVE BEEN IMPACTED BY A PIPELINE EVENT	No

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	Yes
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	No
NEAR FLOOD PLAIN	Yes
NEAR RAILROAD TRACKS	No
NEAR A DAM	No
UPSTREAM FROM A DAM	No
DOWNSTREAM FROM A DAM	No
DOWNSTREAM OF A LAKE	No
DOWNSTREAM FROM A RESERVOIR	No
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	No
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	Yes
ON AN EARTHQUAKE FAULT	Yes
NEAR AN EARTHQUAKE FAULT	Yes
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	Yes
IN A FOREST AREA	No
NEAR A FOREST AREA	Yes
NEAR A MAJOR HIGHWAY	Yes
A HAZARDOUS WASTE FACILITY	Yes
NEAR A HAZARDOUS WASTE FACILITY	Yes
A HAZARDOUS STORAGE FACILITY	No
NEAR A HAZARDOUS STORAGE FACILITY	No
NON REINFORCED BUILDINGS	No
A MAJOR GAS/OIL PIPELINE	No
NEAR A MAJOR GAS/OIL PIPELINE	No

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	Yes
COULD BE CONSIDERED A BIO-HAZARD RISK	Yes

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
Elsinore Valley MWD	Dam	Canyon Lake Dam	No	No
Elsinore Valley MWD	Dam	Diamond Valley Lake Dam	No	No
Elsinore Valley MWD	Dam	Lake Hemet Dam	No	No
Elsinore Valley MWD	Dam	Lake Perris Dam	No	No
Elsinore Valley MWD	Fault	Elsinore Fault	Yes	No
Elsinore Valley MWD	Flood Channel	Lake Elsinore Outflow Channel	Yes	No
Elsinore Valley MWD	Lake	Canyon Lake	No	Yes
Elsinore Valley MWD	Lake	Lake Elsinore	Yes	No
Elsinore Valley MWD	River	San Jacinto River	Yes	No

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION VULNERABILITY WORKSHEET

NAME: David Bell AGENCY: Elsinore Valley Municipal Water District DATE: 6/30/04

	COUNTY		LOCAL JURISDICTION		
HAZARD	**SEVERITY 0 - 4**	**PROBABILITY 0 - 4**	**SEVERITY 0 - 4**	**PROBABILITY 0 - 4**	**RANKING 1 - 19**

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
	Generate new literature for dissemination to:
N/A	◊ Government employees
N/A	◊ Businesses
N/A	◊ Hotel/motel literature
N/A	◊ Local radio stations for education
N/A	◊ Public education via utilities
N/A	◊ Identify/create television documentary content
	Improve the Emergency Alert System (EAS)
N/A	◊ Consider integration with radio notification systems
N/A	◊ Upgrade alerting and warning systems for hearing impaired
N/A	◊ Training and maintenance
N/A	Procure earthquake-warning devices for critical facilities
L	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
N/A	Require earthquake gas shutoffs on remodels/new construction
H	Evaluate re-enforcing reservoir concrete bases
H	Evaluate EOCs for seismic stability
H	Install earthquake cutoffs at reservoirs
H	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
	Earthquake retrofitting
L	◊ Bridges/dams/pipelines
N/A	◊ Government buildings/schools
N/A	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
N/A	Ensure Uniform Building Code compliance
	◊ Update to current compliance when retrofitting
N/A	Insurance coverage on public facilities
N/A	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
N/A	Mapping of liquefaction zones
N/A	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals

M	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
N/A	Fire sprinkler ordinance for all structures
M	Evaluate adequacy of reservoir capacity for sprinkler systems
N/A	Training/standardization for contractors performing retrofitting
	Website with mitigation/contractor/retrofitting information
N/A	◊ Links to jurisdictions
N/A	◊ Alerting information
N/A	◊ Volunteer information
H	Evaluate depths of aquifers/wells for adequacy during quakes
H	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
N/A	Harden repeater sites
H	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
N/A	Redundancy
N/A	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
N/A	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
N/A	Develop greenbelt requirements in new developments
N/A	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
N/A	Required water flow/runoff plans for new development
N/A	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
N/A	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
N/A	Increase sandbag distribution capacities
N/A	Develop pre-planned response plan for floods
N/A	◊ Evacuation documentation
N/A	◊ Re-examine historical flooding data for potential street re-design
N/A	Training for city/county PIOs about flood issues
N/A	Warning systems - ensure accurate information provided
N/A	◊ Publicize flood plain information (website?)

N/A	◊ Install warning/water level signage
N/A	◊ Enhanced public information
N/A	◊ Road closure compliance
N/A	◊ Shelter locations
N/A	◊ Pre-event communications
N/A	Look at County requirements for neighborhood access
N/A	◊ Secondary means of ingress/egress
N/A	Vegetation restoration programs
N/A	Ensure critical facilities are hardened/backed up
N/A	Hardening water towers
N/A	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
N/A	Acquisition of property for on-site retention
N/A	Evaluate regulations on roof drainage mechanisms
N/A	Erosion-resistant plants
N/A	Traffic light protection
N/A	Upkeep of diversionary devices
N/A	Install more turn-off valves on pipelines
N/A	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES

N/A	Aggressive weed abatement program
N/A	◊ Networking of agencies for weed abatement
N/A	Develop strategic plan for forest management
N/A	Public education on wildfire defense
N/A	Encourage citizen surveillance and reporting
N/A	Identify hydrants with equipment ownership information
N/A	Enhanced fire fighting equipment
N/A	Fire spotter program/red flag program
N/A	◊ Expand to other utilities
N/A	Research on insect/pest mitigation technologies
N/A	Volunteer home inspection program
N/A	Public education program
N/A	◊ Weather reporting/alerting
N/A	◊ Building protection
N/A	◊ Respiration
N/A	Pre-identify shelters/recovery centers/other resources
N/A	Roofing materials/defensive spacing regulations
N/A	Community task forces for planning and education
N/A	Fuel/dead tree removal
N/A	Strategic pre-placement of fire fighting equipment
N/A	Establish FEMA coordination processes based on ICS
N/A	Brush clearings around repeaters

N/A	Research new technologies for identifying/tracking fires
N/A	Procure/deploy backup communications equipments
N/A	"Red Tag" homes in advance of event
N/A	Provide fire-resistant gel to homeowners
N/A	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
N/A	Code enforcement
N/A	Codes prohibiting fireworks
N/A	Fuel modification/removal
N/A	Evaluate building codes
N/A	Maintaining catch basins

