D&H Manufacturing (D&H) previously owned the Site and produced precision metal-parts for the semiconductor industry at the facility since approximately 1984. D&H recently sold the Site to the Richard and Donna Wills Revocable Trust U/A January 14, 2002. The existing building is a single story structure with a former metal shavings storage area at the rear of the building. D&H ceased operations in this facility in March 2005 and moved their equipment from the Site. The building is currently occupied by a kennel company. In 2001, D&H discovered evidence of solvent contamination in soil and groundwater a near sump located within the former metal shavings storage enclosure. The sump was reportedly installed in 1987 to contain fluids draining from metal shavings storage bins. Under Water Board oversight, D & H conducted several investigations between 2002 and 2003 to determine the extent of contamination in groundwater. The primary chemicals of concern in groundwater include: Tetrachloroethene (PCE) and 1,1,1 trichloroethane (1,1,1-TCA). There are currently ten monitoring wells at the Site and sampling is being conducted quarterly since wells were installed in 2002. To evaluate potential vapor intrusion from dissolved halogenated volatile organic compounds (HVOCs) in groundwater, indoor air sampling was conducted in January and June 2005. The results of the air sampling reports concluded that vapor intrusion of HVOCs from groundwater was not significant. Concentrations of PCE, and 1,1,1-TCA in indoor ambient air did not exceed RWQCB Environmental Screening Levels (ESLs).

The email responds to the February 5, 2015, Workplan for Offsite Vapor Intrusion Assessment, 2301 Calle de Luna, Santa Clara, California (Workplan). The Workplan is approved with the one condition that the indoor air and pathway air sampling be collected with the HVAC system off. You may elect to additionally collect samples with the HVAC system on, as proposed in the Workplan, to assess building susceptibility to soil gas entry and whether the HVAC system is providing a level of mitigation.

Site History:

The site was previously owned by General Motors Corporation (GMC). In the early 1960's, GMC, Fremont Plant was constructed and began operations. In the mid-1980's, GMC and Toyota Corporation of Japan formed a joint venture, the New United Motor Manufacturing, Inc. (NUMMI).

An Interim Status Document (ISD) was issued on April 6, 1981, to GMC for a surface impoundment, also called Wastewater Lagoon or Wastewater Holding Pond. GMC closed the surface impoundment following an approved closed plan. On November 27, 1984, DTSC issued a letter acknowledging the surface impoundment was officially closed.

The RCRA Facility Assessment (RFA) completed in January 1999, identified the Sand Blast Grit Disposal Area and the Perin's Shop Concrete Sump as areas at NUMMI that needed further investigation of hazardous constituent releases. Spent sand blasting grit contained nickel and chromium which, at high levels can be hazardous. After removal of the spent sand blast grit and underlying soil, soil samples were taken and analyzed for nickel and chromium. The residual soil contamination did not pose any risks to human health and the environment.

Perin's Shop Concrete Sump is located at the maintenance shop. It is a ten inch unlined concrete containment that served as a catch basin for the sludge generated from washing vehicles and equipment at NUMMI. The sump was emptied and cleaned. No VOCs or TPHs were detected from the soil and groundwater samples below the sump. The residual levels of metals detected in soil and groundwater samples were below harmful levels.

The RCRA Facility Investigation (RFI) Report for those two areas was completed in February 9, 2001. Based on DTSC?s technical review of RFI Report, DTSC concurred that the levels of hazardous constituents in soil and groundwater did not pose risks to the environment. DTSC approved the RFI Report on May 24, 2001.

DTSC public noticed a "No further action determination" for the Sand Blast Grit Disposal Area and the Perin' Shop Concrete Sump and held a 45-day public comment period from December 15, 2003 to January 30, 2004. No public comments were received. On March 9, 2005, DTSC issued "Corrective Action Completion Determination" letter for those two areas and on March 23, 2005 DTSC issued "Acknowledgement of Satisfaction".

Site History:

The site was previously owned by General Motors Corporation (GMC). In the early 1960's, GMC, Fremont Plant was constructed and began operations. In the mid-1980's, GMC and Toyota Corporation of Japan formed a joint venture, the New United Motor Manufacturing, Inc. (NUMMI).

An Interim Status Document (ISD) was issued on April 6, 1981, to GMC for a surface impoundment, also called Wastewater Lagoon or Wastewater

Holding Pond. GMC closed the surface impoundment following an approved closed plan. On November 27, 1984, DTSC issued a letter acknowledging the surface impoundment was officially closed.

The RCRA Facility Assessment (RFA) was completed in January 1999, identified the Sand Blast Grit Disposal Area and the Perin's Shop Concrete Sump as areas at NUMMI that needed further investigation of hazardous constituent releases. Spent sand blasting grit contained nickel and chromium which, at high levels can be hazardous. After removal of the spent sand blast grit and underlying soil, soil samples were taken and analyzed for nickel and chromium. The residual soil contamination did not pose any risks to human health and the environment. DTSC public noticed a "No further action determination" for the Sand Blast Grit Disposal Area and the Perin' Shop Concrete Sump and held a 45-day public comment period from December 15, 2003 to January 30, 2004. No public comments were received. On March 9, 2005, DTSC issued "Corrective Action Completion Determination" letter for those two areas and on March 23, 2005 DTSC issued an "Acknowledgement of Satisfaction".

In 2010 the NUMMI joint venture ceased and the NUMMI plant site was sold to Union Pacific Railroad and Tesla Motors. Further investigation of the site is planned under DTSC oversight to determine if releases have occurred.

Site History:

The site was previously owned by General Motors Corporation (GMC). In the early 1960's, GMC, Fremont Plant was constructed and began operations. In the mid-1980's, GMC and Toyota Corporation of Japan formed a joint venture, the New United Motor Manufacturing, Inc. (NUMMI).

An Interim Status Document (ISD) was issued on April 6, 1981, to GMC for a surface impoundment, also called Wastewater Lagoon or Wastewater Holding Pond. GMC closed the surface impoundment following an approved closed plan. On November 27, 1984, DTSC issued a letter acknowledging the surface impoundment was officially closed.

The RCRA Facility Assessment (RFA) completed in January 1999, identified the Sand Blast Grit Disposal Area and the Perin's Shop Concrete Sump as areas at NUMMI that needed further investigation of hazardous constituent releases. Spent sand blasting grit contained nickel and chromium which, at high levels can be hazardous. After removal of the spent sand blast grit and underlying soil, soil samples were taken and analyzed for nickel and chromium. The residual soil contamination did not pose any risks to human health and the environment.

Perin's Shop Concrete Sump is located at the maintenance shop. It is a ten inch unlined concrete containment that served as a catch basin for the sludge generated from washing vehicles and equipment at NUMMI. The sump was emptied and cleaned. No VOCs or TPHs were detected from the soil and groundwater samples below the sump. The residual levels of metals detected in soil and groundwater samples were below harmful levels.

The RCRA Facility Investigation (RFI) Report for those two areas was completed in February 9, 2001. Based on DTSC?s technical review of RFI Report, DTSC concurred that the levels of hazardous constituents in soil and groundwater did not pose risks to the environment. DTSC approved the RFI Report on May 24, 2001.

DTSC public noticed a "No further action determination" for the Sand Blast Grit Disposal Area and the Perin' Shop Concrete Sump and held a 45-day public comment period from December 15, 2003 to January 30, 2004. No public comments were received. On March 9, 2005, DTSC issued "Corrective Action Completion Determination" letter for those two areas and on March 23, 2005 DTSC issued "Acknowledgement of Satisfaction".

Site History:

The proposed school and park site is a portion of the parcel located at 45250 and 45300 Fremont Boulevard and 44851 S. Grimmer Boulevard, in Fremont, California. The Property is approximately 4.5 acres of the larger parcel identified as a portion of Assessor's Parcel Number (APN) 519-1747-10. The Property is bounded by South Grimmer Boulevard to the north, agricultural fields and Fremont Boulevard to the west, the Tesla automotive factory to the south, agricultural fields and Union Pacific Railroad (UPRR) railroad tracks to the east.

Historically, the Property was predominantly used for agricultural purposes until the 1960s. During the 1960s, the southern portion of the site was paved and was part of an auto manufacturing plant. The southern portion of the Property was used for staging and loading vehicles manufactured at the adjacent plant onto rail cars. Currently, the northern portion of the Site is occupied by agricultural fields, as well as a soil stockpile. The southern portion of the Site is occupied by a paved parking lot. The Site is relatively flat and currently unused. The Property is located in a commercial/industrial area of Fremont.

The School will be built by a development team as part of the Warm Springs Community Plan. Upon completion of construction, the school facilities and school site will be turned over to the School District.

On May 7, 2015, DTSC received Environmental Oversight Agreement (EOA) application for proposed Innovation Elementary School Site. On May 14, 2015, DTSC held a scoping meeting with the District and the environmental consultant (ENGEO). Based on submittal of a Phase 1 and Phase 2 Environmental Site Assessment documents, DTSC determined that a Preliminary Environmental Assessment (PEA) Equivalent would be prepared and submitted to DTSC for review and approval. On June 9, 2015, DTSC received the draft PEA Equivalent Report. On June 17, 2015, DTSC issued comments on the draft PEA Equivalent Report.

Based on comments issued by DTSC on the PEA Equivalent Report, the District elected to reuse soil associated with a stockpile onsite, instead of hauling it offsite for disposal. On July 2, 2015, DTSC received a Workplan for characterization of the soil stockpile. On July 13, 2015, DTSC conducted a site visit to provide oversight during stockpile soil sampling activities. On August 5, 2015, DTSC received the draft final PEA Equivalent Report. On September 16, 2015, DTSC issued comments on the draft final PEA Equivalent Report. On October 6, 2015, DTSC received the revised draft final PEA Equivalent Report. On October, 26, 2015, DTSC issued final comments of the PEA Equivalent Report. On December 8, 2015, DTSC approved the PEA Equivalent Report with no further action.

SITE HISTORY:

The proposed school and park site is a portion of the parcel located at 45250 and 45300 Fremont Boulevard and 44851 S. Grimmer Boulevard, in Fremont, California. The Property is approximately 4.5 acres of the larger parcel identified as a portion of Assessor's Parcel Number (APN) 519-1747-10. The Property is bounded by South Grimmer Boulevard to the north, agricultural fields and Fremont Boulevard to the west, the Tesla automotive factory to the south, agricultural fields and Union Pacific Railroad (UPRR) railroad tracks to the east.

Historically, the Property was predominantly used for agricultural purposes until the 1960s. During the 1960s, the southern portion of the site was paved and was part of an auto manufacturing plant. The southern portion of the Property was used for staging and loading vehicles manufactured at the adjacent plant onto rail cars. Currently, the northern portion of the Site is occupied by agricultural fields, as well as a soil stockpile. The southern portion of the Site is occupied by a paved parking lot. The Site is relatively flat and currently unused. The Property is located in a commercial/industrial area of Fremont.

The School will be built by a development team as part of the Warm Springs Community Plan. Upon completion of construction, the school facilities and school site will be turned over to the School District.

On May 7, 2015, DTSC received Environmental Oversight Agreement (EOA) application for proposed Innovation Elementary School Site. On May 14, 2015, DTSC held a scoping meeting with the District and the environmental consultant (ENGEO). Based on submittal of a Phase 1 and Phase 2 Environmental Site Assessment documents, DTSC determined that a Preliminary Environmental Assessment (PEA) Equivalent would be prepared and submitted to DTSC for review and approval. On June 9, 2015, DTSC received the draft PEA Equivalent Report. On June 17, 2015, DTSC issued comments on the draft PEA Equivalent Report.

Based on comments issued by DTSC on the PEA Equivalent Report, the District elected to reuse soil associated with a stockpile onsite, instead of hauling it offsite for disposal. On July 2, 2015, DTSC received a Workplan for characterization of the soil stockpile. On July 13, 2015, DTSC conducted a site visit to provide oversight during stockpile soil sampling activities. On August 5, 2015, DTSC received the draft final PEA Equivalent Report. On September 16, 2015, DTSC issued comments on the draft final PEA Equivalent Report. On October 6, 2015, DTSC received the revised draft final PEA Equivalent Report. On October, 26, 2015, DTSC issued final comments of the PEA Equivalent Report. On December 8, 2015, DTSC approved the PEA Equivalent Report with no further action.

(b) The owner or operator shall use appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: (1) spill prevention controls (e.g., check valves, dry discount couplings); (2) overfill prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and (3) maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., standby tank with a capacity that equals or exceeds the volume of the top 60 centimeters (2 feet) of the tank).

Hanlees vacated the property the first week of September and did not notify FFD. DGDG Hyundai is now operating there and advised that during move-in housekeeping was extremely poor, several work bays were left with numerous spills, garbage and engine parts, tanks, drums and containers belonging to Hanlees were left behind full of waste oil, coolant and filters. Currently, there are (12) oil caddies, 5-55-gallon drums of aerosols, 1-55-gallon drum of filters, 3-55 gallon drums contaminated with oil and caddies with coolant. FFD and DGDG have called multiple times to coordinate with closure. FFD contacted Tom Nguyen on 12-2-21 and he agreed to meet, complete closure procedures and remove remaining hazardous waste on site. FFD contacted Mr. Nguyen two more times and as of today has not filed a Closure Notification or removed abandoned hazardous waste from the there former facility. After today¿s inspection, housekeeping improvements were made to the HW storage areas, access for inspection improved and clean-up in the tank and compressor rooms. The facility improved its manifest and waste receipt organization for 2020. FFD performed a brief waste count, which showed that the site is an LQG NonRCRA waste generator and subject to a 90-day holding period for all HW generated on site and waste tanks are subject to HW Tank Assessments. Due to the length of time to RTC, the amount of open HW violations still remaining open from the routine inspection and that no HW Tank Assessment has been completed, Class I Violations are being cited and formal enforcement is pending in this program.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Final inspection completed upon receipt of the HW Tank Assessments and 3rd party testing of AST equipment. The inspection involved checking the HW storage areas, carts and tank rooms. The carts are labeled with HW labels and \emptied daily\. The Tank Room are clean, daily inspections done and HW labels compliant. The inside waste transfer area was still not compliant for labeling and spills were evident in the containment, although daily inspections are being done. Inspections are the key to success in maintaining the HW storage areas! No further action required but I am concerned that the business does not fully understand how to maintain the hazardous waste program and labeling requirements. HW labeling in the shop area needs to continue to improve. The business was given clear direction on what should be done via email, in order to ensure the program is maintained in compliance. Formal Enforcement is pending.; Note: data in [EVAL Notes] field for some records is truncated from the source.

