Re: CPUC Review of Proponent's Environmental Assessment for LS Power Grid California, LLC's (LSPGC's) Power Santa Clara Valley Project (Application 24-04-017)

Dear Mr. Joseph:

The California Public Utilities Commission (CPUC) Energy Division CEQA Unit has conducted a review of LSPGC's Response to Deficiency Report and additional information provided for the Proponent's Environmental Assessment (PEA) for the Power Santa Clara Valley Project (Project) relative to the CPUC's Guidelines for Energy Project Applications Requiring CEQA compliance: Pre-filing and Proponents Environmental Assessments (November 2019) and the Commission's Information and Criteria List. The Energy Division finds that the PEA contains sufficient information to satisfy the requirements of the Commission's Information and Criteria List and deems the application complete.

The Energy Division will now begin the preparation of an Environmental Impact Report for the Project. Please note that the Energy Division may request additional data, as necessary, to prepare a complete and adequate analysis of the potential environmental effects of the Project in accordance with the requirements of CEQA.

Please do not hesitate to call me at (916) 594-4699 if you have any questions.

Sincerely,

Tharon Wright

Tharon Wright
Project Manager for the Power Santa Clara Valley Project
Energy Division