OTHER HAZARDS

M	Improve pipeline maintenance
N/A	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
	General public drought awareness
H	◊ Lawn watering rotation
N/A	Develop County drought plan
N/A	Mitigation of landslide-prone areas
N/A	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
N/A	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
L	Agriculture - funding of detection programs
	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
N/A	Improve/maintain blackout notification plan.
N/A	Support business continuity planning for utility outages
	Terrorism training/equipment for first responders
M	◊ Terrorism planning/coordination
M	◊ Staffing for terrorism mitigation
	Create a SONGS regional planning group
M	◊ Include dirty bomb planning
N/A	Cooling stations - MOUs in place
N/A	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
H	Develop plan for supplemental water sources
H	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
N/A	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable

N/A	Upgrade valves on California aqueduct
N/A	Public education
N/A	◊ Bi-lingual signs
N/A	◊ Blackout information
N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: Elsinore Valley Municipal Water District
Contact: David Bell
Phone: 951-294-1382

MITIGATION STRATEGY INFORMATION

Proposal Name:

Loss of single point-of failure

Proposal Location:

Booster stations, reservoir or distribution system pipeline within the District's service area.

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
X	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

List any previous disaster related events (dates, costs, etc)

Proposal/Event History

This event would typically occur when a booster station or reservoir serving one of the ridge zones is lost, and there is no regularly connected alternative facility serving the same zone. This has not occurred within the district; however, given the fact that we are located in a high earthquake zone, we need to address this situation.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

For the district facilities, update the SCADA system to ensure that all failures due to an earthquake will be detected.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	Y	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

X	Unfunded proposal - funds are not available for the proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

Y	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: Elsinore Valley Municipal Water District		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO __XX__**	
Current Population in Jurisdiction or Served	100, 000	Projected Population in Jurisdiction or Served - in 2010	140,000
Current Sq Miles in Jurisdiction or Served	96	Projected Sq Miles in Jurisdiction or Served - in 2010	96
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	No	If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years	N/A		
Approximate Number of Homes/Apts/etc.	None	Projected Number of Homes/Apts/etc.- in 2010	None
Approximate Total Residential Value	N/A	Projected Residential Total Value - in 2010	N/A
Approximate Number of Commercial Businesses	None	Projected Number of Commercial Businesses - in 2010	None
Approximate Percentage of Homes/Apts/etc in flood hazard zones	N/A	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	N/A
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones	N/A	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	N/A
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones	N/A	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	N/A
Approximate Percentage of Commercial Businesses in flood hazard zones	N/A	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	N/A
Approximate Percentage of Commercial Businesses in earthquake hazard zones	N/A	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	N/A
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	N/A	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	N/A
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	20	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	20
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	7	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	7
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	13	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	13
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	Yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			Yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Elsinore Valley Municipal Water District**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan:** **Riverside County OES**	**Date of Completion:** **September 10, 2004**
Local Point of Contact: **David Bell**	**Address:** **31315 Chaney Street** **Lake Elsinore, CA 92531**

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part I, Section 2 Page 6**	[M] [NM]	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.		
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	Part II - EVMWD	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	Part II - EVMWD Supplemental Questionnaire - No ordinances	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part ! Wildfire Pgs 28 – 40 Flooding Pgs 41 – 53 Earthquakes Pgs 54 – 66 Extreme Weather Pgs 67 – 76 Dam failure Pgs 85 – 93 Hazmat incidents Pgs 94 – 101 Highway emergencies Pgs 102 – 110 Rail line emergencies Pgs 102 – 110 Airline / airport emergencies Pgs 102 – 110 Pipeline/Aqueduct incidents Pgs 111 – 114 Blackout Pgs 115 – 118 Toxic pollution Pgs 119 – 124 Nuclear incidents Pgs 125 – 128 Terrorism Pgs 135 – 139		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**[No]/[Yes]** If yes, where in MJP: Yes, Part II, EVMWD Section	**[N] [S]**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**[N] [S]**	

	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & EVMWD Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, EVMWD Section	**[N] [S]**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143		
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**[N] [S]**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143		

JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

Home Gardens County Water District

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

	Railroad Track	BNSF	Yes	No
	Reservoir	Lake Mathews	No	Yes
	River	Santa Ana River	No	Yes

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

N/A	Aggressive public education campaign in light of predictions
N/A	Generate new literature for dissemination to:
	◊ Government employees
	◊ Businesses
	◊ Hotel/motel literature
	◊ Local radio stations for education
	◊ Public education via utilities
	◊ Identify/create television documentary content
M	Improve the Emergency Alert System (EAS)
	◊ Consider integration with radio notification systems
	◊ Upgrade alerting and warning systems for hearing impaired
	◊ Training and maintenance
M	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
N/A	Require earthquake gas shutoffs on remodels/new construction
L	Evaluate re-enforcing reservoir concrete bases
H	Evaluate EOCs for seismic stability
M	Install earthquake cutoffs at reservoirs
M	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
N/A	Earthquake retrofitting
	◊ Bridges/dams/pipelines
	◊ Government buildings/schools
	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections
N/A	Ensure Uniform Building Code compliance
	◊ Update to current compliance when retrofitting
H	Insurance coverage on public facilities
M	Funding for non-structural abatement (Earthquake kits, etc.)
N/A	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
M	Mapping of liquefaction zones
M	Incorporate County geologist data into planning
H	Backup water supplies for hospitals

M	Evaluate pipeline seismic resiliency
N/A	Pre-positioning of temporary response structures
N/A	Fire sprinkler ordinance for all structures
M	Evaluate adequacy of reservoir capacity for sprinkler systems
H	Training/standardization for contractors performing retrofitting
L	Website with mitigation/contractor/retrofitting information
	◊ Links to jurisdictions
	◊ Alerting information
	◊ Volunteer information
N/A	Evaluate depths of aquifers/wells for adequacy during quakes
N/A	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

L	Communications Interoperability
N/A	Harden repeater sites
N/A	Continue existing interoperability project
N/A	Strengthen/harden
N/A	Relocate
N/A	Redundancy
N/A	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
N/A	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
N/A	Develop greenbelt requirements in new developments
N/A	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
N/A	Required water flow/runoff plans for new development
N/A	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
N/A	Maintenance of storm sewers/flood channels
N/A	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction
N/A	Upgrade dirt embankments to concrete
N/A	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
N/A	Increase sandbag distribution capacities
N/A	Develop pre-planned response plan for floods
	◊ Evacuation documentation
	◊ Re-examine historical flooding data for potential street re-design
N/A	Training for city/county PIOs about flood issues
N/A	Warning systems - ensure accurate information provided