As noted in the routine inspection conducted on September 17,2020, complete a comprehensive inventory of all wastes and hazardous materials on site to ensure the HMIS reflects the actual storage on-site. After today¿s 4th inspection, make the following updates: Add waste absorbent, waste aerosol cans and oil water separator or clarifier waste sludge. Add to the oil totals, 120 gallons of additional oil stored in six-gallon containers. Approximately (20) 6-gallon containers are stored on site. Update all the tank sizes for the following, which are currently not correct: waste antifreeze is not 70 gallons, fresh antifreeze is not 240 gallons and fresh oil. Confirm sizes with supplier or tank manufacturer which could not be verified on site.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Title Description Comments:

Monitoring Update Pacific Gas and Electric Company (PG & E) has continued in conducting their monitoring reports on a semi-annual basis (note: PG & E last contracted out Arcadis to perform monitoring activities). PG & E's monitoring activities have included the assessment of on-site wells to evaluate current groundwater conditions. The last Monitoring Report was sent to ACWD at the end of June, 2010. Conditions on-site still require monitoring.

Violation Description:

Failure to properly respond to a spill/leak with the following requirements:
a) General emergency procedures as required in section 66265.56.
b) Cessation of use; prevention of flow or addition of wastes into the tank system or secondary containment system and inspect the system to determine the cause of the release.
c) Removal of waste from tank system or secondary containment system:
1) If the release was from the tank system, the owner or operator shall, within 24 hours after detection of the leak or, if the owner or operator demonstrates that that is not possible, at the earliest practicable time remove as much of the waste as is necessary to prevent further release of hazardous waste to the environment and to allow inspection and repair of the tank system to be performed.
2) If the release was to a secondary containment system, all released materials shall be removed within 24 hours or in as timely a manner as is possible to prevent harm to human health and the environment.
d) The owner or operator shall immediately conduct a visual inspection of the release and, based upon that inspection:
1) Prevent further migration of the leak or spill to soils or surface water; and
2) Remove, and properly dispose of, any visible contamination of the soil or surface water.
e) Notifications, reports;
1) Any release to the environment, except as provided in subsection e)2) of this section, shall be reported within 24 hours of detection.
2) A leak or spill of hazardous waste is exempted from the requirements of subsection (e) of this section, but is not exempted from the requirements of section 66265.56, if it is:
A) less than or equal to a quantity of one (1) pound, and
B) Immediately contained and cleaned-up.
3) Within 30 days of detection of a release to the environment, a report containing the following information shall be submitted:
A) Likely route of migration of the release;
B) Characteristics of the surrounding soil (soil composition, geology, hydrogeology, climate);
C) Results of any monitoring or sampling conducted in connection with the release, (if available). If sampling or monitoring data relating to the release are not available within 30 days, these data shall be submitted as soon as they become available;
D) Proximity to downgradient drinking water, surface water, and population areas; and
E) Description of response actions taken or planned.
f) Provision of secondary containment, repair, or closure.
1) Unless the owner or operator satisfies the requirements of subsections f)2) through 4) of this section, the tank system shall be closed in accordance with section 66265.197.
2) If the cause of the release was a spill that has not damaged the integrity of the system, the owner/operator may return the system to service as soon as the released waste is removed and repairs, if necessary, are made.
3) If the cause of the release was a leak from the primary tank system into the secondary containment system, the system shall be repaired prior to returning the tank system to service.
4) If the source of the release was a leak to the environment from a component of a tank system without secondary containment, the owner/operator shall provide the component of the system from which the leak occurred with secondary containment that satisfies the requirements of section 66265.193 before it can be returned to service, unless the source of the leak is an aboveground portion of a tank system. If the source is an aboveground component that can be inspected visually, the component shall be repaired and may be returned to service without secondary containment as long as the requirements of subsection g) of this section are satisfied. If a component is replaced to comply with the requirements of this subsection, that component shall satisfy the requirements for new tank systems or components in sections 66265.192 and 66265.193. Additionally, if a leak has occurred in any portion of a tank system component that is not; Note: data in [Violation Description] field for some records is truncated from the source.

Violation Notes:

Returned to compliance on 07/20/2015. Last date of tank assessment: 1/6/2010

Violation Description:

Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information:
(1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed;
(2) Hazardous characteristics of the waste(s) to be handled;
(3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of:
(A) Factors affecting the potential for corrosion, including but not limited to:
1. Soil moisture content;
2. Soil pH;
3. Soil sulfides level;
4. Soil resistivity;
5. Structure to soil potential;
6. Influence of nearby underground metal structures (e.g., piping);
7. Stray electric current; and
8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and
(B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following:
1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic;
2. Corrosion-resistant coating (such as epoxy or fiberglass) with cathodic protection (e.g., impressed current or sacrificial anodes); and
3. Electrical isolation devices such as insulating joints and flanges;
(4) For underground tank system components that are likely to be affected by vehicular traffic, a determination of design or operational measures that will protect the tank system against potential damage; and
(5) Design considerations to ensure that:
(A) Tank foundations will maintain the load of a full tank;
(B) Tank systems will be anchored to prevent flotation or dislodgement where the tank system is placed in a saturated zone, or is located within a seismic fault zone;
(C) Tank systems will withstand the effects of frost heave; and
(D) The installation of a corrosion protection system that is field fabricated shall be supervised by an independent corrosion expert to ensure proper installation.

Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General during the initial inspection on November 27, 2017 a corroded and abandoned 5 gallon bucket of carburetor cleaner RCRA Waste was found on the side of the building. The facility was asked to properly dispose of the material inside and to use caution in removing it due to the extensive corrosion. The business did nothing and on January 9, 2018 the manager the facility ordered personnel to lab packed the material for disposal. The business was advised of the seriousness of leaving a can of waste and was advised that this potentially could be an enforcement issue. The business complied fully with the requirements and provided a hazardous waste disposal receipt on the 2nd reinspection.

The business bypassed the auto shutdown mode of the Veeder Root leak detection equipment on (2) underground storage tanks, without authorization from the CUPA and violated Health & Safety Code section 25299(f)2. A total of five violations were cited on the following tanks: tank number 2-87 fill, liquid sensor, tank 2-87 STP, liquid sensor, tank 3-91 fill, liquid sensor tanks 3-91 STP, liquid sensor, and tank 3-87 fill the vacuum sensor. At the initial meeting the CUPA assessed a total of $145,000 in penalties for multi-day violations at $5000 per day. For good cooperation and good compliance history the CUPA proposed to reduce the penalties by 50%; or possibly more for a supplemental environmental project. The business never followed up with the CUPA and decided to pay the reduced penalty of $72,500 without any further negotiations. The AEO was finalized on June 21, 2016.

Annual routine UST inspection for CUPA permit. Testing is conducted at night to minimize disruption to the business, sometimes making it difficult to see details inside the fill and STP sumps. Alarm history shows several l-15 and L-17 alarms triggered by brine. On 2-14-2022, SSS completed a full investigation of the 91, 87A and 87B fills and nothing conclusive found. 1. The Additive tank sump has evidence of continual past leakage on the sump floor, manway cover, sump wall sides and piping and currently the Leak detector is leaking around the air eliminator. Although difficult to see at night, there may also be a brine leak due to blue staining. 2. Although difficult to see at night, there may also be a brine leak due to blue staining and small pockets of brine in the 91 and 87 A fill sumps. 3. Dispenser 20 has a small seeping leak from a union. 4. Dispensers 12 and 20 UDC need brine added to the reservoir.; Note: data in [EVAL Notes] field for some records is truncated from the source.

ARSENIC

Site History:

The Site is located within an industrial area of Fremont, California, and consists of an active electrical substation, herein referred to as the "substation," as well
as the surrounding PG&E property, herein referred to as the "pasture area." The footprint of the substation is approximately 27 acres and is 1 mile west of
Interstate 880 and approximately 0.5 mile east of San Francisco Bay. The substation has been in continuous operation as an electrical substation since the early 1930s and is surrounded by fencing and secured by gates that are locked at all times to prevent unauthorized access or trespassing. The substation
includes electrical distribution and control equipment, and control and support buildings. The ground surface consists of a cover of aggregate base rock and
concrete pads supporting the electrical distribution equipment.
The Contaminants of Concern (COCs) of this site are arsenic and TPH. A Phytoremediation Pilot was demonstrated that certain fern species take up arsenic from soil and accumulate it in the leaves. An investigation indicated that the spill prevention, control and countermeasures pond at the substation may have affected the extent and levels of arsenic contamination in soil and drainage channel sediments at the site.

School District:
Past Use that Caused Contam: ELECTRIC GENERATION/SUBSTATION
Potential Media Affected: SEDIMENTS, SOIL
Site History:

The Site is located within an industrial area of Fremont, California, and consists of an active electrical substation, herein referred to as the "substation," as well
as the surrounding PG&E property, herein referred to as the "pasture area." The footprint of the substation is approximately 27 acres and is 1 mile west of
Interstate 880 and approximately 0.5 mile east of San Francisco Bay. The substation has been in continuous operation as an electrical substation since the early 1930s and is surrounded by fencing and secured by gates that are locked at all times to prevent unauthorized access or trespassing. The substation
includes electrical distribution and control equipment, and control and support buildings. The ground surface consists of a cover of aggregate base rock and
concrete pads supporting the electrical distribution equipment.
The Contaminants of Concern (COCs) of this site are arsenic and TPH. A Phytoremediation Pilot was demonstrated that certain fern species take up arsenic from soil and accumulate it in the leaves. An investigation indicated that the spill prevention, control and countermeasures pond at the substation may have affected the extent and levels of arsenic contamination in soil and drainage channel sediments at the site.

Site History:

The Gianera 2 Habitat for Humanity Silicon Valley (Gianera 2 site) site located at 2261 to 2285 Gianera Street. The Gianera 2 site is a rectangular 0.3-acre parcel. In 2009, Habitat for Humanity developed the site with four single-family homes (2271, 2275, 2281, and 2285 Gianera Street) and one two-story condominium at 2261 Gianera Street. The Gianera 2 site is bordered by residences to the south, east, west, and a PG&E substation to the north across an easement.
Environmental investigations indicate that the soil is contaminated in some portions of the site with elevated levels of lead. Historical information indicates that the Gianera 2 site was agricultural (orchards) around the late 1940s until 1971 when the residences were constructed.

Enf Action Description: Notice of Violation Issued by the Inspector at the Time of Inspection
Enf Action Notes:

Fines/Penalties Assessed: $3,200.00. AEO #3-2020- Continental Trucking has been recalcitrant over the last three triennial inspection periods and fail to continually comply with both HMBP and Hazardous Waste Program requirements. Business only submitted an HMBP when cited as a violation during routine inspections in 2013, 2016 and 2019. Over three triennial inspections business did not comply with most of the HW program elements for a LQG and management did not understand how to maintain its HW Program. The initial penalty was assessed at $32,000.00. Through multiple inspections and guidance from FFD, management committed to maintaining it HMBP and HW Program. The business did not want to do a SEP and based on the time-line to return to 100% compliance, penalties were significantly reduced and settled at $32,00.00. No administrative penalties were assessed. The Consent Order was finalized on November 8, 2021.

Overall, the facility has made significant improvement in housekeeping by performing: mopping of floors, organizing parts and equipment for access, completing extensive cleanup around the HW storage area, installing shelves/benches to organize work process flow. The facility needs to do the following to close or correct open Hazardous Waste violations: All hazardous waste handlers and managers must be training on HW Management from a 3rd party resource, a 5 year tank assessment must be done on the hazardous waste tank, daily inspections must be initiated on the used oil tank, weekly inspections must be done hazardous waste drums/containers, improve access to filter drums which are still difficult to inspect and organize all hazardous waste manifests/receipts by year for 2018, 2019 and 2020.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Continental Trucking a Non-RCRA LQG, trucks and equipment. The business has a poor compliance history for CFC, HMBP and Hazardous Waste, since its initial inspections at this location. CT has continually failed to maintain compliance for its HW Program, During the 2017 inspection, class I violations could have been cited, in lieu of enforcement, multiple Class 2 violations were cited. An agreement was made with FFD and the business was required to return to compliance, training to maintain its HW waste program, maintain weekly/daily inspections and improve its poor housekeeping. It took multiple re-inspections before 100% compliance was achieved. During the October 19, 2020 triennial inspection, multiple violations cited 2013 and 2017, were again observed. Due to the amount of repeat violations, level of deviation in its HW Program, formal enforcement for failure to maintain its HW program in order to prevent a release to the environment.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Citation: 22 CCR 15 66265.196 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.196
Violation Notes:

Returned to compliance on 10/23/2014. Tank, 2- filter drums and accumm bucket at bench

Violation Description:

Failure to properly respond to a spill/leak with the following requirements:
a) General emergency procedures as required in section 66265.56.
b) Cessation of use; prevention of flow or addition of wastes into the tank system or secondary containment system and inspect the system to determine the cause of the release.
c) Removal of waste from tank system or secondary containment system:
1) If the release was from the tank system, the owner or operator shall, within 24 hours after detection of the leak or, if the owner or operator demonstrates that that is not possible, at the earliest practicable time remove as much of the waste as is necessary to prevent further release of hazardous waste to the environment and to allow inspection and repair of the tank system to be performed.
2) If the release was to a secondary containment system, all released materials shall be removed within 24 hours or in as timely a manner as is possible to prevent harm to human health and the environment.
d) The owner or operator shall immediately conduct a visual inspection of the release and, based upon that inspection:
1) Prevent further migration of the leak or spill to soils or surface water; and
2) Remove, and properly dispose of, any visible contamination of the soil or surface water.
e) Notifications, reports;
1) Any release to the environment, except as provided in subsection e)2) of this section, shall be reported within 24 hours of detection.
2) A leak or spill of hazardous waste is exempted from the requirements of subsection (e) of this section, but is not exempted from the requirements of section 66265.56, if it is:
A) less than or equal to a quantity of one (1) pound, and
B) Immediately contained and cleaned-up.
3) Within 30 days of detection of a release to the environment, a report containing the following information shall be submitted:
A) Likely route of migration of the release;
B) Characteristics of the surrounding soil (soil composition, geology, hydrogeology, climate);
C) Results of any monitoring or sampling conducted in connection with the release, (if available). If sampling or monitoring data relating to the release are not available within 30 days, these data shall be submitted as soon as they become available;
D) Proximity to downgradient drinking water, surface water, and population areas; and
E) Description of response actions taken or planned.
f) Provision of secondary containment, repair, or closure.
1) Unless the owner or operator satisfies the requirements of subsections f)2) through 4) of this section, the tank system shall be closed in accordance with section 66265.197.
2) If the cause of the release was a spill that has not damaged the integrity of the system, the owner/operator may return the system to service as soon as the released waste is removed and repairs, if necessary, are made.
3) If the cause of the release was a leak from the primary tank system into the secondary containment system, the system shall be repaired prior to returning the tank system to service.
4) If the source of the release was a leak to the environment from a component of a tank system without secondary containment, the owner/operator shall provide the component of the system from which the leak occurred with secondary containment that satisfies the requirements of section 66265.193 before it can be returned to service, unless the source of the leak is an aboveground portion of a tank system. If the source is an aboveground component that can be inspected visually, the component shall be repaired and may be returned to service without secondary containment as long as the requirements of subsection g) of this section are satisfied. If a component is replaced to comply with the requirements of this subsection, that component shall satisfy the requirements for new tank systems or components in sections 66265.192 and 66265.193. Additionally, if a leak has occurred in any portion of a tank system component that is not; Note: data in [Violation Description] field for some records is truncated from the source.