	◊ Publicize flood plain information (website?)
	◊ Install warning/water level signage
	◊ Enhanced public information
	◊ Road closure compliance
	◊ Shelter locations
	◊ Pre-event communications
N/A	Look at County requirements for neighborhood access
	◊ Secondary means of ingress/egress

N/A	Involve insurance agencies in mitigation programs
N/A	Clear out abandoned vehicles from oases
N/A	Code enforcement
N/A	Codes prohibiting fireworks
N/A	Fuel modification/removal
N/A	Evaluate building codes
N/A	Maintaining catch basins

OTHER HAZARDS

M	Improve pipeline maintenance
N/A	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
M	General public drought awareness
	◊ Lawn watering rotation
M	Develop County drought plan
N/A	Mitigation of landslide-prone areas
N/A	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
N/A	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization
N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
M	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
N/A	Improve/maintain blackout notification plan.
N/A	Support business continuity planning for utility outages
L	Terrorism training/equipment for first responders
	◊ Terrorism planning/coordination
	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
	◊ Include dirty bomb planning
N/A	Cooling stations - MOUs in place
N/A	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
M	Develop plan for supplemental water sources
M	Public education on low water landscaping
N/A	Salton Sea desalinization

N/A	Establish agriculture security standards (focus on water supply)
L	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable
N/A	Upgrade valves on California aqueduct
N/A	Public education
	◊ Bi-lingual signs
	◊ Blackout information
N/A	Notification system for rail traffic - container contents
M	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction: Home Gardens County Water District
Contact: Karl Schalow
Phone: (951) 737-4741

MITIGATION STRATEGY INFORMATION

Proposal Name:

TANK TELEMERTRY AND VALVE MODIFICATION

Proposal Location:

TANK SITE

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
X	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
X	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History

List any previous disaster related events (dates, costs, etc)

Our water tank is primary water storage for the district. In the past two years, there have been three incidents of pipeline failure in supply lines being feed by this tank.. Although the failures were caused by human error, in each incident the water level of the tank was reduced by 25%. In two incidents and by 50% in one, the damage to these smaller pipelines was less than the potential damage the 16" pipeline from the tank to the system could cause in an earthquake. This tank is the districts primary backup to support firefighting efforts.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the proposal, any history related to the proposal. List the activities necessary for its completion in the narrative section below.

The proposed mitigation strategy is to upgrade the existing telemetry system at the tank site. The upgrade of the system would include an alerting system and an automatic shut-off value. The alerting system would notify the district of a immediate and high volume loss of water from the tank. In addition, the sensor would automatically close the release value controlling the release of water from the tank. By automatically closing the release valve, there would be a lower flood threat level to the homes in the area of the break and the loss of water would be limited.The cost of the system upgraded greatly out ways the potential loss of property should the pipe be damaged in an earthquake.

Does your jurisdiction have primary responsibility for the proposal? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this proposal

X	Unfunded proposal - funds are not available for the proposal at this time
	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL HAZARD MITIGATION ANALYSIS PROJECT
OPTIONAL COST-BENEFIT ANALYSIS WORKSHEET

Jurisdiction:	Home Gardens County Water District
Contact:	Karl Schalow
Phone:	(951) 737-4741
Proposal Name:	TANK TELEMETRY AND VALVE MODIFICATION
Proposal Location:	TANK SITE

Estimated Proposal Costs
List the projected total cost of the mitigation proposal. Although these are estimated costs, some care should be taken to ensure the values are as accurate and comprehensive as possible.

Benefit/Loss Costs *- The projected cost of the event should it happen.*
These costs are determined by projecting the potential damage and losses as a result of the event and include:

3. Direct Losses - Losses linked directly to a hazard event including response costs and all damages.

4. Indirect Losses - All losses other than direct losses and can include potential economic losses due to the closure of a damaged facilities, as well as non financial losses such as loss of historical resources, pain, and suffering.

LOSS/BENEFITS FACTORS

PROJECT COSTS		(List potential losses)	NUMBERS	COST
Labor	1000.00	1. Structures		
Materials		a. Destroyed	2.00	50000.00
Land Acquisition		b. Damaged	4.00	100000.00
Contract Services	25000.00	2. Lives		
Other Costs (Please List):		a. Injured		
		b. Deceased		
		3. Agriculture		
		a. Animals Injured		
		b. Animals Deceased		
		c. Crops Destroyed		
		4. Infrastructure		
		a. Destroyed		80000.00
		b. Damaged		
		5. Economic Loss -Water Loss Value		1362.68
		6. Response Costs		600.00
		7. Other Losses or Costs (Please List)		
Total Proposal Cost:	26000.00	Total Loss Projection:		681983.68

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: **Home Gardens County Water District**		**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO X**	
Current Population in Jurisdiction or Served	780	Projected Population in Jurisdiction or Served - in 2010	900
Current Sq Miles in Jurisdiction or Served	54	Projected Sq Miles in Jurisdiction or Served - in 2010	54
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	No	If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years	N/A		
Approximate Number of Homes/Apts/etc.		Projected Number of Homes/Apts/etc.- in 2010

Approximate Percentage of Commercial Businesses in wildland fire hazard zones		Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones		Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	3	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	5
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	2	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	2
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	yes	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			yes

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Home Gardens Water District**	**Title/Lead Jurisdiction of Multi-Jurisdictional Plan: Riverside County OES**	**Date of Completion: September 15, 2004**
Local Point of Contact: **Karl Schalow**		**Address:** **3832 N.Grant St.** **Corona, Ca. 92879**

Part II, Home Gardens Water District Section	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Flooding Pgs 41 – 53 Earthquakes Pgs 54 – 66 Extreme Weather Pgs 67 – 76 Hazmat incidents Pgs 94 – 101 Blackout Pgs 115 – 118 Part II, Home Gardens Water District Section		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**[No]/[Yes]** If yes, where in MJP: Yes, Part II, Home Gardens Water District Section	**[N] [S]**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**[N] [S]**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & Home Gardens Water District Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
MITIGATION STRATEGY				

Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II, Home Gardens Water District Section	**[N] [S]**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143		
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143	**[N] [S]**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143

Jurisdiction's Critical Facility Evaluation

In December of 2001, the County of Riverside, in cooperation with local jurisdictions and agencies, developed an Emergency Response Database. This database was created so emergency planners could use the database as a planning tool as well as quickly determine the potential impact an event may have on a community, district, or specific site. During the creation of the Emergency Response Database, contributors were asked to identify critical facilities within their jurisdictions under the following sections:

- Airports
- Community Colleges
- Dams
- Schools
  - Preschools
  - Elementary Schools
  - Middle Schools
  - High Schools
- Fire Stations
- Government Buildings
- Highways
- Hospitals
- Red Cross Shelters
- Law Enforcement Facilities
- Waste Management Sites
- Reservoirs / Water tanks

For each site, the user can identify at a minimum, the address of the site, the type of structure, and the type of occupancy and site contact information.