Site History:

Rivermark Properties (Site) is located on property that was the eastern half and an additional area in the northwest corner of the former CSL Agnews West Developmental Center (West Campus), where a State hospital operated since the 19th century. The State of California entered into a binding contract with a developer for the purchase and development of the Site after cleanup.

In August 1999, Rivermark Partners, LLC (Rivermark) entered into a Voluntary Cleanup Agreement with DTSC for a 152-acre property surrounding and including portions of the Mansion Grove site (former Agnews property, currently Thamien Park).

Initial investigations at the Site found that operations related to the Developmental Center such as farming, auto repair, incineration, and demolition of structures had contaminated the Site with debris, pesticides, arsenic, and lead-based paint. In addition, a small portion of the Site was impacted with solvents from the adjacent Mansion Grove Site.

Beginning in approximately 2000, Rivermark redeveloped an approximately 152-acre property surrounding the Mansion Grove site to the west and north into single-family detached homes, attached multi-family residences, a school, a park, a library, and commercial-use.

As stated in the Rivermark remedial action plan, under a park land-use scenario, soil in the (then future) Thamien Park area exceeded soil remedial goals for arsenic and mercury (residual agricultural chemicals in the soil). Rivermark excavated and disposed of approximately 3000 cubic yards of soil in the southern portion of the park land-use area extending from the property line with the Mansion Grove apartment complex. Upon completion of the soil removal at Thamien Park, the Rivermark remedial action plan concluded that soil within Thamien Park would meet the soil remedial goals for the park use scenario and no further remedial action was necessary.

After site cleanup, the Site was developed into residential and commercial uses. A 3.5-acre area of the previous Agnews property immediately downgradient of the Mansion Grove property was developed into Thamien Park. Thamien Park includes playgrounds, two half basketball courts, a tennis court, restrooms, turf areas, picnic areas, and pathways. A Land Use Covenant was recorded with restrictions where Thamien Park is now located.

The DTSC approved on February 28, 2013, a change to the Site groundwater remedy from groundwater extraction to monitored natural attenuation (MNA). An Explanation of Significant Differences (ESD) report (December 28, 2012) was approved by DTSC which provided a Workplan for the MNA Program, as well as a Sampling and Analysis Plan

According to the 2012/2017 Five-Year Review report, the following was noted:

* The monitoring program has been implemented as required by the Rivermark remedial action plan and the ESD is sufficient to support the evaluation of the groundwater remedy and maintain health protectiveness.
* The Rivermark MNA groundwater remedy is meeting the performance criteria established by the Rivermark remedial action objectives, and the groundwater remedy selection.
* The rate of decrease of volatile organic compound (VOC) concentrations in groundwater is consistent with expectations, and the VOC plume is decreasing in size according to interwell trend evaluations.

Operational procedures for the Rivermark MNA remedy are consistent with the requirements specified in the Rivermark remedial action plan and the ESD.

Continuation of the Rivermark MNA remedy is recommended until such time that the interwell averaged VOC concentrations in groundwater meet the remedial action objectives.

Groundwater monitoring reports and operation and maintenance reports (collectively "reports") associated with the Site after 2006 are included in the Mansion Grove reports. These reports are found at the EnviroStor's Mansion Grove Site (43280031).

Comments: RAP - DTSC approved the RAP which required that any soil above the remedial goals be excavated and properly managed off-site. The groundwater beneath the site will be remediated by the construction of an extraction trench at the property boundary of Mansion Grove, and an additional extraction trench at the leading edge of the contaminated groundwater. The site cleanup was broken up into four phases to support development schedules for the site.

Soil was contaminated with the following: arsenic, lead, mercury, DDT, chlordane, polycyclic aromatic hydrocarbons (PAHs), perchloroethylene (PCE) and trichloroethylene (TCE). Groundwater investigation showed PCE, TCE, 1,1-dichloroethylene (DCE), cis-1,2-DCE, 1,2-dichloroethane (DCA) and vinyl chloride (VC) to be above the drinking water standards in the area north of the Mansion Grove Site.

Comments: DTSC performed a five-year review to evaluate the effectiveness and protectiveness of the remedy implemented as the site. DTSC concluded that the remedy remains protective of human health and the environment. The land use covenant prevents sensitive site uses, volatile organic compounds in groundwater remain stable, and there are no complete human exposure pathways at the site.

Violations

Violation Date: 09/09/2020 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Fremont City Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 09/09/2020. AT&T should consider providing local contacts or other contact options in the Facility/Owner Information section of the HMBP¿s primary, secondary and environmental contacts for the facility. The repeat use of the call center for all three contacts in the HMBP is not acceptable practice. FFD made three phone calls to the Call Center and it took over 60 days to schedule an inspection at this facility. Leaving the call center as a contact is acceptable, but other contact options should be considered for future HMBP submittals.

Violation Description:

Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.

Violations

Violation Date: 09/09/2020 ***Violation Source:*** CERS

Violation Notes:

Returned to compliance on 09/15/2020. Weekly waste inspections are the key to ensuring all hazardous waste storage areas are compliant, labels are complete and accumulation dates are noted or do not exceed the allowable accumulation time. Provide a copy of a weekly hazardous waste inspection for review in order to satisfy and closeout this violation.

Violation Description:

Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.

Violations

Violation Program: HW ***Violation Division:*** Fremont City Fire Department
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Notes:

Returned to compliance on 09/15/2020. Universal Waste has a maximum accumulation of one year. Two containers stored on-site had August 2020 accumulation dates. Properly dispose of all universal waste exceeding accumulation of one yearand provide a copy of the manifest for re-inspection

Violation Description:

Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met:
(1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms.

(2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f).

(3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Initial Inspection Due to the CV-19 pandemic and shelter in place order, most inspections are being conducted remotely. The HMBP program for PG&E is the only outstanding program at this time that is overdue. Since this facility has been in good general compliance across all CUPA Programs and submit to FFD any changes through CERS within 30 days; the review was performed using CERS only. PG&E has been diligent and submitting their HMBP annually prior to March 1 and their HMBP for this year was submitted on February 28, 2020 and reviewed and approved by FFD on March 25, 2020. No violations were noted for this program.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Sampling was completed along the remote fill pipe trench from the old waste oil tank location to the repair garage. Samples were taken from the trench at 4 feet below grade surface. Approximately 100 feet of double wall remote fill line was allowed to be left in place after rinsing and slurring in order to prevent major disruption to building. Two 2 samples were also taken at the remote fill inside the garage at approximately 3 1/2 feet below grade surface. Closure plan was received, reviewed and no further action is being required by FFD; Note: data in [EVAL Notes] field for some records is truncated from the source.

2 10,000 gallon double wall steel modern welding diesel and gasoline tanks were removed as well as 1 500 gallon double wall steel modern welding. PG&E made the decision to remove all the tanks due to a suspected failure of the outer wall of the diesel tank. The failure was never verified by testing and when the tanks removed all looked intact, no corrosion or signs of a release. Tanks were cleaned on site and sent to recycling at Schnitzer steel in Oakland. Samples were taken from each of the tank ends at the soil water interface and one water sample was also taken. Sampling was a observed by FFD and ACWD.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Notes:

This was a third reinspection to verify compliance with violations cited during the routine inspection on 4-7-22 and the 5-11-22 Other inspection. Although violations were corrected for labeling and open containers, the same violations were discovered in other areas. The 55-gallon waste solid drum on the compressor pad, found during the reinspection, had not been removed and no HW label had been placed on the drum. The the 5-gallon waste water/oil from the compressors in the same condition as observed during the 5-11-22 insp. W&W was advised to immediately create a Weekly Waste inspection form that covers ALL HW storage areas and to train employees who inspect waste storage areas. Based on past history and continual failure to mange the HW storage areas, Class I violations were cited. Immediate action to obtain compliance and correct these violations is necessary in order to avoid formal enforcement. HW training has been delayed until 7-7-2022.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Site History:

DTSC received via email an Environmental Oversight Agreement Application (EOAA) from the Fremont Unified School District (FUSD) for the acquisition of a property located at 43100 Isle Royal Street in the City of Fremont, Alameda County.

According to the EOAA, the property currently operates as the Tri-Cities Children's Center/Kidango, Inc. The site previously was used for agricultural purposes (row crops) from at least 1939 until the early 1960s. In the early 1960s the Timothy Rix Elementary School was constructed by the Irvington School District. The school operated until 1977. Ownership of the property was transferred to Tri-Cities Children's Center (subsequently Kidango, Inc.) in approximately 1985 and an early education and family services center was operated at the site. Kindango, Inc. was the property owner until the site was conveyed to FUSD on June 21, 2017.

A Phase I Environmental Site Assessment conducted in 2016 identified the potential for impacts to shallow soil at the site for/from: organochlorine pesticides (OCPs) and arsenic based on previous agricultural use; OCPs from termiticide use and lead-based paint from/around the existing buildings; proximity to naturally occurring asbestos formations; and poly-chlorinated biphenyls near a pad-mounted transformer.

QUESTIONNAIRE SENT QUESTIONNAIRE RECEIVED. HAULER: OAKLAND SCAGENGER, 2601 PERALTA, OAKLAND PERMIT: NPDES 402 - 0027812 INSPECTION(STATE) SITE INSPECTION & INTERVIEW INSPECTION(STATE) SITE INSPECTION-SAMPLE COLLECTED SAMPLE RESULTS INSPECTION RESULT NO PROBLEM. Removal Action. This activity was originally counted as a site certification. The 01/01/84 date was selected because it provided the earliest statute of limitations date. DTSC oversaw the removal of 6,100 gallons of contaminated liquids, 350 drums, and 8 cubic yards of contaminated soil. INSPECTION(OTHER) E&E REP C(84)C403 ON SI. NO RECOM MADE IN REP. 2 SPILL AREAS TESTED. RESULTS -ELAVATED HEAVY METALS. AREAS HAVE BEEN EXCAVATED, CON ACCEPTABLE. Region 2 staff received Groundwater Technology/Character-ization and Feasibility Study for this site. The submittal outlined proposed remedial work on groundwater solvent plumes required under a RWQCB order. There are three major areas of soil and groundwater contamination: 1) a clorinated organics plume near the center of the facility; 2) a methanol plume near the southern portion of the site; and 3) a diesel plume which overlaps the methanol plume. The plumes are not flowing off-site. A groundwater extraction and treatment system is being planned. Extraction by a network of shallow wells will be followed by a fixed-film bioreactor treating 60 lbs/day organics. Waste discharge requirements of 1 ppm of VOCs will be met. Ketones have been diminished but acetone and MEK are still present at 100 mg/l and PCBs at 12 mg/l. Due to the presence of contamination, DTSC will delete this site from the list of Certified Sites and show the site as referred to the RWQCB.

The Crown Cork & Seal (CC&S) property is located on an approximately 27-acre parcel in an industrial area of Fremont, California. The facility was used for the manufacturing of sanitary food cans since 1963 until its closure in 2000. In 1999, a diesel release from a ruptured truck fuel tank occurred in 1999 near the far southern corner of the paved area behind the main Manufacturing/Warehouse Building. Cleanup of the site included soil and asphalt removal and disposal as hazardous waste. Groundwater monitoring has continued around areas of the facility where contaminants of concern (COC) were used.

The Regional Water Quality Control Board, San Francisco Region (Water Board) provides regulatory oversight of environmental investigation and cleanup activities at the property located at 41100 Boyce Road, Fremont, California (Case Number 01S0259) under Order Number R2-2009-0003. The site, formerly owned by Hexion, Inc. (Hexion) (formerly Momentive Specialty Chemicals, formerly Hexion Specialty Chemicals, formerly Borden Chemical) is subject to ongoing soil and groundwater remediation. In 2014, the property was sold to Prologis (41100 Boyce Road LLC). Prologis has redeveloped the property as the Silicon Valley Logistics Park, comprised of two warehouse buildings separated by a truck court. Representatives of Hexion and Prologis, and ARCADIS, their environmental engineering consultant, have met with the Water Board on several occasions to discuss integration of the proposed buildings and site development with planned remediation activities. Ongoing remediation and monitoring are required on a portion of the site. The planned facility has been designed specifically to accommodate ongoing cleanup activities. The proposed site plan will not impede the longer-term remedial activities.

Comments: Removal Action. This activity was originally counted as a site certification. The 01/01/84 date was selected because it provided the earliest statute of limitations date. DTSC oversaw the removal of 6,100 gallons of contaminated liquids, 350 drums, and 8 cubic yards of contaminated soil.

Comments: Region 2 staff received Groundwater Technology/Character- ization and Feasibility Study for this site. The submittal outlined proposed remedial work on groundwater solvent plumes required under a RWQCB order. There are three major areas of soil and groundwater contamination: 1) a clorinated organics plume near the center of the facility; 2) a methanol plume near the southern portion of the site; and 3) a diesel plume which overlaps the methanol plume. The plumes are not flowing off-site. A groundwater extraction and treatment system is being planned. Extraction by a network of shallow wells will be followed by a fixed-film bioreactor treating 60 lbs/day organics. Waste discharge requirements of 1 ppm of VOCs will be met. Ketones have been diminished but acetone and MEK are still present at 100 mg/l and PCBs at 12 mg/l. Due to the presence of contamination, DTSC will delete this site from the list of Certified Sites and show the site as referred to the RWQCB.

The subject 23-acre property (Site) is completely developed with asphalt pavement and a single, oversize industrial warehouse with a 10-acre footprint. Sysco San Francisco (Sysco), a commercial food stuff delivery company currently operates on Site. The nature and extent of petroleum hydrocarbons at the former Fleming Site have been extensively monitored. The former Fleming underground fuel storage tanks (UST), and area of affected groundwater, generally on the eastern portion of the property, is defined by interior wells MW-2 through MW-4, MW-10 through MW-12, MW-18, MW-19, and well CET-4. Down gradient wells from the former USTs and area of affected groundwater is defined by wells MW-5 through MW-8, and wells MW-14 through MW-17. Benzene was detected in CET-4 at a concentration of 11 micrograms per liter (ìg/L); minor levels of Toluene at 2.1 ìg/L; Ethyl benzene was detected in CET-4 at 15 ìg/L; and Total Xylenes were detected in CET-4 at 2.2 ìg/L. Total Petroleum Hydrocarbons as gasoline (TPH-G) were detected in CET-4 at 2,500 ìg/L and MW-12 at 460 ìg/L. Detections for TPH as diesel (TPH-D) were found in all wells sampled this quarter. The highest concentration was found in MW-10 at 6,300 ìg/L. Detections of methyl tert-butyl ether (MTBE) were found only in wells MW-10 at 1.8 ìg/L, and MW-11 at 1.5 ìg/L.

Date Completed: 5/6/1991
Comments: Completed RA. Soil was contaminated with DDT. Early agreement with DHS over remediation via mixing low (roughly 3 ppm) DDT was acted on. PEA and risk assessment negotiated and ultimately approved for proposed condo development. Ultimately, excavation and mixing was completed and statistical sampling achieved cleanup goal of <.9 ppm.

Description: *** HISTORICAL *** RP states the release was to the inside of a delivery truck, dripping eventually into the cab of the vehicle, and possibly to the street. The vehicle was used for deliveries for quite a while before the release was discovered, therefore caller is unsure if any of it may have entered any water - the vehicle was used for deliveries around town. The UPS delivery truck number was 110203. Caller states there was a delay in hosing down the vehicle. Caller states the report was originally received from an anonymous concerned citizen.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

Deleted NPL: DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Mar 23, 2023

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Mar 23, 2023

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Apr 24, 2023

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by RCRA.

Government Publication Date: Apr 24, 2023

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Apr 24, 2023

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Apr 24, 2023

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Apr 24, 2023

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Apr 24, 2023

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Apr 24, 2023

Federal Engineering Controls-ECs: FED ENG

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Jun 22, 2023

Federal Institutional Controls- ICs: FED INST

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Jun 22, 2023

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites: NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jan 16, 2023

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 13, 2022

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Aug 8, 2022

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Aug 30, 2022

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Mar 23, 2023

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Mar 23, 2023

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

State

State Response Sites: RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Jun 1, 2023

EnviroStor Database: ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Jun 1, 2023

Delisted State Response Sites: DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Jun 1, 2023

Solid Waste Information System (SWIS): SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: May 9, 2023

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels: SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

Waste Management Unit Database: WMUD

The Waste Management Unit Database System tracks and inventories waste management units. CCR Title 27 contains criteria stating that Waste Management Units are classified according to their ability to contain wastes. Containment shall be determined by geology, hydrology, topography, climatology, and other factors relating to the ability of the Unit to protect water quality. Water Code Section 13273.1 requires that operators submit a water quality solid waste assessment test (SWAT) report to address leak status. The WMUDS was last updated by the State Water Resources control board in 2000.

Government Publication Date: Jan 1, 2000

EnviroStor Hazardous Waste Facilities: HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Jun 1, 2023

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report: SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers: C&D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers: RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Jul 10, 2023

Listing of Certified Processors: PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Jul 10, 2023

Listing of Certified Dropoff, Collection, and Community Service Programs: CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Jul 17, 2023

Land Disposal Sites: LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Jul 13, 2023

Leaking Underground Fuel Tank Reports: LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Jul 13, 2023

Delisted Leaking Storage Tanks: DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Jul 13, 2023

Permitted Underground Storage Tank (UST) in GeoTracker: UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Jan 17, 2023

Proposed Closure of Underground Storage Tank Cases: UST CLOSURE

This listing includes Proposed Closure of Underground Storage Tank (UST) Cases which are being considered for closure by either the State Water Resources Control Board at a Future Board Meeting or the Executive Director that have been posted for a 60-day public comment period, and Closure of UST Cases with Closure Denials and Approved Orders. The lists are provided by the California Water Boards.

Government Publication Date: Jun 13, 2023

Historical Hazardous Substance Storage Information Database: HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System: UST SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks: AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks: AST SWRCB

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks: TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Apr 12, 2023

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Aug 2, 2023

California Environmental Reporting System (CERS) Tanks: CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Apr 12, 2023

Delisted California Environmental Reporting System (CERS) Tanks: DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Apr 12, 2023

Historical Hazardous Substance Storage Container Information - Facility Summary: HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions: LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Jun 1, 2023

CALSITES Database: CALSITES

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions: HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions: DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Jul 13, 2023

Voluntary Cleanup Program: VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Jun 1, 2023

GeoTracker Cleanup Program Sites: CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Jul 13, 2023

Delisted Cleanup Program Sites: DELISTED CLEANUP

A list of Cleanup Program sites which were once included - and have since been removed from - the list of Cleanup Program Sites in GeoTracker. GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.
Government Publication Date: Jul 13, 2023

Delisted County Records: DELISTED COUNTY
Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.
Government Publication Date: Jul 26, 2023

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands: INDIAN LUST
This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 9, which includes California, is made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 19, 2023

Underground Storage Tanks on Tribal/Indian Lands: INDIAN UST
This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 9, which includes California, is made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 19, 2023

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST
Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 26, 2023

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST
Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 26, 2023

County

Alameda County - LOP Sites List: LOP ALAMEDA
List of sites in the Alameda County Department of Environmental Health's (ACDEH) Local Oversight Program (LOP). The ACDEH LOP program oversees the investigation and cleanup of hazardous materials releases to the environment under two programs. The Leaking Underground Fuel Tank (LUFT) program is specific to unauthorized releases associated with petroleum underground storage tank systems. The Site Cleanup Program (SCP) oversees the investigation and cleanup of releases from hazardous materials, including but not limited to releases of pesticides, heavy metals, dry cleaner solvents, etc., including redevelopment of sites with residual contamination from historic uses.
Government Publication Date: Jan 16, 2019

Alameda County Contaminated Sites: CONT ALAMEDA
This list of contaminated sites was provided by the Alameda County Department of Environmental Health (ACDEH) up until May 2019. This data is now obtained through the State Water Resources Control Board's GeoTracker. Releases of other types of hazardous materials from underground storage tanks or other releases and/or spills that have contaminated soil, soil vapor, and/or groundwater may be regulated by ACDEH under the Site Cleanup Program, San Francisco Bay Regional Water Board, or by the California Department of Toxic Substance Control. ACDEH under LOP's SCP oversees the cleanup of contaminated property under authority of Health and Safety Code Sections 101480 through 101490.
Government Publication Date: May 27, 2019

Alameda County - UST List: UST ALAMEDA
A list of registered Underground Storage Tanks (USTs) in the County of Alameda. The list is made available by Alameda County Department of Environmental Health.
Government Publication Date: Aug 1, 2023

Alameda County Aboveground Storage Tanks: AST ALAMEDA

This database containing active and inactive aboveground storage tank facilities is maintained by the Alameda County Department of Environmental Health. These aboveground storage tanks contain petroleum-based liquid products such as gasoline, diesel, lubricants, etc. Effective July 1, 2018, tanks in an underground area (TIUGA) are subject to the Aboveground Petroleum Storage Act Program.

Government Publication Date: May 2, 2022

Alameda County - City of Berkeley CUPA Facilities: CUPA BERKELEY

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs at the City of Berkeley in Alameda County. This list is maintained by the Toxics Management Division at the City of Berkeley.

Government Publication Date: Jul 6, 2023

Alameda County - Hayward City CUPA List: CUPA HAYWARD

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Hayward City. This list is maintained by the Hayward City Fire Department.

Government Publication Date: Jul 16, 2019

Alameda County - San Leandro City CUPA Facilities List: CUPA SANLEANDRO

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Leandro City, Alameda County. This list is made available by San Leandro City Environmental Services Section.

Government Publication Date: Apr 11, 2019

Alameda County - Union City USTs: UST UNION

A list of Underground Storage Tanks (USTs) in the city of Union in Alameda County. This data is made available by the Environmental Programs Division of Economic & Community Development, Union City.

Government Publication Date: May 3, 2021

Alameda County - Union City CERS CUPA List: CUPA CERS UNION

A list of CERS registered facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Union. This list is made available by the City of Union Economic and Community Development Department.

Government Publication Date: May 3, 2021

Alameda County - Union City CUPA Facilities: CUPA UNION

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Union. Includes facilities with active and inactive statuses. This list is made available by the City of Union Economic and Community Development Department.

Government Publication Date: Sep 30, 2020

Alameda County - City of Livermore and Pleasanton UST List: UST LIVERMORE

A list of registered Underground Storage Tank (UST) in City of Livermore and City of Pleasanton, Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

Government Publication Date: Mar 31, 2023

Alameda County - City of Livermore and Pleasanton AST List: AST LIVERMORE

A list of registered Aboveground Storage Tank (AST) in City of Livermore and City of Pleasanton, Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

Government Publication Date: Mar 31, 2023

Alameda County - City of Livermore and Pleasanton CUPA Facilities: CUPA LIVERMORE

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in City of Livermore and City of Pleasanton in Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

Government Publication Date: Mar 31, 2023

Santa Clara County - Historic Solvent Case Listing: HSOL SANTACLARA

The Santa Clara Valley Water District was responsible for the oversight of solvent and toxic release cases and maintained a list of historic solvent cases in Santa Clara County.

Government Publication Date: Aug 22, 2016

Santa Clara County - Local Oversight Program Listing: LOP SANTACLARA

A list of Leaking Underground Storage Tanks (LUST) facilities in Santa Clara County Provided by Santa Clara Department of Environmental Health (DEH). Since July 1, 2004 the DEH has served as the oversight agency for investigations and clean-up of petroleum releases from underground storage tanks through implementation of the Local Oversight Program (LOP) contract with the State Water Resources Control Board.

Government Publication Date: Jun 14, 2017

Santa Clara County - Underground Storage Tanks: UST SANTACLARA

List of underground storage tanks made available by the County of Santa Clara's Hazardous Materials Compliance Division.

Government Publication Date: Aug 2, 2023

Santa Clara County - CUPA Facilities List: CUPA SANTACLARA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Clara County. This list is made available by Santa Clara County Department of Environmental health (DEH). DEH's Hazardous Materials Compliance Division (HMCD) is CUPA for the county with jurisdiction within the Cities of Los Altos Hills, Monte Sereno, and Saratoga; and in all unincorporated areas of Santa Clara County, including Moffett Field, San Martin, and Stanford.

Government Publication Date: Mar 13, 2021

Santa Clara County - City of San Jose Hazardous Material Facilities: HAZ SANJOSE

A list of facilities with hazardous materials, including underground and aboveground tanks. This list is maintained by the City of San Jose Fire Department.

Government Publication Date: Oct 15, 2020

Santa Clara County - Gilroy City CUPA Facilities List: CUPA GILROY

The Gilroy City Fire Marshal's office maintains a list of CUPA Facilities located in Gilroy City.

Government Publication Date: Jun 3, 2022

Santa Clara County - Sunnyvale City CUPA List: CUPA SUNNYVALE

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Sunnyvale City, Santa Clara County. This list is made available by the Fire Prevention & Hazardous Materials division of the Sunnyvale Department of Public Safety.

Government Publication Date: Jun 10, 2022

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Aug 18, 2022

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Oct 19, 2022

PFOA/PFOS Contaminated Sites: PFAS NPL

This list of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been detected in water and/or soil is provided by the U.S. Environmental Protection Agency (EPA). EPA Disclaimer with FOIA file: Inclusion on the list does not necessarily mean that drinking water has been affected, nor does inclusion mean that anyone at the site has been exposed or is at risk for detrimental health effects.

Government Publication Date: Jun 15, 2023

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. The dates this data was extracted for the PFAS Analytic Tools range from March 2022 to April 2023. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Apr 24, 2023

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map, credited to the Northeastern University's PFAS Project Lab, Silent Spring Institute, and the PFAS-REACH team. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: https://pfasproject.com/pfas-sites-and-community-resources/

Government Publication Date: Oct 9, 2022

National Response Center PFAS Spills: ERNS PFAS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Limitations: The data from the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Apr 15, 2023

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Feb 19, 2023

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Oct 19, 2022

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

PFAS Waste Transfers from RCRA e-Manifest: PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.
Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN
An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.
Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP
An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.
Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP
Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).
Government Publication Date: Jan 25, 2023

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER
The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.
Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS
The U.S. Environmental Protection Agency's Enforcement and Compliance History Online system incorporates data from the Integrated Compliance Information System - National Pollutant Discharge Elimination System (ICIS-NPDES). ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. This data includes permit, inspection, violation and enforcement action information for applicable ICIS records.
Government Publication Date: Oct 15, 2022

Drycleaner Facilities: FED DRYCLEANERS
A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.
Government Publication Date: Apr 15, 2023

Delisted Drycleaner Facilities: DELISTED FED DRY
List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).
Government Publication Date: Apr 15, 2023

Formerly Used Defense Sites: FUDS
Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset.
Government Publication Date: Jul 12, 2022

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Mar 31, 2021

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United State Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Nov 7, 2022

Surface Mining Control and Reclamation Act Sites: SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Aug 18, 2022

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: May 25, 2023

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Jun 5, 2023

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Apr 19, 2023

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Mar 1, 2023

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 3, 2022

State

PFAS Sampling Locations: PFAS SAMPLING

This data is sourced from the State Water Board's GeoTracker Per- and Polyfluoroalkyl Substances (PFAS) Map tool which contains individual sampling points (i.e., soil boring, groundwater monitoring well, drinking water well for municipal drinking water systems, etc.) or a site location with PFAS analytical data. Includes analytical results that are finalized and submitted electronically by the Responsible Parties via GeoTracker's Electronic Submittal of Information Portal, and after it's accepted by a Regional Water Quality Control Board.