During the creation of this Multi-Jurisdictional Local Hazard Mitigation Plan, it was determined that the Emergency Response Database could provide vital information for this project and it would be utilized as the source for the identification of critical facilities within hazard areas. To ensure the most up-to-date data was used, all participants involved updated the critical facilities data at the beginning of the Hazard Mitigation Plan project. The critical facility list for this jurisdiction will be reviewed and updated regularly to ensure that the vulnerability of each location is evaluated on a regular basis.

Because of the sensitive nature of the data obtained through this process, address information will not be included in the identification of critical facilities for the protection of all participants.

LOCAL JURISDICTION VULNERABILITY WORKSHEET

OTHER - PLEASE DESCRIBE BELOW					

LOCAL JURISDICTION MITIGATION STRATEGIES AND GOALS

Please evaluate the priority level for each listed mitigation goal identified below as it relates to your jurisdiction or facility. If you have any additional mitigation goals or recommendations, please list them at the end of this document.

Place an H (High), M (Medium), L (Low), or N/A (Not Applicable) for your priority level for each mitigation goal in the box next to the activity.

EARTHQUAKE

H	Aggressive public education campaign in light of predictions
H	Generate new literature for dissemination to:
H	◊ Government employees
H	◊ Businesses
N/A	◊ Hotel/motel literature
N/A	◊ Local radio stations for education
H	◊ Public education via utilities
N/A	◊ Identify/create television documentary content
N/A	Improve the Emergency Alert System (EAS)
L	◊ Consider integration with radio notification systems
L	◊ Upgrade alerting and warning systems for hearing impaired
L	◊ Training and maintenance
L	Procure earthquake-warning devices for critical facilities
M	Reinforce emergency response facilities
N/A	Provide training to hospital staffs
N/A	Require earthquake gas shutoffs on remodels/new construction
H	Evaluate re-enforcing reservoir concrete bases
H	Evaluate EOCs for seismic stability
H	Install earthquake cutoffs at reservoirs
L	Install earthquake-warning devices at critical facilities
N/A	Develop a dam inundation plan for new Diamond Valley Reservoir
M	Earthquake retrofitting
M	◊ Bridges/dams/pipelines
N/A	◊ Government buildings/schools
N/A	◊ Mobile home parks
N/A	Develop educational materials on structural reinforcement and home inspections **(ALREADY DEVELOPED)**
N/A	Ensure Uniform Building Code compliance
N/A	◊ Update to current compliance when retrofitting
H	Insurance coverage on public facilities
H	Funding for non-structural abatement (Earthquake kits, etc.)

L	Pre - identify empty commercial space for seismic re-location
N/A	Electrical co-generation facilities need retrofitting/reinforcement (Palm Springs, others?)
L	Mapping of liquefaction zones
L	Incorporate County geologist data into planning
N/A	Backup water supplies for hospitals
H	Evaluate pipeline seismic resiliency
H	Pre-positioning of temporary response structures
L	Fire sprinkler ordinance for all structures
N/A	Evaluate adequacy of reservoir capacity for sprinkler systems
H	Training/standardization for contractors performing retrofitting
H	Website with mitigation/contractor/retrofitting information
N/A	◊ Links to jurisdictions
N/A	◊ Alerting information
N/A	◊ Volunteer information
L	Evaluate depths of aquifers/wells for adequacy during quakes
M	Evaluate hazmat storage regulations near faults

COMMUNICATIONS IN DISASTER ISSUES

H	Communications Interoperability
N/A	Harden repeater sites
N/A	Continue existing interoperability project
N/A	Strengthen/harden
H	Relocate
H	Redundancy
H	Mobile repeaters

FLOODS

N/A	Update development policies for flood plains
N/A	Public education on locations of flood plains
N/A	Develop multi-jurisdictional working group on floodplain management
N/A	Develop greenbelt requirements in new developments
N/A	Update weather pattern/flood plain maps
N/A	Conduct countywide study of flood barriers/channels/gates/water dispersal systems
N/A	Required water flow/runoff plans for new development
N/A	Perform GIS mapping of flood channels, etc.
N/A	Install vehicular crossing gates/physical barriers for road closure
N/A	Maintenance of storm sewers/flood channels
H	Create map of flood channels/diversions/water systems etc
N/A	Require digital floor plans on new non-residential construction

N/A	Upgrade dirt embankments to concrete
H	Conduct countywide needs study on drainage capabilities
N/A	Increase number of pumping stations
H	Increase sandbag distribution capacities
H	Develop pre-planned response plan for floods
H	◊ Evacuation documentation
L	◊ Re-examine historical flooding data for potential street re-design
L	Training for city/county PIOs about flood issues
N/A	Warning systems - ensure accurate information provided
N/A	◊ Publicize flood plain information (website?)
N/A	◊ Install warning/water level signage
N/A	◊ Enhanced public information
N/A	◊ Road closure compliance
N/A	◊ Shelter locations
N/A	◊ Pre-event communications
N/A	Look at County requirements for neighborhood access
N/A	◊ Secondary means of ingress/egress
N/A	Vegetation restoration programs
N/A	Ensure critical facilities are hardened/backed up
M	Hardening water towers
M	Terrorism Surveillance - cameras at reservoirs/dams
N/A	Riverbed maintenance
N/A	Evaluate existing lift stations for adequacy
N/A	Acquisition of property for on-site retention
N/A	Evaluate regulations on roof drainage mechanisms
N/A	Erosion-resistant plants
N/A	Traffic light protection
N/A	Upkeep of diversionary devices
M	Install more turn-off valves on pipelines
N/A	Backup generation facilities
N/A	Identify swift water rescue capabilities across County

WILDFIRES NOTE: There was no information received regarding Wildfires

	Aggressive weed abatement program
	◊ Networking of agencies for weed abatement
	Develop strategic plan for forest management
	Public education on wildfire defense
	Encourage citizen surveillance and reporting
	Identify hydrants with equipment ownership information
	Enhanced fire fighting equipment