Government Publication Date: Mar 14, 2023

Dry Cleaning Facilities: DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Dec 20, 2021

Delisted Drycleaners: DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Jan 31, 2022

Non-Toxic Dry Cleaning Incentive Program: DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Jan 31, 2022

PFAS GeoTracker Cleanup Sites: PFAS GT CLEANUPS

A list of applicable cleanup sites from the State Water Resources Control Board's (SWRCB) GeoTracker data management system where one or more of the potential contaminants of concern are identified in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Jul 13, 2023

PFOA/PFOS Groundwater: PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Apr 30, 2023

PFAS Investigations: PFAS INVEST

This list of potential Per- and Polyfluoroalkyl Substance (PFAS) sites is compiled from the California State Water Resources Control Board's (SWRCB) PFAS Investigations Map tool. The SWRCB issued investigative orders, per California Water Code (CWC) Section 13267 and/or 13383, to these sites. This does not mean that PFAS has been produced, used, or discharged at these sites. Orders were also issued to the public water systems to sample wells in the vicinity of these locations. The data includes locations for airports, landfills, suspected chrome plating facilities, publicly owned treatment works (aka wastewater treatment plants), bulk fuel terminals, refineries, and military facilities that have potential sources of PFAS.

Government Publication Date: Nov 28, 2022

Hazardous Waste and Substances Site List - Site Cleanup: HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Mar 15, 2023

Toxic Pit Cleanup Act Sites: TOXIC PITS

The Toxic Pits Cleanup Act (TPCA) list identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. This list was maintained by the State Water Resources Control Board (SWRCB), is not longer maintained, and updates are not planned.

Government Publication Date: Jul 1, 1995

List of Hazardous Waste Facilities Subject to Corrective Action: DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement: INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked by the California Department of Toxic Substance Control's (DTSC) EnviroStor data management system.

Government Publication Date: Mar 16, 2023

School Property Evaluation Program Sites: SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Jun 1, 2023

California Hazardous Material Incident Report System (CHMIRS): CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Apr 20, 2023

Historical California Hazardous Material Incident Report System (CHMIRS): HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Handlers from Hazardous Waste Manifest Data: HAZNET

A list of handlers not otherwise classified as Treatment, Storage, Disposal facilities (TSDF) or generators from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Oct 24, 2016

Generators from Hazardous Waste Manifest Data: HAZ GEN

List of handlers listed as having generated waste from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Dec 31, 2017

TSDF from Hazardous Waste Manifest Data: HAZ TSD

List of Treatment, Storage, and Disposal Facilities (TSDFs) from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Dec 31, 2017

Historical Hazardous Waste Manifest Data: HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters: HW TRANSPORT

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

Government Publication Date: Jun 27, 2023

Registered Waste Tire Haulers: WASTE TIRE

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Jun 2, 2023

California Medical Waste Management Program Facility List: MEDICAL WASTE

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

Government Publication Date: Jul 13, 2023

Historical Cortese List: HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders: CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Dec 6, 2021

California Environmental Reporting System (CERS) Hazardous Waste Sites: CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Apr 12, 2023

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites: DELISTED HAZ

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker: GEOTRACKER

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Jul 13, 2023

Mines Listing: MINE

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Government Publication Date: Jun 16, 2023

Recorded Environmental Cleanup Liens: LIEN

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: Jun 7, 2023

Waste Discharge Requirements: WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Jul 13, 2023

Toxic Pollutant Emissions Facilities: EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2020

Clandestine Drug Lab Sites: CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/clandestine drug laboratories.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

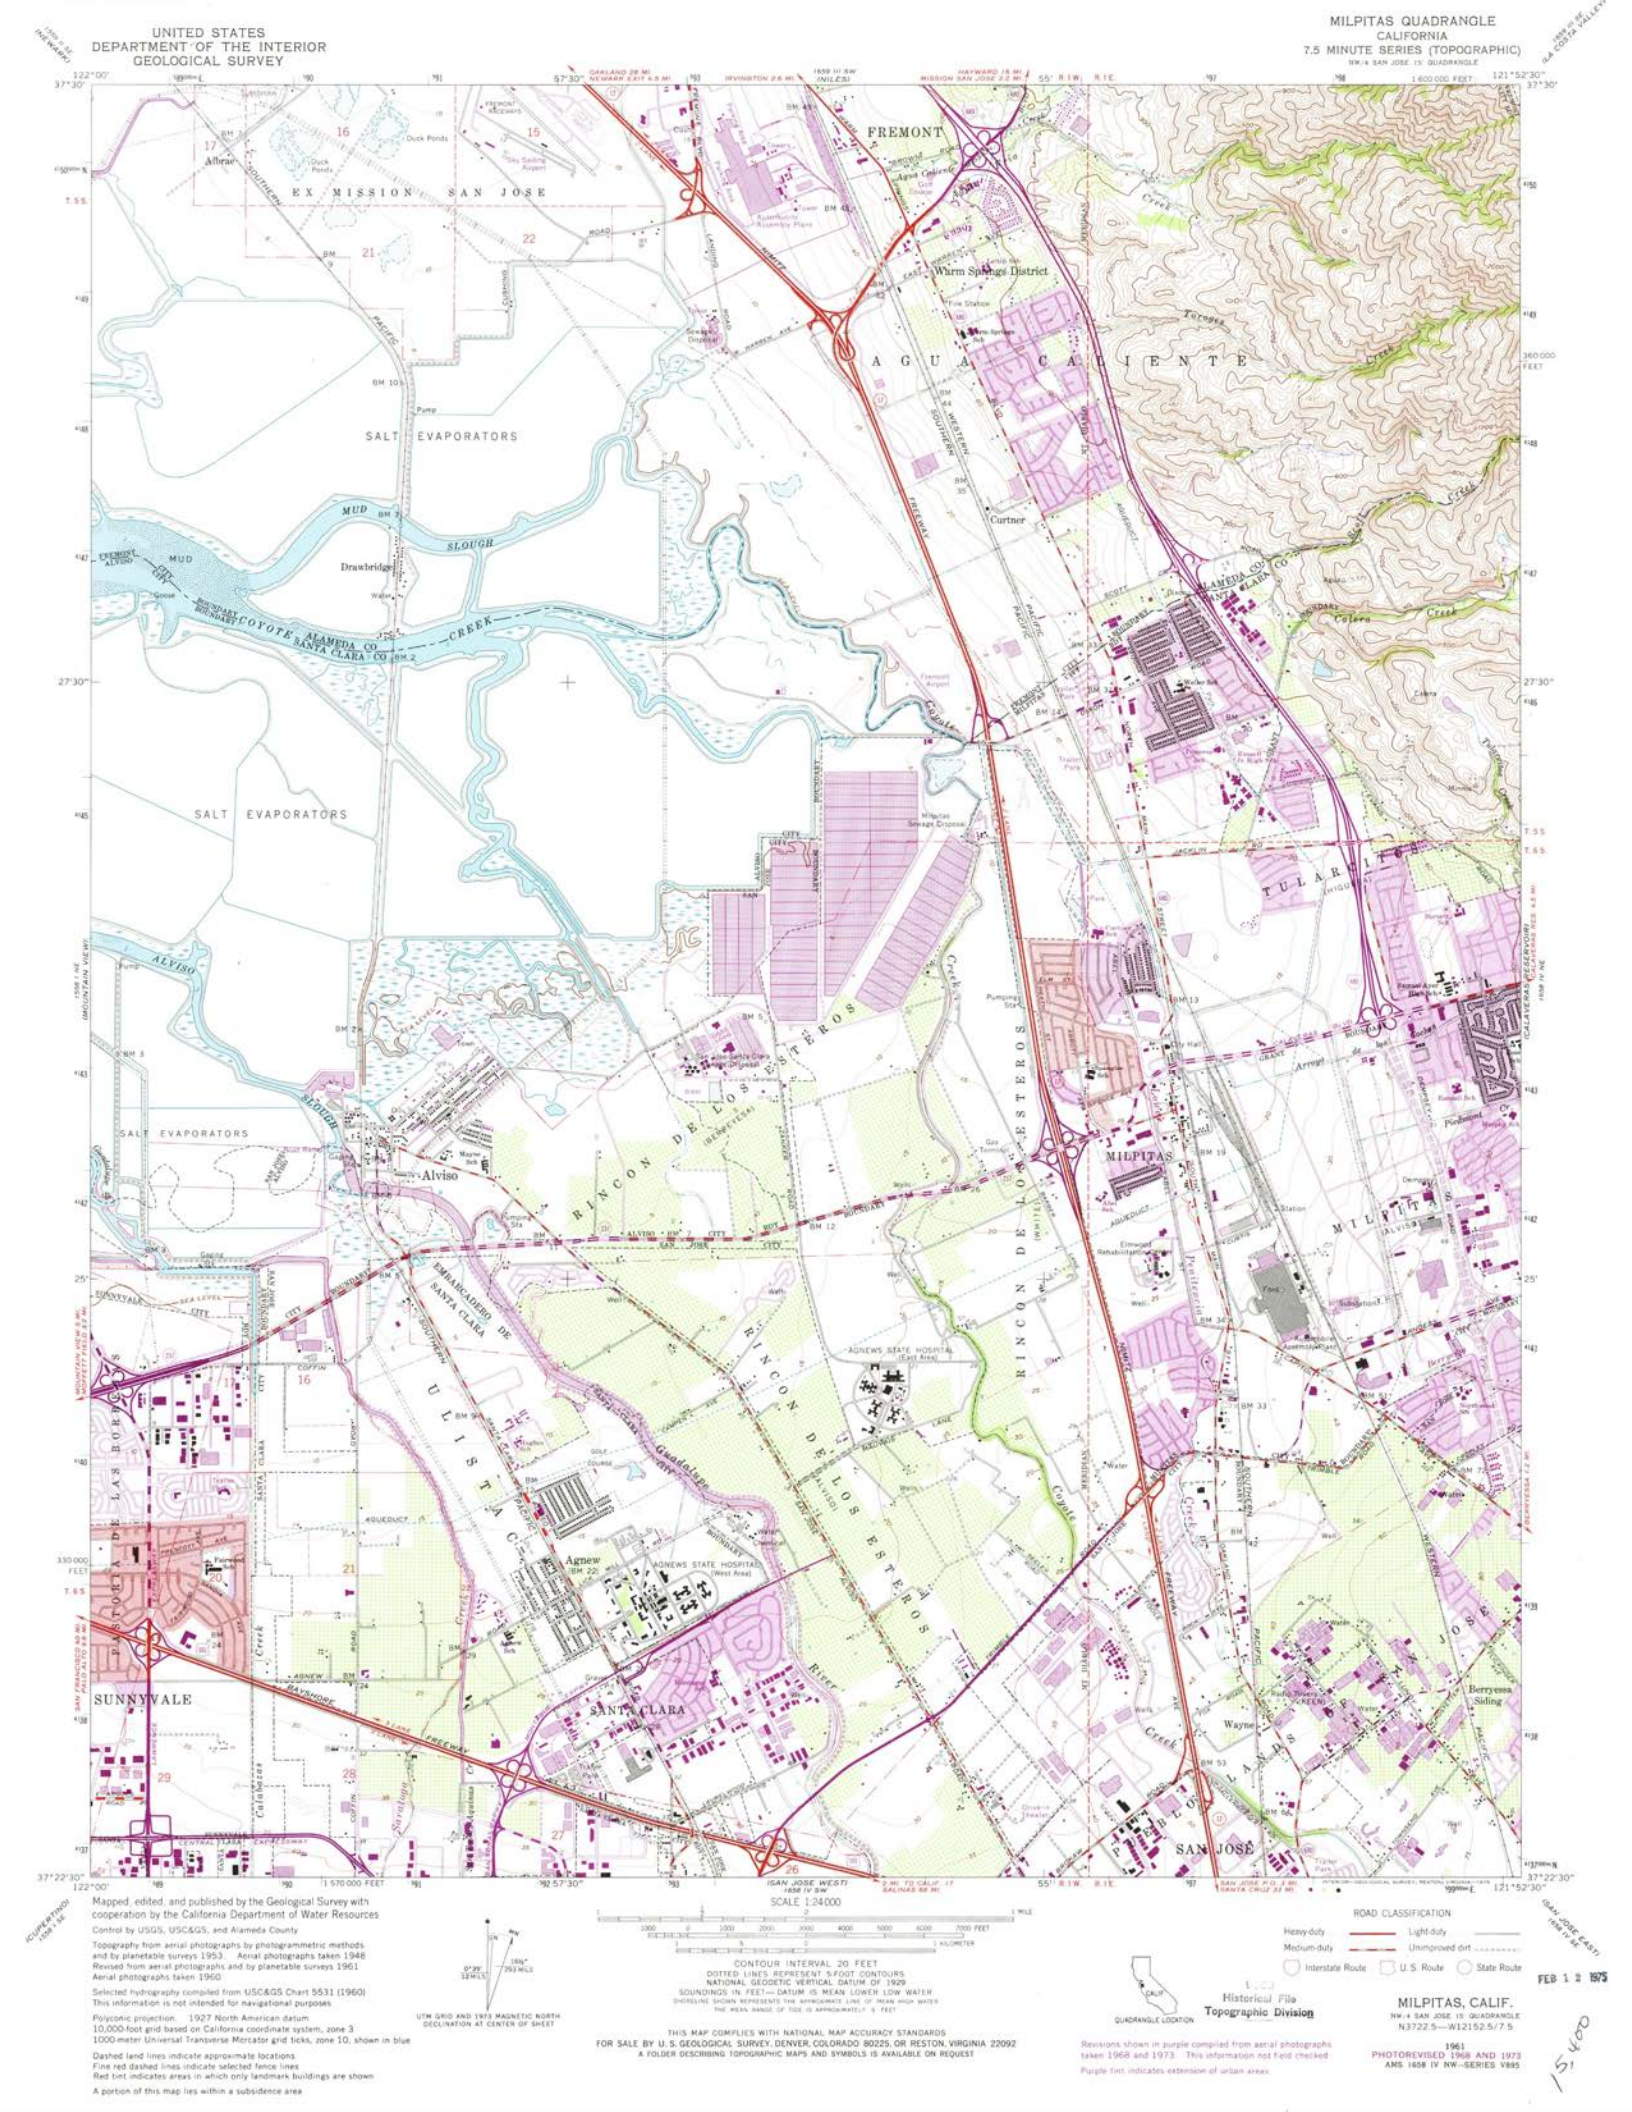
Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