	Fire spotter program/red flag program
	◊ Expand to other utilities
	Research on insect/pest mitigation technologies
	Volunteer home inspection program
	Public education program
	◊ Weather reporting/alerting
	◊ Building protection
	◊ Respiration
	Pre-identify shelters/recovery centers/other resources
	Roofing materials/defensive spacing regulations
	Community task forces for planning and education
	Fuel/dead tree removal
	Strategic pre-placement of fire fighting equipment
	Establish FEMA coordination processes based on ICS
	Brush clearings around repeaters
	Research new technologies for identifying/tracking fires
	Procure/deploy backup communications equipments
	"Red Tag" homes in advance of event
	Provide fire-resistant gel to homeowners
	Involve insurance agencies in mitigation programs
	Clear out abandoned vehicles from oases
	Code enforcement
	Codes prohibiting fireworks
	Fuel modification/removal
	Evaluate building codes
	Maintaining catch basins

OTHER HAZARDS

H	Improve pipeline maintenance
N/A	Wetlands mosquito mitigation (West Nile Virus)
N/A	Insect control study
N/A	Increase County Vector Control capacities
H	General public drought awareness
M	◊ Lawn watering rotation
H	Develop County drought plan
N/A	Mitigation of landslide-prone areas
N/A	Develop winter storm sheltering plan
N/A	Ease permitting process for building transmission lines
N/A	Evaluate restrictions on dust/dirt/generating activities during wind seasons
N/A	Rotational crop planning/soil stabilization

N/A	Enhance agricultural checkpoint enforcement
N/A	Agriculture - funding of detection programs
M	Communications of pipeline maps (based on need to know)
N/A	Improved notification plan on runaway trains
H	Improve/maintain blackout notification plan.
H	Support business continuity planning for utility outages
M	Terrorism training/equipment for first responders
M	◊ Terrorism planning/coordination
M	◊ Staffing for terrorism mitigation
N/A	Create a SONGS regional planning group
N/A	◊ Include dirty bomb planning
N/A	Cooling stations - MOUs in place
N/A	Fire Ant eradication program
N/A	White Fly infestation abatement/eradication program
H	Develop plan for supplemental water sources
M	Public education on low water landscaping
N/A	Salton Sea desalinization
N/A	Establish agriculture security standards (focus on water supply)
M	ID mutual aid agreements
N/A	Vulnerability assessment on fiber-optic cable
H	Upgrade valves on California aqueduct
H	Public education
H	◊ Bi-lingual signs
H	◊ Blackout information
N/A	Notification system for rail traffic - container contents
N/A	Control and release of terrorism intelligence
N/A	Develop prison evacuation plan (shelter in place?)

LOCAL JURISDICTION PROPOSED MITIGATION ACTION AND STRATEGY PROPOSAL

Jurisdiction:	LEE LAKE WATER DISTRICT
Contact:	JOHN PASTORE
Phone:	951 277-1414

MITIGATION STRATEGY INFORMATION

Proposal Name:

LEE LAKE WATER DISTRICT FLOOD PROTECTION PROJECT

Proposal Location:

22646 TEMESCAL CANYON ROAD, CORONA CA 92883

Proposal Type

Place an "X" by the type of mitigation strategy (one or more may apply)

X	Flood and mud flow mitigation
	Fire mitigation
	Elevation or acquisition of repetitively damaged structures or structures in high hazard areas
	Mitigation Planning (i.e. update building codes, planning develop guidelines, etc.)
	Development and implementation of mitigation education programs
	Development or improvement of warning systems
	Additional Hazard identification and analysis in support of the local hazard mitigation plan
	Drinking and/or irrigation water mitigation
	Earthquake mitigation
	Agriculture - crop related mitigation
	Agriculture - animal related mitigation
x	Flood inundation/Dam failure
	Weather/Temperature event mitigation

DESCRIPTION OF THE PROPOSED MITIGATION STRATEGY

Proposal/Event History

List any previous disaster related events (dates, costs, etc)

1998 STORM FLOWS IN TEMESCAL CREEK THREATENED TO FLOOD THE TREATMENT FACILITY AT THIS LOCATION AND CAUSED EXTENSIVE EROSION TO ADJOINING PROPERTY.

Description of Mitigation Goal Narrative:

Give a detailed description of the need for the project, any history related to the project. List the activities necessary for its completion in the narrative section below.

THE PROXIMITY OF THE DISTRICT'S $17 MILLION SEWAGE TREATMENT FACILITY TO THE TEMESCAL CREEK SUBJECTS IT TO FLOODING AND EROSION FROM THE CREEK DURING A SIGNIFICANT STORM EVENT. THE PROJECT WILL CONSIST OF AN EARTHEN AND ROCK DIKE, APPROX. 1200 LF LONG THAT WILL BE CONSTRUCTED ALONG THE WESTERLY BANK OF THE TEMESCAL CREEK TO PROTECT THE SEWAGE TREATMENT FACILITY. THE PROJECT WILL HAVE TO BE DESIGNED AND THE NECESSARY PERMITS AND ENVIRONMENTAL CLEARANCES OBTAINED.

Does your jurisdiction have primary responsibility for the project? If not, what agency does?

Yes	X	No		Responsible Agency:

FUNDING INFORMATION

Place an "X" by the proposed source of funding for this project

	Unfunded project - funds are not available for the project at this time
X	Local jurisdiction General Fund
	Local jurisdiction Special Fund (road tax, assessment fees, etc.)
	Non-FEMA Hazard Mitigation Funds
X	Local Hazard Mitigation Grant Funds - Future Request
	Hazard Mitigation Funds

X	Has your jurisdiction evaluated this mitigation strategy to determine it's cost benefits? (i.e. has the cost of the mitigation proposal been determined to be beneficial in relationship to the potential damage or loss using the attached Cost/Benefit Analysis Sheet or another internal method)