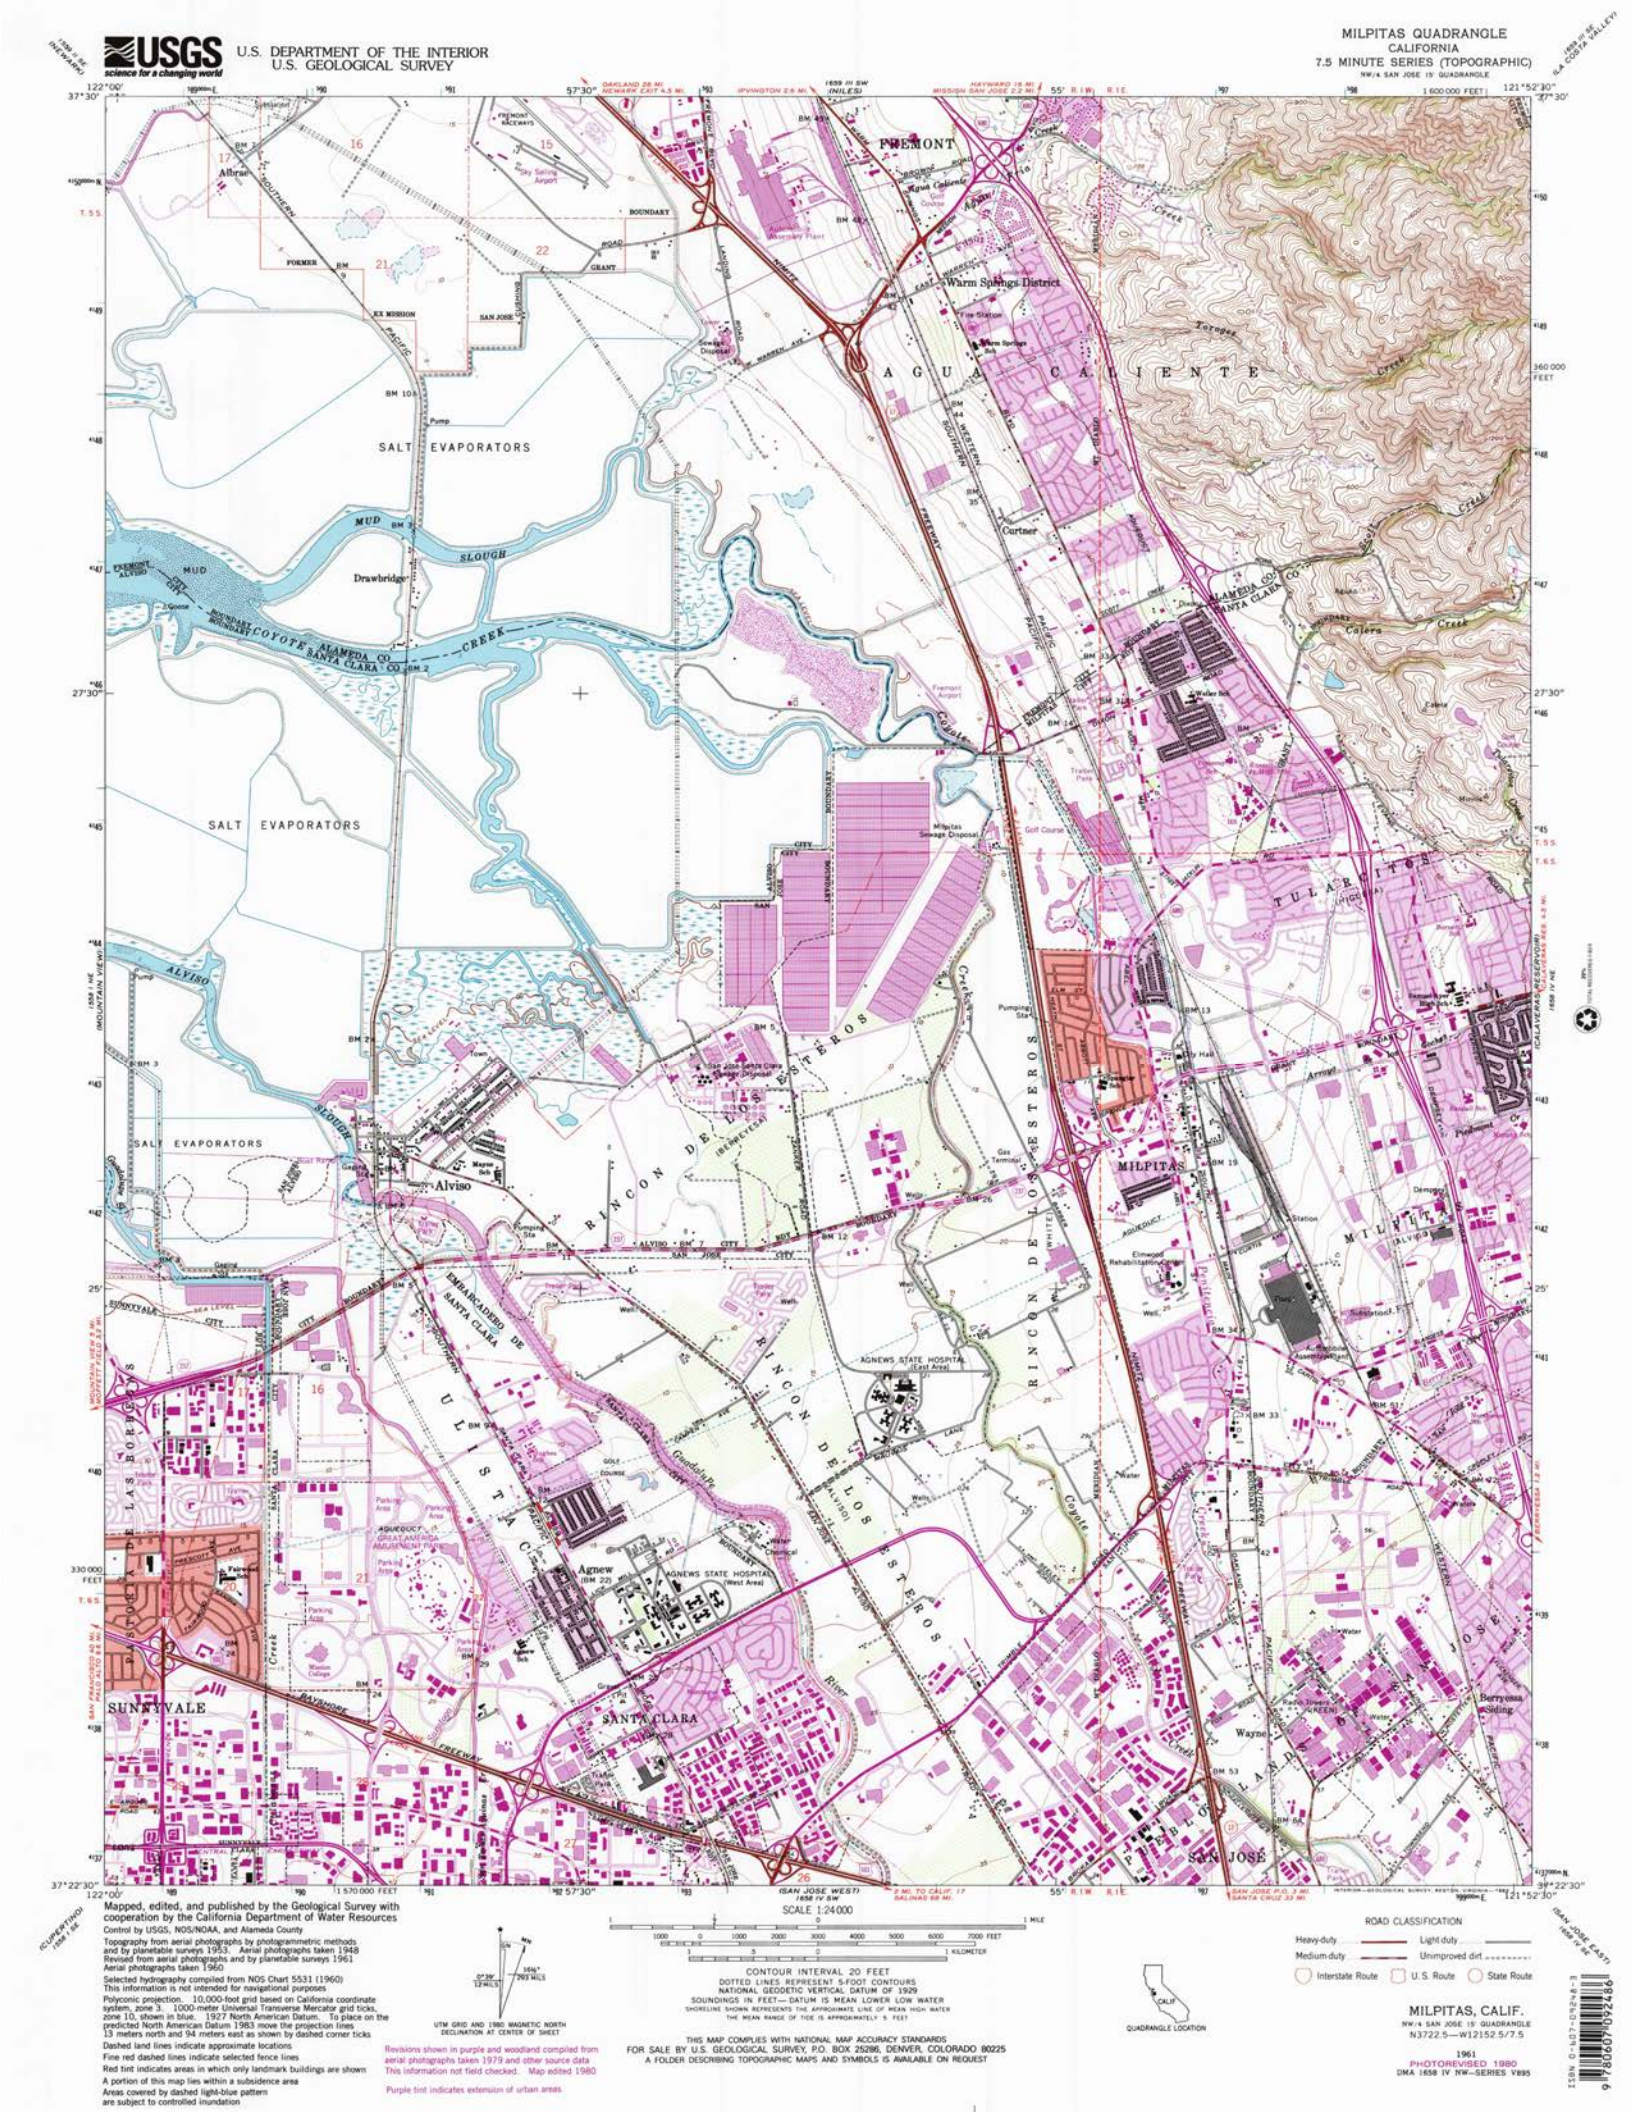
Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

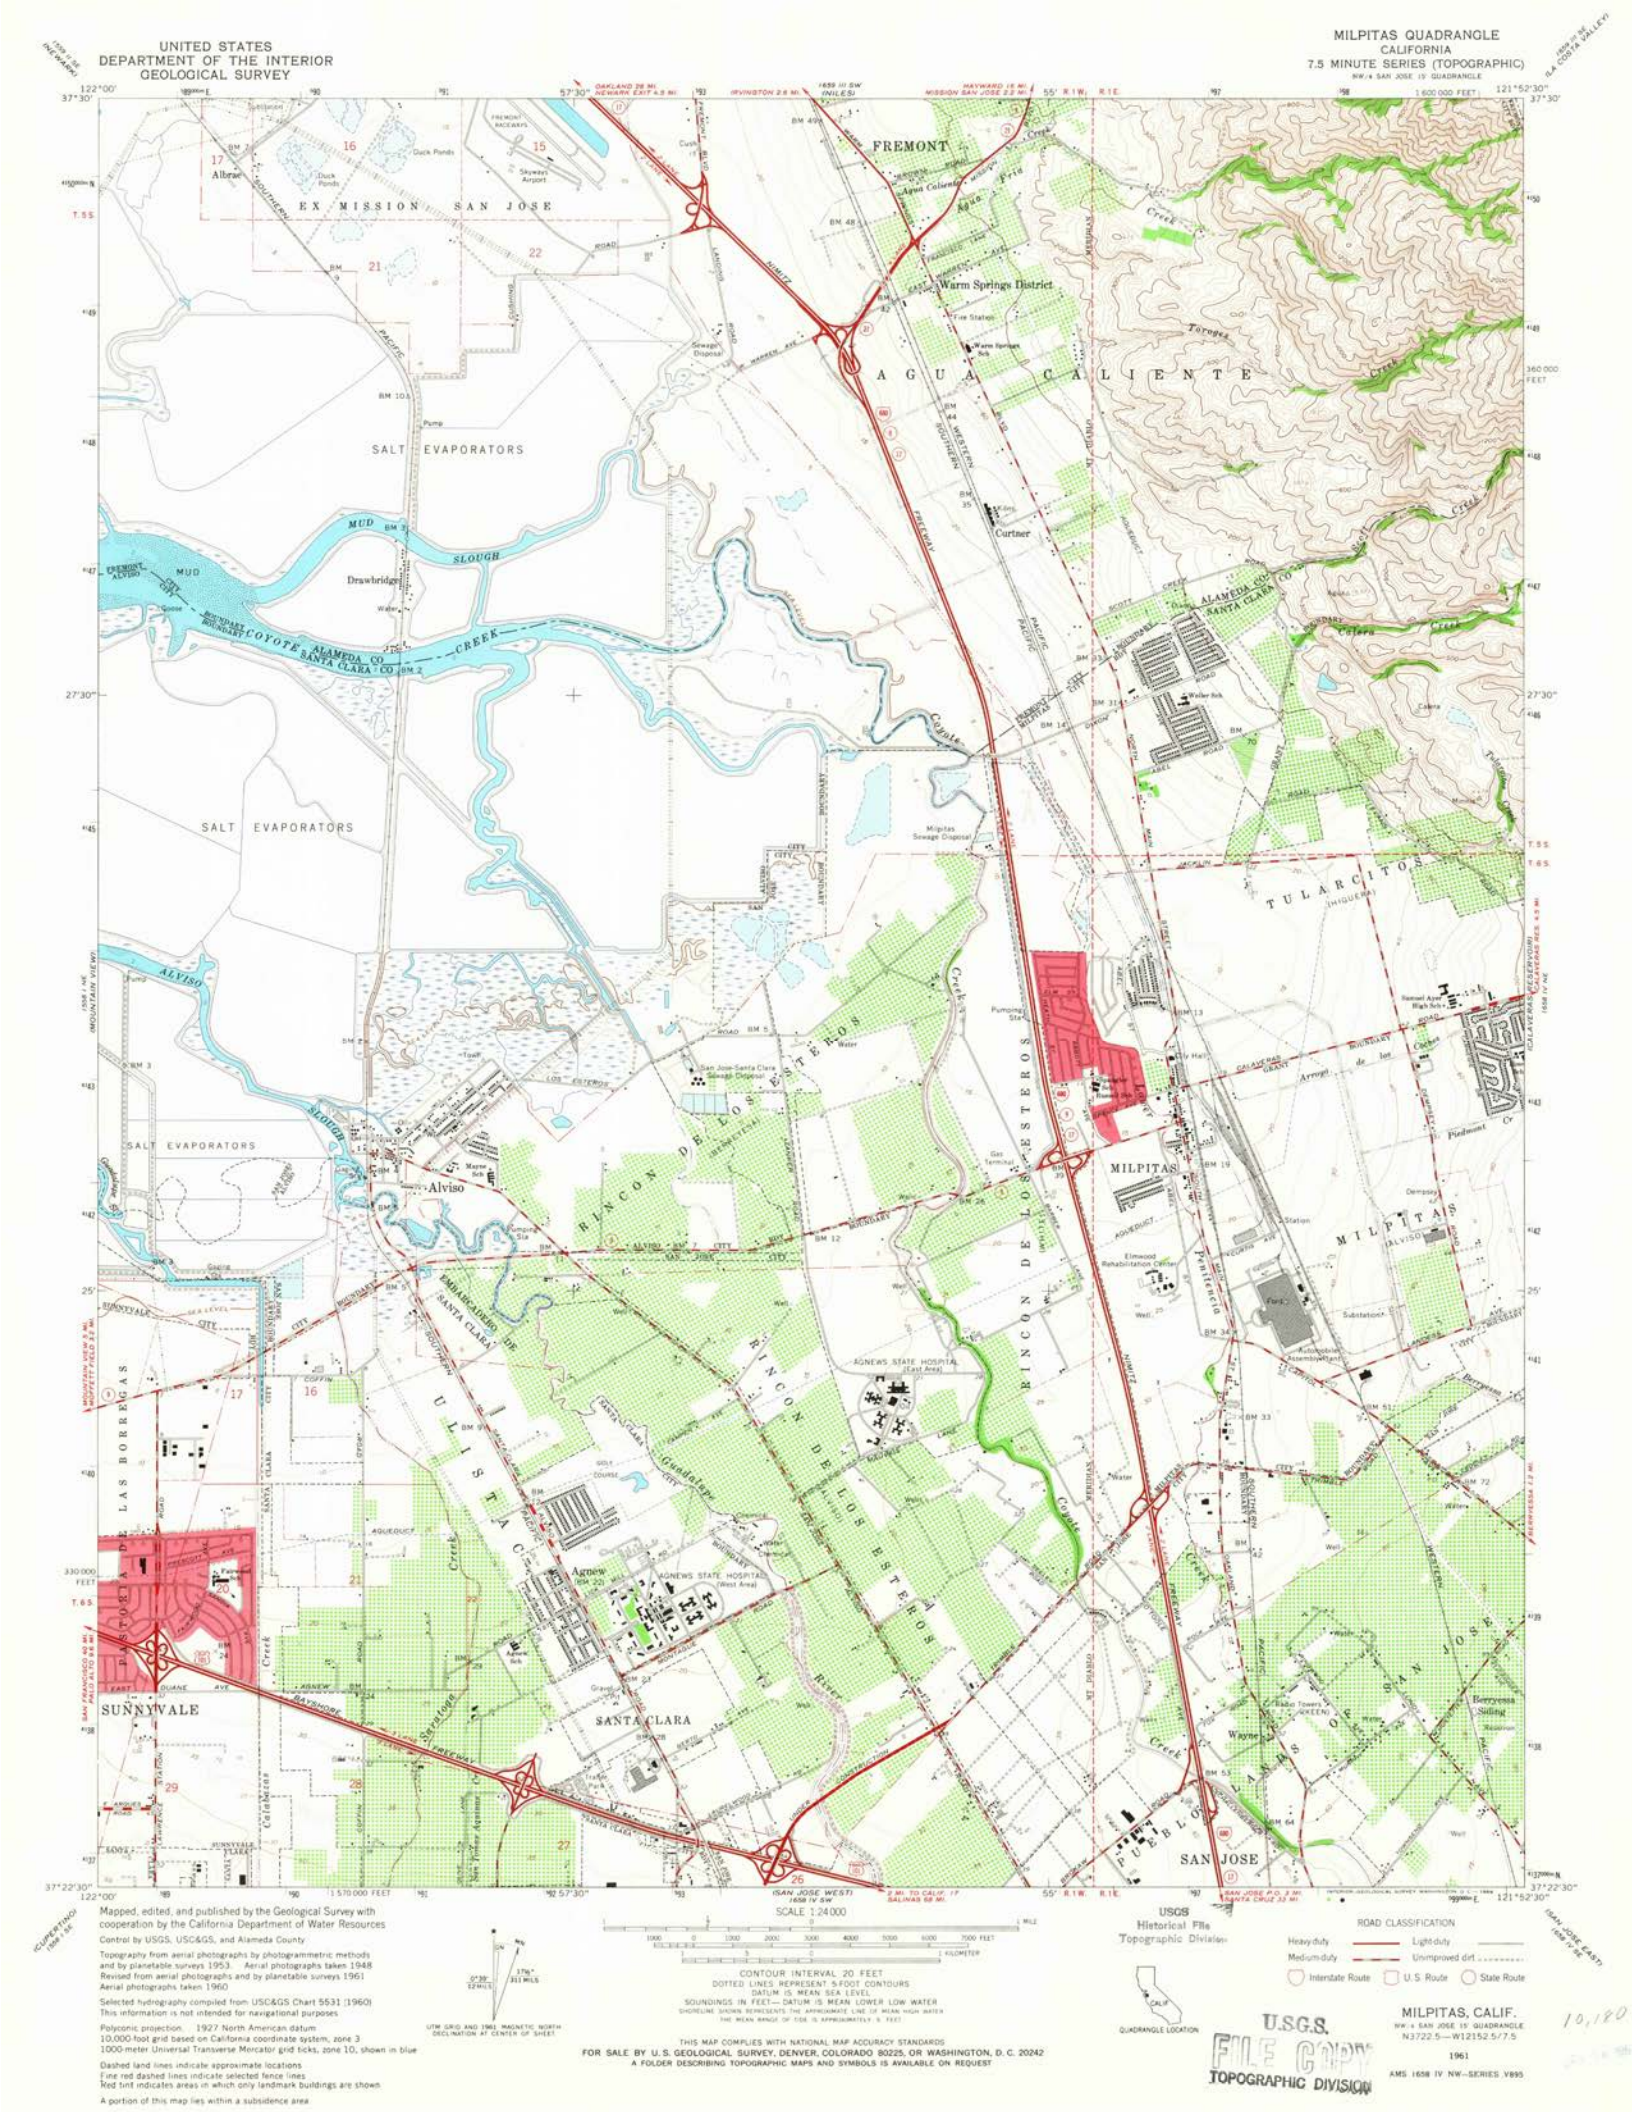
'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.



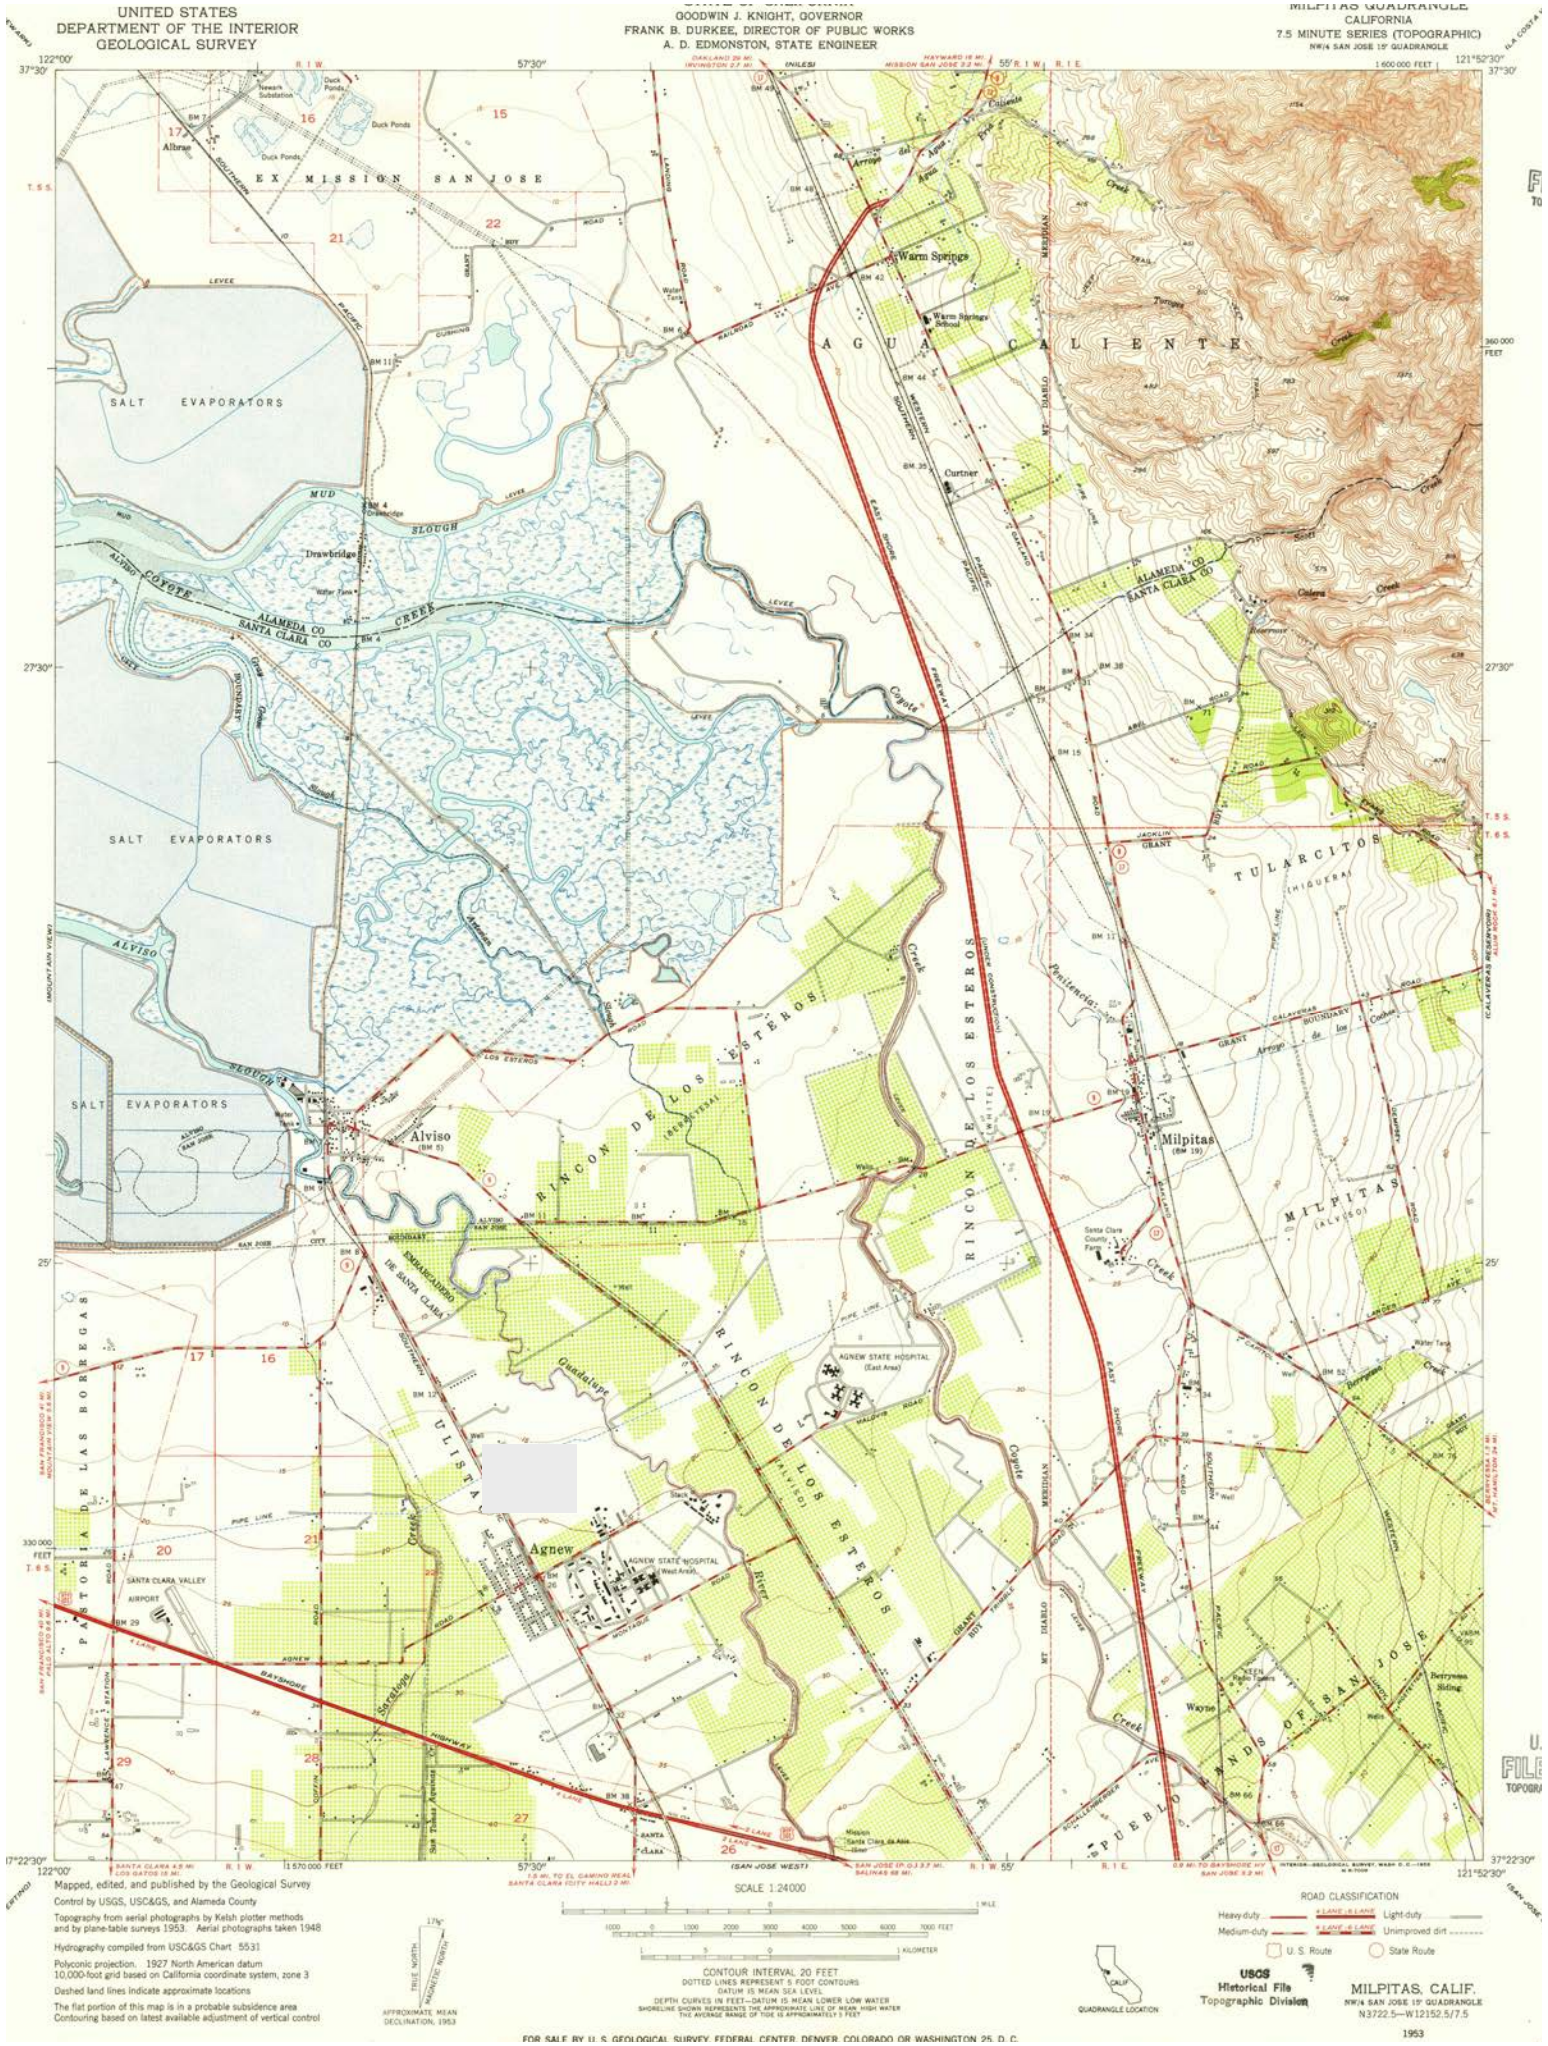
'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.