LOCAL JURISDICTION DEVELOPMENT TRENDS QUESTIONNAIRE

LAND USE ISSUES - COMPLETE THE INFORMATION BELOW

JURISDICTION: **LEE LAKE WATER DISTRICT**	**DOES YOUR AGENCY HAVE RESPONSIBILITY FOR LAND USE AND/OR DEVELOPMENT ISSUES WITHIN YOUR JURISDICTIONAL BOUNDARIES? YES _____ NO __X__**		
Current Population in Jurisdiction or Served	6800	Projected Population in Jurisdiction or Served - in 2010	9800
Current Sq Miles in Jurisdiction or Served	10.5	Projected Sq Miles in Jurisdiction or Served - in 2010	10.5
Does Your Jurisdiction have any ordinances or regulations dealing with disaster mitigation, disaster preparation, or disaster response?	NO	If yes, please list ordinance or regulation number.	
What is the number one land issue your agency will face in the next five years	NA		
Approximate Number of Homes/Apts/etc.	2200	Projected Number of Homes/Apts/etc.- in 2010	6200
Approximate Total Residential Value	NA	Projected Residential Total Value - in 2010	
Approximate Number of Commercial Businesses	23	Projected Number of Commercial Businesses - in 2010	50
Approximate Percentage of Homes/Apts/etc in flood hazard zones	0	Approximate Percentage of Homes/Apts/etc in flood hazard zones - in 2010	0
Approximate Percentage of Homes/Apts/etc in earthquake hazard zones	NA	Approximate Percentage of Homes/Apts/etc in earthquake hazard zones - in 2010	NA
Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones	NA	Approximate Percentage of Homes/Apts/etc in wildland fire hazard zones - in 2010	NA
Approximate Percentage of Commercial Businesses in flood hazard zones	25	Approximate Percentage of Commercial Businesses in flood hazard zones - in 2010	25
Approximate Percentage of Commercial Businesses in earthquake hazard zones	NA	Approximate Percentage of Commercial Businesses in earthquake hazard zones - in 2010	NA
Approximate Percentage of Commercial Businesses in wildland fire hazard zones	NA	Approximate Percentage of Commercial Businesses in wildland fire hazard zones - in 2010	NA
Number of Critical Facilities in your Jurisdiction that are in flood hazard zones	1	Projected Number of Critical Facilities in your Jurisdiction that are in flood hazard zones - in 2010	1
Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones	NA	Number of Critical Facilities in your Jurisdiction that are in earthquake hazard zones - in 2010	NA
Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones.	NA	Number of Critical Facilities in your Jurisdiction that are in wildland fire hazard zones - in 2010	NA
Does your jurisdiction plan on participating in the County's on-going plan maintenance program every two years as described in Part I of the plan?	YES	If not, how will your jurisdiction do plan maintenance?	
Will a copy of this plan be available for the various planning groups within your jurisdiction for use in future planning and budgeting purposes?			YES

Supplement for all CA Local Government Jurisdictions participating in Multi-Jurisdictional, Local Hazard Mitigation Plans

Each separate jurisdiction participating in a Multi-Jurisdictional Plan, must a formally adopt the Multi-Jurisdictional Plan as their own LHMP. Even though a jurisdiction is "participating" in a multi-jurisdictional plan, EACH JURISDICTION must ensure that certain requirements of the Multi-Jurisdictional Plan have been met. Failure to do so MAY delay review and or approval of the multi-jurisdictional plan.

While each multi-jurisdictional plan must be a "stand alone" document upon completion, each jurisdiction must be aware of the information and requirements, unique to each participant, that must be provided in order for the multi-jurisdictional plan to be complete. The advantage for each local government in participating in a multi-jurisdictional plan is, among many, that most information and data (i.e. information, data, maps), may be shared by all participating jurisdictions.

The following "mini" Plan Review Crosswalk **should be completed by each participating jurisdiction** to document how and where information needed by the multi-jurisdictional planning effort, but specific to each participating jurisdiction, has been included.

Participating Jurisdiction: **Lee Lake Water District**	**Title/Lead Jurisdiction Of Multi-Jurisdictional Plan:** **Riverside County Operational Area**	**Date Of Completion:** **9/24/04**
Local Point Of Contact: **JOHN PASTORE**	**Address:** **22646 TEMESCAL CANYON ROAD** **CORONA., CA.92883**	
Title: **General Manager**		
Agency: **Lee Lake Water District**		
Phone Number: **(951) 277-1414**	**E-Mail:** **Llwdjp@Att.Net**

Jurisdiction's NFIP Status*			
Y	**N**	**N/A**	**CRS Class**

*** Notes: [Y] – Participating [N] - Not Participating [N/A] - Not Mapped**

SCORING SYSTEM: One of the following scores will be assigned to each of the following LHMP requirements.

N – Needs Improvement: The jurisdiction's portion of the multi-jurisdiction's plan does not meet the minimum for a plan requirement. Reviewer's comments must be provided.
S – Satisfactory: The jurisdiction's portion of the multi-jurisdiction's plan meets the minimum for the requirement. Reviewer's comments are encouraged, but not required.

Prerequisite(s) (Check Applicable Box)	NOT MET	MET
Multi-Jurisdictional Plan Adoption: §201.6(c)(5) **AND**		
Multi-Jurisdictional Planning Participation: §201.6(a)(3)		

Planning Process	N	S
Documentation of the Planning Process: §201.6(b) and §201.6(c)(1)	**N/A**	**in MJP**
Local Capabilities Assessment §201.4(c)(ii) and §201.6(c)(1) (State Requirement)		

Multi-Jurisdictional Risk Assessment §201.6(c)(2)(iii)	N	S
Identifying Hazards (if applicable): §201.6(c)(2)(i)		
Profiling Hazards (if applicable): §201.6(c)(2)(i)		
Assessing Vulnerability: Overview: §201.6(c)(2)(ii)		
Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)		
Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)		
Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)		

Mitigation Strategy	N	S
Multi-Jurisdictional Mitigation Actions: §201.6(c)(3)(iv)		

Plan Maintenance Process	N	S
Monitoring, Evaluating, and Updating the Plan: §201.6(c)(4)(i)	**N/A**	
Incorporation into Existing Planning Mechanisms: §201.6(c)(4)(ii)		
Continued Public Involvement: §201.6(c)(4)(iii)	**N/A**	

Additional State Requirements*	N	S
See Planning Process, Local Capabilities Assessment	**N/A**	
Insert State Requirement here	**N/A**	

SUPPLEMENT STATUS

SUPPLEMENT HAS REQUIREMENTS THAT "NEED IMPROVEMENT"	

SUPPLEMENT REQUIREMENTS ARE ALL "SATISFACTORY"	

*States that have additional requirements can add them in the appropriate sections of the *Multi-Hazard Mitigation Planning Guidance* or create a new section and modify this Plan Review Crosswalk to record the score for those requirements.

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
PREREQUISITE (S)	NOTE: The prerequisite, or prerequisites in the case of multi-jurisdictional plans, may be reviewed before, but must be met before the plan can receive final FEMA approved.			
Multi-Jurisdictional Plan Adoption	Requirement §201.6(c)(5): ***Element B & C:*** For multi-jurisdictional plans, each jurisdiction requesting approval of the plan must provide supporting documentation that it has been formally adopted by EACH participating jurisdiction.		[M] [NM]	
Multi-Jurisdictional Planning Participation	**Requirement §201.6(a)(3):** Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process. ***Element A***. Where in the MJP is this jurisdiction's participation, in the MJP development, documented?	**Part 1, Page 6**	[M] [NM]	
PLANNING PROCESS				
Documentation of the Planning Process	***Requirement*** - IFR §201.6(b): In order to develop a more comprehensive approach to reducing the effects of natural disasters, the planning process **shall** include:	N/A - Should be included in the MJP		
Local Capabilities Assessment	***Requirement*** – Section §201.4(c)(3) (ii) of the Federal Register Interim Final Rule 44 CFR Parts 201 and 206 states, "[The State mitigation strategy shall include] a general description and analysis of the effectiveness of local mitigation policies, programs, and capabilities.	See Elements A-D below.		
Local Capabilities Assessment	*Element* A: Does the plan provide a description of the human, technical and financial resources available within this jurisdiction to engage in a mitigation planning process and to develop a local	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

PLAN REVIEW CRITERIA	REQUIREMENT AS TAKEN FROM THE INTERIM FINAL RULE PART 201	LOCATION IN THE (MJP) MULTI JURISDICTIONAL PLAN (INDICATE SECTION OR ANNEX AND PAGE #)	SCORE / STATE / FEMA REVIEWER COMMENTS SCORING SYSTEM [M] MET [NM] NOT MET (FOR PREREQUISITE (S) ONLY) [N]--NEEDS IMPROVEMENT OR [S]--SATISFACTORY	
	hazard mitigation plan? (These resources are described in Section 2.2 of the OES LHMP Development Guide).			
Local Capabilities Assessment	*Element* B: Does the plan list local mitigation funding sources (taxes, fees, assessments or fines) which affect or promote mitigation within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* C: Does the plan list local ordinances which affect or promote disaster mitigation, preparedness, response or recovery within the reporting jurisdiction?	Yes - Part II Lee Lake Water District Section - Supplemental Questionnaire	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***
Local Capabilities Assessment	*Element* D: Does the plan describe the details of ongoing mitigation projects and programs within the reporting jurisdiction?	No	**[N] [S]**	***Note: This information is required to complete the State Hazard Mitigation Plan and must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.***

RISK ASSESSMENT				
Multi-Jurisdictional Risk Assessment	Requirement §201.6(c)(2)(iii): For multi-jurisdictional plans, the risk assessment must assess **each jurisdiction's** risks where they vary from the risks facing the entire planning area. It should be noted that the Vulnerability Assessments are almost always unique to each jurisdiction (EXAMPLE: For a county based MJP, a school district's vulnerability to a hazard is different than the city that it is in, and the city will have different vulnerabilities than that of the overall planning area (county).	Part I Wildfire Pgs 28 – 40 Flooding Pgs 41 – 53 Earthquakes Pgs 54 – 66 Dam failure Pgs 85 – 93 Hazmat incidents Pgs 94 – 101 Pipeline/Aqueduct incidents Pgs 111 – 114 Blackout Pgs 115 – 118 Part II Lee Lake Water District Section -		
	Were unique Hazards & Hazard Profiles Included from this jurisdiction?	**[No]/[Yes]** If yes, where in MJP: Yes - Part II Lee Lake Water District Section -	**[N] [S]**	
	Assessing Vulnerability: Overview: §201.6(c)(2)(ii)	Part 1, Pages 19-139	**[N] [S]**	
	Assessing Vulnerability: Identifying Structures: §201.6(c)(2)(ii)(A)	Part 1, Pages 19-139	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Estimating Potential Losses: §201.6(c)(2)(ii)(B)	Part 1, Pages 19-139	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*
	Assessing Vulnerability: Analyzing Development Trends: §201.6(c)(2)(ii)(C)	Part 1, Pages 24-27 & Lee Lake Water District Supplemental Questionnaire	**[N] [S]**	*Note: This information must be covered. However, a "Needs Improvement" score on this requirement will not preclude the plan from passing.*

MITIGATION STRATEGY				
Multi-Jurisdictional Mitigation Actions	Requirement §201.6(c)(3)(iv): For multi-jurisdictional plans, there must be identifiable action items specific to the jurisdiction requesting FEMA approval or credit of the plan. (That is, Does the plan include at least one identifiable action item for each jurisdiction requesting FEMA approval of the plan?)	Yes, Part II - Lee Lake Water District Section -	**[N] [S]**	
PLAN MAINTENANCE PROCESS				
Incorporation into Existing Planning Mechanisms	Requirement §201.6(c)(4)(ii): [The plan shall include a] process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms.	Part I, Page 143		
	Has this jurisdiction included a process by which the local government will incorporate the requirements in other plans, such as comprehensive or capital improvement plans, when appropriate?	Part I, Page 143 and Part II - Lee Lake Water District Section - Supplemental Questionnaire for	**[N] [S]**	
ADDITIONAL STATE REQUIREMENTS	See Planning Process – Local Capabilities Assessment for an additional State & Local Planning Requirement.	Part I, Page 143		

RIVERSIDE COUNTY MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION AGENCY INVENTORY

Mission Springs Water District

HAZARD IDENTIFICATION AND SUMMARY WORKSHEET

PLEASE PROVIDE THE FOLLOWING INFORMATION

Agency/Jurisdiction:		Mission Springs Water District		
Type Agency/Jurisdiction:		Other Agency		
Contact Person:	Title:	Service Supervisor		
First Name:	Dave	Last Name:	Pargeon	
Agency Address:	Street:	66575 Second Street		
	City:	Desert Hot Springs		
	State:	CA		
	Zip:	92240		
Contact Phone	760-329-6448		FAX	760-329-2482
E-mail	dpargeon@mswd.org			

Population Served	25,000	Square Miles Served	135

Does your organization have a general plan?	NO
Does your organization have a safety component to the general plan?	NO
What year was your plan last updated?	