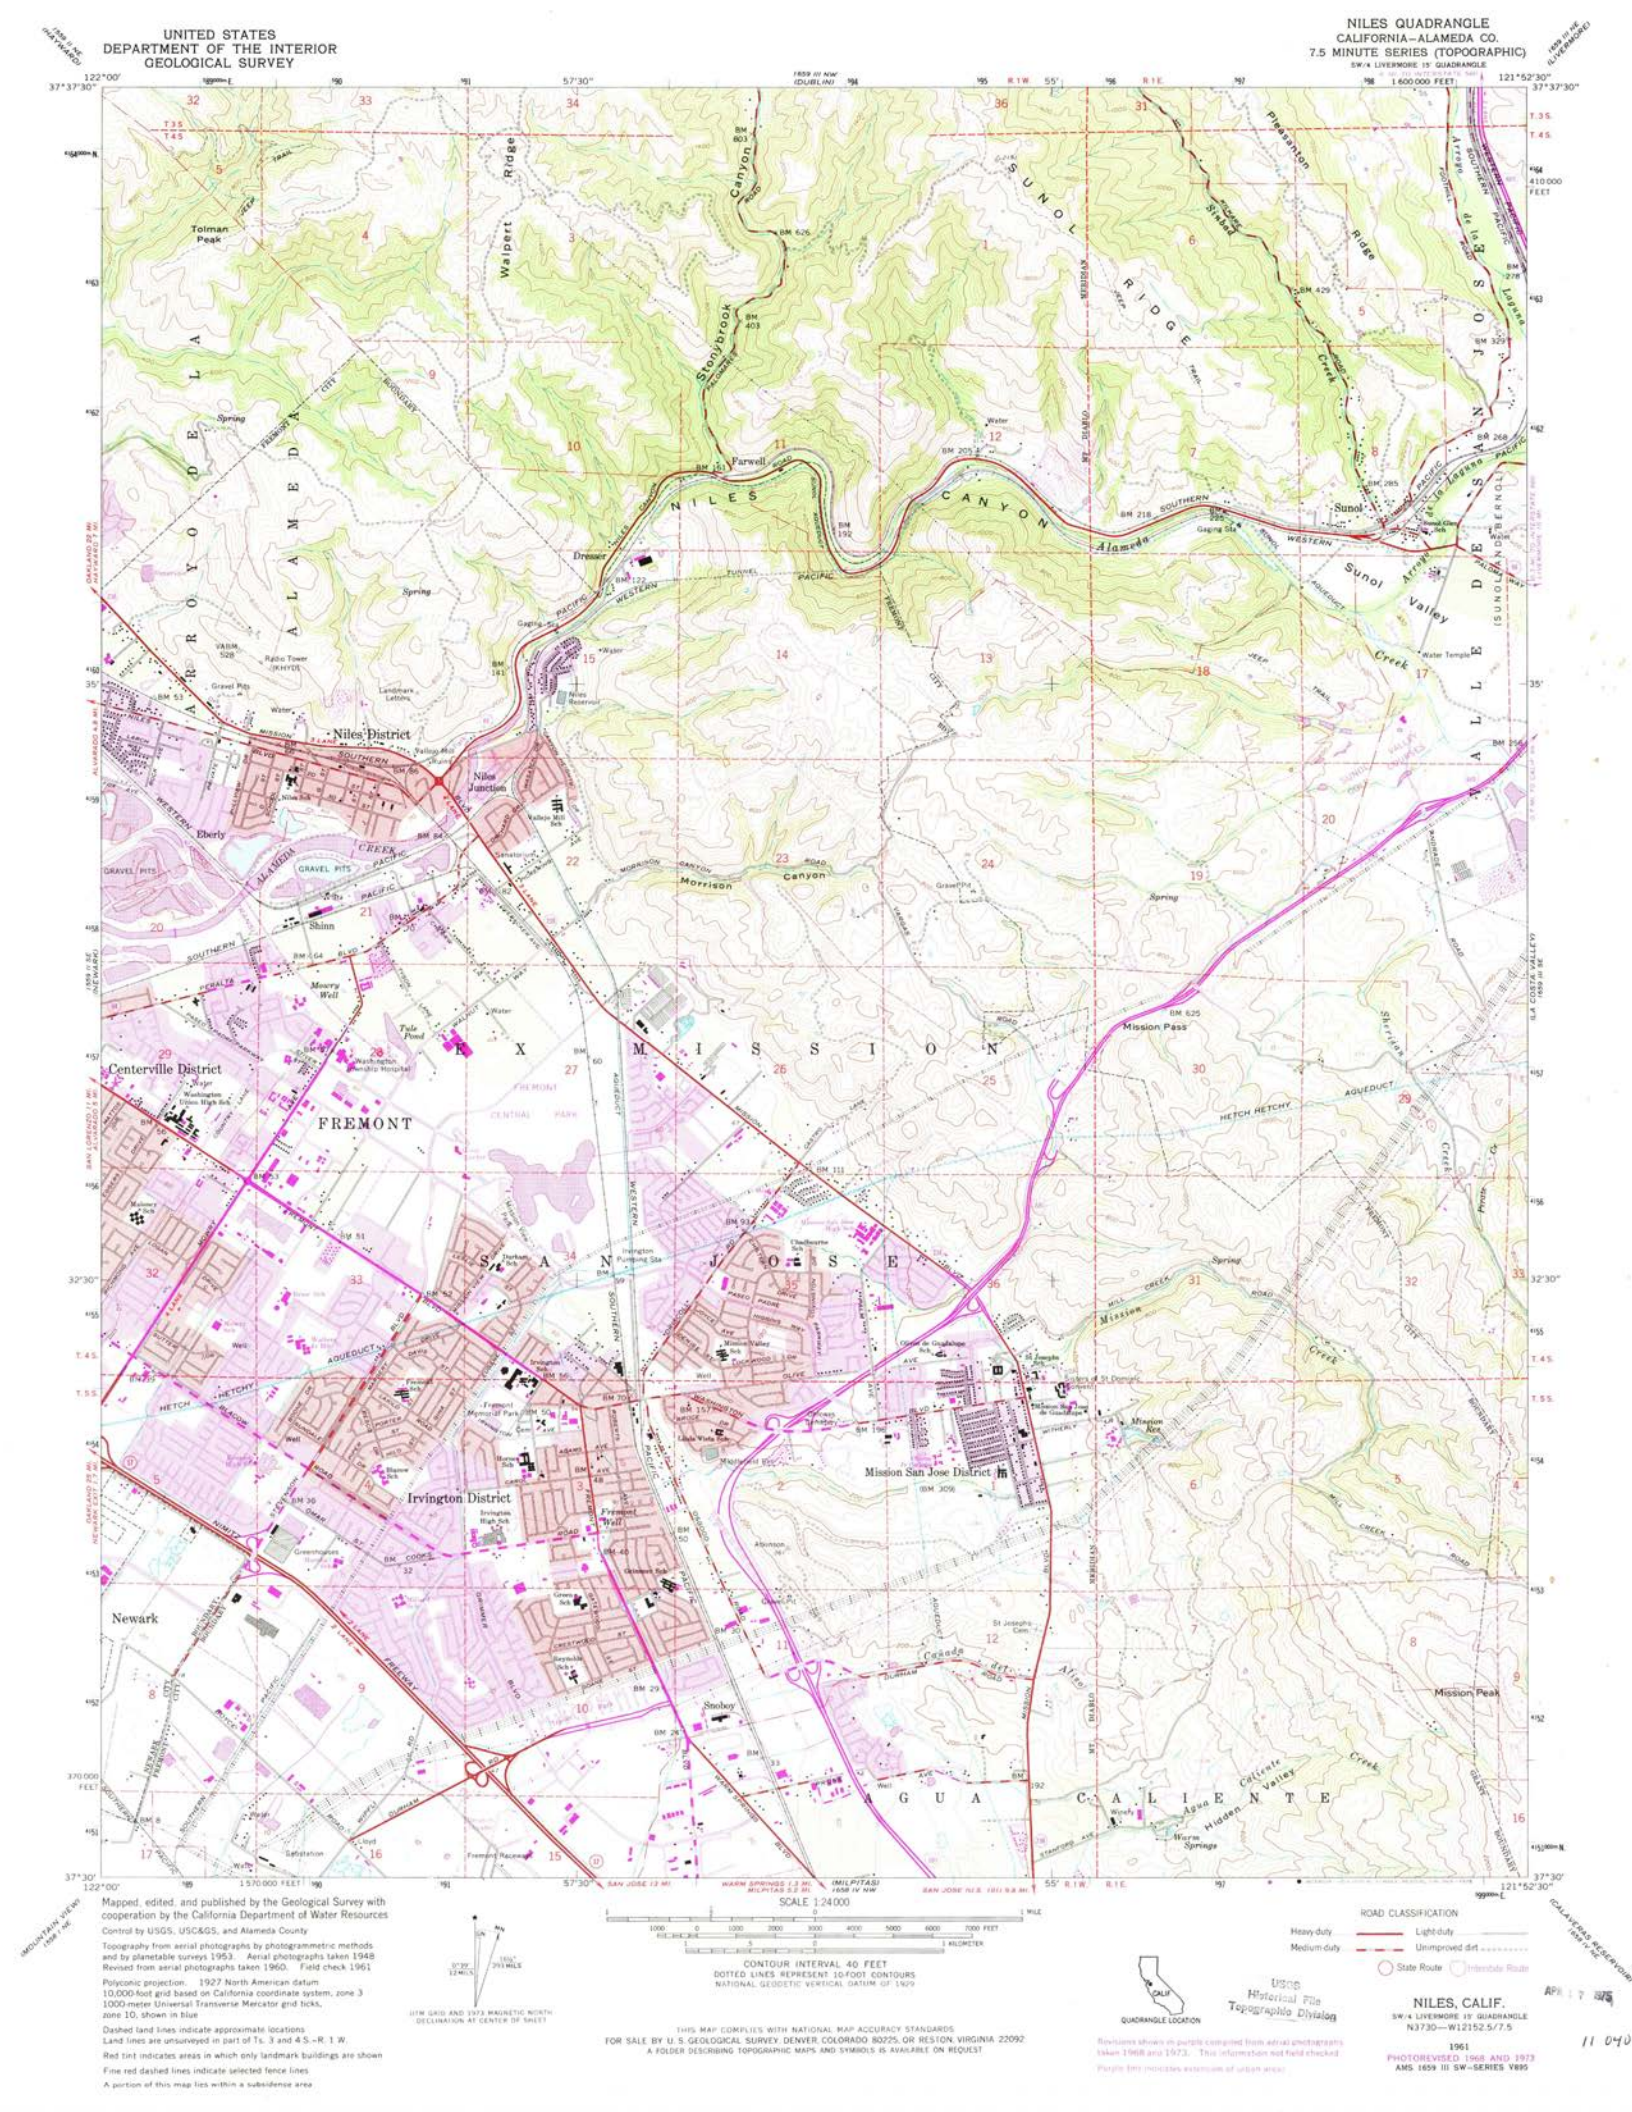
'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.



Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.



The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'



Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