Does your organization have a disaster/emergency operations plan?	YES
What year was your plan last updated?	2004
Do you have a recovery annex or section in your plan?	YES
Do you have a terrorism/WMD annex or section in your plan?	YES

HAZARD IDENTIFICATION QUESTIONNAIRE

DOES YOUR ORGANIZATION HAVE:

AIRPORT IN JURISDICTION	NO
AIRPORT NEXT TO JURISDICTION	YES
DAIRY INDUSTRY	NO
POULTRY INDUSTRY	NO
CROPS/ORCHARDS	NO
DAMS IN JURISDICTION	NO
DAMS NEXT TO JURISDICTION	NO
LAKE/RESERVOIR IN JURISDICTION	NO
LAKE/RESERVOIR NEAR JURISDICTION	NO
JURISDICTION IN FLOOD PLAIN	YES
CONTROLLED FLOOD CONTROL CHANNEL	YES
UNCONTROLLED FLOOD CONTROL CHANNEL	YES
EARTHQUAKE FAULTS IN JURISDICTION	YES
EARTHQUAKE FAULTS NEXT TO JURISDICTION	YES
MOBILE HOME PARKS	YES
NON-REINFORCED FREEWAY BRIDGES	NO
NON-REINFORCED BRIDGES	NO
BRIDGES IN FLOOD PLAIN	YES
BRIDGES OVER OR ACROSS RIVER/STREAM	NO
ROADWAY CROSSING RIVER/STREAM	NO
NON REINFORCED BUILDINGS	NO
FREEWAY/MAJOR HIGHWAY IN JURISDICTION	YES
FREEWAY/MAJOR HIGHWAY NEXT TO JURISDICTION	YES
FOREST AREA IN JURISDICTION	NO
FOREST AREA NEXT TO JURISDICTION	NO
WITHIN THE 50 MILES SAN ONOFRE EVACUATION ZONE	NO
MAJOR GAS/OIL PIPELINES IN JURISDICTION	YES
MAJOR GAS/OIL PIPELINES NEXT TO JURISDICTION	YES
RAILROAD TRACKS IN JURISDICTION	YES
RAILROAD TRACKS NEXT TO JURISDICTION	YES
HAZARDOUS WASTE FACILITIES IN JURISDICTION	NO
HAZARDOUS WASTE FACILITIES NEXT TO JURISDICTION	NO
HAZARDOUS STORAGE FACILITIES IN JURISDICTION	NO
HAZARDOUS STORAGE FACILITIES NEXT TO JURISDICTION	NO

DOES YOUR ORGANIZATION OWN OR OPERATE A FACILITY

IN A FLOOD PLAIN	**YES**
NEAR FLOOD PLAIN	**YES**
NEAR RAILROAD TRACKS	**YES**
NEAR A DAM	**NO**
UPSTREAM FROM A DAM	**NO**
DOWNSTREAM FROM A DAM	**NO**
DOWNSTREAM OF A LAKE	**NO**
DOWNSTREAM FROM A RESERVOIR	**NO**
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	**YES**
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	**YES**
ON AN EARTHQUAKE FAULT	**YES**
NEAR AN EARTHQUAKE FAULT	**YES**
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	**NO**
IN A FOREST AREA	**NO**
NEAR A FOREST AREA	**NO**
NEAR A MAJOR HIGHWAY	**YES**
A HAZARDOUS WASTE FACILITY	**NO**
NEAR A HAZARDOUS WASTE FACILITY	**NO**
A HAZARDOUS STORAGE FACILITY	**NO**
NEAR A HAZARDOUS STORAGE FACILITY	**NO**
NON REINFORCED BUILDINGS	**NO**
A MAJOR GAS/OIL PIPELINE	**NO**
NEAR A MAJOR GAS/OIL PIPELINE	**YES**

DOES YOUR ORGANIZATION HAVE ANY LOCATIONS THAT:

HAVE BEEN DAMAGED BY EARTHQUAKE AND NOT REPAIRED	**NO**
HAVE BEEN DAMAGED BY FLOOD	**YES**
HAVE BEEN DAMAGED BY FLOOD MORE THAN ONCE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE	**NO**
HAVE BEEN DAMAGED BY FOREST FIRE MORE THAN ONCE	**NO**
HAVE BEEN IMPACTED BY A TRANSPORTATION ACCIDENT	**NO**
HAVE BEEN IMPACTED BY A PIPELINE EVENT	**NO**

EMERGENCY OPERATIONS INFORMATION	
DOES YOUR ORGANIZATION HAVE AN EOC	YES
IS YOUR EOC LOCATED:	
IN A FLOOD PLAIN	NO
NEAR FLOOD PLAIN	YES
NEAR RAILROAD TRACKS	NO
NEAR A DAM	NO
UPSTREAM FROM A DAM	NO
DOWNSTREAM FROM A DAM	NO
DOWNSTREAM OF A LAKE	NO
DOWNSTREAM FROM A RESERVOIR	NO
NEAR A CONTROLLED FLOOD CONTROL CHANNEL	NO
NEAR UNCONTROLLED FLOOD CONTROL CHANNEL	NO
ON AN EARTHQUAKE FAULT	YES
NEAR AN EARTHQUAKE FAULT	YES
WITHIN THE 50 MILE SAN ONOFRE EVACUATION ZONE	NO
IN A FOREST AREA	NO
NEAR A FOREST AREA	NO
NEAR A MAJOR HIGHWAY	NO
A HAZARDOUS WASTE FACILITY	NO
NEAR A HAZARDOUS WASTE FACILITY	NO
A HAZARDOUS STORAGE FACILITY	NO
NEAR A HAZARDOUS STORAGE FACILITY	NO
NON REINFORCED BUILDINGS	NO
A MAJOR GAS/OIL PIPELINE	NO
NEAR A MAJOR GAS/OIL PIPELINE	NO

OTHER FACILITY INFORMATION	
ARE THERE LOCATIONS WITHIN YOUR JURISDICTION THAT:	
COULD BE CONSIDERED A TERRORIST TARGET	YES
COULD BE CONSIDERED A BIO-HAZARD RISK	NO

Specific Hazards Summary

Jurisdiction	Hazard Type	Hazard Name	In Jurisdiction?	Adjacent to Jurisdiction?
Mission Springs Water District	Aqueduct	Metropolitan Municipal Water District	Yes	No
Mission Springs Water District	Fault	Banning	Yes	No
Mission Springs Water District	Fault	Garnet Hill	Yes	No
Mission Springs Water District	Fault	Mission Creek	Yes	No
Mission Springs Water District	Pipeline	unknown	Yes	No
Mission Springs Water District	Railroad Track	unknown	No	Yes

Jurisdiction's Critical Facility Evaluation
